

Über dieses Buch

Dies ist ein digitales Exemplar eines Buches, das seit Generationen in den Regalen der Bibliotheken aufbewahrt wurde, bevor es von Google im Rahmen eines Projekts, mit dem die Bücher dieser Welt online verfügbar gemacht werden sollen, sorgfältig gescannt wurde.

Das Buch hat das Urheberrecht überdauert und kann nun öffentlich zugänglich gemacht werden. Ein öffentlich zugängliches Buch ist ein Buch, das niemals Urheberrechten unterlag oder bei dem die Schutzfrist des Urheberrechts abgelaufen ist. Ob ein Buch öffentlich zugänglich ist, kann von Land zu Land unterschiedlich sein. Öffentlich zugängliche Bücher sind unser Tor zur Vergangenheit und stellen ein geschichtliches, kulturelles und wissenschaftliches Vermögen dar, das häufig nur schwierig zu entdecken ist.

Gebrauchsspuren, Anmerkungen und andere Randbemerkungen, die im Originalband enthalten sind, finden sich auch in dieser Datei – eine Erinnerung an die lange Reise, die das Buch vom Verleger zu einer Bibliothek und weiter zu Ihnen hinter sich gebracht hat.

Nutzungsrichtlinien

Google ist stolz, mit Bibliotheken in partnerschaftlicher Zusammenarbeit öffentlich zugängliches Material zu digitalisieren und einer breiten Masse zugänglich zu machen. Öffentlich zugängliche Bücher gehören der Öffentlichkeit, und wir sind nur ihre Hüter. Nichtsdestotrotz ist diese Arbeit kostspielig. Um diese Ressource weiterhin zur Verfügung stellen zu können, haben wir Schritte unternommen, um den Missbrauch durch kommerzielle Parteien zu verhindern. Dazu gehören technische Einschränkungen für automatisierte Abfragen.

Wir bitten Sie um Einhaltung folgender Richtlinien:

- + *Nutzung der Dateien zu nichtkommerziellen Zwecken* Wir haben Google Buchsuche für Endanwender konzipiert und möchten, dass Sie diese Dateien nur für persönliche, nichtkommerzielle Zwecke verwenden.
- + *Keine automatisierten Abfragen* Senden Sie keine automatisierten Abfragen irgendwelcher Art an das Google-System. Overlay Processes—Old and New.

By WILLIAM GAMBLE, F.R.P.S., F.O.S.

Ever since half-tone blocks began to be used there has been a demand for some process of mechanical overlaying, and many attempts have been made to supply this need. For one reason or another, the processes have not proved entirely successful, for it cannot be said that at the present day there is any single process that stands out conspicuously as being the one and only process which is regularly used and which everybody regards as the right one.

Some Early Overlays.

The first overlay process we remember was one devised by the firm of Husnik and Hausler, of Prague, who, some twenty-five years ago, did a good deal of business in England in supplying process blocks, and particularly three-colour blocks which at that time were not being made in this country, or were just beginning to be made. An overlay was always supplied with each block; it consisted of a gelatine relief on paper, the tones of the picture being rendered by varying thicknesses of gelatine. The results obtained by using these overlays were reckoned very good. Apparently the overlays were made by printing a paper coated thickly with bichromatised gelatine under the negatives used for making the blocks, and then washing out the unaltered gelatine so as to secure the desired relief. It was a modification of the same firm's process of "Leimtype" (literally glue-type) which was used largely in America under the name of the "wash-out" gelatine process. The plates were actually made in hardened glue and the result electrotyped to form the durable printing surface.

Many years afterwards the process was revived in a modified form under the name of the De Vinne Overlay process, which was run over here by an American named Pfizenmeyer. The modification consisted in taking a plaster cast from the gelatine relief, and from this mould obtaining a relief in gutta-percha. This gave a hard but sufficiently elastic relief, and if duplicates were required it was easy to get them from the same mould. I have some of these gutta-percha overlays still and they seem quite good, though now rather brittle through age. Several large printing houses took up the process, but paid a large sum for the rights. The plant required was rather expensive, as it included a special drying oven, printing frame, arc

lamp, and sundry other appliances for the developing, casting, and preparing the gutta-percha reliefs. I imagine it was complicated, expensive, possibly slow, and uncertain in results. But it was claimed to be quicker and cheaper than making cut-out overlays. However, there is no firm still using the process, so far as I know.

The Arthur Cox Method.

The Arthur Cox overlay has perhaps had the most success, but is now off the market, so far as the outfits and licenses are concerned, but I believe anyone can use it who knows how, and the materials can be bought. The process consisted in taking a print from the block on thin sheet zinc with a special ink, charging the roller more fully than for taking a good proof, and whilst the ink was wet dusting it with bitumen powder. The plate was then heated sufficiently to fuse the powder into the ink. The half-tone dots were filled up in the dark parts and partly so in the half-tones, whilst the high-light dots were left isolated. The plate was already backed with varnish, so that all that was necessary was to put it into an etching bath and etch with nitric acid until the high lights were eaten away and the half-tones partly so. After cleaning off the resist and trimming the edges, the overlay was ready for use by attaching to a sheet on the cylinder in the same way as a paper overlay, and bringing a draw sheet over it. I have not heard any objections raised to this process, and I believe several printers still use it. Recently a similar process was brought out in America under the name of "the Metal Overlay," and apparently exploited successfully without giving any credit to the original inventor. When the Arthur Cox Company was in existence it used to supply overlays to customers not wishing to be troubled with making their own overlays from the blocks supplied by the firm.

This process was also used for interlays, that is to say the metal relief was put between the wood mount and the plate, but this never seemed to catch on so well as the overlay process, though I believe some newspapers use it as a means for avoiding the make-ready on rotary newspaper machines. Most of the newspapers using blocks largely have some process of interlaying, but generally it takes the form of attaching a paper

cut-out underlay to the plate and running it under the stereo matrix calender. This has an effect known as "bumping up." The shadows are thrown into relief, whilst the high lights and half-tones are lowered.

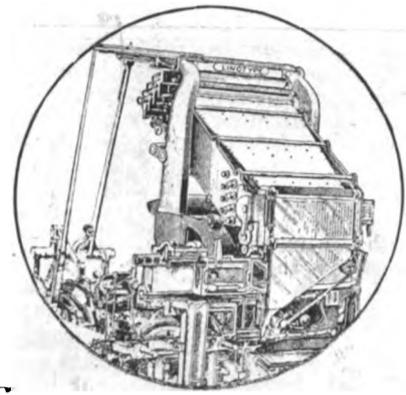

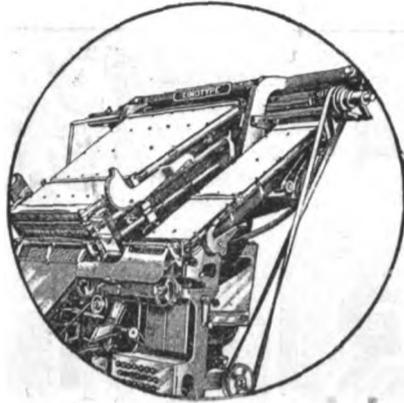

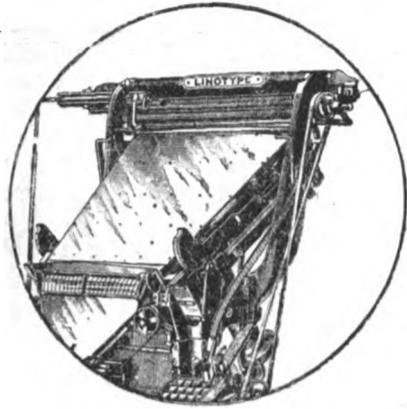

An illustrated paper tried the idea of transferring an ink print to the back of the zinc plate in exact register with the picture on the front, and etching this strongly in the same way as the Cox Overlay, but I do not think the process is now used.

Some German Processes.

An overlay process originating from Germany before the war consisted of taking a proof from the block with a special varnish ink on stout glazed paper, dusting this proof with some fusible powder (possibly bitumen, resin or shellac) and subjecting the proof to strong heat by baking on a hot plate so as to melt the powder into the ink. This had the effect of producing a strong relief which looked like making a very good overlay. I have the samples in my possession forming the overlays for a set of colour blocks, but it seems to me that the process would not be so good for colour work, as the ink would shrink the paper. Some similar process has, I think, been exploited in America in recent years and may be running now.

Another process of Teutonic origin, in the before-the-war period, was that of Lankes and Schwartzler, called the Chalk overlay. In this case a splendid chalk surfaced board was supplied, and proofs from the blocks were taken with a special ink. The board with the impression on it was put into a dish with a special etching solution which I believe had chlorine as its active ingredient. This etched away the chalk surface of the board except where the ink formed a resist. After being washed and dried the overlay was ready for use. The method seemed to be popular at one time, and it may still be used, as I understand the materials can still be purchased.

Recently I was shown a method of preparing an overlay on a heavily coated board, looking like a piece of stereo flong. The idea was to pull a proof on it and then scrape away the chalk surface, more or less according to the light and shade required. Apparently the inventor has not yet found the capitalist who was expected to give him

WHY MORE THAN ONE LINOTYPE MODEL IS MADE

The Linotype is built in various models for the convenience of printers. The models are arranged in two classes: (1) Linotypes with Single Distributors; (2) Linotypes with Multiple Distributors.

Standard Linotypes with Single Distributors are suitable for book printers and others requiring the usual range of roman and italic in various bodies.

Multiple-Distributor Linotypes enable users to set, in addition to the work detailed above, a variety of type faces (roman, italic, display faces, and special characters) in one line, for catalogue work, encyclopedias, etc.

A model is also supplied for the composition of large display lines for headings, general commercial work, etc. Another model is equipped for the continuous composition of text matter up to 14 point and display matter up to extended 36 point.

As a result of this arrangement of models, no printer need purchase a Linotype with a larger equipment than he actually needs. At the same time the system of construction enables the Linotype user to add to his plant when he needs further equipment, without sacrificing any part of that already installed.

To-day any printer can install a Linotype to set fully 95% of his composition, or he can install a Linotype to set any particular portion of the work he wishes to handle that way. In either case he invests his money in the machine best suited to his requirements; he is not saddled with equipment for which he has no active use, and therefore does not lock up his capital in unproductive plant.

The flexibility of the Linotype system of typography enables every letterpress printer to have at least one Linotype

several thousands for it, as the process has not appeared on the market.

The Marzio Overlay.

Since the war there has been a lull in new overlay processes, but lately there came under my notice a process from Italy, known as the Marzio Mechanical Overlay, which seems to combine the good points of several of the older processes with some new ones.

In this method a proof is taken with a special ink on a transparent glazed paper. Before the ink can dry it is dusted with a special powder and afterwards with another

powder which has the effect of building up the relief. The powder comes off where there is no ink, and may be removed from any of the printed parts if desired by the application of a stiff brush. After the powdering is complete, another sheet is attached to the overlay by means of a special solution, apparently with the object of protecting the relief surface from damage. To obtain increased relief a set-off may be made on the back of the sheet at the same time that the print is made on the surface, both sides being dusted with powder and protected by covering sheets. A very durable overlay is thus ob-

tained, and, being transparent, it is easy to register it on the cylinder or platen. When looked at by transparency, the overlay has the effect of a beautiful photographic positive. The results I have seen obtained by this process are excellent, and I should think it is a method that will appeal to printers of half-tone blocks.

Such are a few of the overlay processes, old and new, that come to my mind. There may be others which I have forgotten, and there may be opportunity yet for the ideal process.

Looking Backwards.

SOME FEATURES OF THE PAST YEAR.

At the beginning of a new year, while looking forward hopefully to the future, one is apt to cast a glance behind and call to remembrance the incidents of the twelve months that have passed away. The poet advises us to "let the dead past bury its dead," but this injunction should not prevent us from looking over our shoulder and taking a backward glance at the things we have put behind us; we may gather instruction and profit, sometimes, by musing on them and letting our past experiences help our future procedure. The year that has just finished has been a somewhat trying one for the Allied trades. Both employers and employed have suffered; few master printers have complained of too much work coming their way, and among the workers unemployment has been rife.

Wages Movements.

The Wages Question in the printing trade was a feature of the year that caused a considerable amount of discussion. In May the Federation Council proposed a reduction of 15s. per week on the wages of male workers and 5s. 6d. on those of females; later the proposed reduction was modified to 10s. and 3s. 6d., and a long series of meetings and conferences of both employers and employed took place, the result finally being that a reduction of 5s. per week took effect on the first pay-day in October, a further reduction of 2s. 6d. to take effect in January, 1922, with a corresponding reduction in the wages of females, learners and piece workers. At one time during negotiations feeling ran rather high on both sides, and a cessation of work seemed almost inevitable, but fortunately the matter was amicably settled without the arbitration of a strike or lock-out.

"We've got no work to do" has unfortunately been the cry of many thousands in the allied trades, and it is many years since the various societies had so many members signing the unemployed books. At the offices of the London Society of Compositors, in Poppins Court, and at the premises of the Machine Managers and at that of the Operative Printers' Assistants, in Blackfriars Road, there could every forenoon be seen large groups of unemployed men waiting about on the chance of a job turning up. This state of affairs is much to be regretted, and it is to be hoped that such an improvement in trade will shortly set in as will enable most of those at present out of work to find steady employment.

The Printing Exhibition.

The sixth International Printing Exhibition, and the first held since the outbreak of war in 1914, was an outstanding feature of the printers' year, and brought together a collection of machinery that for size and interest had not been surpassed at any previous show of the kind. While nothing startlingly new or revolutionary was on view, the improvement in machines that had been effected since the previous exhibition was very noticeable, as was also the forward movement in lithographic practice, most of the

litho appliances being of the rotary offset style, this method having, apparently, quite ousted the flat-bed machine. An entirely new appliance, from the other side, was the "Ludlow Typograph," an invention that does for the display compositor what the Linotype does for the man on "solid dig," and enables him to turn out display lines cast solid, with no chance of pie and no distribution to do. This invention was fully described and illustrated in our issue of December 8th last. The growing popularity and importance of photogravure was demonstrated by the number of machines that were on view, and the excellence of the quality of the work they turned out. For illustrative purposes photogravure is coming well to the front, and deservedly so, as it is a beautiful and artistic method of reproduction, and all methods and appliances that simplify the process will be welcomed by the printer. Automatic feeders as applied to cylinder and platen presses were also shown, the latter in a considerable variety, thus demonstrating that the self-feeding platen, which a few years ago was looked on as almost an impossibility—unless in the form of an expensive and specially constructed machine—is now an accomplished fact. During the run of the Exhibition a two-day's World's Printing Trade Congress was held, at which Mr. E. W. Humphries, the president of the Federation of Master Printers, presided, and at which many subjects of importance to printers came up for discussion or elucidation. Among the papers read at this Congress was one on the "Standardisation of Paper," which is one of the things desired by the printer at the present day. The present methods of handling and dealing in paper are full of anomalies. They are the growth of the customs of past generations, and the multiplicity of sizes, names and weights give great trouble to all who make a living by the handling of paper. If the sizes and weights could be systematised, and reduced in number, much time and worry would be saved and the cost of printing reduced. Not only the sizes and weights need standardising, but also the number of sheets to the ream, as at the present time a ream of paper may be 480, 504, 516, 520, or any other arbitrary number of sheets according to the fancy of the particular paper-maker who produces it. A considerable amount of attention to this matter of standardisation has been given by master printers during the year, and Mr. W. Howard Hazell has gone to considerable trouble in his efforts to get a standardisation scheme adopted.

The Postage Trouble.

Another feature of the year was the action of the Postmaster-General, when, in June, he increased the postal charges to such an extent and in such a way as to seriously handicap the business of the printer and wholesale stationer. The increase of the post-card rate from 1d. to 1½d. has hit the post-card printer and the retailer very heavily, and led to a reduction amounting to somewhat like 50 per cent. in the sale of these productions. The raising of the printed paper minimum from

½d. to 1d. has dealt a further blow at the printer, as not only has it prevented the ordering of much circular and other printed matter, but it has been the means of sending actual printing orders abroad to Continental countries from which they have been posted to England at a very much reduced rate of postage. Many deputations have waited on the Postmaster-General to urge on him a reduction in the present rates, and although no definite promise has been given, printers have not lost heart, and are continuing by letters in the Press, and by other suitable means to urge an early reform in what is generally agreed to be a mistaken postal policy.

Surplus Plant.

A considerable amount of surplus machines and appliances for the printing and kindred trades has come under the auctioneers' hammer during the past twelve months. Many private plants were disposed of, and there were several extensive sales of plant used by H.M. Stationery Office, both in this country and on the Continent during the war. The result of such a lot of machines being put on the market in a year when printers were suffering from the prevailing trade depression, and not in a position to purchase additional plant, has been a considerable drop in prices, and appliances that in times of prosperity would have brought good prices have been disposed of for very small amounts. The result, of course, was that those printers who were in a position to purchase have secured some remarkable bargains. What the effect of such large numbers of machines being offered at second-hand prices has had on the printers' engineers' business we are not in a position to know, but it must certainly have had an adverse influence on the purchase of new appliances.

Learning from America.

During the summer a party of London master printers paid a visit to the United States. Mr. George Eaton Hart, Mr. C. H. Lea and Mr. E. W. Carter went there with a view to visiting some of the progressive printing offices of the States and comparing their equipments and methods with those in vogue in this country. The party was very courteously received by American printers, and were given every facility to make a thorough investigation of the plants and methods of the various printing works visited by them. Their tour took them to New York, Philadelphia, Boston, Washington, Chicago, Buffalo and Rochester, and in the course of their travels they were able to get a good insight into the American ways of doing things. In respect to premises and mechanical equipment they found their American brethren ahead of us; new plant and new machinery of the most up-to-date character is continually replacing old and worn material, and with this better equipment they are able to turn out work quicker and more profitably than in this country. Masters and men were not so well organised as in England, and in the event of trade disputes occurring there was not the same organised methods of deal-

ing with each other. In the matter of technical education we in this country can still hold our own, and have nothing to fear from comparison. In this connection it is satisfactory to hear that the scheme for the long-promised Central School of Printing in London is likely to materialise, the Education Committee of the London County Council having decided to recommend the Council to approve in principle the establishment of a central printing school in South London in which the various scattered classes could be accommodated, and the St. Bride Foundation School be transferred. The latter School has been a great success, and with its 1,500 students deserves more and better accommodation than it has at present. Mr. J. R. Riddell, the principal of the School, is constantly furthering the good work of training the young printer.

Amalgamations.

In glancing backward over the year's doings

one is struck by the number of amalgamations that have taken place between firms engaged in the allied trades, and important developments may arise from the combinations that have taken place. Messrs. Thomas De La Rue and Co., Ltd., Messrs. Charles Goodall & Sons, Ltd., and Messrs. J. A. Weir, Ltd., have combined forces, and now form a powerful combination. Messrs. Blades, East & Blades and Messrs. W. Sprague & Co., have fused their interests, and, although trading under their former titles, will be able to place greater resources at the disposal of their connections. Messrs. Lowe & Brydone, Ltd., and Messrs. C. G. Roder have also consolidated their interests, and so have many other firms in the trade, which, space being limited, we do not mention here. An important amalgamation has also taken place in the Otley printing machine trade, the three leading wharfedale firms of Messrs. Dawson & Sons, Messrs. Payne & Sons, and Messrs. Elliott and Co. having united their forces, and they

now trade under the style of Dawson, Payne and Elliott, Ltd. This consolidation of interests has led to an amalgamation of the London agencies for these firms, and Messrs. W. H. Lockett & Co. and the London branch of Messrs. Payne & Sons have united forces, and will deal with the London business of the Otley firms, and also handle the special machines manufactured by Messrs. Waite and Saville, David Carlaw and Sons, and Waite and Sheard.

The year 1921 cannot be said to have been a good one for printers. That its successor, 1922, will bring a larger measure of prosperity is devoutly to be hoped. Forgetting the worries and disadvantages of the past twelve months, let us throw away our pessimism and become optimists, looking forward and hoping for a period of greater prosperity, and doing our best throughout the ensuing twelve months to further the interests of the trade that provides us with our bread and butter—and, sometimes, jam.

P. M. SHANKS & SONS, LTD. GENERAL LETTERFOUNDERS

ISH to call the particular attention of all Printers and Publishers to the fact that their extensive selection of specially designed Modern and Old Style faces is now cast on the generally accepted British-American Point System, That they have recently designed a number of beautiful faces for Magazine, Art Booklet and Catalogue work,
 ¶ That they are constantly adding to their already numerous series of thick, thin, wide and condensed faces of Sans-serif, Gothic, and Doric,
 ¶ That the maintenance of their established reputation for Hard Metal and accuracy of workmanship receives their constant attention,
 ¶ And that the large stocks kept enable them to fill all orders promptly on receipt.

Trade Notes.

SLIGHT damage was done by a fire which occurred on Friday at the premises of the National Printing Ink Co., Ltd., 72, Turnmill-street, E.C.1.

The *Adelphi Magazine*, to be finely printed at the Morland Press, Ltd., will appear quarterly. The subscription has been fixed at 10s. 6d. per annum, post free, and the first number will appear in January.

AN interesting series of lectures on industrial subjects has been arranged by the Industrial League and Council, to be given each Wednesday evening during January, February and March at Caxton Hall.

COVENTRY master printers have gained a point for which they have striven by the Corporation agreeing to put their Council minutes up for tendering and to divide the remainder of the printing requirements amongst the members of the trade in the city.

ANOTHER number of the *Gadget*—by Bob Leathart on behalf of the Printers' Medical Aid—is out. It is "No. 0002," and the price "uncontrolled." There is a good deal of truth in its slogan: "One touch of Leathart makes the whole trade grin."

"DAILY MIRROR" ELECTION POSTERS.—Further appeals were made by the *Daily Mirror* Newspapers, Limited, at Hertford Quarter Sessions, on Monday, against 20 convictions by the Hertford Bench on summonses for printing and publishing posters having reference to the election in East Herts last June (when Rear-Admiral Sueter was returned) without the consent of the candidate or his agent, and not bearing imprints. The appeals were dismissed.

GLASGOW DISTRICT OF NEWSPAPER PRESS FUND.—The annual meeting of the Glasgow and West of Scotland members of the Newspaper Press Fund was held on Friday in the Religious Institution Rooms. Mr. A. S. Charteris, the chairman, presided. It was stated in the committee's report that the membership of the district was now 226, which was a slight increase on the year. The committee dealt with 15 applications, and the amount given, including a pension, was £521.

BAXTER PRINT PRICES.—Messrs. Puttick and Simpson sold the first portion of the Wilson Browne collection of Baxter colour prints on the 21st ult., when high, and in several cases record prices, were given. "Butterflies" brought £54 12s.; "The Large Queen," £50; "Edmund Burke," with lettered mount and gold bordered, £64; the rare May Queen set, with Attention and Contemplation, uncut sheet, £20. Among the Le Blond prints, a complete set of the ovals, fine impressions, in an album, made £72 9s.

MEETINGS OF F.M.P. AND J.I.C.—Much importance will attach to meetings of the council of the Federation of Master Printers and the Joint Industrial Council to be held on the 10th and 11th respectively. On Tuesday the Federation council will receive a report of their labour committee's deliberations on the subject of the wages position and certain definite decisions will have to be taken; the proposals from the railway companies regarding classification have been received, and will be considered; further action in connection with the postal rates will be discussed; and interesting developments of the costing campaign will be considered. On Wednesday the J.I.C. will receive a further report of the apprenticeship committee, and the unemployment committee, having circulated a draft scheme for supplementary insurance, will ask for the opinions both of the federated unions and of the employers.

FOR the third annual dinner of *The Times* day publishing staff, which takes place next Saturday at the Abercorn Rooms, Liverpool-street Station, the following artists, amongst others, are billed:—Miss Phyllis Norman Parker, A.R.A.M., Miss Olive Tyson, Miss Elsa Ford, and Messrs. Ben Davies, Fred Curtis, George Rapley and Master Oswald B. May, of H.M. Chapel Royal, Savoy

MR. T. KENDALL, a well-known figure in the printing trade at Coventry, passed away on Tuesday. Deceased, who was 69 years of age, had been in the employ of Messrs. Curtis and Beamish for half a century.

THE Council of the Royal Horticultural Society has become responsible for continuing the publication of Curtis's *Botanical Magazine*.

ONE of the best known of Fleet-street advertising men, Mr. Arthur Bettany, died in London on Christmas Day. Mr. Bettany represented the *Western Morning News* for many years.

MR. W. H. JOWETT, who died at New Brighton last week, aged 84 years, founded the *Wallasey Chronicle*, of which he became the first editor. He retired when in his 70th year.

THE death is announced of Mr. Charles R-Cheshire, for many years connected with the advertising department of the *Journal of Commerce*. At one time he was connected with the *Liverpool Review*. Later he was advertising manager of the *Porcupine*.

PRINTING OFFICE RAIDED.—Men said to be members of the Irish Republican Army, but describing themselves as members of the R.I.C. (says a Cork message), raided a printing office at Cork last week, and seized all copies of a pamphlet entitled "The Case for the Treaty," by Professor Alfred O'Rahilly, of the National University, a prominent Sinn Feiner. The raiders also dispersed the type.

LADY STRATHCONA has given a donation of £1,000 to the Arthur Pearson Memorial Fund.

AFTER dancing with his hostess at a Christmas party at Upton Park last week, James Smith, a printer's machine minder, of East Ham, sat down and lost consciousness. He died before medical aid could be rendered. Smith, who was 57 years old, was suffering from heart disease.

THE death is announced, at the age of 69 years, of Mr. William Gibson Croal, for 39 years a member of the London staff of the *Scotsman*.

WALES has lost one of its best known publishers by the death of Mr. Gwenlyn Evans, printer of the *Geninen*. Mr. Evans was a veteran supporter of the Bible Society, and was recently presented by the society with a very fine Bible in recognition of thirty years of valuable services.

THE Industrial Welfare Society has decided to extend the scope of its monthly journal. As the *Journal of Industrial Welfare*, this publication has achieved considerable success among the many firms who have welfare schemes as an integral part of their organisation, and now, with the abbreviated title of *Industrial Welfare*, a campaign is being entered upon with the object of making the practical developments of the movements more widely known. The issue of this new series marks a further stage in the rapid growth of the industrial welfare movement and is some indication of the earnest desire of a powerful body of men of every political creed to ameliorate working conditions and to secure a lasting industrial peace.

BOOKSELLERS' PROVIDENT INSTITUTION.—Mr. C. J. Longman presided at a meeting of the board of directors of the above named institution held at Stationers Hall, on Wednesday, December 21st, and was supported by Messrs. J. E. Allen, C. A. Ashley, R. E. Bartram, J. R. Blade, S. C. Boyle, J. Cooper (trustee), J. Foster (vice-president), C. H. Hollingsworth, F. J. James, W. A. Kelk, A. W. Lewis, W. Longman (treasurer), F. P. Minoggio, A. W. Nott, A. Shallis, G. W. Skinner, G. C. Sole, J. E. Stroulger, R. E. Taylor. The sum of £124 11s. 4d. was granted for the relief of members and widows of members and this amount was augmented by Christmas gifts, kindly contributed by Richard Bentley, Esq., C. J. Longman, Esq., Sir Fredk. Macmillan, and Messrs. J. Whitaker & Sons, Ltd.

MR. ALFRED GIBSON, whose death, at the age of 70, has occurred at Cheltenham, was the founder of *Law Notes*, now in its 40th year of publication.

MR. AND MRS. FRANK LLOYD have presented a fine collection of early Worcester porcelain to the British Museum. With one possible exception, this is regarded as the largest and most representative collection of its kind.

AMONG notable printed books listed in two catalogues of rare books, manuscripts, bindings, and autographs issued by Messrs. Maggs Brothers is a fine copy of "Vita Christi," by Ludolphus, black letter, 4 vols., 1495—the first book printed in the Portuguese language, and the second non-Hebrew book, issued in Portugal. Haebler, in his bibliography, says that it is one of the finest incunabula ever produced in the whole of the Iberian Peninsula.

PLANS for a general strike are being made in South Africa in support of the coalminers.

SOME meetings which promise to be of special interest are being arranged for 1922 by the Association of Master Printers of West and North-West London. On January 11th a trade union official is to debate trade unionism with a prominent representative of the non-union side. On February 8th, Mr. H. R. Danford will speak on the items of cost which enter into overhead expenses. On March 8th, Mr. C. T. Jacobi is to address the Association, and for the April meeting it is hoped that a printer outside the ranks of the L.M.P.A. will be found who will give his reasons for not being a member.

A MAJORITY of religious publications in the United States are said to be published under non-union conditions and generally to be antagonistic to the trade union movement.

THE death is announced, at the age of 81, of Mr. Henry Watterston, one of the greatest figures American journalism has produced. He was editor of the *Louisville Courier-Journal* for more than fifty years.

A NEW monthly journal, the *New Generation*—to appear early this month, replaces the *Malthusian*, a monthly journal published without a break since 1877—44 years. This Magazine was the official organ of the Malthusian League and was issued privately to members and the general public.

THE Boston Club of Printing House Craftsmen have organized a Boston Graphic Arts Exposition, incorporated under the Laws of the State of Massachusetts to be held during the week of August 28th to September 2nd, 1922, at the Mechanic Building, Boston, Mass.

CATALOGUES, ETC., FOR POLAND.—H.M. Commercial Secretary at Warsaw reports that in virtue of an order published in the *Monitor Polski* for November 29th, catalogues, price lists and circular letters of foreign firms, printed in one or more colours, bound or unbound, arriving by post or with consignments of goods, for advertising purposes, will be admitted into Poland duty free if the number does not exceed five with each consignment, and provided that they are used by the addressee only.

PRINTING INK exported from America to Sweden in 1919 amounted to \$13,857 in value, whilst the 1920 imports were valued at only \$6,200. Imports of other inks, on the contrary, show an increase, the 1920 value being \$8,783 as against \$5,874 in 1919.

A LARGE collection of the London Underground posters has been exhibited in New York and in Washington, D.C., and has achieved wide popularity. The exhibition has drawn large crowds and considerable Press comment. In regard to the latter it is interesting to note that American experts remark that the London posters are far less Teutonic in feeling and method than the current American examples.

GERMAN EXPORTS TO U.K.—German exports to this country during the months of July, August and September last included printing machinery, etc., amounting to 1,720 cwt., commercial books, etc., to 1,678 cwt., and writing books to 4,258 cwt., in addition to large quantities of unprinted paper of various kinds.

FRANKLIN'S statue in Washington was recently for the first time since its erection in 1889, thoroughly cleaned and renovated. The work was carried out at the suggestion of, and under the superintendence of, local master printers, the Washington Typothetæ.

COMPLETE satisfaction is said to be resulting from an agreement recently made between Chicago paper merchants and Chicago printers, whereby no direct sales of paper are made to customers of the printer.

A RECENT statement from an authoritative source is that more than 12,000,000 packs of playing cards are sold each year in the United States.

NEW YORK printing employees have recently been successful in resisting an attempt at wage reduction, but the effect of this on the trade as a whole is regarded by many with apprehension. "The result of maintaining high printing costs on book publications," says the *N.Y. Publishers' Weekly*, "will undoubtedly be to drive this work more and more out of New York."

THE paper merchants of Chicago look forward to a growth in Chicago's paper market in keeping with developments along lines in which paper is a large factor. Eventually, they feel, as do many of the printers, that Chicago will be the world centre for publishers, and when that time comes, the paper men say, Chicago also will be one of, if not the largest paper market in the world.

Euston Press War Memorial.

Unveiled by L.M.P.A. President.

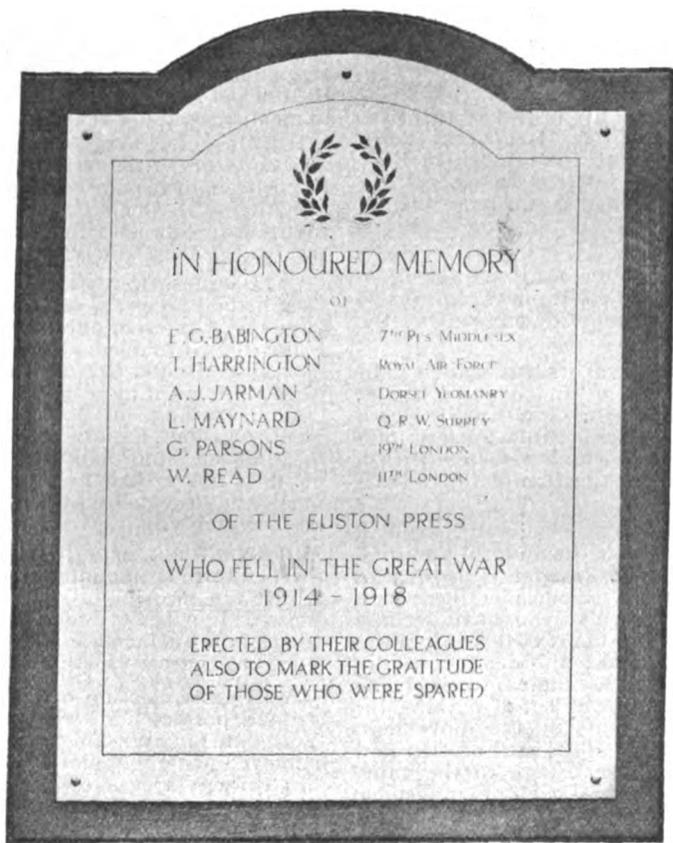

On Saturday last, in the presence of a large gathering of representatives of all departments of the firm of Langley and Sons, Ltd., there took place the unveiling and dedication of a memorial to the men of the Euston Press who fell in the Great War. The religious part of the service was conducted by the Rev. Edgar S. Sheppard, M.A., Vicar of the Parish, and the unveiling ceremony was performed by Mr. R. A. Austen-Leigh, president of the London Master Printers' Association and vice-president of the Federation of Master Printers. Among those present one noticed also: Mr. W. Whyte, secretary of the London Master Printers' Association; Mr. E. W. Wormald,

our "common round, our daily task," with the comfortable and reasonable expectation that, apart from accidents, we should probably continue on the same lines for the remainder of our working days. We lived in moderate comfort; we spent our well-earned leisure in whatever way we chose; and there was no cloud on the horizon to darken our future. For seven months more this continued, and then suddenly, in the twinkling of an eye, everything was changed. War burst out, and war of such magnitude that armies hitherto undreamt of in size had to be raised. The cry went forth for men, men, and still more men; and from every side the answer came back—from field and factory, from rich and poor, from employers and employed—and a steady stream of volunteers flowed in, in those early days of enthusiasm. In common with other houses the Euston Press sent forth its full quota of able-bodied and patriotic men. It was not for them to

whom we now think of as the heroic dead, and secondly as an incentive to those who come after, those to whom as time goes on the Great War will be but a matter of history, an incentive to them so to order their lives that when the call comes again, as haply it may come, they will be ready to emulate their predecessors. To those who remain let me quote the immortal words of Lincoln spoken after the battle of Gettysburg in dedicating the cemetery of those who had fallen: 'The world will little note, nor long remember, what we say here; but it can never forget what they did here. It is for us, the living, rather to be here dedicated to the great task remaining before us—that from these honoured dead we take increased devotion to the cause for which they here gave the last full measure of devotion, that we here resolve that the dead shall not have died in vain, that the nation shall, under God, have a new birth of freedom, and that government of the people, by the people, and for the people shall not perish from the earth.'

Mr. Austen-Leigh concluded by reciting the names and services of the fallen, and then unveiled the memorial.

The words of dedication were spoken by the Vicar, and further prayers followed, the meeting being brought to an impressive end by the sounding of the Last Post and the pronouncing of the Benediction.

The Euston Press Memorial Tablet.

St. Bride Students' Social.

Continuing the scheme for raising money to complete St. Bride Students' Pension Fund before the end of the present session, another social gathering took place at St. Bride Institute on Friday, December 30th, when some 200 students and their friends were present and enjoyed a whist drive, concert and dance for which the instructors were responsible.

For the first hour a whist drive was arranged, creating a considerable amount of friendly rivalry. The ladies' first prize was gained by Miss W. Hewlett, and the second by Miss F. W. Smith, who tied with two other ladies. The prize was ultimately awarded by "cutting." The gentleman's first prize was awarded to Mr. C. H. Budd and the second to Mr. E. Hutchings.

After the presentation of prizes, the hall was cleared and the rest of the evening spent in dancing, interspersed with musical items, not the least pleasing being those contributed by Miss I. Richards (15 years old) and Miss Muriel May (a tiny tot of 8). A whistling solo by Mrs. Curry, one of the students, was also much appreciated.

A full evening's enjoyment finished soon after 11 o'clock by the singing of Auld Lang Syne. There were many desires expressed that similar evenings should be arranged.

In the Newspaper Realm.

MR. ROBERT DONALD, editor of the *Referee*, has sold his interest as a director of the *Yorkshire Observer* to Sir James Hill, who now becomes sole instead of joint proprietor. Mr. Donald has interests in other Northern newspapers, which he will continue to hold.

A NEWSPAPER amalgamation in the North of Scotland is expected soon to be publicly announced. In this case the control of the joint production, it is understood, will pass into the hands of Coalition supporters.

THE death occurred just before Christmas of Mr. Walter Baxendale, for many years kennel editor of the *Field* and a frequent contributor to the *Pall Mall Gazette*.

"NEWSPAPER" SUNDAY TRAM.—On Sundays, commencing January 1st, a special tram-car for the convenience of newspaper workers and others has been started, leaving Blackfriars (John Carpenter-street), at 5.40 a.m., for Westminster, Kennington, Clapham, Balham, and Tooting Broadway.

THE late Mr. Harry Lacey Fraser, a well-known law reporter, who had served *The Times* in the Chancery Division for a long period, left £2,069.

MR. GEORGE LANSBURY announces in the *Daily Herald* that the recent appeal for funds towards reducing the price of the paper to a penny has resulted in readers sending, mainly in sums of £1. just on £8,000.

president of the West and North-West London Master Printers' Association; Mr. F. Colebrook; Mr. and Mrs. E. C. Langley; Mr. and Mrs. Alfred Langley; Mr. Leonard Langley; Mr. Harold Langley and other members of the Langley family; also relatives of the men who had fallen.

The proceedings opened at 11 o'clock with prayer, which was followed by the singing of the hymn "O God, our help in ages past." An impressive address from Mr. Austen-Leigh then preceded the unveiling of the memorial, which took the form of a brass mural tablet mounted on mahogany, as shown herewith.

Mr. Austen-Leigh's Address

Mr. Austen-Leigh said: "We are met here on simple but solemn duty, to do honour to the brave men of the Euston Press who, in the recent war, laid down their lives for King and Country, and through them to do honour to the larger body of their fellow-workmen who underwent the same risks and braved the same dangers, but whom Providence permitted to return safely to their homes.

"Three years and more have already passed since the War came to its long-fought end, and in the disillusionment that has since attended so many high hopes, in the doubts and difficulties that beset us, in the dull struggle for life in which so many of us are involved, it is natural and perhaps inevitable that our recollections should become blunted and our memories grow short. But on this occasion, on the last day of the dying year, perhaps you will allow me for a few minutes to recall your minds to this time eight years ago. The year 1913—the last of what we now call the "pre-war" years—came to an end without anything very extraordinary happening. Most of us were going about our work,

trouble their minds with the niceties of who began the war. Their country had need of them—that was enough for them. 'Theirs' not to reason why; theirs but to do and die. Let us think of them for a few moments, think of the lot that befell them. Let us recall them rushing from the composing-room, the machine-room, the warehouse or the clerical department, rushing to arms, abandoning their work, which, if it was not easy, was at any rate work to which they were accustomed, giving up hours of leisure, submitting to irksome discipline and bearing almost intolerable discomfort during the period of training. Think of them drafted out to the various theatres of war—to be frozen in France, scorched in Palestine or exposed to perpetual fire in Gallipoli—bearing all these things, enduring everything in order that liberty might be preserved and their dear ones at home saved from the unspeakable horror of the invader in their midst—finally meeting the supreme test and making the supreme sacrifice. Let us not forget the debt we owe to them, especially those of us to whom it was not permitted to bear arms ourselves; let us not forget the debt we owe to all who went out to fight for England, but more particularly to those who did not return.

"It has been said by one of the greatest orators of all time that 'Of illustrious men the whole world is a tomb,' but nevertheless it is only right and fitting that those of the Euston Press should desire to have some permanent and visible memorial of the fallen set up in the place where they worked at their everyday occupation. The tablet which is about to be unveiled will be placed, I understand, in the passage where all may read it who pass to their daily work, and there it will serve two objects—first as a reminder of those

New Year Honours.

Print, Paper, and Allied Trades Well Represented.

The allied trades occupy a prominent place in the New Year Honours list, as indeed by virtue of their importance, they ought to do, and to each and every one of the gentlemen there represented we extend our congratulations.

Baronets.

SIR GEORGE ROWLAND BLADES, M.P.

Knighted in 1918, has represented the Epsom Division of Surrey since 1918. He is joint senior partner of the well known printing firm, Blades, East and Blades. A prominent figure in the life of the City, he has filled many positions of honour. He was Senior Sheriff, City of London, 1917-18, was appointed a J.P. for County of London, 1914, and for Surrey, 1921, and was elected Alderman for the Ward of Bassishaw in 1920. He was Master of the Gardeners' Company 1912, and of the Horners' Company 1914-16. Closely associated though he is with many of the philanthropic institutions of the metropolis, the printing charities are, naturally, of greatest interest to him. He acted as president of the Institute of Printers in 1905, was president of the Printers' Pension Corporation in 1917, and was president of the Stationers' and Paper Manufacturers' Provident Society in 1920.

CHARLES HYDE, O.B.E.

A member of the management committee of the Press Association. He entered the newspaper business with his uncle, Mr. John Feeney in 1897, and, under the terms of Mr. Feeney's will, purchased and became sole proprietor in 1913 of the *Birmingham Post*, the *Birmingham Mail*, and the *Birmingham Weekly Post*. He has been associated with many philanthropic movements.

JOSEPH JOHN JARVIS.

Mr. Jarvis is not only a director of the *Financial News* and well known in press circles, but is connected with several City undertakings. He has been able to advise the Government in connection with various problems of financial reconstruction and on the question of exchange. He was useful, too, in several other directions during the war. He is keenly interested in sport.

Knights.

FREDERICK EDWARD ROBERT BECKER.

Head of one of the largest groups of paper-makers in the country; during the war conducted without charge all experiments for Paper Controller; rendered valuable services during the war in connection with wood pulp and paper industries, and was a member of the Admiralty Arbitration Committee.

FREDERICK MORTON RADCLIFF.

Proprietor of *Liverpool Courier* and *Liverpool Express*. Born in Liverpool in 1861, in 1906 he joined the board of Messrs. C. Tinning and Co., Ltd., the proprietors of the *Liverpool Courier* and the *Evening Express*, becoming the chairman of directors in 1916, on the retirement of Sir R. A. Hampson.

COL. JOSEPH REED.

Chairman of the Press Association. He joined the Committee of the Association in 1918, and was appointed to the chairmanship in May last. He is also prominently identified with the Newspaper Society. Colonel Reed is one of the directors and the general manager of the *Newcastle Chronicle* publications, with which he has been connected for the greater part of his life. He is a son of the late Mr. R. B. Reed, for many years the friend of the late Joseph Cowen, who made the *Newcastle Chronicle* famous. Mr. R. B. Reed was manager of the *Chronicle*, and Joseph Reed commenced his career as a "printer's devil" on that paper. He then entered Durham University, and adopted the profession of marine engineering. When the linotype was introduced into the *Chronicle* office he was called in to attend to the new machinery, and he has never returned to marine engineering. He became works manager, and the death of Mr. Cowen and the retirement of Mr. R. B. Reed found him in complete control of the publications of the office.

ALEXANDER RICHARDSON, M.P.

Member for Gravesend. Managing director of Engineering, Ltd. Vice-president of the Junior Institution of Engineers, and Companion of the Institution of Marine Engineers.

MEREDITH THOMPSON WHITTAKER.

Mr. Whittaker, who is an octogenarian, and has just completed his second term of office

as Mayor of Scarborough, is one of the best known men in the newspaper world. He is proprietor of the *Scarborough Evening News* and the *Scarborough Weekly Mercury*, and recently acquired also the *Scarborough Evening Post*. He was the principal founder of the Linotype Users' Association, and as its chairman has negotiated all the principal wages agreements with the Typographical Association in regard to linotype operators in the provinces. He was also a prominent member from the beginning of the Newspaper Federation, and as its representative succeeded in securing the adoption of a national agreement for the regulation of wages in the printing trade. Mr. Whittaker was a member of the committee of management of the Press Association from 1913 to 1918, was chairman in 1916 1917, and was re-appointed to the committee last year. He is also an ex-chairman of the Yorkshire Newspaper Society. He has been very active in the development of Scarborough as a health resort.

Order of the Bath.

ALFRED WILLIAM POLLARD.

Keeper of Printed Books, British Museum.

Order of Merit.

SIR JAMES MATTHEW BARRIE, BT., M.A., LL.D.
 (Edin.).

In recognition of his services to literature and the drama.

Royal Victorian Order.

K.C.V.O.

PERCY COLEMAN SIMMONS.

Solicitor by profession, ex-chairman of the L.C.C., on which body he has seen many years of service.

Imperial Paper Mills.

Presiding at the ordinary general meeting of the Amalgamated Press, Ltd., at the Memorial Hall, London, on Friday, at which a final dividend for the year of 5s. per share, free of income tax, was declared on the ordinary shares, Sir George A. Sutton, the chairman, made the following reference to the Imperial Paper Mills:—

The paper trade of this country has been through unfortunate times during the year. Your mills at Gravesend, in common with all others, have suffered from the heavy depreciation in the value of stocks of pulp and papermaking materials. Trade depreciation and the loss due to depreciated currencies have been contributory causes. We hope and believe the worst is over and that the coming year will see some improvement in the industry.

SPECIAL PREPAID ADVERTISEMENTS

The Minimum Charges for Three Lines, with an average of seven words to the line, for Advertisements under the headings given below are as follows (extra lines at proportionate rates):—

 agents, 11, St. Bride-street, London, E.C.4.

 Representatives throughout the United Kingdom and
 also in Australia, New Zealand, India, South
 Africa, United States, South America, Canada, etc.

THURSDAY, JANUARY 5, 1922.

Our Enlargement.

 WITH this issue we revert to the former size
 of the "BRITISH AND COLONIAL PRINTER AND
 STATIONER," thus securing additional space
 to deal with matters of trade interest. We
 make the change more readily as we are
 assured it will be appreciated by our readers
 and advertisers alike. The size of our pages
 now gives facilities for fully illustrating time
 and labour saving inventions. Our aim is to
 demonstrate to buyers at home and abroad
 the progressive spirit of manufacturers of ma-
 chinery and appliances for the printing and
 allied trades. As in the past our paper will
 be devoted to the interests of—

 Printers and Lithographers.
 Photogravure, Collotype and Offset
 Printers.
 Printers' Engineers.
 Type Composing Machine Builders.
 Typefounders.
 Printing Ink Makers.
 Electrotypes, Stereotypers and Engravers.
 Bookbinders.
 Papermakers and Wholesale and Manufac-
 turing Stationers.
 Paper Bag and Envelope Makers.
 Box-Makers.
 Makers of Machinery and Appliances for
 all Paper and Board Consuming Indus-
 tries, etc.

The Spirit of Co-operation.

 ONE of our aims is to foster hearty co-
 operation between all sections of the printing
 industry. It is only by mutual and sympa-
 thetic understanding that the best results
 can be obtained. The printing trade has
 had its troubles during the past year, but,
 fortunately, except in a few districts, there
 has been an absence of labour troubles, which
 points to the reasonable attitude of both
 employers and employed, and there is no
 reason to doubt that good relations will con-
 tinue to exist. We are glad to notice that
 reports from several industrial centres indi-
 cate a brighter outlook, and in due course
 this should favourably react on the printing
 trade. Of great assistance would be the re-
 moval of prohibitive postal charges, which
 at present greatly curtail the dispatch of
 printed matter through the post. A serious
 phase of the question is that work goes
 abroad, as cheaper postage is secured. It is
 as well to recognise the situation clearly, as it

 is incumbent on all to use their best efforts to
 promote efficiency and to aim at economy in
 production for the welfare of the industry. As
 in the past our space will be available for full
 reports of meetings of Trade associations
 and organisations—representing both em-
 ployers and employed. We invite the co-
 operation of secretaries to make the "BRITISH
 AND COLONIAL PRINTER AND STATIONER"
 thoroughly representative in this respect. We
 have trade correspondents throughout the
 United Kingdom and the Colonies, and we
 have also arranged to publish contributions
 from technical and expert writers in order
 that all latest improvements in machinery,
 processes, etc., may be fully ventilated. Our
 object is to serve and to advance the
 interests of the printing industry in every
 conceivable way.

Export Trade.

 THE "BRITISH AND COLONIAL PRINTER AND
 STATIONER" since it was established 44 years
 ago has achieved a distinction of which we
 are proud, and we are stimulated to make
 still further efforts to increase the prestige of
 the journal at home and abroad. Our export
 issues have rendered good service in promo-
 ting overseas trade, and in this field we stand
 unique, the outcome of years of experience
 and the close study of the requirements of
 industries represented not only throughout
 the United Kingdom, but in Australia, India,
 South Africa, East and West Indies, Canada,
 South America, etc. It is extremely flattering
 to have received from time to time, quite
 unsolicited, letters of appreciation from adver-
 tisers. One firm says: "Your advertisements
 act only too well . . . quite full of orders."
 Another firm mentions: "We could not have
 selected a better medium." From another
 source we receive the information: "Have
 doubled turnover in two months, for which
 we give your paper the credit." Another
 advertiser writes: "Your journal goes into
 the hands of all that we care to supply." A
 Calcutta opinion characterises the "BRITISH
 AND COLONIAL PRINTER AND STATIONER" as
 "Unique, practical, comprehensive, always
 interesting and progressive." We look, there-
 fore, with the greatest confidence to the
 increased support of advertisers.

Postage in the New Year.

 BUSINESS men are on all sides expressing
 the opinion that if trade is to be revived, one
 of the first requisites to that end is the lifting
 of some of the pressing burden of taxation
 now resting upon industry. The increased
 postal rates can fairly be regarded as one of
 these taxes, and printers look upon these rates
 as a very serious handicap on their trade. The
 joint secretaries of the Joint Industrial Council
 have, we are glad to hear, written to the Post-
 master-General pointing out the importance
 of an early announcement as to the revision
 of postal rates in April. They stressed the
 fact that many firms are now allocating their
 advertising expenditure, and expressed the
 hope that as the J.I.C. is meeting on the
 11th inst., an intimation may be received
 before that date.

Foreign Paper.

 FOREIGN news-print and common printings
 are being offered at ridiculous figures for de-
 livery at long date. No English mill can
 attempt to compete against quotations which
 are merely the result of debased currency any
 more than a purchaser can expect English in-
 dustry to revive on work sent out of the
 country. The speculator in foreign wares
 should reflect just now that they are a two-
 edged weapon, inasmuch as their importation
 helps to keep unemployment rife and makes
 the condition of the country precarious for
 everybody. If money is apparently saved by
 cheap foreign purchase at one end, it is lost
 by the burden of taxation and bad trade
 brought about or encouraged by this very
 process of importation on the basis of a rotten
 exchange.

What We Value!

Appreciation of our Past Efforts and Encouragement for the Future from Leading Members of the Printing Trade.

It is extremely gratifying to know that our efforts to serve the printing trade are appreciated in many quarters. With pride we quote a few of many expressions of good wishes from leading representatives of the industry, which give us every encouragement and stimulus for the future:—

MR. JAMES MACLEHOSE (Robert MacLehose and Co., Ltd., the University Press, Glasgow), President of the Federation of Master Printers:—

I am glad to know that with the beginning of the New Year you are enlarging the size of the *British and Colonial Printer and Stationer*, to which I wish all success. You are making this change at a time when all classes of our trade, whether employers or employees, are beset with many difficulties, but our countrymen have always shown their best in time of trouble. We have known what they have done in these years of war, and it would ill become us to be down-hearted. Let us (though we express it more tersely in Scotland) put a stout heart to a stiff climb, and we shall see better days.

MR. E. G. ARNOLD (Butterley-street, Hunslet-lane, Leeds), Ex-President, Federation of Master Printers of Great Britain and Ireland, 1916-1918.

I hear with considerable pleasure that the *British and Colonial Printer and Stationer* is about to return to its pre-war size, and general appearance, and, as a wish for the forthcoming year, may I express the hope that the increase in size in the *British and Colonial Printer and Stationer* may be a happy omen for an increase in the fortunes and volume of trade throughout the various branches of the industry. One has been accustomed for many years past to look for the weekly issue of your paper as being the bearer of the latest trade news and developments, and, writing as a very old subscriber, it is with particular gratification that I hear that increasing demands upon your space have led you in the direction of going back to pre-war size. With all best wishes for the future of your paper.

MR. R. A. AUSTEN-LEIGH (1, New-street-square, London, E.C.4), President of the London Master Printers' Association:—

I rejoice to hear that you find the times propitious enough to enable you to return to the previous format. As a constant reader, I consider your journal to be of such great service to the industry that any increase in its size and consequent efficiency is bound to be of advantage to all who are connected with the printing trade. With all good wishes for your continued prosperity.

MR. E. W. HUMPHRIES (Percy Lund, Humphries and Co., Ltd.), Bradford, ex-president of the Federation of Master Printers.

As a life-long reader of your paper, it is a source of pleasure to know in the coming year, as peace is here, and as it looks as if the world is more or less settling down to sense, reason and work, that your old-established journal, which had to reduce its size and expenses during the war, is going to appear in its old large size. I have no doubt that the same vigour and grasp of the details of the trade that has marked its past will be accentuated in the future. I am sure I wish you all success, and thanks for efforts you have always made to assist the trade and bring about that better feeling between the employer and the employed.

MR. W. HOWARD HAZELL (Hazell, Watson and Viney, Ltd., 52, Long-acre, W.C.2):—

I am glad to learn that in 1922 you are going to increase the size of your journal. Any journal that disseminates information and new ideas amongst master printers in this country is doing a service to the Trade, and I hope that your enterprise will be successful.

MR. REGINALD J. LAKE (St. Edmunds, Langley-road, Watford), late Director of the Federation of Master Printers and late secretary of the Master Printers' Association (London):—

I congratulate you on your enterprise in returning to the larger size of the *British and*

Colonial Printer and Stationer and cordially wish you success in the approaching forty-fourth year of your publication and in all future years. The service you have rendered to the trade is universally recognised, and if the interest of your pages is increased in proportion to the increased size of page, yours should be the most interesting Trade publication, and materially increase the efficiency of the service rendered. With all best wishes.

MR. GEORGE EATON HART (St. Clements Press, Ltd., Portugal-street, Kingsway).

I am very glad to know that you have decided to revert to the original size of the paper, and I feel sure that the enlargement will add to its usefulness and attractiveness, and will give the utmost satisfaction to your many subscribers, who, like myself, always rely upon the information which the weekly issue gives of the doings in the trade. Wishing you increased success.

MR. T. E. NAYLOR, M.P. (7-9, St. Bride-street, London, E.C.4), secretary, London Society of Compositors.

I am glad to hear that your paper is now to be issued in its original and larger form, and hope that this is an indication of improved business throughout the industry.

MR. A. E. HOLMES (60, Doughty-street, London, W.C.1), secretary, Printing and Kindred Trades Federation of the U.K.

I am very pleased to learn that you are returning to the previous larger size of your journal, and I hope that the enterprise will prove as successful to yourselves as it will be beneficial to the large circle of your readers. Sometimes I think it is a compliment to the printing and cognate trades that they possess a comparatively small number of journals catering exclusively for their interests, as the affairs of the trade are focussed so much better than they otherwise would be. By the attention you have hitherto given to the inventions and improvements in the trade and the very informative articles which are always to be found in your journal, you certainly merit the success you are endeavouring to achieve.

Postal Rates and Printing.

Statement by the Postmaster-General.

The Postmaster-General states that his attention has been drawn to a circular sent out by a Continental firm, inviting British firms to have their circulars printed, addressed, and posted in their country, and showing that by this means a considerable saving can be made. The rate of postage on a circular sent from this particular country, and from others similarly situated, is equivalent to about $\frac{1}{10}$ th to $\frac{1}{8}$ th of a penny at the current rate of exchange. It will not be seriously suggested, says the official statement, that the British postal rate for circulars should be reduced to that figure. But the Continental firm compares not only British postage rates with the postage rates of their country, but also the costs of printing and addressing. According to their figures the cost of printing is about one-fifth of the cost in England, and the wages of an address-writer are less than one-tenth of those of a person employed on the same work here. The circular bears the legend, "Wages are here twenty to thirty times less." On those facts it cannot be seriously suggested that a mere alteration of postage rates could alter them.

While certain firms which post large numbers of circulars have thought fit to take advantage of depreciated exchanges to have their circulars posted abroad, the number of

such firms is extremely small. There is no indication of any widespread tendency in that direction, and the total volume of matter posted in this country at the printed papers rate of postage is not seriously affected. In so far as persons are found to contravene the law or postal regulations in sending circulars abroad to be posted, the Postmaster-General is using such preventive powers as he possesses. Countries like Switzerland, Denmark and Holland are having the same experience as that of which complaint is made in this country.

Mr. Burchell's Appeal.

An urgent request to all industrial firms and master printers throughout the Kingdom has been made by Mr. W. H. Burchell, governing director of the Caxton Press, Ltd., and hon. secretary of the Association of Master Printers of the London Central Districts, on the subject of high postal rates. It is asked that the firms will write to or interview their local M.P.'s, with a view to approaching the Postmaster-General to re-establish the half-penny postal rate on printed matter. The abolition of this rate, it is contended, has caused great loss of work to the printing trade and allied industries; and the estimated loss to labour weekly is put at £500,000. This hindrance to trade and commerce has, it is stated, been brought about by the stopping of the cheap postal rate mentioned, and the consequent great unemployment among workers and stagnation in the issue of publicity matter by industrial firms are emphasised.

"The Treasury, in a statement just issued,"

said Mr. Burchell to a Press representative, on Monday, "states that there has been a big drop in postal revenue from April 1st to December 31st, 1921, amounting in the case of stamps alone to £2,000,000. The abolition of the halfpenny stamp is one of the greatest and most egregious business blunders ever committed. It has caused industrial firms to curtail by half their printing orders for catalogues, booklets, leaflets, and circulars."

Germany's Printing Expansion.

Dutch printers are up in arms on the subject of the capturing of their trade by German printing houses, favoured by the depreciated exchange.

"Your printing for nothing" is the attractive heading of advertisements now appearing in the Dutch press, and these advertisements state the plain, bald truth—you can get your printing done in Germany for nothing, while at the same time the German printer makes a reasonable profit on the transaction! It is all due to the cheap mark.

For printed matter the postal rate in Holland is 2 cents. The German printers will for the same amount print your circular, put it in an envelope, write the address, put on the stamp—a German stamp—and post it for you to be delivered to your customer in Holland! You consequently get not only your printing free, but your envelope and the addressing.

DIVIDENDS AND REPORTS.

SPICER BROTHERS, LTD.—Interim dividend on ordinary shares to September 30th at the rate of 3s. per share, less tax.

SPANISH RIVER PULP AND PAPER MILLS Co.—Dividends at the rate of 7 per cent. per annum on preference and common stock for three months ending December 31st, 1921.

NEW COMPANIES.

PRESLANDS, LTD.—Capital £1,515, in 1,500 cumulative 7½ per cent. preference shares of £1 each and 300 ordinary shares of 1s. each; printers, stationers, lithographers, type-founders, photographic printers and lithographers, artists, engravers, etc. Private company. First directors: H. F. L. Williams, G. T. Thomas and J. H. Skelton. Registered office: 7, Southampton-street, Holborn, W.C.1.

AVERY'S SERVICES, LTD.—Capital £4,000, in £1 shares (1,000 preference and 3,000 ordinary); to adopt an agreement with A. A. W. Avery and to carry on the business of photo, colour, half-tone and line process engravers, photo etchers, artists, photo printers, photographers, retouchers, photo offset plate makers and printers, etc. Private company. Subscribers: F. Avery and J. R. Avery. First directors: A. A. W. Avery, F. Avery, J. R. Avery and Margaret E. M. Avery.

TOM STILLINGS AND SONS, LTD.—Capital £7,000, in £1 shares (3,000 8 per cent. non-cumulative preference); to take over the business of a newspaper proprietor and general printer carried on by T. Stillings at Lowtown, Pudsey. Private company. First directors: T. Stillings, G. Stillings, H. Stillings and T. Stillings, jun.

COVENTRY ENGRAVING AND ADVERTISING SERVICE, LTD.—Capital £2,500, in £1 shares; line, half-tone and colour process engravers, stereotypers, printers, stationers, lithographers, advertising agents, etc. Private company. Directors: H. E. Busst, Mrs. F. E. Busst and W. Holmes. Registered office: 39, Cow-lane, Coventry.

WESTON-SUPER-MARE GAZETTE, LTD.—Capital £3,000, in £1 shares; to take over the business of newspaper proprietors carried on at Wadham-street, Weston-super-Mare, as the *Weston-super-Mare Gazette*. Private company. First directors: R. J. Matthews, C. H. Mills and E. P. Sperring. Registered office: 1A, St. James-street, Weston-super-Mare, Somerset.

WALTER KING, LTD.—Capital £16,000, in £1 shares; to take over the business of a proprietor and publisher of a periodical known as the *Gas Journal*, carried on by W. King at 11, Bolt-court, Fleet-street, E.C. Private company. First directors: W. King, C. A. King and A. F. Bezant. Registered office: 11, Bolt-court, Fleet-street, E.C.4.

RICHARDSON AND Co., TIN PRINTERS, LTD.—Capital £5,000, in £1 shares; mechanical and

consulting engineers, tool and machinery makers, die makers and sinkers, printers on paper, wood, tin and other material, lacquerers and enamellers, makers of plain and fancy boxes of tin, sheet metal, wood, etc. Private company. Directors: J. S. Stubbs and F. B. J. Richardson. Registered office: 364-368, Cleveland-street, Birkenhead.

BERNER, NICOL AND Co., LTD.—Capital £30,000 in 25,000 10 per cent. non-cumulative preference shares of £1 each, free of income tax up to 6s. in the £, and 100,000 deferred shares of 1s. each; timber, wood pulp, wood and paper merchants and manufacturers, timber growers, etc., and to adopt agreements with I. D. Berner and R. G. Berner for the acquisition of the benefit of certain contracts for wood pulp. Private company. First directors: I. D. Berner, R. G. Berner and S. Nicol. Registered office: 57, Gracechurch-street, E.C.

BRITISH PULP CASE Co., LTD.—Capital £500 in £1 shares; manufacturers of compressed cardboard goods, jewel, plate and cutlery case makers, makers of fancy goods, toys, etc. Private company. First directors: C. W. Gray, A. W. Williams and G. Schroder. Registered office: 82, Villa-street, Hockley, Birmingham.

PAUL AND BARKER, LTD.—Capital £5,000 in 4,500 6 per cent. cumulative preference shares of £1 each and 20,000 ordinary shares of 6d. each; to take over the business of merchants, manufacturers and agents carried on at 40-41, Great Marlborough-street, W., as "Gallwey, Paul and Barker," and to carry on the same and the business of importers and exporters of and dealers in apparatus, machines, chemicals and other articles, engineers, experts, printers, publishers, etc. Private company. First directors: U. G. de Barker and A. G. Spencer. Registered office: 40 and 41, Great Marlborough-street, W.1.

A. STANGROOM AND Co. LTD.—Capital £500 in £1 shares; merchants, brokers, bankers, advertising agents, shipowners, wharfingers, warehousemen, carriers, importers and exporters of and dealers in paints, varnishes, glues, dyes, enamels, pigments, chemicals and drugs, cloths and materials, printers, advertisers, etc. Private company. First directors: A. Stangroom and F. C. P. Blake.

INCORPORATED INSTITUTE OF PUBLICITY, LTD.—The Incorporated Institute of Publicity, Ltd., a company limited by guarantee, to promote and encourage knowledge of advertising and publicity science and of the art of advertising and publicity service in all its branches. The management is vested in a council, the first members of which are: D. H. Clegg (president), Sir C. F. Higham, M.P., W. S. Crawford, C. F. Keir, S. J. Crockford, C. C. Knights and A. V. Hyde. No notice of situation of registered office was filed at time of incorporation. File number 178,526.

BUSINESS INDICATORS, LTD.—Capital £2,000, in £1 shares (500 pref. and 1,500 ord.); to carry on the business of advertising consultants, business organisers, advertisement agents and contractors, etc. Private company. First directors: P. P. Daniel and S. J. Price. Registered office: 26, Charing-cross-road, W.C.2.

E. C. ADVERTISING Co., LTD.—Capital £1,000, in £1 shares; to take over from the E. C. News Co., Ltd., that part of their undertaking dealing with all kinds of advertising. Private company. First directors: M. Emanuel, C. C. Beazley. Registered office: 4, Broad-street-place, E.C.2.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

WELBECSON PRESS, LTD. (London).—Land registry charge on reversion of 108, Clarendon-road, St. Mary Abbots, Kensington, dated December 5th, 1921, to secure £162 10s.

Holder: Sir Joseph E. Radcliffe, Bt., Budding-park, Harrogate.

FIELD PRESS, LTD.—Particulars of £60,000 second debentures (including £50,000 already registered) authorised May 3rd, 1921, present issue £10,000 charged on the company's undertaking and property, present and future, including uncalled capital, subject to prior debentures.

BRIXTON "FREE PRESS" PRINTING AND ADVERTISING Co., LTD.—Mortgage or charge on 429, Brixton-road, S.W., dated December 15th, 1921, to secure all moneys due or to become due from company to L.C.W. and Parr's Bank, Ltd.

LORILLEUX AND BOLTON, LTD. (printing ink manufacturers, London).—Satisfaction in full on November 17th, 1921, of charge dated April 13th, 1920, securing all moneys due or to become due.

GOADSBY AND Co., LTD. (paint, colour, varnish and ink manufacturers, chemists, etc.)—Legal mortgage on certain lands and premises in Bradford, Manchester, dated December 14th, 1921, to secure all moneys due or to become due from company to L.J.C. and M. Bank.

SAMUEL JONES AND Co., LTD. (gummed paper makers and paper glaziers, etc.)—Satisfaction in full on December 15th, 1921, of mortgage or charge, dated October 21st, 1921, supplemental to charge dated September 23rd, 1920, securing £25,000.

WEST LONDON PAPER STAINERS, LTD.—Debenture dated December 1st, 1921, to secure £800 and further advances not exceeding in all £1,500, charged on the company's undertaking and property, present and future, including uncalled. Holder: George Mawson and Co., Ltd., 71, Fleet-street, E.C.

BANKRUPTCIES, etc.

Re RICHARD SILLETT (trading as "H. Paxman and Co."), General Stationer, 5, Paul-street, Finsbury, E.C.—The public examination of this debtor was held at the London Bankruptcy Court, the accounts showing liabilities £301 against assets valued at £142. In the course of his evidence the debtor stated that he commenced business as a general stationer, printer and sundriesman, as above, in 1917 with £145 capital, and filed his petition on October 11th owing to pressure by creditors. He attributed his failure to bad health and bad trade. The examination was concluded.

Lendrum Limited.

The annual staff dinner of the Manchester Branch of Messrs. Lendrum Limited took place on Friday, the 23rd ult., at the Grosvenor Hotel, Deansgate, Manchester.

The chair was occupied by Mr. A. S. Lowry (manager of the Waste Department), who was supported by Mr. David McGowan (manager of the New Paper Department), and a company of 48 sat down to dinner. The happy relationship existing between the members of the staffs themselves and the respective managers was manifested in the speeches made in proposing the various toasts, and in spite of the hard times through which the paper trade has been passing it was made evident that both the inside and outside staffs of Messrs. Lendrum Limited were in good heart.

After dinner the company adjourned to the Manchester Hippodrome and thoroughly enjoyed the excellent programme there provided.

At the conclusion the chairman was unanimously requested to convey the thanks of the company to Mr. E. S. Lendrum (managing director), whose unavoidable absence was regretted, together with an expression of their best wishes for the coming year and an assurance of their loyalty and devotion to the interests of the firm.

Personal.

LORD RIDDELL arrived back from Washington last week, and has made some interesting remarks to Press representatives as to the Washington Conference and things in general. Referring to the U.S. Press reports of the Conference, Lord Riddell commends their quality and states that nowadays accuracy is the aim—almost the craze—of the high-class American reporter.

MR. F. E. R. BECKER, one of the best known men in the paper trade, was on Friday entertained at the Connaught Rooms by friends in the business in celebration of his fiftieth birthday.

LORD BURNHAM, who presided, also unveiled a portrait of Mr. Becker, painted by Mr. Tennyson Cole.

MR. A. HARRIS was entertained at luncheon on the 22nd ult. by his friends and colleagues at the Trocadero Restaurant on the occasion of his retiring from the advertisement department of Messrs. Cassell and Co., Ltd., after 54 years' service with the firm.

SIR ARTHUR SPURGEON, J.P. (managing director), on behalf of the directors, congratulated Mr. Harris on his long and useful career, and presented him with a handsome writing desk, while the advertisement department presented him with a gold pencil case, and Mr. F. E. Potter, on behalf of the outside advertising agents, with a silver fountain pen.

MR. T. E. NAYLOR, interviewed by a Press representative as to a report of his possibly resigning the secretaryship of the L.S.C., pointed out that the rules of the Society do not necessitate resignation. He said he would make no statement of his own views or inclinations, and he would "carry on" if the members desired it. The fact that a prospective candidate for the secretaryship had already issued a circular had given rise, said Mr. Naylor, to a report that he intended to resign, but at present this was entirely premature.

MR. R. B. SIMNETT, managing director of Messrs. Sanders, Phillips and Co., Ltd., gave a very interesting address on cost-finding at the meeting of the South-West London Master Printers' Association on Tuesday night at Chelsea Town Hall, Mr. J. D. Wise, the president of the Association, in the chair.

MR. A. WILLIAMSON, from headquarters, inaugurated a useful discussion, which will be reported in our next issue.

MR. WILLIAMSON, who is secretary of the Cost and Charges Committee of the Master Printers' Federation, recently addressed the Harness Makers' and Saddlers' Association (London) on the subject of "Costing in the Leather Trade." The large audience followed the subject with considerable zest. The chief point made was the unsatisfactory method of recovering expenses by a percentage on both wages and materials—particularly where repairs are an important section of the business transacted.

MR. E. H. BERRYMAN, well-known in connection with the Printers' Managers and Overseers Association, entered the Hospital of St. Peter's Annexe at Hampstead, on Monday, December 26th, where it is expected he will undergo an operation. His many friends in the trade wish him a speedy and satisfactory recovery.

MR. DUNCAN KEATS delivered an interesting lecture dealing with the making of process blocks at a well-attended meeting of the Printing, Bookbinding and Kindred Trades' Overseers Association on Tuesday evening. A report of the proceedings will appear in next week's issue.

MR. THOMAS SINNISTER, chief of the stereotyping department of Messrs. Hulton and Co., newspaper proprietors, Manchester, and Mr. William H. Foddy, of the circulation department, have been presented by the proprietors with solid silver rose bowls in recognition of 43 and 40 years' service respectively.

TO MARK their silver wedding, Mr. W. R. Southey, managing director of Messrs. H. W. Southey and Sons, Ltd., printers and pub-

lishers, Merthyr, and Mrs. Southey were presented on Monday, by the firm's employees, with a silver salver. Mr. Henry Thomas, the oldest employee of the company, handed the gift to the recipients.

MR. FRANK HEYWOOD is to lecture on "Offsetography" (The Offset Process) on Friday, the 13th inst., in connection with the artistic typography classes at the L.S.C. Camberwell School of Arts and Crafts, Peckham-road, S.E.5, the chair to be taken at 7 p.m.

MR. H. J. ODELL, of Birmingham, formerly a sub-editor on the staff of the *Birmingham Gazette*, has been chosen as prospective Labour candidate for the Bassetlaw Division of Nottinghamshire, in opposition to the Coalition Conservative member, Sir Ellis Hume Williams, K.C. The last Liberal member of the division was Sir Frank Newnes, Bart., for whom Mr. Odell acted as agent.

Mr. Naylor and the "Daily Herald."

In an article contributed to the *Daily Herald*, Mr. T. E. Naylor, M.P., secretary London Society of Compositors, recalls his association with that newspaper in the early days of its existence.

"For some few years prior to the printers' strike of 1911," he writes, "I and others had been trying to arouse interest in the idea of a Labour daily. Then came the strike, and with it our chance to start the *Daily Herald* in embryo.

"The story of those early days has been told again and again, but fresh incidents are recalled from time to time. It is not generally known, for instance, that Mr. Keir Hardie was very keen on the prospect of having a Labour daily, and gave me a call during the strike to discuss the possibility of the *Daily Herald* being continued as a Labour newspaper.

"In recalling the early struggles of the *Daily Herald* when it became a full-fledged newspaper, the incidents of the 'first night' stand out very clearly. The production of a new 'daily' is usually rehearsed for six days in advance, as a new play would be rehearsed, to make sure that the various processes are in perfect running order. With our slender means we could not afford a full rehearsal, but resolved to start on No. 1 a day before the actual event, in order to get out at least one 'dummy' copy. We failed miserably. For one reason, advertisements were conspicuous by their absence, leaving our pages incomplete. Secondly, our leader writer disappointed us. The Committee at once pounced on me for that leading article! And in the intervening hours was written the very first Labour daily editorial—one of the finest contributions to the English language that ever— But look up No. 1 and give me your candid opinion!"

Trade Union Matters.

NEWSPAPER WORKERS' WAGES.— The unions representing the whole of the London newspaper workers, excluding journalists, have received notice from the employers of a proposal for a reduction of wages and modification of working hours. The proposals include a percentage reduction of wages in two instalments of 5 per cent., making 10 per cent. in all. We understand that meetings of the unions affected are being held to consider the position. The Newspaper Proprietors' Association, being unconnected with the Federation of Master Printers, was not affected by the wages agreement arrived at last autumn, and consequently separate negotiations are necessary before any readjustment of wages can take effect.

PUBLISHING TRADE WAGES. There was a meeting on Sunday of the printing and paper workers' employed in the publishing trade to consider a proposal arrived at during the recent conference between the union representatives and the employer's association with regard to a proposed reduction of wages. The meeting did not uphold the proposals of the conference in favour of a reduction of 5s. per week. We gather that the chief hindrance to a more favourable attitude was a feeling on the part of the union members that by accepting the reduction proposal in its present form no stability would be given to wages, and that the proposal might be accepted if satisfactory provision could be made to meet this objection.

Messrs. W. J. Light & Co., Ltd.

Some Interesting Appliances.

In addition to their own specialities, which include Light's "Everwear" oil-and-ink-proof press rubbers and various qualities of dry flong—including the "Photo-tone" fine art flong—Messrs. William J. Light and Co., Ltd., 127, Fenchurch-street, E.C.3, are acting as selling agents for Messrs. Winkler, Fallert and Co., S.A., Berne (Switzerland), who produce various interesting mechanical appliances.

Almost of first importance among these machines is an automatic stereo moulding press, the primary advantages of which are that it is designed for moulding any class of work from small job forms to full-size news pages, and, still more important, for forms for three and four colour fine half-tone work for catalogues and magazines. The press can be used either hot or cold, with either wet or dry flong, and is entirely automatically controlled, with either electric or steam heating. Two of these presses are now working in London and are said to be very successful.

Another machine of considerable interest is the "Winkler" automatic casting apparatus, for rotary newspaper plates. This machine produces—at the rate of six to seven plates per minute—perfect rotary newspaper stereo plates without tail and requiring no boring, and the machine is so constructed that the casting boxes may be interchangeable, an advantage claimed to be unobtainable in any other form of casting apparatus.

Other useful "Winkler" machines are an automatic router for either flat or rotary stereo plates, also a flat router having a vertical bed, upon which work can be done in any direction, including ovals and circles, all chips immediately falling away from the plate, an advantage to the operator which will be readily appreciated.

Further "Winkler" stereo appliances include an electrically-heated metal pot, in which the temperature is automatically regulated, patent circular saw, which, although the plates to be cut need not be moved by hand, cuts at any angle with particular accuracy and bevels the plates as desired; also a combined melting furnace and steam generator so adapted that waste heat is utilised for producing steam for other purposes.

The "Winkler" automatic ingot caster for re-melting type and stereo metals, is also a very efficient appliance, which is characterised by the fact that the metal is poured through the medium of a patent cock from that part of the pot where no oxydisation can occur.

The "Winkler" hardening plant for nickel-plating stereos is especially simple and efficient, as also is the "Winkler" composition roller casting apparatus, in which the composition enters the moulds from the base and produces perfect rollers, absolutely free from bubbles.

For linotype users there is the "Winkler" electrically heated lino pot, provided with an automatic temperature regulator and with an adjustable indicator, which entirely controls the current consumed, and in this connection Messrs. Light and Co., Ltd., also supply a "Safety Finger" for use on linotype machines.

To fine art colour printers perhaps the most important of Messrs. Winkler, Fallert and Co.'s productions is the "Winkler" flat bed printing machine of an entirely new type. This machine has an oscillating cylinder and the claim is made that it is so constructed that perfect register is assured and, with the greatest precision obtainable on a stop cylinder press, output at a speed exceeding that of ordinary black printing on the average two-revolution press being guaranteed—from which it will be gathered that this "Winkler" printing machine is of more than ordinary interest, the primary object being to print from stereos colour work previously only attempted by lithography.

For precision and as time-savers the "Winkler" patent stereo chases with single action surface lock-up and the "Winkler" combined chase galley are also to be commended.

Messrs. Light and Co., Ltd. are now acting as selling agents for Messrs. Maschinenfabrik Augsburg-Nurnberg, whose rotary and flat bed printing machines hold world-wide repute.

THE late Mr. Samuel White Whaley, of St. Anne's-on-the-Sea, and of S. W. Whaley and Sons, paper merchants, left £19,195.

PHOTOGRAMS OF THE YEAR 1921. London: Iliffe and Sons, Ltd.

This is a unique production, in view of the fact that it is the only international annual of its kind devoted to the pictorial side of photography. The present volume well sustains the high reputation the publication has secured in the past. It includes upwards of 100 reproductions, beautifully printed as art plates, of the finest pictorial work done during the past year by leading pictorialists with the camera in all parts of the world. The book as a whole is a handsome volume that will appeal to every lover of pictures, and at the same time teach many useful lessons to every photographer. In addition to the art plates in the volume the literary portion includes contributions from authorities on photography in this country, the Colonies and abroad. A most complete directory containing valuable information concerning the photographic societies, federations and clubs devoted to photography in this country is also included, and this feature alone makes the book a work of reference of considerable value. The price is 6s. net, by post 6s. 6d., in stout paper covers, or 8s. net, by post 8s. 6d., in cloth boards.

WORTERBUCH DER FACHAUSDRÜCKE DES BUCH- UND PAPIERGEWERBES. Von Wilhelm Hellwig. Frankfurt am Main: Klimsch and Co. Pp. 270, 8-in. x 5½ in.: cloth boards. Price 5s., postage extra.

A copy of this very useful volume is sent us by the German publishers. As its title indicates, it is a dictionary of technical expressions used in the book and paper industries, and an examination of its contents shows that it covers a wide field. The book is divided into five sections: (1) German into English, French, Italian and Spanish; (2) English into German; (3) French into German; (4) Italian into German; and (5) Spanish into German. It is designed to meet the needs not only of the printer and the papermaker but also of the workers in allied trades; thus it contains terms relating not only to the printers' and papermakers' machinery, tools and apparatus, but also to raw materials, photography, chemistry, etc. Moreover it covers many words not peculiar to the printing and allied trades. Besides such terms as *father of the chapel*, *cock-robin shop* and *printer's devil*, one finds also more general but often-wanted terms like *piece-hand*, *trade union*, *strike*, *invoice* and *discount*. The volume should be found very useful in this country—though, being produced for German readers, it gives in German only, not English, the equivalents of French, Italian and Spanish terms. It is surprising that an English publication of the kind is not obtainable. So far as we are aware no one publishes in this country such a work devoted primarily to the printing and allied trades, but only dictionaries of technology in general, which are cumbersome as well as expensive. Mr. Hellwig's book seems to meet a very real need.

"CONVERTING A BUSINESS INTO A PRIVATE Co." is the title of a useful little book by Mr. Herbert W. Jordan and published by Jordan and Sons, Ltd. It carries out very practically the intention indicated by the title and is another valuable contribution to the literature of company law from the same pen.

ENTITLED "The Manchester Royal Exchange," a portfolio of six *facsimile* pencil drawings by Fred Taylor, R.I.—each *facsimile* drawing being on a single sheet, size 18½ in. by 13½ in. and suitable for framing—is being printed and published by Taylor Garnett Evans and Co. (Hudson and Kearns, Ltd.), Guardian Printing Works, Cheetham, Manchester, and 28, Blackfriars-street, Manchester.

MR. JOSEPH PENNELL is the author of "The Graphic Arts: Modern Men and Modern Methods," a new work to be issued shortly by the Cambridge University Press, acting in England for the Chicago University Press. The book is illustrated with representative examples of work by old and modern masters of wood engraving, etching, and lithography, and contains a report of the Scammon Lectures delivered by the author at the Chicago Art Institute in the spring of 1920.

TO BECOME an able man in any profession, there are three things necessary—nature, study, and practice.—Aristotle.

Calendars.

MESSRS. SLATER AND PALMER, the printing ink, varnish and fine colour manufacturers of Wine-office-court, send us a copy of their wall calendar for 1922 which is well adapted for office use and is of special interest because of the inks of various colours used for both letterpress and half tone work in its production. The calendar is not merely useful as a calendar, but the six colours that are shown thereon in rotation are arranged so that they suggest colours in contrast for printers wishing to do a two-colour job tastefully.

MESSRS. PERKINS, BACON AND CO., LTD., the well-known engravers and printers of banknotes, postage stamps, cheques, etc., send us a wall calendar for 1922 which is an admirable example of their art. A large card, bearing the firm's name and description and several illustrations, is elaborately printed in the intricate style of engraving associated with bank note and similar printing, as is also each sheet of the monthly calendar pad. The artistic effect of the whole is excellent.

MESSRS. LANGLEY AND SONS, LTD., printers and manufacturing stationers, Euston, N.W., have issued a calendar consisting of six cards (8 by 6 inches), the dates for the twelve months being printed on both sides. The cards are pale green with a wide border in a darker shade of the same colour, and the dates are clearly printed in black. Quite a business-like production which is well adapted for office use.

MESSRS. J. J. KELIHER AND CO., LTD., printers and stationers, of 73, Moorgate-street, and at Kingsway, send us a well-designed wall calendar, a specially useful characteristic of which is that it carries not only a daily date pad with bold red figures, but a pad of monthly sheets as well.

MESSRS. JAMES BROADLEY, LTD., printers, engravers and account book makers, of Accrington, issue a monthly sheet wall calendar, in which the month's dates stand out boldly in white figures on a deep blue background.

ABDULLA 1922 ALMANACK.—An Abdulla almanack for 1922 has been published by the Bond Street cigarette specialists of that name. In accordance with the usual annual practice of the firm 10,000 copies are offered for sale, at the price of 1s. 6d., for the benefit of the British Red Cross Society, Abdulla and Co. bearing the expenses of production. As the almanack contains twelve coloured illustrations, each specially drawn for the publication by a leading artist, there should be no difficulty in selling all the copies.

THE *Bury Times* sends us a hanging calendar, the principal feature of which is a half-tone reproduction of a photograph taken on the occasion of the Prince of Wales's visit to Bury last July.

THE French Paper Stock Co., Ltd., are issuing another useful calendar for the new year, 11½ in. by 14 in. In addition to the dates, there are various tables which will be appreciated by those who handle paper and boards. One column, for instance, gives corresponding prices per ton and per lb., and other tables present equivalent substances, grammes and lbs., equivalent numbers per cwt. of strawboards, and postal rates, etc.

MR. JOHN BRADLEY, paper and board merchant of 37, Queen Victoria-street, has sent to his friends a calendar for 1922 which is adorned with a coloured reproduction of the clever dog picture by A. Wardle, "More Frightened than Hurt."

MESSRS. PETER DIXON AND SON, LTD., are again sending out their mammoth calendar for the New Year. Seventeen by 10½ inches, it shows in bold figures the date, a whole page being given to each day. The calendar is printed on "Dixon's make," which is an established feature in the trade, and the manner in which it holds out for the whole year is a tribute to the quality of the product of Oughtibridge and Grimsby. The size of the figures themselves being 7-in. by 4-in., they can be readily seen at a distance, and this unique calendar is a useful adjunct to office or factory.

FROM Messrs. Charles J. Forward and Son, Ltd., of 25-27, Sayer-street, New Kent-road, London, S.E., we have received a copy of their "Forward' Diary and Engagement Book for 1922," a neat little production for the vest pocket.

The Printer and His Paper.

SIR,—I read with interest the article by Mr. E. A. Dawe, of H.M. Stationery Office, on "The Printer and His Paper," which appeared in your issue of December 15th, especially where he shows how paper and boards will deteriorate after leaving the mill owing to careless storing, etc. These discrepancies are often laid on the papermaker, whose fault it is not.

Mr. Dawe points out how expensive it is to allow the printing employees to get over their paper difficulties as best they can, without consulting a specialist. Now, the question arises to my mind, what is a specialist? Is he a beaterman or a machineman skilled in the production, storing and handling of papers or boxboards?

Mr. Dawe refers to printers' troubles which arise from register, cockling, electricity and so on. I suppose the "so on" includes excess of fluff, uneven sheets, soft edges, too absorbent or non-absorbent. Colour troubles in art papers, Mr. Dawe states, are often due to the papermaker. I would like to ask in what respect. I think this would depend on the dyes used, whether pigments or anilines, and also would be governed by their exposure to light.

From a practical point of view, I will give my experience in regard to register. I quite agree with Mr. Dawe that varying temperatures affect register, as I have experienced great trouble from this source when making paper in the tropics, where you have to contend with great atmospheric changes, from dry heat to great humidity.

It is also essential, in the course of manufacture, to have the "stuff" regular in the first place, because it is a well known fact amongst practical papermakers that if the stuff is emptied free and fast, and then you may get it slow or wet, it will affect the register, as fine, free stuff will shrink on the machine more than long, soft stuff. Another factor in regard to register is that if the chest is low, then the stock is susceptible to the slightest variation.

Now I will deal with cockling from a paper-making point of view. Cockling may, and very often is, caused by a dirty second press felt on a Fourdrinier machine, or by the first drying cylinders being too hot. On a box-board machine you will set up blistering, which is the same effect as cockling on a Fourdrinier, by having the first drying cylinder too hot.

With regard to electricity in the paper, I have found that by stretching a copper wire across the web between the calendar and the reel, and allowing the wire to rest on the sheet, you can take out a great deal of electricity that may be in the sheet.

I may add that paper highly dried will contain more electricity than a sheet which is ordinarily dried. For instance, in making a high machine-finished paper, you will notice there is not so much electricity in it as a rough finished paper. This is owing to the fact that a paper with a high finish is not run so dry.

Just a word about boxboards. Cockling is caused in the way I have stated, but "curling" is a great trouble to box-makers. This is entirely due to the sizing, more so when water doctors are used on the calendars.

I will just illustrate this point. You may have a water doctor on the back and face, and you find the board curls up to the face. This shows that the backs are expanding by absorbing more water than the face. The remedy is to look to the sizing and stock and see if there is any reaction by using a blue litmus paper in the stock for acidity.

Yours, etc.,

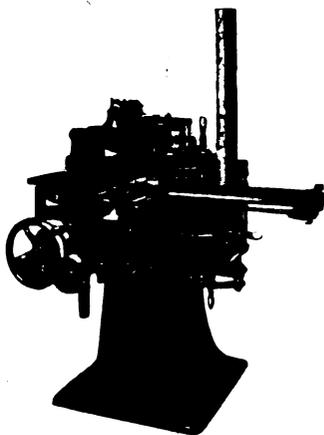

W. H. SILVESTER.

West Drayton.

Goods for Hungary Free.

The following goods may be imported into Hungary without licence: Paper pulp, paste-board (cardboard, tarred cardboard and cartonpierre); paper of all kinds (including wall-paper, photographic paper, etc.), except cigarette papers; printing type of brass or other common metal, books, music and periodicals.

SETS AND CASTS all classes of composition, simple or intricate, in single types, from 5 point to 14 point. Saves distribution and makes printing a pleasure

PRODUCES EVERYTHING for composition—type for the cases from 5 point to 36 point, and leads, rules, borders, clumps, and spacing material

British Paper for British Users.

A Plea for Preference.

By CAPTAIN W. E. NUTTALL, M.B.E.

I am very sensible of the privilege conferred upon the wrapping section of the paper-makers by the opportunity afforded to me of addressing you this afternoon and I wish to express the gratitude both of myself and those whom I represent for the invitation extended to us.

I propose to survey as rapidly as possible some of the problems with which we are faced at the present time, in the hope of making some contribution, however slight, towards bringing about that improvement which I am sure is so earnestly desired by all of us.

To begin with, each of us has his own difficulties, you as bagmakers or wholesale stationers, we as papermakers, and if we are to arrive at anything, I think it is essential for each of us to try to understand the other's case.

As I see your industry, it is highly competitive, so that you are under a never-ending pressure to turn out a better article at a lower price—within limits, of course. Furthermore, you are large employers of labour and costly machinery, and have all the cares incident to the running of a manufacturing industry, including heavy capital outlay.

Well, gentlemen, I can assure you that these, in an even more aggravated form, are precisely some of the difficulties which confront a modern papermaker, and therefore each can, and should, sympathise with the other.

But the papermaker has to deal with a form of competition at the present time which is absolutely disastrous. I refer to paper supplies from countries with depreciated currency and rates of exchange and especially from countries with which we were lately at war. In those countries the depreciated exchange has been brought about by the very victories which our own superhuman efforts and sacrifices enabled us to gain.

Furthermore, it must not be forgotten that this competition, which I will not hesitate to describe as unfair competition, re-acts in the prices of Scandinavian papers; so that supplies come in from Norway and Sweden at figures admittedly far below the cost of production, Scandinavian makers having to compete with the prices of German, Austrian and Finnish papers on this market.

Well, the British papermaker has stood up to all this manfully. When the slump came, it is well known that there were in existence tremendous stocks of all classes of wrapping and bag papers, much of it bought speculatively. Our papermaker waited patiently for those stocks to be liquidated, hoping that when they were gone business would improve. The stocks have been largely cleared; but the improvement has not materialised. The process of clearing brought about that demoralisation in the market which was afterwards continued by the depreciated exchanges of late enemy countries.

The papermaker himself held heavy stocks of high-priced material when the slump set in. He has in the meantime written these down in his books at ruinous losses. To-day he is fighting for business which he cannot get, although he has brought down his prices to the level of his Scandinavian competitors in most cases. It is most important also to remember that these prices entail very heavy losses, even when based on the current market prices for materials. Nevertheless, the British papermaker is prepared to suffer those losses if only he can get his plant going and keep his workpeople together.

Another point to be borne in mind is that diminished output means increased cost per ton, so that the very circumstance which the papermaker is trying to overcome, namely, shortage of orders, adds to his cost of manufacture, and so to difficulty in dealing with foreign competition. In fact, he finds himself in a vicious circle in this respect.

Nevertheless, prices have been brought down to the lowest possible level; a level which is far below the cost of production, after that cost has been based upon market prices of materials, which, in their turn, are being sold below cost. I cannot too strongly emphasise that further reductions are not possible without the risk of the gravest disaster and the collapse of the industry. Very much the same conditions hold good in Scan-

Paper read before the United Kingdom Paper Bag Manufacturers' Association and the National Association of Wholesale Stationers.

dinavia, and British and Scandinavian prices are about on the same level; in some cases British paper is offered at even lower rates. In any case the level which has been reached is the bottom level.

Fighting for Business.

With prices coming from countries where the exchange is depreciated, it is, of course, impossible to compete, or to even attempt such a course. We are endeavouring to deal with that problem by quite other methods, namely, the Safeguarding of Industries Act, and we feel sure we can count on your assistance in this respect if need be.

But signs are not lacking that competition of this class is going to be the means of its own downfall, at any rate as far as Germany is concerned.

Whilst I am dealing with the papermaking side of the matter, I should like to remind you that the normal total capacity of British mills engaged in the wrapping trade is estimated officially at 250,000 tons per annum and that at least 8,000 workpeople are employed. The estimated normal consumption of all classes of wrapping paper is 450,000 tons, including export. That figure will, of course, be much less in the present year, owing to the slump.

Another point to which I wish to draw your attention, is that a large number of British mills are still turning out the old-fashioned types of English rope and other browns, sugar papers, caps and royal hands. Mills engaged on this grade of paper do not require to use imported raw materials at all. On the contrary, they work up more or less waste materials collected in this country. In this way they find employment for a large number of people—in the neighbourhood of 3,000—in another industry.

Such mills produce their product without importing, and hence are playing a particularly important part in the country at the present time from the point of view of fiscal economies.

On that account they are particularly worthy of your utmost support and consideration and no opportunity should be lost of giving them the utmost encouragement.

I have said that the British papermaker is fighting for business which he cannot get, even when he brings his price into line with the Scandinavian. Undoubtedly, there is at present a much lessened demand for paper as compared with normal times. But still, there is a considerable quantity of business being placed with foreign mills, more especially in Scandinavia, which would be more than enough to keep British mills at full production if they could get a share of it. We have the mortification of seeing our own mills idle, or working short time, and our people unemployed, whilst across the water many mills are actually busy on British orders.

I am ready to make the fullest allowances for the fact that a large proportion of such business placed abroad is of such a nature as to be unsuitable for British mills. I am well aware that stress of competition forces bag makers to buy kraft and sulphite papers in substances which are too thin for British machinery; that in many cases and by the same force your customers have been educated to demand features in paper which cannot at present be produced over here; that there are certain kinds of paper which are not even manufactured in this country.

But, nevertheless, after the fullest allowance has been made for all those factors we are convinced that there is a large residue of this foreign-placed business which, with good will on your side, could be placed in this country, to the benefit of all concerned.

Struggling for Existence.

It is my duty to speak quite plainly. Our papermakers feel very acutely about this thing. They are struggling for very existence; it is a life and death fight both for them and their employees; they feel that they have a right in this crisis to ask for the active support of those to whom they have always looked for their trade and their orders.

And, after all, gentlemen, I think I can show that even from the lower standard of self-interest there are strong arguments in favour of encouraging the home mills; indeed, it is not so much a matter of encouraging as of actually keeping them in existence.

I submit that it is better to keep British workpeople employed than to have the cost of maintaining them by doles, hated alike by the payer and the receiver. Yet every ton of paper ordered abroad which might have been ordered over here means all that. Nay, it means more. It means the misery and suffering of fellow countrymen who depend on us for employment which you are withholding from them.

It means higher taxation, and it means obstacles in the way of the restoration of our own rate of exchange, so necessary to assist in the reduction of the cost of living.

We must not lose sight of the fact that every workman we can lift from idleness into employment means increased spending power in the community. Money paid to him instead of to the foreign workman means not only help to our own industry, but help to a hundred other industries, principally to the distributors of food and the shops, who themselves are large consumers of the goods which you yourselves produce.

We are all groaning under an almost impossible burden of taxation. But the foreigner who takes your order escapes scot free from this as far as this country is concerned. The same applies to rates. To the cost of foreign paper must be added the cost of unemployment doles, plus the discontent and misery of our fellow-countrymen. That is an eloquent sentence for which I am indebted to one of your most eminent members.

Tangible Advantages.

Again, there are certain very definite and tangible advantages which the British papermaker has to offer you. He can give you better service in the way of delivery. You can draw from the home mill more frequently and consequently in more reasonable quantities at one time. This in turn reduces the quantity of stock which you need to carry. Storage, space and expense are saved, and the locking up of capital. All these considerations are inducements in favour of placing your orders at home. I have already referred to the question of increased cost of production due to working short time in our mills. I must complete that aspect of the matter by pointing out that if you can help us to get our mills to full production again it will naturally lessen the cost of production and put us in a better position to meet the foreign competition. That is the logical and inevitable conclusion from what I already said on this point.

A Higher Point of View.

So far I have examined this matter from the standpoint of self-interest only. But, gentlemen, I think we ought not to overlook the fact that there is a higher point of view to which the present circumstances of our country give a nature of much urgency and importance. It is a fact that one of the principal problems, indeed perhaps the greatest problem, which is facing all responsible men who care for this land of ours today is the terrible scourge of unemployment, and the distress and suffering and even danger which follow in its train.

I hold that it is the duty of each one of us to examine and search himself to see that he personally is doing everything which lies to his hand to do, even if it means much effort and sacrifice, to minimise unemployment in every way open to him. He must even find ways and means which at first glance do not seem to be open. I know of some papermakers who have even kept their workpeople on throughout all this terrible period, notwithstanding the fact that they have only had orders for less than half of the capacity of their mills.

It was open to these firms to close down and dismiss their employees. Such a course would have involved a loss trifling by comparison with that which has been incurred by the policy which they deliberately elected to pursue. In my own case I have been running my mill on those lines since January of this year, and I am proud to feel that my workpeople have been kept together at full rates of pay so far as the married employees are concerned.

But there must come a time, when, with the best will in the world, businesses cannot stand such a strain. In our judgment the time has now arrived when we must appeal to those who have orders to place to come to our assistance. Our need is urgent; it is desperate and we feel that our appeal will not be in vain.

We think that much is in your power. We would urge upon you to examine each line of your trade, to see if it cannot be modified in some way so as to make British paper available. To consider each order before it is sent to the foreigner, lest haply some British papermaker might handle it for you at no real sacrifice to yourselves. To impress upon your travellers and sales departments a vigorous and active policy of urging your customers to choose British-made papers in preference to the foreigner wherever that may be physically possible. To get in closer touch with British papermakers in order to see what they can do for you—you will be agreeably surprised at the result. Above all, to combat with all your strength the prejudice which

has been allowed to grow up in favour of foreign papers to the detriment of the British article.

If you will ponder over the figures I have given above showing the relation between the British total production and the total consumption, you will see that it is not an impossibility to get our British wrapping mills going again whilst still leaving room for the importation of all papers for which substitutes cannot possibly be manufactured here.

The Mental Attitude.

After all, gentlemen, the mental attitude plays a larger part in these matters than we sometimes imagine, and I repeat that the difference between a determined spirit of seeking to divert foreign business to British mills wherever physically possible and a spirit of apathetic indifference means just the difference between the British mills getting going again on the one hand, and closing down on the other hand. By the need of our stricken country to-day, by the sacrifices made, and being made, on the part of British paper-makers, by your own enlightened self-interest, I appeal to you to give serious thought to this subject. On behalf of employers and employed in an industry which means much to yourselves as well as to the country, I urge upon you concerted action on this matter of foreign competition.

An industry which employs eight thousand workpeople and a very large amount of capital deserves some consideration from those to whom it has always looked for its trade.

If this afternoon I have made any contribution towards that consideration taking practical shape in the form of a portion of your foreign purchases being diverted into British channels, if I have done anything to awaken that spirit to which I have referred, I shall be satisfied that I have not wasted your time.

It is reported that the American trade ship St. Louis, which is shortly to start on its tour of the world as a floating exhibition of manufactured goods of the United States, is not so elaborate as the British trade ship, and the rates charged for space are four times as much as the British.

Caxton Convalescent Home,

The Printer and His Paper.

Claim for Favoured Treatment from Wholesaler.

It is important for sellers of paper to understand the attitude of the printer to his suppliers, and in this connection Mr. Robert Hausauer, in the *Typhothetæ Bulletin*, makes the claim that the printer is entitled to favoured classification because of the service he performs in the merchandising of paper; that he earns the right to buy cheaper than can the consumer.

Mr. Hausauer is writing in reference to the "long price list for paper," which is a method of listing the price of paper at a percentage above the price at which the seller is willing to dispose of that paper to a favoured class. The writer points out in detail the extent to which printers enter into and assist in solving the problem of the distribution of paper.

1. Our numerous plants, serving as they do widely separated communities, engaged as they are in specialising in various kinds of printing, are convenient agencies through which to merchandise paper.

2. The personalities of printers and printers' salesmen are important factors in the distribution of paper. While it is true that printers are interested principally in selling printing, paper is the only tangible thing about which the average purchaser of printing can express an intelligent opinion. When buying printing, the purchaser buys everything, except paper, before it is finished. Therefore, much of the effort and time expended in effecting a sale of printing is devoted to satisfying the purchaser about paper.

3. Printers and their salesmen form the point of contact between the mill and the wholesaler, on the one hand, and the ultimate consumer, on the other. Indeed, it has been admitted that as much as 95 per cent. of the fine papers manufactured reaches the ultimate consumer through such agencies as the printer, lithographer and publisher.

4. Printers assume the obligation of correctly estimating the quantity of paper required to produce the job in question, and accept the consequences of error.

5. Printers assume the obligation of specifying the kind of paper best calculated to produce the desired effect with the greatest economy to the customer, and accept the consequences attending faulty judgment.

6. Printers purchase paper under trade customs designed to fit the convenience of the wholesaler of paper, and sell paper under conditions imposed largely by the needs of the consumer, absorbing any losses which arise through differences in the conditions under which they buy and under which they sell. Thus, if a customer having a mailing list of exactly fifty thousand orders exactly fifty thousand pieces, and we buy a special size of paper for use on that order, we may be compelled to accept an overrun or underrun of from 3 to 15 per cent., in the first instance, paying for paper we cannot use on that order, and, in the second instance, making up the shortage as best we can, usually at increased expense.

Must Conciliate Consumer.

The printer has to conciliate the ultimate consumer of paper for variations in weight and shade, accept responsibility for defects which cannot be detected before paper is cut, adapt his printing processes, to overcome defects in the paper and do countless other things imposed by the wholesaler and to most of which the consumer cannot and will not adapt himself.

7. The printer actually purchases the paper and assumes responsibility for shortage resulting from faulty delivery or mishaps in printing.

8. The printer stores paper until it can be printed and the capital required to carry paper in the form of unfinished work is an important factor in the merchandising of paper.

9. The printer insures paper against loss through fire until it is printed and delivered.

10. The printer subjects himself to costs in the physical handling and counting of paper, in the storage space he is compelled to maintain, in the tools and labour necessary to handle it.

11. The printer effects actual delivery of paper to the consumer.

12. The printer purchases his paper according to the terms of the wholesaler, and accepts his pay according to the terms usual in retailing.

13. The printer sustains his normal percentage of loss in the collection of that portion of

his accounts represented by the value of the paper used.

14. The printer assumes the cost of recording, invoicing and collecting for the paper used by his customers.

Mr. Hausauer submits that in the performance of these duties the printer accepts very definite responsibilities in the distribution of paper and performs all the functions of a retailer.

He adds: I do not want to be misunderstood as implying that the paper wholesaler does not enact a very necessary part in the distribution of paper. I believe quite the contrary to be the case. His capital, his warehousing facilities, his knowledge of where papers are made and where they can be procured, the work of his organisation in keeping printers informed as to new lines and changes in existing lines, his ability to carry stocks sufficient to meet average requirements, are all necessary and important factors in the satisfactory and economical distribution of paper. But I want him to respect our position. He enjoys just the privileges of recognition from the mills that we ask of him.

The point is, that in order to get paper from the manufacturer to the ultimate consumer, certain costs are created and certain services must be rendered. All these costs should be repaid in the ultimate price at which paper is sold and there should also be a profit upon services rendered by all agents to a satisfactory and economical distribution. The wholesaler's cost and profit are protected by the sales policy of the mills, and we want the wholesaler to protect our costs.

Mr. Hausauer proceeds to state reasons for believing that the long price list will be the most effective way to accomplish the ends sought.

There are two ways in which the desire of the consumer to purchase paper at wholesale prices can be checked. First, by the wholesaler flatly declining to sell him at any price, and, second, by the wholesaler selling to him only at a price sufficiently in advance of the price quoted to the printers to cover the costs which would normally accrue to the printer plus a fair profit for the services the latter will render.

Doubtless, the simplest plan would be for the wholesaler to decline absolutely to sell to the consumer, and if that plan could be generally adopted, I would consider that the wholesalers had done their whole duty to the printer. But I, for one, would ask of the wholesaler something more than his duty. We want his sympathetic co-operation in remedying a condition which exists, I admit largely through a lack of gumption in the printer. I do not regard it as probable that the wholesaler will continue to sell much paper direct to the consumers at an advance in price to cover the printer's cost and profits.

Business-like printers would immediately add their handling costs and profits to paper even though it were furnished by the consumer, and the results would be two profits to be paid on the same transaction, a condition which the consumer would very soon understand and avoid by letting the printer purchase all paper. I believe that either method would very soon amount to the same thing, except that the wholesaler issuing a long price list would still be privileged to sell such fine papers as were not intended for printing, a class of business he is better qualified to handle than the printer, and which possibly may be attractive to him.

LORD LEVERHULME, speaking at the annual dinner of "Pear's Annual," predicted that the literary advertisement would take the place of the artistic advertisement, for the public wanted now sound argument artistically put in words.

THE OLDEST TRADE PROTECTION OFFICE IN THE UNITED KINGDOM.

ESTABLISHED 1776.

PERRY'S Trade Protection Offices.

(W. R. PERRY, LTD.),

12, Coleman Street, London, E.C.2.

Status Inquiries made as to the position and standing of Traders and others.

PERRY'S GAZETTE and LIST OF CREDITORS are Published weekly, and are invaluable to every one in business.

DEBTS RECOVERED and PAID OVER PROMPTLY.

Particular attention is called to the fact that this is the only **TRADE PROTECTION SOCIETY** that possess at its offices in London Registers containing full Bankruptcy and other Registered Information, together with Status Information **FOR THE WHOLE OF THE THREE KINGDOMS.**

TERMS from £1 is. upwards, according to requirements. **PROSPECTUS** and further particulars on application to the above offices.

DIRECTORY.

Rates: £3 per annum (52 insertions) for each card of 2 lines or under; each additional line £1 6s. per annum extra.

BOOKBINDING MACHINES.

T. W. and C. B. SHERIDAN CO., LTD., 63, Hatton-garden, E.C.1. Sole Vendors of the Sheridan Bookbinding and Leather Embossing Machines, including Perfect Binders, Wrapping Machines, Case Makers, Paper Cutters, Embossing Presses, Bundling Presses, Gathering Machines, Die Cutting Presses, and all styles of Bookbinding Machines. Also the Burton Peerless Rotary Perforator, the Dexter Folding Machines and Automatic Feeders for all classes of work, the Dexter Combination Wire Stitcher and Feeder, the Jacques Shears and Paper-Box Machinery, the Kast Insetting, Covering and Wire Stitching Machine, etc.

BOOK-SEWING, STITCHING, Etc., MACHINES.

SMYTH-HORNE, LTD., 1-8, Baldwin's-place, Baldwin's-gardens, Gray's-inn-road, E.C.1. "Smyth" Book-Sewing Machines, built in 6 styles, 8 sizes, for Letterpress and Stationery Books. Over 8,000 sold; Chambers' line of Book-Folding Machines, with King Continuous Feeders; Seybold's New "Dayton" Paper Cutting Machines; New Three-Knife Book and Pamphlet Trimming Machines, Embossers, etc.; Anderson's Rapid Folding Machines.

"DURABLE" PRINTING ROLLERS.

"THE DURABLE" PRINTERS' ROLLER CO., LTD. Charles-street, Hatton-garden, London, E.C. Manager, E. L. Marler.

PAPERMAKERS' ENGINEERS.

Safety in the Printing Office.

By HARRY A. MADDOX.

Accidents in printing offices are mainly caused by unfenced machinery or shafting, floor obstacles, projections, or inefficient lighting, undue exposure to fire risk and personal carelessness. Granted every reasonable precaution, accidents will happen, and their occurrence must be provided for. Some one person should be appointed in charge of the first-aid cabinet, and a record should be kept of all accidents, however trivial. The cabinet should be fitted out with a comprehensive range of medical necessities covering ordinary ailments as well as casualty cases. Large offices are not now considered complete without the first-aid room and medical attention on the spot.

Prevention of Accidents.

Having provided efficiently for accidents, the next thing is to reduce their number to the absolute minimum. Machinery must, from legal necessity, have its exposed moving parts guarded. The guards, or fences, are best of a fixed character wherever possible, especially for belting. Employees are not sufficiently careful of their own safety, and many accidents are the result of unused or misplaced guards. Upright guards should either have solid foundations or be fixed to the floor. For lightness and space economy, wire guards are to be recommended. Motors are best encased in wire frames, wooden covers embodying a certain amount of fire risk, in addition to inherent clumsiness and obstruction.

The relation between inefficient artificial light and accident has been referred to, and the fact may be merely stressed here that accidents in contact with moving machinery most frequently happen under the influence of bad light and excessive glare.

Precautions Against Fire.

Fire safety is perhaps the most essential of the many safeguards which must be introduced as part of every manufacturing enterprise. Certainly the fire peril is the most terrible of the dangers to be faced, but it can be reduced to almost negligible proportions by a well devised scheme of protection, safeguard, and combatance. The modern building should be of fireproof material, fitted with armoured steel fire-resisting doors, automatic alarm and sprinkling apparatus. Unfortunately, most of the existing types of building are anything but fireproof in their nature and the utmost the occupier can do is to cover his risk well and introduce all the safeguards possible. Apart from accidents and sheer carelessness, the chief causes of fire include heat from gas engine exhaust pipes and slow-combustion stove pipes, spirit vapours contacting with

naked flame, defects in electric wiring, and spontaneous combustion (as in the case of heaped-up oily rags).

The precautions taken by the intelligent printer (including those of legal necessity) would be the election of a person or persons in each department responsible for that department, and the formation of a fire-committee constituted by these persons under a nominal head. Fire drill would be practised at set intervals, with occasional sham alarms (the workpeople having been notified previously). Fire buckets, supplemented by patent extinguishers and sand, would be amply provided in each department and the departmental fireman would be held responsible for their efficient maintenance. In large establishments hose and hydrants would be installed. Fire exits and escapes would be provided and kept clear, and the escape would be fitted with high side rails. Floors would be kept clean and free from refuse. Naked lights would be forbidden in use. Oil drippers and trays would be installed at every point where the probabilities of falling drops of oil were manifest, and also beneath all machines. Galvanised iron bins would be provided as receptacles for oily rags and refuse. Paraffin or other inflammable spirits would be stored under special supervision. Smoking would be rigorously repressed. Gas and open fires are dangerous in the workshop and should give way to electricity and steam or hot-water heating.

Automatic Protective Devices.

According to the efficiency of the precautions against fire the assessment of risk will be adjudged more or less in favour of the occupier. Insurance companies will grant extra concessions in cases where automatic sprinklers, alarms, or other approved appliances have been installed. Automatic sprinklers are perhaps the most efficient and efficacious reagents against fire, but they are also the most costly. In many instances they have been restricted to an infinitesimal amount of damage which would otherwise have totalled to enormous proportions. The installation of sprinkling apparatus comprises a network of pipes along the ceilings of the various rooms, connected up with the water supply. For every 100 square feet of area a nozzle is provided, plugged with a small marble. The marble is held in position by a strut secured by solder metal with a melting point of 150° F. In the event of an outbreak of fire the temperature rises and the solder melts, releasing the marble and permitting an immediate flow of water in the locality. The spread of the water is assured by an ingenious contrivance which converts it into a wide volume of spray. In addition to the water action, automatic

sprinklers also give an alarm and indicate the locality of the outbreak.

The ordinary automatic fire alarm works on the principle of expansion by a rising temperature. A number of detectors are affixed at convenient intervals and connected up with an indicating board at the entrance to the building or even direct with the fire station. In the event of fire, the expansion of a metal strip closes an electric circuit and causes the alarm bell to ring continuously, at the same time indicating the point at which the fire has started.

Chemical extinguishers act upon the basis of oxygen exclusion. Fire depends upon an available supply of atmospheric oxygen, and the object of the extinguisher is to propel carbon dioxide gas on to the outbreak for the purpose of damping it down. The sulphuric acid and the bi-carbonate of soda in the apparatus unite to form sulphate of soda and carbonic acid gas, with water. Small outbreaks are immediately suppressed under the action of this preparation.

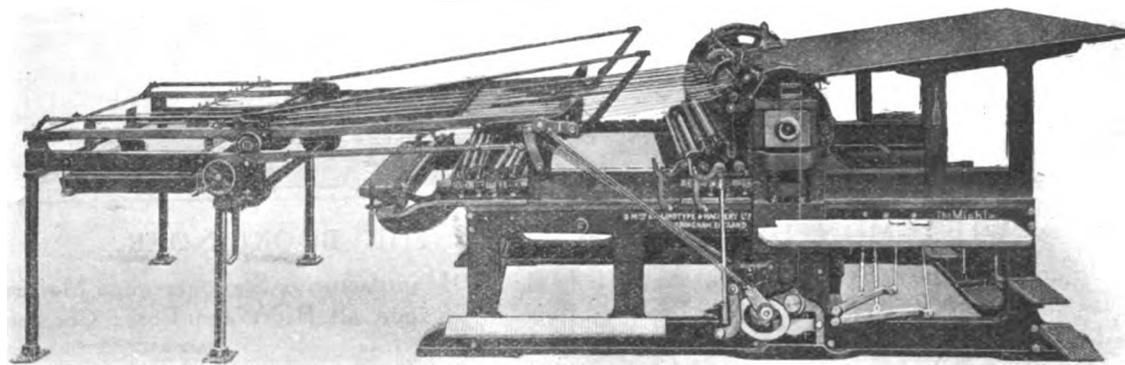

Fire Insurance.

Having taken every reasonable precaution against fire, the printer must still assume fire to be a contingency to be thoroughly insured against. To meet the requirements of the insurance company, when claiming, the value of every item destroyed must be proved. The onus is upon the printer, and his only reliable evidence is an up-to-date inventory compiled by an independent and authentic professional. The inventory should be itemized in full detail and classified by departments and floors. Exhaustive summaries should classify the component parts, giving departmental analysis and aggregate total values of machinery, motors, shafting, belting, furniture, fixtures and fittings, tools and utensils, type, designs, standing matter, blocks, stock, etc., etc. Three copies of the inventory should be issued, one being held by the valuer, one by the printer, and a main summary by the insurance company, whose acceptance of the figures should be secured. A rate of depreciation could be agreed upon, but the printer would necessarily keep his inventory posted up to date with alterations and additions. The insurance policy itself must be in such terms as will clearly account for everything for which the printer is liable or responsible, including telephone installations, goods held in trust, buildings, work in progress, standing matter, designs, etc. In the event of a fire, loss of profits over a specific period must be assumed, and rent and other expenses during the period of reconstruction should be fully covered. Much subsequent worry, trouble and loss would be avoided if clear

An extract from a new book in preparation.

The Miehle

TRADE MARK

EQUIPPED WITH FACE-UP PILE DELIVERY.

This delivery enables the printed sheets to be delivered directly on to a board ready for removal in bulk by truck without disturbing them. The piling of the sheets in this way gives the printed matter ample time to dry, and not only dispenses with the usual labour required to move the sheets from a delivery board every half-hour or so, but safeguards the work against spoilage through smudging of ink, etc.

and adequate arrangements were made at the time of carrying out an insurance policy. The revolution in values brought about by the events of recent years has negated the utility of any data compiled at an earlier date, and it is of vitally serious import to the trade that modern risks and modern values should be met and covered by modern figures.

The Rating of Machinery.

A Matter of Prime Concern to the Printing Industry.

It is not yet sufficiently realised by printers that the law as it stands permits the local surveyor in most districts to assess for rateable value not only the building, but also the machinery and plant contained therein. The popular opinion that such an assessment would stop short of any contrivance unattached to the premises is not founded on fact. Unrepealed Acts governing rating date back to the Statute of Queen Elizabeth, and have been complicated by legal decisions since given in many cases brought before the Courts. The outstanding fact is that the decisions have, without exception, confirmed the liability of machinery to assessment, whether attached permanently to the hereditament, affixed to the floor, bolted down, or resting by their own weight. The reasoning is that plant and equipment increases the value of the hereditament and that the assessment may be based on the entire value of the establishment to a willing tenant.

Practice of Rating Growing.

The Poor Rate Exemption Act of 1840, which is renewed annually, was introduced for the purpose of prohibiting the rating of personal chattels, but subsequent legal decisions have nullified the intended relief and left open the way for inclusive assessment according to the discretion of the surveyor. Hitherto it has not been the uniform practice of surveyors to include machinery in their assessments, especially in the principal manufacturing districts, but recent events evince a growing tendency to take advantage of decisions of the supreme Court of Appeal.

Alverstoke, Birmingham, Manchester, Plymouth, East Stonehouse, and Southampton are covered by the Union Assessment Acts of 1862. Scotland is supposed to be exempt from machinery rating by Act of Parliament, but by an obscure clause which made its way into law through an Omnibus Bill, the Glasgow Corporation secured the right to enforce assessment of plant for rating purposes.

Onus on the Tenant.

In the County of London, assessments are revised every fifth year, with due allowance for appeal, claim, or protestation, but the onus of claim or appeal is with the tenant, who must comply within the specified period or forego his privilege. Elsewhere, assessments may be made as frequently as the Commissioners may deem fit and proper. Abroad the rating of machinery is not recognised.

The danger to every printer is therefore a very real one as the law now stands, antiquated though the Acts may be. There is nothing to prevent the Commissioners or local surveyor from assessing for rateable value the whole of any factory or printing office as it stands, including its contents.

A Bill for Relief.

A Bill for the Relief of Machinery from Rating has been before the House of Commons at intervals during the last 30 years, and although on several occasions it has passed the second reading, support has not been strong enough to carry it through to the Lords. The Bill provides that machinery, tools, utensils, and appliances which are not fixed, or only so fixed as to be removable without necessitating the removal of any part of the hereditament, should be excluded from assessment for rating purposes.

SIR CHARLES MANDLEBERG suggests that the next trade boom may come as suddenly as the slump. Therefore he urges manufacturers not to lose any time in completing their selling arrangements abroad, so that when the buying begins they will have their selling representatives on the spot ready to do business for them.

Monotype Demonstration at Bristol.

Lecture to the Trade.

An interesting meeting was convened recently under the auspices of the Bristol Centre of the Printers' Managers and Overseers Association for the purpose of demonstrating the working of the Monotype composing and type-casting machine. Major J. A. Arrowsmith Brown, D.S.O., placed his premises at the disposal of the members of the Association for this purpose and a very large and representative gathering attended to see the different processes in actual operation. Not only were the machines composing straightforward matter, but complicated and tabular work was also in operation. Further, they were shown the latest innovation, that of casting leads and rules, also display type. An hour and a half was spent in this manner, at the conclusion of which the president of the Association, Mr. J. M. Dodds, proposed a hearty vote of thanks to Major Arrowsmith Brown for his kindness.

The members assembled later at Messrs. Stuckey's Restaurant, where to the number of over 50, tea was served by the hospitality of the Lanston Monotype Corporation. Amongst those being present were Mr. F. G. Jones, secretary of the Bristol Master Printers' Association, and Mr. W. Stone, secretary of the Typographical Union. Mr. Jones, in a few apposite remarks, dealt with the advantages to be derived from practical demonstration, such as that given in the afternoon, and complimented the Lanston Monotype Corporation on their forward and broad-minded policy in thus offering facilities to managers and overseers for obtaining a knowledge of the capabilities of the machine.

Mr. J. Bowen, the secretary of the Printers' Managers' and Overseers' Association, supplemented these remarks and also expressed his thanks, on behalf of the Association, for the kindly hospitality displayed to them that afternoon.

Mr. E. Quick, branch manager, Bristol, replying for the Lanston Monotype Corporation, mentioned that they were willing at all times to help an association such as had met that afternoon. As he believed, it was the best way of bringing the advantages of any machine before the trade.

At 6.15 a lecture, open to the trade, was given at the Merchant Venturers' College (by kind permission of Professor Wertheimer, B.Sc.), by Mr. E. Quick, the chair being taken by Mr. J. Corrigan, chairman of the Bristol Master Printers' Association.

Mr. Corrigan, in introducing the lecturer, expressed his pleasure at taking the chair on the occasion, in view of his position as chairman of the Bristol Master Printers' Association. He mentioned incidentally that the house with which he is connected has had the longest connection and probably the greatest experience with the Monotype type-casting machines of the houses in the West of England. He was connected with the introduction of the first type-setting machine introduced into Bristol, this being the Thorne Simplex, and later introduced the first Linotype into the town. He commented upon the effect of the introduction of type-composing machinery, stating that ultimately it must be to the good of not only the printing trade itself, but the community in general.

Mr. Quick prefaced his address upon Monotype by a brief resume of the innovation and development of type-setting machinery, slides of these being shown, which met with much appreciation. Following this, the history of the Monotype from its inception in this country was dealt with and then the lecturer proceeded to explain fully the mechanical parts of the machine. The various models were dealt with, explanations being made of the manipulation of the keyboard, spacing out the lines, perforating the paper roll, transferring the roll to the casting machine, showing the action of such perforations when in contact with compressed air, bringing the die-case into correct position for casting the different characters, the method of obtaining perfect alignment, and the casting and delivery to the galley of the finished matter. In fact, the machine does everything except the printing. Many interesting points were so clearly explained that it was made possible to those who were unacquainted with the machine, and to whom it had appeared intricate, to follow without difficulty.

At the conclusion, Mr. W. Stone, secretary of the Typographical Association, proposed a hearty vote of thanks to the lecturer, also including the chairman, who at the end of what he (the speaker) knew had been a very arduous week, had found time to be present at the meeting. He emphasised the extreme desirability of such gatherings as that, and also the meeting together of those representing the different spheres such as they had that evening, in their chairman as head of the Master Printers, the president of the Printers' Managers' and Overseers Association, and himself as representing the Typographical Association, and trusted that many other occasions would occur when they could meet and confer together.

Mr. Dingle, of the *Western Daily Press*, seconded this, and the evening was brought to a conclusion by a brief response from the chair.

Scottish Notes.

(By Our Edinburgh Correspondent)

In spite of the depression in trade generally—or perhaps because of it—the New Year holiday has been freely celebrated in Scotland. The break came as a welcome relief, and now it is over, everyone is turning, with what hope they can summon up, to the promise of the New Year.

THE printing trade is only moderately busy, and it is feared that a good deal of the book printing for publishers has gone permanently to the South.

THIS depression adversely affects the paper-making industry, which is still pretty lifeless. In this respect prominent makers of paper-making machinery state that since January last new orders have been practically non-existent, their absence giving the directors the gravest anxiety.

ALTHOUGH busy during the past year on previous orders, the directors state that the current year promises to be one of the most trying that the company or its predecessors have ever faced. In this connection it may be borne in mind that most of the paper-makers put their war profits into new plant before the trade slump came.

IN paper circles there is little business being put through yet, and any orders coming in cause quite a flutter of excitement.

THE combination of esparto mills has aroused great interest in the North, and more details are anxiously awaited. The object of the scheme is to promote economy of working, especially on the distributing side. Scottish esparto papers occupy a unique position, and this new development will help to extend their fame still further.

Marking of Goods for Canada.

The office of the High Commissioner for Canada issues the following announcement:—

Referring to the Regulations recently made by the Canadian Government for the marking of goods imported into the Dominion, section 13 has been amended, and now provides as follows:—

"The name of a manufacturer or his trade mark accompanied by the name of the country or a place in a province, State, or other division of a country where the goods have been manufactured or produced will be accepted as sufficient indication of the country of origin."

Further, sub section A of section 16 has been cancelled, and the following substituted:—

"Cloth and material in the web or roll shall be marked with an indication of the country of origin on the piece ticket label, or band, or on one end of each web or roll."

ANOTHER new use for paper appears to be that of a saw, for it is demonstrated that a piece of paper rotated at high velocity will cut through wood like a saw.

“SLOGGER”

AUTOMATIC SHEET FEEDER

THE half-tone figures 1 and 2 show the new type Slogger Feeder attached to the Miehle 2-rev. Fig. 1 is a Near Side Rear View showing how all the control handles have been placed as near as possible in one position and all within easy reach of the machine minder's hand, as follows:

2. Pile Raising Adjuster for automatically regulating the Top Height of the Pile.
5. Stopping Handle.
6. Starting Handle.
7. Trip Re-setting Lever.
11. Air Valve for Controlling the amount of draught required to separate varying weights of paper.

Figure 2 is an offside rear view with gear guards removed showing how all working parts are equally accessible from either side of the feeder.

The Air Blower No. 9 has now been mounted centrally with the Feeder in one unit, and will in all cases where possible be driven by a separate and independent electric motor.

This makes the Feeder entirely self contained and gives the machine-minder clear access between his press and the feeder for making ready and attention to his forme.

In all cases where the press is in good condition perfect register is guaranteed and the press can be speeded up to the full speed guaranteed by the press makers.

One of the greatest advantages of the method of separation on the “Slogger” is the strong current of air directed through the sheets by oscillating blower which ensures each sheet being separated some thirty times before it is taken away to the press. This method of separation frees the paper from all dust and fluff and as a result the machine-minder does not have to wash his forme nearly so often as when feeding by hand or when using other feeders which do not blow the dust or fluff out of the paper.

PERFECT REGISTER.

HIGH-SPEED.

Trade Notes.

MENDIP PRESS, LTD.—The goodwill of this business has been purchased by the Wessex Associated News, Ltd., Bath. The services of the staff have been retained. The freehold property, letterpress and binding plant and machinery will be submitted for sale by auction on the 18th inst. by Mr. Robert H. Ruddock.

MR. SIGISMUND C. H. GOETZE, the famous artist, is prosecutor in a case of alleged libel at Bow-street. The defendants are Captain Harold Spencer, Great Ormond-street, W.C., and Messrs. G. T. Holder, A. E. Holder and G. F. Holder, trading as G. Holder and Sons, printers, Lamb's Conduit-street, W.C., who were summoned in respect of an article published in *Plain English*. The hearing was adjourned until Monday next.

MESSRS. SELFRIDGE opened on Monday, at their Oxford-street premises, an "Industrial Exhibition," designed to show some of the smaller industries at work. Among the industries included are type-setting, book-binding, and marbling.

The man who, as reported in the *Daily Press*, fell over the cliffs at Beachy Head on Sunday has been identified as Mr. Arthur Hentschel, 46, Eastbourne. He is a brother of the well-known photo-engraver, Mr. Carl Hentschel, and was connected with a firm of lithographers in High Holborn.

It is reported that a new Unionist weekly newspaper will be launched at Scarborough early in February, for service in Scarborough and the Whitby Division, under the title of the *Scarborough Standard and North and East Riding Gazette*.

PHOTO LITHO'D NEWSPAPER.—The proprietors of the *Blackpool Times* (the Blackpool Free Press, Ltd.), are to be congratulated upon their issue of January 6th, which marks a new step in the production of this newspaper. This issue is produced entirely by the photo litho offset process, and the *Blackpool Times* is the first newspaper to be printed by this method in Great Britain and Ireland.

MR. JOHN S. BIRDSALL, who for nearly forty years had been a member of the composing-room staff of the *Yorkshire Post*, has died at Leeds in his 60th year.

ARRANGEMENTS are in hand for two *Daily Herald* "Back-to-a-Penny Conferences" to be addressed by Mr. George Lansbury this month. London and Sheffield are the centres chosen.

A RESOLUTION protesting against any printing required by local firms being sent out of the town at a time when so many members are out of employment through depression in the printing trade has been passed by the Swansea Typographical Society.

PETITIONS signed by some 500 night workers living in many of the South-Western districts in London have been forwarded to the London County Council requesting an adjustment of night tramway services on the Brixton and Tooting routes, which will more fully meet their needs.

The annual dinner of the *Daily Chronicle* advertisement staff was held on Friday evening at the Holborn Restaurant, Mr. Arthur Richardson, advertisement manager, occupying the chair.

The staff of Messrs. Charles Birchall, Ltd., proprietors of the *Journal of Commerce* and associated businesses, held an enjoyable social evening at the Britannia Rooms, Liverpool, on Saturday, when members of all departments met in good fellowship. Among those present were Mr. C. Herbert Birchall, J.P., the head of the firm, and Mrs. Birchall, J.P., a director of the company, and other members of the Birchall family.

The executive council of the British Empire Exhibition announce that an anonymous donor has undertaken to be responsible for the last £80,000 of the £1,000,000 wanted.

The British Institute of Industrial Art, of which Sir Hubert Llewellyn Smith, G.C.B., is chairman, is opening an Exhibition of Present Day Industrial Art, to be held, with the sanction of the President of the Board of Education, in the North Court of the Victoria and Albert Museum, from January 16th to February 25th, inclusive.

APPEALS on behalf of the Arthur Pearson Memorial Fund are being sent out all over the world.

The late Mr. Richard Bolton, Liverpool-printer, sole proprietor of Messrs. Bolton Bros., left £3,789.

FRANK DIGBY HARDY, alias D. C. Hughes, 53, previously describing himself as a journalist but who now appeared in the calendar as a bookbinder, pleaded guilty at Monmouthshire Quarter Sessions last week to obtaining £10 by means of a worthless cheque at Abertillery. A large number of previous convictions were proved and it was stated the police at present held six warrants for prisoner's arrest. Sir Henry Mathers Jackson, the chairman, said the court could not pass a less sentence than five years' penal servitude.

INTERESTING details of a profit-sharing and share-owning scheme in successful operation are given in the current number of *Newton Mill Journal*, the attractive little house journal issued by the stationery firm of Jacobsen, Welch and Co., Ltd., Hyde, Cheshire.

The Sheffield Advisory Committee of the Joint Industrial Council of the Printing and Allied Trades devotes its attention mainly to educational and social matters. For the present season a course of six lectures was arranged, and the two lectures which have been held already have been attended with great success. The New Year's programme opened with a big social on Saturday.

The proprietors of the *Evening Express*, Cardiff, have promised a valuable challenge shield to the newly-formed Welsh Boxing League.

The late Mr. Edward Joseph McManus, of Highdown-road, Hove, a well-known author and journalist, at one time editor of the *Morning*, and, during the war, of *Blighty*, who died June 17th, aged 59, left £1,323.

MESSRS. HILL, SIFFKEN AND CO., LTD., the poster specialists, again remember their friends this New Year with a serviceable desk blotter which gives the dates for the whole year on each sheet of the blotting paper.

PRINTERS' PENSION CORPORATION subscribers who have votes for disposal are being asked to give assistance to Mr. Ernest Ward, aged 72. The case is strongly recommended.

BOOK-PRODUCTION FIGURES.—The *Publishers' Circular* records a total of 11,026 books as having been published in the United Kingdom during the year 1921. This is an increase of 22 compared with the total for 1920. The two years closely resemble one another in their main features. New books were 19 more than in 1920, the totals being 8,757 and 8,738; and new editions only varied by 3, the totals being 2,269 and 2,266. It is interesting to notice that the year's total is now about 1,000 less than in the years immediately before the war. The worst of the war years was 1918, when our total output of books was only 7,716 as against 12,379 in 1913.

A GENERAL STRIKE in South Africa appears at the time of writing, to be certain.

It is stated that the Australian Workers' Union, by a 7 to 1 majority, have voted in favour of "One Big Union" for all workers in the Commonwealth.

SWISS master printers have denounced the agreement with their employees as from December 31st of this year, with the object of reducing wages on the ground of the decreased cost of living.

CANADA during the seven months' period ending October, 1921, imported printing and bookbinding machinery of the value of \$1,165,000, as against \$2,130,000 last year, and \$1,219,000 in the seven months of 1919.

ANALYSING the trade of Ireland for the year 1919 in connection with the Irish settlement, it is pointed out that £162,000 worth of paper was received from Canada, Sweden, U.S.A. and Holland; £154,000 of wood pulp from Norway and Sweden, and £19,000 of straw-board from Holland.

The Department of Overseas Trade is in receipt of information from the Commercial Counsellor of his Majesty's Embassy in Tokio (Mr. E. T. Crowe, C.M.G.) regarding the forthcoming Peace Exhibition, which is to be held there from March 10th to July 31st, 1922. The Commercial Counsellor states that this exhibition may prove a good opportunity for showing new British goods, and he recommends British firms to make a small exhibit.

The Financial Ministry of Esthonia proposes to buy the Rappin paper mill, where State paper money is made, the price being 30,000,000 marks.

PRINTED books (in 100 kilos.) were imported into Switzerland during the nine months ended September, 1921, to the extent of 16,116 (of the value of 5,676,000 francs), 26,963 (13,626,000 francs) in the corresponding period of 1920, and 20,767 (12,926,000 francs) during the nine months of 1913.

"The Printer and His Paper."

SIR,—I feel that I cannot pass the opportunity of expressing my gratitude to Mr. Silvester for his interesting letter in your issue of the 5th inst., in which he gives us the benefit of his own experience with regard to paper.

I sincerely hope that Mr. Silvester has not got the impression that the papermaker was blamed for the deterioration of paper and boards, on the contrary, Mr. Dawe spoke very feelingly for the papermaker.

With regard to consulting a specialist, I am afraid Mr. Silvester must be under a misapprehension if he thinks that Mr. Dawe means "a beaterman or a machineman skilled in the production, storing and handling of papers and boxboards." As a very interested listener of Mr. Dawe's address at that meeting, I am sure that I am voicing the opinion of the remaining members who were present, that Mr. Dawe's meaning of a specialist was one who had a very thorough knowledge of paper-making, etc., combined with a thorough knowledge of the chemical and scientific side.

Again thanking Mr. Silvester and hoping that I have answered his doubt,

Yours, etc.,
FRED. H. COLE.

Hon. Secretary,
 S.W. London Master Printers' Association.

92, Vauxhall Bridge-road,
 January 6th.

The Printers Trade Journal.

SIR,—It was a cheering sight to see the *British and Colonial Printer and Stationer* itself again last Thursday, not only in size but as suggestive of uncurtailed satisfaction for its readers on perusal in the near future. Why is it that printers, though engaged in supplying the wants of so many other trades in this respect, yet have neglected to keep themselves abreast of the times by maintaining a worthy production for themselves? A trade organ is undoubtedly a most effective means of trade organisation. To see again a printers' journal defying expense is truly a hopeful sign of better times ahead.

Yours, etc.,
JOHN R. BURT.

Morton, Burt and Sons, Ltd.,
 Paddington, Jan. 7th.

SIR,—Congratulations on coming out in the old size again! A great improvement.

Yours, etc.,
G. BASIL BARHAM, C.E.,
 M. INST. M.E.

East Acton, January 7th.

"MEN AND THINGS."

Short Articles by Mr. Frank Colebrook on "Men and Things" in the printing world will appear in this Journal, commencing with our next issue.

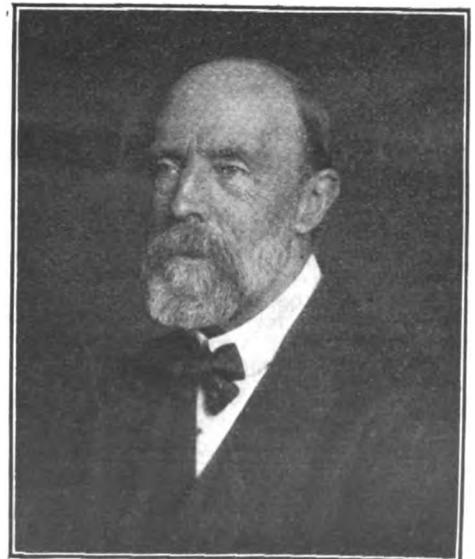

Photo by Margery Colebrook,
 Hazelsville Studio, 92, Hazelsville Rd., N. 10.

FRANK COLEBROOK.

South-West London Master Printers.

Allegations of Price Cutting.

In addition to the address on Cost Finding, which was given by Mr. R. B. Simnett, and which will appear in our next issue, there were one or two matters of interest discussed at the meeting of the South-West London Master Printers' Association, which was held on Tuesday night last week at the Chelsea Town Hall, under the presidency of Mr. J. D. Wise (Messrs. Wise and Co., Battersea).

The chairman, in opening the meeting, referred to the question of the Alliance block vote and to the question as to whether there should be any alteration. He thought, in view of the subscription which London contributed to the Federation, that it was entitled to the vote which it at present possessed, and he thought there should be no alteration while the rate of subscription remained as at present. He pointed out that at present London could carry anything by the preponderance of its vote, and he thought they should not forego anything that would endanger the condition of the craft in London, where they could deal with the unions in the printing trade in their own way.

Mr. Young mentioned that the attitude of some of the Alliances was that if they regulated the voting power according to the subscription it was not a sufficiently democratic procedure.

Mr. Spring, who mentioned that the Printers' Managers and Overseers Association had had a similar question before them, proposed that no alteration be made with regard to the block vote.

Mr. E. G. Cole seconded the resolution, which was carried unanimously.

The chairman, following a communication from Mr. Nuttall, asked the members to give serious attention to the literature which had been issued with regard to the employment of ex-sailors and soldiers as apprentices in the printing trade.

Price Cutting.

Mr. F. H. Cole, hon. sec., read a letter from a firm of printers, who were formerly subscribing members, alleging price cutting against a member of the Association.

The chairman observed that price cutting was all too rife in their district, and even among their own members. He mentioned a case of his own concerning 25 double demy posters for which his quotation was 30s. The customer, however, whom he had served for many years, had placed the contract elsewhere for 12s. 6d. On approaching the firm with whom the order was placed, Mr. Wise was informed that the work had actually been done by a trade printer who charged the firm who received the order 10s. 6d. Mr. Wise pointed out to his competitor that when he took into consideration the cost of handling the job he probably only made 6d., or might in fact have lost 6d. Whether he had or had not made anything out of the order himself, he certainly had injured him (Mr. Wise). This was one of those cases where, by cutting-in, the competitor did no good to himself but injured a fellow member and did harm to the trade. With reference to the particular case referred to in the correspondence, the chairman pointed out that it was not necessarily a case of price cutting until they had proof, and accordingly the matter was referred to committee for consideration.

The chairman introduced Mr. Peters, an additional organiser from head quarters, who, he said, came to them with a splendid record and who had been a master printer himself. Mr. Wise expressed the belief that Mr. Johnson and Mr. Peters would do all they possibly could, not only to bring in new members, but to work up interest among the old. He expressed regret that out of a membership of 90 they could only rely upon a very small proportion attending their meetings. It was "live" members they wanted, especially in these times.

The election of new members of the Association concluded the business.

GLUE MANUFACTURE IN INDIA.—We learn from the Department of Industries, Madras, that the Experimental Glue Factory, Washermanpet, Madras, South India, manufactures glues, and in cases of large orders glues can be supplied as far as possible to customer's requirements.

Printers' Managers and Overseers ASSOCIATION.

January Meeting.

A smoking concert was the principal item on the agenda of the January meeting of the P. M. and O. A. held on Tuesday of last week at the "Old Bell," Holborn. A short business session preceded the concert. Mr. S. M. Bateman, president, was in the chair, and there was a good attendance of members.

After the minutes of the December annual meeting and special general meeting had been read and confirmed, intimation was made that the vice president, Mr. R. H. Berry, had written to apologise for absence owing to illness. It was also announced that a few lines had been received from Mr. E. H. Berryman who was in hospital with a view to undergoing an operation. Those present heartily supported the president's expression of hope that if an operation did take place it would be a very successful one and that Mr. Berryman would soon be amongst them once more. Mention was also made of the indisposition of Mr. W. H. Gill (the financial secretary) and Mr. R. Condliff.

A letter was read from Mr. E. Moyce, son of the late secretary, Mr. Edward Moyce, requesting the general secretary to bring to the notice of members his mother's candidature in connection with the Printers' Pension Corporation election next March Mr. Whittle announced that at the next election the Association would be asking for members' votes on behalf both of Mrs. Moyce and Mr. J. J. Smith.

Three candidates for membership recommended by the Council were unanimously elected; they were: Mr. C. H. Fryer (E. Couchman and Co., Ltd., 15, Moorgate-court, London, E.C.2; overseer—composing room); Mr. I. W. J. Ryman (The Botolph Printing Works, 8, Gate-street, Kingsway, W.C.; overseer—composing room); and Mr. W. Strachan (Barclay and Fry, Ltd., Southwark, S.E.; overseer—machine room: Litho).

Special Delegate Meeting.

The meeting next considered a recommendation by the Council *re* Rule 4, "That the Special Delegate Meeting be held at Nottingham, on Saturday, February 4th, 1922."

Mr. Whittle explained that Nottingham had been chosen at the venue because members from all Centres could visit that town and return the same day, as was desirable in the interests of economy. He said the date, February 4th, had been arranged so that delegates would have an opportunity to report to their Centres at the next general meetings. The Council's recommendation was unanimously endorsed. Another recommendation of the Council was also carried unanimously—*re* Article 9, "That this matter be also dealt with at the Special Delegate Meeting," Mr. Whittle remarked that upon this matter—which was discussed at the December meeting—there would not be general assent of the various Centres, and that therefore it would be businesslike to deal with this subject also at the February Special Delegate Meeting.

As London delegates to the Special Delegate Meeting Messrs. A. E. Jarvis and J. C. Pugh were elected, members being reminded that the rules provided for the attendance of the president and general secretary.

Before announcing the commencement of the concert, the president on behalf of the Council wished every member present a happy and prosperous New Year.

Bohemian Concert.

Mr. Eric Clifford's Bohemians, who have previously entertained the Association very agreeably, again earned a cordial reception. Miss Madge Clinton's vivacious songs were a strong feature of the programme, and hearty applause was gained also by Miss Ethel Golding (soprano), Mr. Stanley Graham (humorist), Mr. Sydney Bridger (baritone), and Mr. Erne Durnell, whilst Mr. Eric Clifford acted as accompanist throughout, and also contributed songs at the piano.

During an interval in the concert programme the president introduced the treasurer of the Glasgow Centre, Mr. J. H. Adamson, who was accorded a hearty reception, and who briefly expressed his pleasure at being present.

At the conclusion a cordial vote of thanks to the artists was moved by Mr. S. A. Dawson, seconded by Mr. French, and carried unanimously.

Government Contracts.

Contracts were placed with the following firms during November:—

Stationery Office.

INK.—Coates Bros. and Co., Ltd., London, E.; B. Winstone and Sons, Ltd., London, E.C.

LOOSE LEAF BINDERS AND METALS.—Webb, Son and Co., Ltd., London, E.C.; British Loose Leaf Mfrs., Ltd., London, S.E.; A. E. Walker, Ltd., London, N.

PRINTERS' SUNDRIES.—Fry's Metal Foundry, London, S.E.; J. Haddon and Co., London, E.C.

India.
MACHINES, MONOTYPE.—Lanston Monotype Corporation, Ltd., London, E.C.

The Linotype for Display Work.

Messrs. Linotype and Machinery Ltd. write to point out that at the top of the second column on page 3 of our last week's issue under the heading "Looking Backwards," is a statement concerning the Linotype, which rather suggests that the Linotype of to-day produces solid matter only, and leaves the composition of display work to machines other than the Linotype.

As it was not the intention of the writer to leave in the mind of the reader the impression that the product of the Linotype was purely body matter we gladly take this opportunity to remind readers that—as they have doubtless learned from our advertisement pages—the Linotype has for some considerable time past arranged for the continuous composition of text matter up to 14-point and display matter up to extended 36 point, the whole of which is produced by one operator direct from the keyboard—the matrices of the large display faces being assembled and cast in precisely the same way as the smaller matrices for regular body matter. As a matter of fact, so wide is now the field of Linotype capability, that the striking claim can be made that any printer can to-day install a Linotype to set fully 95 per cent. of his composition.

Out of Their Time.

Messrs. J. Fry and A. Gowler, of the Electro and Stereo Department of Messrs. Cassell and Co., Ltd., have just completed their apprenticeships, and to mark the occasion the event was celebrated on Saturday by the holding of a dinner and concert at the Falcon Hotel, Gough-square, E.C.1. The chair was occupied by Mr. W. Forsyth and the vice chair by Mr. W. Longley, and there were between 50 and 60 present. The musical items and the dinner were admirably arranged and the toast-list, though brief, contributed much to the success of the evening.

The toast of the "Visitors," proposed by Mr. P. Taylor, was responded to by Mr. W. C. Warren and Mr. W. Bullett, two erstwhile servants of the House of Cassell.

SPECIAL PREPAID ADVERTISEMENTS

The Minimum Charges for Three Lines, with an average of seven words to the line, for Advertisements under the headings given below are as follows (extra lines at proportionate rates):—

Representatives throughout the United Kingdom and also in Australia, New Zealand, India, South Africa, United States, South America, Canada, etc.

THURSDAY, JANUARY 12, 1922.

Municipal Printing.

THE important subject of municipal printing has cropped up in acute form at Newcastle-on-Tyne owing to a proposal of the Newcastle Corporation to develop its printing plant, which was started by the City Education Committee in war-time to meet the abnormal conditions then prevailing. It was set up at the Education offices in Northumberland-road, but the proposal now is to transfer it to the Town Hall and extend it by spending several thousands of pounds on what promises to be a permanent new department, unless it is frustrated by the opposition of the rate-payer master printers and many others who are opposed to municipal trading of any kind. A committee of the Corporation has issued a report on the printing undertaking and the master printers have replied to it, and it was expected that both sides would be discussed at the City Council meeting yesterday, the 11th inst. The General Purposes Committee of the Chamber of Commerce received a deputation from the Master Printers' Association, and having heard their objections to the Corporation printing press, the committee supported the printers to the extent of declaring that in principle they were opposed to municipal trading or any extension of it. Meanwhile controversy is being carried on in the columns of the *Newcastle Daily Chronicle* on the subject of municipal printing, and also on the question of the alleged existence of a "ring" in the printing industry. An able letter controverting the latter allegation and putting pertinent points *re* the municipal printing plant, has appeared over the signatures of Mr. B. Leslie-Smith (president, Master Printers' Association of Newcastle and District) and Mr. A. E. Goodwin (secretary, Federation of Master Printers of the United Kingdom).

"Unfair Competition."

MASTER printers are considerably perturbed over what is described as the "unfair competition by wholesale houses," and the London Master Printers' Association have issued a circular on the subject. It appears that a sub-committee of the Organisation Committee has been appointed to consider the best means of safeguarding the interests of the members affected, and the committee, with the approval of the Council, has decided to prepare a list of wholesale houses and dealers supplying printers who confine their transactions to the

trade only, and are willing to pledge themselves not to supply consumers direct at a price that will not enable a member to make a profit were the same goods to be supplied through him. The matter is one which has occupied attention for some time, and as competition for business increases, the position naturally becomes aggravated. The principle is a very important one for master printers, though the remedy may not be easy. It arises, too, of course, in practically every industry. Such steps as can be taken to check the practice are being made by the Association, and members are asked to give the information which will enable a complete list to be prepared.

Gold Leaf and Protection.

THE question of the protection of British gold leaf beaters from German competition is of much interest to the bookbinding industry, and it becomes a matter of practical politics by the claim made on Monday by gold leaf beaters to a Committee, appointed under Part II. of the Safeguarding of Industries Act, at No. 5, Old Palace-yard. The claim is a threefold application for the imposition of a 33½ per cent. duty on beaten gold leaf coming in this country, by the British Master Gold and Silver Beaters' Federation, the Gold Beaters' Trade Society, and the Women Gold Leaf Workers' Society. The application is opposed by Mr. Mackenzie Wood, M.P. (instructed by Messrs. Stikeman and Co.), on behalf of the gold leaf group of the London Chamber of Commerce; by Mr. Hedley Miller, on behalf of the bookbinding section of the London Chamber of Commerce; by Mr. Orrock, on behalf of the Scottish Alliance of Employers in Printing and Kindred Trades, and also the Edinburgh Master Bookbinders' Association; and by Mr. F. E. C. Brenchley, on behalf of the French Cigarette Paper Co., Ltd. The case of the applicants is that gold leaf manufactured in Germany was being sold or offered for sale in the United Kingdom at a price below that at which similar goods could be profitably manufactured here, and, because of that, employment in the United Kingdom was likely to be seriously affected. The applicants state that the gold leaf manufactured in Germany is being sold in England at £2 12s. 6d. per 1,000 leaves of the 3½ size, and it is impossible for any British manufacturer to produce it at that figure, the price of the home-produced article being £3 16s. per 1,000 sheets. It is owing to the climatic conditions—especially in Nuremberg—that the Germans can manufacture a thinner leaf than the British, and owing to that cause, as well as the cheaper cost of labour and the depreciated value of the mark, the German manufacturer has the advantage. The claim is to come up for further hearing on the 24th inst.

German Trade Menace.

GREAT activity is being displayed by German manufacturers of printing machinery to get a footing among British printers. A circular has lately been widely distributed throughout the United Kingdom, in which the German senders say: "We have made a wonderful invention of highest importance to the printing line, and we beg to compare our progressive printing method with the ancient job printing." After describing the operations of the machine, the circular adds that the new press "is adapted for all printings, and deals splendidly with the finest art job, even with the most complicated one." A letter from the same firm, dated December 28th, and marked "Confidential!" informs the addressee that the firm is now "not in a position to supply more than two machines to one client simultaneously. We are prepared to meet you regarding the price, though the favourable rate of exchange allows you to purchase at half the real price. We are rather certain that this favourable exchange value of the German currency will not last any longer, as an international levelling seems to

be intended. Our suggestion regarding the price is engaging till January 31st, 1922, only. We would be in a position also to offer you a monopoly for important Government needs, without competition, that doubtless will be of highest interest for your country, as it enables the Treasury to save a lot of money."

The Russian Market.

NOW THAT the trouble with Ireland is out of the way, the task of settling the Exchange difficulty and opening up the Russian markets should offer a useful opportunity for the negotiating talents of the Prime Minister. At present in both these directions there are obstacles to British trade. Stable exchange rates would remove the more aggravated competition which is felt so severely in the paper industry. With regard to the opening up of Russia, there are possibilities here which should set the commerce of the world in motion. Already we have seen accounts of Finnish contracts with the Soviet Government, and that in itself should ease the situation for that country. At present the great Russian population with all its opportunities for useful activity is dormant. There should be some way out of the *impasse* which would confer benefit upon a wide circle of nations. Such a situation will doubtless be found in time or force itself upon the powers that be. But the need for speeding up the work is great.

City and Guilds Examinations.

Printing Technology Results.

The report of the work of the Department of Technology of the City and Guilds of London Institute for the session 1920-21 shows that of 17 candidates in Typography, Grade I, 11 passed, and 6 failed, while in Grade II, and Final there were 232 candidates, of whom 156 passed and 76 failed. Of 16 candidates for the typographical Full Technological certificate, 4 were successful. In Lithography, Grade I., 6 out of 7 candidates passed, and in Grade II. and Final, 20 out of 34. Of 17 candidates in Bookbinding, 15 passed, only 2 failing.

The Prize Winners.

The Typography prizes offered by the Printers' Managers and Overseers' Association were awarded as follows:—Final Examination, Section 1—Compositors' Work: 1st prize of £1 5s. to Harold Pickford, College of Technology, Manchester; 2nd prize of 10s. to Jack Dunstan Dorward, St. Bride Foundation Printing School, London. Final Examination, Section 2—Press and Machine Work: 1st prize of £1 5s. to Leonard Holgate Almond, and 2nd prize of 10s. to John William Drewett, both of the St. Bride Foundation Printing School, London.

The Lithography prizes offered by the Printers' Managers and Overseers' Association were awarded as follows:—Final Examination: 1st prize of £1 5s. to Sydney Charles Haynes, and 2nd prize of 10s. to Albert Fifer, both of the St. Bride Foundation Printing School, London.

Other prize-winners, grouped according to places of instruction, were:—

LONDON—ST. BRIDE FOUNDATION PRINTING SCHOOL.—Almond, Leonard Holgate, Typography (Press and Machine Work); 1st prize, Final S.M. Dorward, Jack Dunstan, Typography (Compositors' Work); 2nd prize, Final S.M. Drewett, John William, Typography (Press and Machine Work); 2nd prize, Final S.M. Haynes, Sidney Charles, Lithography; 1st prize, Final S.M.

LONDON COUNTY COUNCIL.—Matthews, William Frederick, Bookbinding (Finishing); 1st prize, Final.

MANCHESTER COLLEGE OF TECHNOLOGY.—Pickford, Harold, Typography (Compositors' Work); 1st prize, Final S.M.

GLASGOW—ROYAL TECHNICAL COLLEGE.—Sloan, William, Typography (Press and Machine work); 1st prize, Grade II., B.M.

CORK—CRAWFORD MUNICIPAL TECHNICAL INSTITUTE.—Fitzpatrick, William Joseph, Typography (Compositors' Work); 1st prize, Grade II., B.M.

BELFAST—MUNICIPAL TECHNICAL INSTITUTE.—Nicholson, Alexander, Lithography; 1st prize, Grade II., B.M.

Personal.

AMONG those present on Tuesday when the Duke of York, in the presence of a distinguished company, at Wembley Park, turned the first turf on the site of the British Empire Exhibition, were Viscount Burnham and Sir William and Lady Waterlow.

THE Lord Mayor of London, Lord Burnham, Lord Rothermere, Lord Northcliffe, and Lord Riddell are, among others, now vice-presidents of the Arthur Pearson Memorial Fund.

LORD LEVERHULME is to preside at the 59th annual dinner of the Newspaper Press Fund, which has been fixed for Thursday, April 27th, at the Edward VII. Rooms, Hotel Victoria, Northumberland-avenue, W.C.2.

THE date of the complimentary dinner to Sir Charles F. Higham, M.P., has been changed to Saturday, January 28th, at the Connaught Rooms, when Sir Eric Geddes will preside. Tickets are obtainable from Mr. Carl Hentschel, acting hon. secretary, 106-107, Shoe-lane, E.C.4.

THE Council of the Newspaper Society, on Wednesday, entertained to luncheon at the First Avenue Hotel the new newspaper knights—Sir Charles Hyde, Colonel Sir Joseph Reed, and Sir Meredith T. Whitaker—in appreciation of the honours conferred upon them.

SIR WILLIAM DAVIES, editor and director of the *Western Mail*, Cardiff, has been elected one of the two vice-presidents for Great Britain of the Press Congress of the World.

MR. JAMES MACLEHOSE, M.A., LL.D., president of the Federation of Master Printers, is being entertained to-day (Thursday) at luncheon by the Birmingham Master Printers' Association, on the occasion of his attending a general meeting of members of the Midland Alliance.

AMONG other guests present will be Mr. A. E. Goodwin, secretary of the Federation, General W. W. Bemrose and the officers of the Midland Alliance. A notable rally of master printers is anticipated.

THE Mayor of Newport, Councillor E. A. Charles, who was formerly a reporter on the staff of the *South Wales News*, Cardiff, gave an "At Home" to the newspaper men of Newport last week. In addition to the pressmen, the Chief Constable, Captain Gower, himself an ex-journalist, was also present and gave some reminiscences of the Manchester Press Club.

MR. C. ALLEN, of the Solicitors' Law Stationery Society, and Mr. F. A. Davies, assistant secretary of the London Society of Compositors, agreed to debate the subject of "Trade Union versus Open House" at the meeting last night (Wednesday) of the Association of Master Printers of W. and N.W. London.

MR. MONTAGUE SMYTH again played the rôle of Father Christmas when, on Saturday afternoon, the members of the London Press Club gave their annual treat to their own children.

MR. ANEURIN M. DAVIES, who has been appointed circulation manager of the *Pall Mall Gazette*, began his career on the *Llanelli Star*, and later joined the Swansea press, after which he was on the staff of *The Times* for over five years.

MR. DAVIES was made the recipient last week of a gift from the staff of the Field Press publishing department, as a token of esteem and appreciation of his many kindnesses during his term as circulation manager of the Field Press publications. This took the form of a canteen of cutlery suitably engraved, and was handed to the recipient by Mr. James Chizlett, the oldest member of the department.

MRS. G. E. SWANWICK, a member of the literary staff of the *Newcastle Daily Chronicle*, has been presented with a gold watch and bracelet and other gifts by her colleagues on that paper on leaving to take up another appointment. The presentation was made by

Mr. D. Bambridge, editor of the *Newcastle Daily Chronicle*, who paid a high tribute to Mrs. Swanwick's abilities.

MAJOR D. C. MCLAGAN, D.S.O., of the Central Council for Economic Information, is to deliver an address on "Remedies for Industrial Unrest," on Friday, 20th inst., at St. Bride Institute.

THE chair will be taken at 7 p.m. by Mr. T. E. Naylor, J.P., M.P., secretary, London Society of Compositors.

MR. A. B. KAY, *The Times* representative who was kidnapped in Dublin last week, was formerly on the staff of the *Bradford Daily Telegraph*, serving as sub-editor and subsequently as editor of that journal. He left Bradford in 1920 to join the staff of the *Sunday Chronicle*, and last year was appointed to the staff of *The Times*.

Mr. James Law.

Mr. James Law, one of the proprietors of the *Scotsman*, died at the age of eighty-three at his residence in Edinburgh. He had been for more than sixty-four years the business manager of the *Scotsman*, and for the greater part of that time one of its proprietors.

After the rotary web machine (the Walter Press) had been installed in *The Times* Office, *The Times* being the first newspaper to be wholly printed by a machine of this kind, Mr. Law proposed to introduce the same mechanism into the *Scotsman* office in Edinburgh. Doubts were expressed by practical printers as to whether the rotary machine would be equally suitable for the comparatively thin paper which was then used for the *Scotsman*. Mr. John MacDonald, the then manager of *The Times*, who paid a visit to Edinburgh in 1873, believed that it could be so used. Mr. Law agreed with him. The new machines were accordingly forwarded to Edinburgh from *The Times* office, and in 1873 the *Scotsman* was being successfully printed by this method, in spite of the thinner paper, at the rate of 24,000 copies an hour.

A man of exceptional vitality and judgment, which never waned, Mr. Law remained in active management of the paper till a fortnight ago. His principal recreation was golf, in which he was an enthusiast. His eldest son, Mr. G. H. Law, has been associated with his father as a proprietor and in the management of the firm since 1895.

Mr. Alfred E. Dawe.

We regret to record the death of Mr. Alfred E. Dawe, A.I.C., of H.M. Stationery Office, and brother of Mr. Edward A. Dawe. He was trained in chemistry at the Royal College of Science, passing with distinction to the Government Laboratory. He entered H.M. Stationery Office in 1910 as an Assistant Examiner of Paper, and became Examiner in 1920. He conducted the lectures on Paper at the Borough Polytechnic Institute, was recently elected A.I.C., and at the age of 39 had a promising career before him. He leaves a widow and two children. Both the deceased gentleman and his brother have rendered valuable services to the paper industry of this country.

Mr. Harry James.

MR. HARRY JAMES, foreman bookbinder with the Fisher Bookbinding Co., died unexpectedly on Thursday last from pneumonia, following influenza. Mr. James, who was 43 years of age, was in the service of the Fisher Co. for over 20 years, going to them when he completed his apprenticeship. Mr. Woodman, on behalf of the firm, sent a kindly letter of condolence to the widow, expressing appreciation of Mr. James' services. On the occasion of the funeral on Tuesday, beautiful wreaths were sent, one from the male employees of the Fisher Bookbinding Co., and one from the women.

SIR A. TUCK, managing director of Raphael Tuck and Sons, controverts the statement of a Post Office official that there was a falling off in the number of Christmas cards posted. He states that orders last year were fully up to the average of normal years before the war, while the repeat orders during December up to Christmas Day were the heaviest on record,

The Bookbinder.

Helpful Ideas for the Bindery.

For the ambitious craftsman, all distinguished work done in his own craft possesses a powerful fascination. The printer or bookbinder who examines the products of the foremost exponents of fine typography or artistic binding is able not only to enjoy the general pleasing effect of beautiful work, but he can often also pick up very useful suggestions for the application of new ideas or modified methods to his own practice. It is a sound instinct that leads many printers and binders to surround themselves with the choicest specimens of their own or others' work; besides beautifying one's surroundings this provides also a constant source of inspiration available to assist the creative effort required for the particular job on hand. Good examples of the printed page are nowadays so easy of acquisition that the printer should have no difficulty in not only covering his walls with such, but also filling therewith as many cuttings-books as he has a mind to. Fine bookbindings, however, are not so readily obtainable, and the probability is that many binders consequently miss what they might otherwise find of very great assistance.

Need for More Exhibitions.

Here lies the value of public exhibitions of bookbinding. The binder who has easy access to a good selection of bindings in a local institution has the next best thing to an

extensive private collection. There are too few of such exhibitions available to the public. For Londoners the best is to be found at the British Museum, where, in the King's Library, is housed a collection of bindings which is particularly rich in fine bindings, both English and foreign. Of these the English examples are principally from the old Royal Library given by King George II. to the nation in 1757, while another prolific source of valuable specimens was the magnificent collection bequeathed to the Museum in 1799 by the Rev. C. M. Cracherode, who had been able to take full advantage of the great dispersal of valuable books consequent upon the French Revolution. The Victoria and Albert Museum at South Kensington also possesses an excellent selection of historic bindings representing very fully the various styles prevailing in different countries and in different periods of the evolution of the binder's art.

A Good Move at Wigan.

A praiseworthy step has just been taken by the Borough Librarian of the Wigan Public Library, a step which might with advantage be more widely followed by public libraries throughout the country. At the Wigan Library has been brought together a fairly representative selection of English and foreign bookbindings typical of periods from the fifteenth century to the present day, there

being 100 specimens in all. The fifteenth century is represented by five panel-stamped and bossed bindings in calf, pigskin, and vellum, and the sixteenth century by nine specimens, including three excellent examples of pictorial stamps. English, Danish, and German, the stamps being dated respectively 1547, 1560, and 1562, also good specimens of German "frame" tooling and Italian polychromatic decoration. Sixteen specimens of seventeenth-century work are shown, comprising a great variety of styles. Six of the number are of English workmanship, including a very beautiful specimen of inlaid brown and black leather on red morocco, covered with elaborate gold tooling. Later centuries are well represented, and the selection brought up to date by modern examples of fine bindings by the leading English binders, including Zaehnsdorf, Riviere, Soheran and Co., Chivers of Bath, Davison of Alnwick, Fazakerly of Liverpool and Manchester, Birdsall and the Hampstead Bindery. Bookbinding workers of Wigan and district should find this exhibition of special interest to themselves. The mere copying of our predecessors is not to be recommended, but the instructive and suggestive value of their work is unquestionable. The best precedents set by earlier binders form a good basis on which the creative faculty of to-day can stand when reaching put for the attainment of its own highest.

Binding Notes and News.

The Prevailing Depression.

The New Year has been ushered in under depressing conditions of trade, so far as the bookbinding industry is concerned. There is an absolute lack of big business, and for what few inquiries there are about the competition is anything but wholesome. Some of the figures we have recently seen suggest that there are a great many binders who have no knowledge of what their work is costing them. In the case of S.O. contracts particularly, there is certainly no room for doubt that the bulk of the work is executed at an actual loss. We are, of course, well accustomed to the well-worn argument that the big contract job is the filler which enables the binder to keep his department going on full time, thereby curtailing the actual aggregate cost of production. The value of such argument is more apparent than real. The chief gainer from its application is assuredly not the bookbinder.

Publishers Marking Time.

Despite the recent outcry against impossible cost of production, at least one publisher has found it possible to put the popular 1s. classic on the market again. It is but a short time ago that an Edinburgh firm found its way back to the 2s. series. The former corresponds to the old 7d. edition while the latter was evidently the counterpart of the pre-war 1s. novel. Obviously we are progressing in some quarters. Generally speaking, however, the publishers as a body are marking time in the face of heavy production cost and entire lack of demand for books. The winter season usually brings along an active demand for text-books and technical publications generally, but there have been comparatively few new books on the lists this season.

Bookbinding Materials.

The market for bookbinding materials has undergone no radical development in recent months. We appear to have reached a period of temporary stability in which the level of price corresponds to 100 per cent. on pre-war

figures. This is rather more true for paper than for most of the types of material used by the bookbinder. It must be confessed that with a few exceptions the manufacturers of binding materials have been slow to bring their prices into conformity with the general trend. Particularly does this apply to the fabrics and textiles used by the binding industry. It is precisely in these spheres that the influence of monopoly is greatest.

Binders' Leathers.

The leather manufacturers claim that raw material prices are hardening, due to an improved state of business in the boot and shoe trade. Despite the firmer tone, bookbinding leathers are as yet unaffected. Doubtless the lack of demand and the keen anxiety to secure business has much to do with the position. Actually, leather prices have been on a stable level for some months past and the probability is that they will remain unaltered during the winter season. After that it remains to be seen what happens to railway and shipping transport rates. It is already being taken for granted that these will shortly be reduced, in which case coal and power charges will speedily follow suit and we shall enter on our next cycle in the transition from war cost to pre-war price.

Some Good Offers of Leather.

The annual stocktaking is responsible for some remarkable offers of leather parcels at low clearance figures. The present is a good time to buy for current use. Basils are offered as low as 7d. per square foot, skivers can be secured at from 4½d. to 5½d., rough calfs at 1s. 5d., pigskins at 1s. 3d., and anglos at 1s. 6d. The market level is well above these figures. Prospective buyers should use caution in taking advantage of clearance lines from unknown sources, the soundest of policy being that of ordering on approval. The value of a skin depends upon its economy in use, its substance, regularity and texture. It is impossible to judge value from quotations.

A Point About Glue.

A bookbinding firm of repute recently met with many complaints from clients who detected an obnoxious odour in the books supplied to their orders. The fault was speedily traced down to the glue, which had been bought cheaply from a new source. On examination it was found that the glue was a low-quality production from inferior bone. An immediate change to hide glue at 50 per cent. higher price not only remedied the fault but effected an actual economy by producing a greater volume of more tenacious liquid from an equal weight of glue. During the course of inquiry the peculiar fact was elicited that not one of the binding staff possessed the sense of discrimination in glue odours. They had become so accustomed to the smell of glue generally that they were unable to detect it. It would be interesting to know if this is a common experience in the trade.

Other Binding Materials.

Bookcloths remain unaltered in price, common qualities standing at 1s. 1½d. per yard, with inferior grades on offer at 1s. The Rexine Co., Ltd., recently announced a reduction in one or two of their bookbinding qualities. Buckrams are down a little with prospects of a further fall before long. Common buckram, a combination of linen and cotton can to-day be secured at 2s. 6d. per yard. Threads and tapes stand at an unwarranted figure and the binder has every right to expect a lower standard of price. Goldleaf is firm and likely to remain so for some time. Marble papers are only cheap when bought direct or in large quantity. Users would do well to keep to the substitutes which have been employed since the war. There is still room for some new British production to take the place of fancy marble paper, and we would suggest that attention be turned to the monotone or duotone diaper designs which are popular in the systems goods and loose-leaf book trade.

**Printing, Bookbinding & Kindred
 TRADES OVERSEERS' ASSOCIATION.**

There was a good muster of members of the Association at the monthly meeting held on the 3rd inst. at St. Bride Institute, Bride-lane, E.C.4. The president (Mr. A. W. Hunt) was in the chair and was supported by the vice-president (Mr. H. Milton). Most of the evening was taken up by a very interesting and instructive address given by Mr. Duncan Keats, letterpress instructor at St. Bride Printing School, on the "Making of Process Blocks" and which will be found in another column.

The minutes of the previous meeting were read and confirmed.

The correspondence submitted included letters from Mr. Henry Boyce, who wrote thanking the members for his election to

Making Half-Tone Blocks.

Lecture by Mr. Duncan Keats at St. Bride Printing School.

At the monthly meeting of the Printing, Bookbinding and Kindred Trades Overseers' Association on the 3rd inst.—a report of the ordinary proceedings of which appears on this page—Mr. Keats delivered, in a non-technical way, an address on the "Making of the Process Block."

At the outset he expressed thanks for the honour the members had shown in asking him to address them. Owing to an inadvertence it was only that morning that he had been informed of the date of their meeting and it was due to the generous assistance given by Mr. J. R. Riddell which had enabled him to gather together one or two hurried thoughts and a few specimens with which to come before them. He thought there was little information a machine minder—at any rate regarding the actual machining of a job—could impart to the binder. Yet the latter often made the finished job appear quite presentable by the exercise of a little manipulation when unfortunately the job was not always made to line up or fall perfectly correctly on the machine when the sheet was in the full size.

The Woodcut Superseded.

In spite of the more modern processes, the half-tone was still the most accepted method of illustrating the jobs that passed through their hands, to be eventually distributed to the public. After giving a brief résumé of the development of the half-tone and how it superseded the woodcut, Mr. Keats proceeded to explain that that evolution was brought about to meet in a speedier and more commercial manner the need for illustrations with which to portray faithfully the various densities of light and shade, as apart from the two extremes of solid black or pure white. This advance had brought about the demand for many improvements in paper, inks and printing machinery, and the fact that the high repute in which British products the world over were held bespoke its own recommendation as to how well our manufacturers had kept pace with requirements.

Method of Photographing.

Makers of the half-tone block prefer to have the article at their own studios, where they can the more easily control their lighting and better handle the photography generally. The operator displays the goods either on the floor, a stand, or fixes them on a copy board against the wall. He next illuminates them with two arc lamps of great intensity placed in such positions as will give an even diffusion of light over the objects. At a convenient distance away, the camera is so arranged as to give correct definition and such size of image on the ground glass as the block is required to be. Very great precaution is of course taken to prevent movement or vibration of any kind during the exposure.

The Prism.

The ordinary photographic negative appears not only reversed as regards tone, but also as regards the direction in which it reads, i.e., right becomes left, and vice versa. This reversal has to be prevented for block-making purposes, and is accomplished by attaching a prism to the front of the lens, which then necessitates placing the camera at right angles to the object. Regarding the reversal of position in a negative the lecturer gave one or two humorous incidents, and explained briefly the action of the prism.

The Screen.

A ruled screen or grating had to be inserted in the camera behind the lens at a correct distance from the glass negative, in order to break up the continuity of tones which later on enabled the etcher to procure a printing surface in relief, which was essential for printing by the letterpress method. Mr. Keats next explained by diagrams and examples how the screens were manufactured and how the image from the lens was projected through equal-sized screen apertures, and thus broken up into small shafts of light, which caused to grow on to the sensitised film dots of various sizes, in accordance with the light value reflected by different portions of the object.

Exposing the Screen Negative.

The screen negative, having been exposed, is passed on to the copperplate department, where the printer cuts a piece of polished copper to the required size, and coats it with

a sensitising enamel. This enamel later on acts as a resist to the action of an etching solution. When dried, the plate is placed with the negative in a printing-out frame, and perfect contact between them procured, and then exposed to arc lamps and printed out with the aid of an actinometer. The action of the light renders the enamel insoluble in water, and leaves those minute portions still soluble where by the dot formation light had been retarded from taking effect, thus again reversing both; the colour values causing large areas of enamel to become insoluble where the plate corresponds to dark portions of the original object, and causing only the formation of smaller dots where the illustration has to reproduce lighter tones. This operation also at the same time reverses the direction of the picture in an opposing manner to both that of the negative and object.

After due exposure the plate is removed and the soluble parts washed away, the remainder being dyed to enable the development of the plate to be more easily observed. The enamel, however, in certain parts, is now sufficiently hardened to withstand the action of water, but not yet strong enough to withstand the action of an etching fluid. In order to make it so the copperplate is held over a stove and subjected to a burning-in process which changes the colour of the enamel to the familiar dark brown shade.

The Etching Department.

The copper plate is next passed on to the etching department, whose business it is to change the flat surface into one having relief. Although the image shows up clearly on the surface of the plate, if it is inked up, only a solid flat print would result. The operator first protects the bare copper at the back of the plate by the application of a coating of shellac, and places it in an earthenware bath containing perchloride of iron in solution, which by attaching the unprotected parts, commences to eat away particles of copper from between the dots comprising the image.

The various stages of etching, stopping out, burnishing, the removal of blemishes, and the manner of proving were explained, also how the plate was afterwards passed on to the moulder, whose business it was to rout away any parts not required, to line up, bevel and drill the plate ready for mounting.

Mr. Keats, in concluding, gave his hearers much useful information regarding the names of blocks finished in different styles, such as "cut out," "deep etched," etc., together with a few wrinkles to bear in mind when ordering these necessary adjuncts to everyday print.

Hudson and Kearns, Ltd.

Messrs. W. and E. Hudson Retire from the Business.

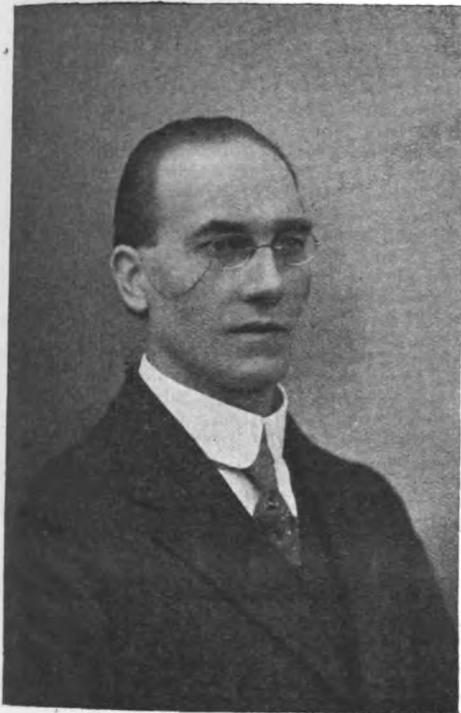

Mr. R. Hulme, chairman and managing director of Hudson and Kearns, printers, Hatfield-street, S.E., has issued a circular to the preference shareholders of the company, in which he announces that after an association of fifty years Mr. William Hudson and Mr. Edward Hudson have retired from business, and that he has purchased their entire holding of ordinary shares in the company.

While increasing his own shareholding, in order to give the preference shareholders an opportunity of acquiring some of the ordinary £1 shares he is offering them a certain number at 21s. 6d., inclusive of stamp duty and registration fee.

THE *Devon and Exeter Daily Gazette* has just completed its 150th year of publication. It was first issued in January, 1772, as a weekly paper, the daily issue beginning in 1863 with a single page of matter for a halfpenny.

A TASTEFUL calendar issued by Mr. C. H. Rhodes, paper merchant, Bradford, comprises the reproduction of a beautiful painting, "A Spring Morning," by E. W. Haslehurst, R.B.A.

RUBBER STAMPS If you require Rubber Stamps QUICKLY, send to the Pneumatic Rubber Stamp Co. (Buck's Patent) Limited. 125, Queenhithe, Upper Thames St., LONDON, E.C.4. Catalogues Free upon request.

Mr. Duncan Keats.

membership, and from Mr. A. J. Daines who gave notice of a motion that he would move at the annual general meeting next month, an amendment to Rule 16 regarding unemployment.

The following were next elected to membership, receiving from the president a warm welcome into the ranks of the Association:—Messrs. Chas. C. Ward (ruling), and W. H. Evans—honorary—(binding)—Messrs. W. W. Sprague and Co., Ltd.

The annual dinner was fixed to take place at the Holborn Restaurant on April 8th, and Messrs. Geo. A. Eden, A. G. Aves and A. J. Daines were elected stewards.

The chairman then called upon Mr. Keats for his lecture, after the delivery of which Mr. Hunt, in cordially tendering thanks to Mr. Keats, spoke of the great strides made in the making of the half-tone since the days of the Misenbach process. He mentioned how important it was that when advances were made in any one direction further improvements must necessarily follow in others to cope with it. The steady and wonderful progress made in the production of the process block had brought about the necessity for the up-to-date machinery as they knew it to-day.

In returning thanks for the appreciative remarks of the chairman Mr. Duncan Keats took the opportunity of pointing out that no matter how desirous a manager or an overseer might be to train his apprentices along broad lines, the exigencies of commercial life prevented his putting same into practice. He therefore urged them to consider carefully the usefulness of the Technical School for such a purpose and support it by giving every encouragement and facility for attending to any that may be under their supervision.

Several questions were put to Mr. Keats by Messrs. Eden, Aves and Rutherford, and after an inspection had been made of the various examples on view of the process engravers' art a very pleasant evening was brought to a close.

DIVIDENDS AND REPORTS.

LOVELL AND CHRISTMAS.—Interim dividend at the rate of 6 per cent. per annum for six months ended December.

NEW COMPANIES.

SMITH BROS. (BIRMINGHAM), LTD.—Capital £15,000 in £1 shares (8,000 pref. and 7,000 ordinary); paper, paper bag, envelope and account book makers, bookbinders and sellers, printers, etc. Private company. Directors: A. T. Hayes, B. H. Smith and E. G. Evans. Registered office: 52, St. Paul's-square, Birmingham.

T. DUNNILL SYKES, LTD.—Capital £7,500 in £1 shares (5,000 5 per cent., cum. pref.); to take over the business of advertising contractors and agents, photographers, colour printers and lithographers carried on by T. Dunnill Sykes and E. D. Galpin at Bank-chambers, 329, High Holborn, and elsewhere, as "T. Dunnill Sykes." Private company. First directors: T. D. Sykes and E. D. Galpin. Registered office: Bank-chambers, 329, High Holborn, W.C.1.

C. S. YEATES, LTD.—Capital £6,000 in £1 shares; to carry on the business of engravers, photographers, photographic printers, manufacturers of machinery and appliances used by photographers, stationers, etc. Private company. Subscribers: A. J. Hull and M. G. May. Subscribers appoint directors. Registered office: 14, Hatton-wall, E.C.

JAMES HARRISON AND CO., LTD.—Capital £2,000 in £1 shares; engineers, especially in relation to the making and constructing of card box board and printing machinery, etc. Private company. Subscribers: J. Harrison, C. A. Watkinson and R. Harrison. Subscribers appoint directors.

E. A. BRADDICK, LTD.—Capital £10,000 in £1 shares; to take over the business of a printers' engineers carried on as "E. A. Braddick. Private company. Subscribers: E. A. Braddick and Ethel C. Braddick. Registered office: 9, Gough-square, E.C.4.

PALMER'S HOTEL GUIDES, LTD.—Capital £500 in £1 shares; to carry on business as indicated by the title and that of advertising contractors and agents, etc. Private company. First directors: R. R. Palmer and Mrs. E. Palmer. Registered office: 12, St. Andrews-chambers, Wells-street, Oxford-circus, W.1.

BAKER'S ILLUSTRATED GUIDES, LTD. (London).—Capital £2,000 in £1 shares; advertising contractors and agents, printers, engravers, photographers, billposters and agents, etc., and to adopt an agreement with H. A. Fry. Private company. First directors: R. A. Tuckey, P. E. Lavell, C. Gibson, C. J. Marshall and J. J. Gillan.

NEWBY-SHEPHERD ADVERTISING SERVICE, LTD.—Capital £2,000, in £1 shares; advertising agents and contractors, bill posters, etc.

Private company. First directors: A. H. Newby and W. A. Shepherd. Registered office: 32, Victoria-street, Manchester.

WALKER WALL PAPERS, LTD.—Capital £500, in £1 shares; to adopt an agreement with H. S. Wood, and to carry on the business of wall-paper manufacturers and merchants, brokers, etc. Private company. First directors: W. Dixon, E. W. Negus and H. S. Wood. Registered office: 26, Victoria-street, Cambridge.

HENRY WILKINSON, LTD.—Capital £35,000, in £1 shares; to acquire the benefit of an agreement dated December 14th, 1921, with H. Wilkinson, and to carry on the business of paper manufacturers and merchants, etc. Private company. First directors: H. Wilkinson and W. L. Heaton. Registered office: Lomax Bank Mills, Little Lever, Lancs.

JAMES ENGLISH AND CO., LTD.—Capital £20,000, in £1 shares; to take over the business of manufacturers of card and cardboard, and paper merchants carried on at Peerless Works, Radsworth-street, Baldwin-street, City-road, E.C., and elsewhere, as "James English and Co.," and to carry on the same and the business of manufacturers of mounting and Bristol boards, photographic mounts, etc. Private company. Subscribers: Mrs. K. M. English and L. E. Giffen. Registered office: Peerless Works, Radsworth-street, Baldwin-street, E.C.2.

RIBBLESDALE PAPER Co., LTD.—Capital £2,000, in £1 shares; to acquire the business of a paper merchant and agent carried on by H. Aspden at Preston, as the "Ribblesdale Paper Co.," and to carry on the business of paper manufacturers, merchants and agents, stationers, dealers in, and makers of, boxes and bags, or any kind of packing or parcelling cases and material, including coating, enamelling or covering papers, cardboard and other materials, dealers in wood pulp, rags or other material for the manufacture of paper, etc. Private company. Subscribers: H. Aspden and Miriam C. Aspden. Registered office: 20, Grimshaw-street, Preston.

RUSSIAN RESTORATION, LTD., has been registered as a "private" company, with a nominal capital of £100, in 1s. shares; to carry on in Russia and elsewhere the business of dealers in landed and other property, manufacturers, traders, printers, publishers. Signatories to the Memorandum of Association: W. H. Easlick and E. Hancock. Signatories appoint directors. File number, 178,852.

RUSSAGE ADVERTISING Co., LTD.—Capital £100, in £1 shares; advertising agents and contractors, to procure advertisements for insertion in Russian and other foreign trade journals, etc. Private company. First directors: Fanny Litwack, Chanaan Izhakin and Mordchel Mazower. Registered office: 61-2, Chancery-lane, W.C.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

LEIGH AND WILLIAMS, LTD. (printers).—Mortgage on 31, Sussex-street, Rhyd, dated December 20th, 1921, to secure all moneys due or to become due from company to London Joint City and Midland Bank.

TEARNE AND SONS, LTD. (printers, Birmingham).—Satisfaction in full on May 9th, 1921, of second debenture, dated January 9th, 1919, securing £800.

WHITAKER AND Co. (LEEDS), LTD. (iron-mongers, brush, rope and twine manufacturers, papermakers, etc.).—Satisfaction in full on December 23rd, 1921, of mortgage dated August 30th, 1920, securing £3,000.

JOHN SLACK, LTD. (paper manufacturers, etc., Stockport).—Satisfaction to the extent of £6,000 on April 3rd, and to the further extent of £1,500 on November 9th, 1912, of mortgage and floating charge dated March 10th, 1910,

securing £11,500. (Notified December 28th, 1921). Debenture dated December 20th, 1921, to secure £8,000, charged on the company's undertaking and property, present and future, including uncalled capital, subject to above mortgage and floating charge. Holders: F. S. Kitchin and E. E. Rigby, 43, Spring-gardens, Manchester.

BANKRUPTCIES, etc.

Re D. SMITH AND SONS, cardboard box manufacturers, 19 and 20, Rupert-street, Leman-street, E.C.—A receiving order was made on December 15th, at the London Bankruptcy Court against this firm, the partners in which are stated to be Colman Smith, Gabriel Smita and Jennie Littman, and the first meeting of creditors was held on January 2nd before Mr. Warren, official receiver. According to the statements of the debtors at their preliminary examination, the brothers Smith came to this country from Russia with their parents some 20 years ago, and commenced business in 1905. Being in want of capital in 1915, they obtained an advance of £1,700 at 12 $\frac{1}{2}$ per cent. interest from their sister-in-law, Mrs. Littman, a condition being that the latter's husband should take a part in the management of the business. It was arranged that Mrs. Littman should receive a one-third share of the profits, but there was no written agreement, and neither of the brothers Smith regarded Mr. or Mrs. Littman as partners. In the course of litigation in the High Court, however, the Judge decided that Mrs. Littman was a partner, a decision which prevented the firm from prosecuting claims for nearly £30,000, and to that decision, coupled with depreciation in the value of stock and the slump in trade, the debtors attributed their failure. The liabilities are estimated by the debtors at £20,000, but proofs of debt aggregating £31,477 were dealt with by the official receiver, and Mr. E. H. Hawkins, I.A., was elected trustee to administer the estate, with the assistance of a committee of inspection. The value of the assets did not transpire, but the bond to be given by the trustee was recommended to be for £5,000.

Re THE PERFECT MANUFACTURING Co.—Creditors met last week at the London Bankruptcy Court, under the failure of Robert Leslie Wise and James George Marsden, trading in partnership as above at 10, New Union-street, E.C., wholesale manufacturing stationers, bookbinders and pattern card makers. The receiving order was made on December 19th, upon the debtors' own petition. Mr. Warren, official receiver, said proofs of debt to the amount of £455 had been received, and the liabilities were estimated at £900, whilst no assets of value were disclosed. The debtors entered into partnership in 1915, and they attributed their failure to slackness in trade, general depression, and loss of sub-contracts for the Government. In the absence of any offer, the case was left with the official receiver, to be wound up in bankruptcy.

Re SAMUEL GEORGE OSBOND.—The first meeting of creditors was held at the London Bankruptcy Court, under a receiving order made against Samuel George Osbond, author and publisher, lately trading as the Power Book Co., at 14, Harrington-road, South Kensington. The petitioning creditors were the Garden City Press, Ltd. It appeared that the debtor commenced business in 1908, and in May, 1920, he sold it to a lady who had advanced him £150, and who had since assisted in the business. The liabilities were estimated at £3,000, and the meeting was adjourned for a fortnight for the appointment of a trustee. The failure is attributed by the debtor to the effects of the war on the publishing business and to the failure of the London Academy of Science and Art, in which he was interested.

MESSRS. WHITEMAN AND BASS (lithographers), LTD., have issued a bold and serviceable calendar for the New Year. The tear-off slips, one for each day, are 4 $\frac{1}{2}$ in. by 5 $\frac{1}{2}$ in., the bold red lettering being readily seen.

A firm of manufacturers' agents in Toronto desire to obtain the representation, on a commission or consignment basis, of United Kingdom manufacturers of fancy or plain box and printing paper. (Reference No. 501.)

ARGENTINA.

A commission agent resident in the Argentine, and having 25 years' experience of the market, desires to obtain the representation of United Kingdom manufacturers of wall-paper. (Reference No. 544.)

Big Canadian Organisation.

Sir Frederick Becker's Control.

What is described as the greatest pulp-making organisation in the world relates to a combination of Canadian interests, which has been effected by the Ludgate Pulp and Paper Syndicate, Ltd., which was formed for the purpose of inaugurating a Canadian company to acquire mills, machinery, plant, water power, railroad, timber limits and other property. The object in view was to secure a total output of 300,000 short tons of mechanical pulp and 100,000 short tons of sulphite pulp per annum. Under the present organisation, which is controlled by Sir Frederick Becker, the principal undertaking acquired is that at Chicoutimi, with which is linked up the St. Laurence Pulp and Lumber Co., and other important properties.

New Inventions.

Feeding Sheets.

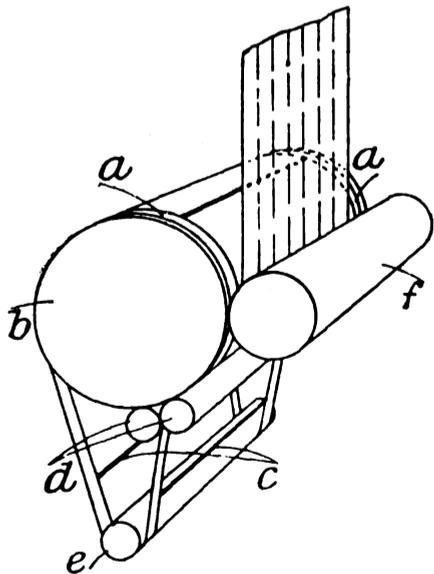

In an invention patented by Messrs. Ritchie and Son, Ltd., and J. Cullen piles of sheets of cardboard, millboard, etc., are fed to the pile tables of box-making, printing, or other machines by mechanism comprising carrier chains of the usual kind and in conjunction with these chains are arranged rollers which can be moved to a position above the level of the chains to enable a pile support to be manipulated easily to position the pile on the chains, the rollers then being lowered to permit the chains to forward the pile into correct position on the pile table. The invention is described in connection with an elevator of the

kind described in Specification 161,430 for raising the pile and its support from ground level to the level of the table on which the chains and rollers referred to above are arranged. The rollers A are mounted on shafts M carried by cranks O, which, when in the position shown in Fig. 5, are above the chains B, and the pile support C can then be readily moved from the elevator over a fixed roller O on to the rollers A. When the pile is correctly positioned, the cranks D are moved to lower the rollers A by means of a rod P attached to a slide H which is guided by horizontal slots L and pins K, and is fitted with vertical slots L' which operate the cranks. The chains B then move the pile to the desired position on the pile table.

Folding Paper.

Transverse folding-mechanism for rotary newspaper, magazine, and similar printing-presses, as patented by Mr. A. Terrey, comprises two endless steel bands a passing round the folding cylinder b, between the folding rollers d and over a jockey roller e, said bands a being connected together by transverse

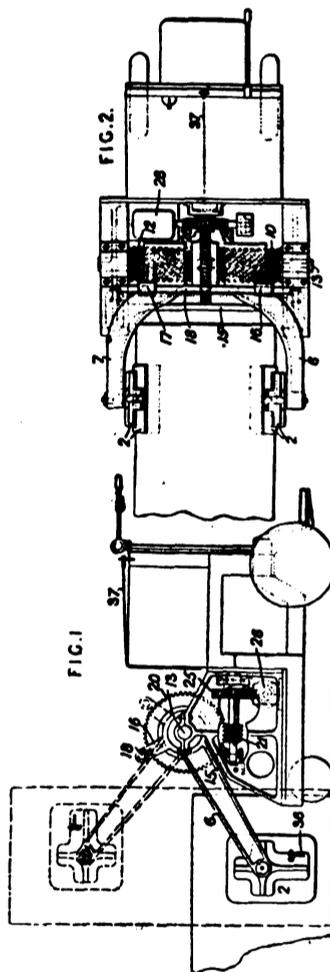

folding-bars c spaced at intervals determined by the size of the newspaper, etc. to be folded. The latter is cut off from the web by the cutting-cylinder f at the same time as one of the folding-bars c reaches a position between the folding-rollers d, the bar c then commencing the folding of the cut newspaper, etc., into the rollers d. The folded product is drawn off the bar c by reason of the higher speed of

the folding rollers, and is directed to the delivery mechanism by guides or otherwise in known manner.

Transporting Paper.

A patent application for load-handling machines by the Great Northern Paper Co., relates to machines for handling heavy bulky articles and particularly for up-ending and transporting large rolls of paper. Curved grippers 2 are pivotally mounted in arms 6, 7 which are engaged by oppositely threaded members 10, 12 fixed to a shaft 13, and normally rest on a horizontal bar 15. A bar 18 couples projections 16, 17 extending upwards from the arms 6, 7. The shaft 13 is

driven by an electro-motor 28 through worm gears 25, 26 and 20, 21. When a horizontal roll is to be up-ended, the truck is run up to the end of the roll with the arms 6, 7 in their lowest position and separately sufficiently to receive it. The motor 28 is then started and forces the arms 6, 7 towards each other. When this movement of the arms is stopped by the compression of the roll, they are swung upwards about the shaft 13, and the roll is first raised to the upright position and then lifted off the ground. When an upright roll is to be transported, the arms 6, 7 are placed initially in a horizontal plane and retained there by the engagement of a chain 37 with the bar 18, and the grippers 2 are turned through a right-angle from the position shown in full lines, Fig. 1, and maintained in the new position by the engagement of the catches 36 with the upper surface of the arms 6, 7.

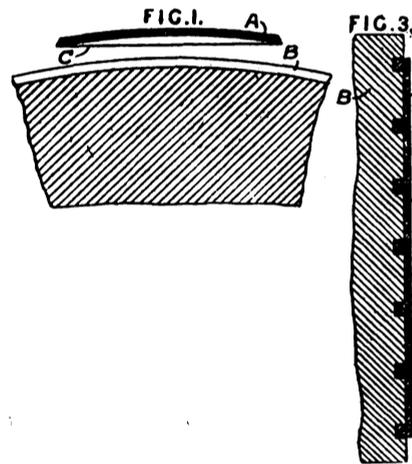

Drawing Books.

Mr. J. H. Valentine has patented an invention according to which children's drawing books contain pages bearing coloured pictures, and other pages prepared so that copy draw-

ings in chalks, crayons, or paints can be made and afterwards rubbed out with a damp cloth or sponge. The copy pages may be interleaved alternately or otherwise attached, or may be separate from the cover and carried in a pocket or under a band. The book may be further provided with a pocket for chalks, etc. and colour specimens on the prepared pages.

Printing Plates.

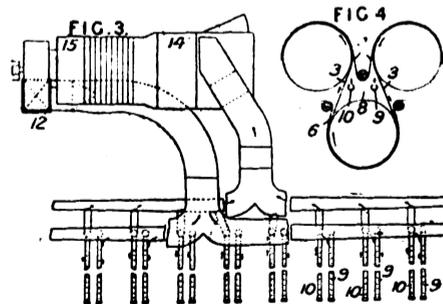

In an invention patented by Mr. J. Murray a typographic printing-plate is curved on its outer surface A, Fig. 1 to the radius of the printing-surface and is flat or substantially so on its under surface C, and is provided

with a series of grooves D, Fig. 3, the bottoms of which are curved to the radius of the cylinder B to receive the plate, the cylinder having a series of circumferential ribs E engaging the grooves D on the plate. The plate may be secured by buttress strips placed in transverse grooves in the cylinder and having undercut edges engaging the bevelled edges of the plate.

Drying Paper.

According to a patent application for which has been made in this country by the International Paper Co., moisture is removed from the pockets 8 between the felts 4, 6 and the drying cylinders of a paper machine by means

of dry air supplied by blast pipes 9 directed between the paper web 3 and the felts, and by suction pipes 10. The air currents so produced travel in opposition to the motion of the adjacent paper web. The respective pipes are connected to a fan 12 provided with an air washer 14 and heater 15 by which means air is continuously circulated.

Linen-Faced Paper.

A machine invented by Mr. H. P. Howe to impart a linen finish to paper has as its important feature two cloth surface plates or plating members. Instead of using rolls bearing against the plating members the machine is equipped with segmental carriers on which the plating members are supported.

“DRYLIO”

British Paper Industry in 1921.

A REVIEW OF THE YEAR.

The year which has just drawn slowly to its darkening end has been, for papermakers, as for all other manufacturers, a period of strain and stress, during which, to a greater extent than ever before in the commercial history of the world, international problems have dominated the domestic situation. It is true that, so long as actual war conditions continued, the British manufacturer's policy was necessarily dictated by the limitations imposed by the course of hostilities; certain markets were closed to him, and certain other areas were only available for his products under restrictions and regulations, while the distribution of his output in the home market was governed by external authority. But the problem in those days was a definite one, and its factors were either stable or easily ascertainable. Far otherwise is the case to-day, when the very basis of the commercial structure, the purchasing power of the currency, is a quality which not merely fluctuates, but fluctuates wildly, between wide limits and without any apparent logical reason. So long as the foreign exchanges continue to be a quivering quicksand, so long will it be difficult to set the world's commerce on a firm foundation, and the engineer who will build a railway over the industrial Chat Moss has not yet appeared.

The Course of Trade.

A new and valuable index of the course of trade is afforded by the figures published from time to time by the Ministry of Labour showing the number of Unemployment Insurance books lodged for the purpose of receiving unemployment pay. On December 31st, 1920, for the papermaking and Paper-staining Industry, the figures were 3,603 totally and 4,459 partially unemployed. On March 24th, 1921, they had risen to 6,972 and 11,046, but the coal stoppage, which began on April 1st, had an immediate adverse effect, which reached its highest point on May 27th, when the figures were 17,027 and 12,332. By the end of July the immediate effects of the coal stoppage had subsided, and were down to 6,851 and 5,813, figures which have remained approximately constant up to the date of writing, those for November 18th being 7,516 and 5,591, and for December 2nd 6,515 and 4,962. The total number of books issued is 56,840, so that roughly 22 per cent. of the persons employed in the industry are continuously in receipt of unemployment benefit. These figures, of course, do not disclose the whole position, as they do not include either those who have exhausted their period of benefit or those whose short time is three days per week or less; and as many mills are continuing to employ their workers on odd jobs, even when actual papermaking is not in progress, it may be safely estimated that output has been reduced below one-half of the normal.

Wages and Labour.

The necessity for reduction of making costs naturally led to a movement for lower wages, and after a series of meetings for negotiation a basis of agreement was reached with the assistance of the Joint Industrial Council. The principle adopted was that of reduction based upon the variations in the official cost of living figure, but changes were only to be made after the lower figure had been in operation for two consecutive months. The second reduction under the agreement came into force at the beginning of December, and the lowering of the official figure to 99 is the first stage towards a further reduction. The agreement included a reference to the fact that it is neither intended nor desired that wages should revert to pre-war rates, and this is in itself an additional proof, if such were required, of the amicable relationship which exists between employer and employed in the industry.

Paper Imports.

This leads naturally to the consideration of the import figures for the year and their bearing on the depressed state of the industry. It should be borne in mind that before 1914 the

country imported 50,000 tons a month, and manufactured 100,000 tons a month, in round figures. During 1920, the twelve months preceding the year under review, imports reached almost exactly the 1913 height, while British mills, at any rate until the last few months of the year, were running full time. When we come to the 1921 figures, however, we find a very different proportion of trade, and one which, as the year went on, became increasingly unfavourable to the home manufacturer. During the six months from June to November inclusive, British mills were mostly on half production, or less than that, so that the highest figure for home production will be 300,000 tons, even if we include all that was made for stock. The quantity imported during that period was nearly 200,000 tons, the foreign supplier thus taking two-fifths of the trade instead of his normal one-third. If we consider October and November only, we find that the position is considerably worse. As against a maximum home production of 100,000 tons, imports reached 75,000 tons, bringing the foreign share to three-sevenths. Translating these fractions into actual production figures, it will be seen that in the last two months alone over 17,000 tons of paper have been imported which would normally have been made in British mills.

Trade Customs.

The paper trade has been fortunate in the past in the possession of a codified set of Trade Customs to which reference could always be made in case of difference of opinion. The existing Code, excellent as it was in many ways, was far from complete, and in some respects had ceased to represent the actual practice of the trade. In order to put this right, considerable time was spent during the year in its revision by a special Joint Committee representing the branches of the trade which are most directly interested—the papermakers, wholesale stationers, manufacturing stationers, and paper bag makers. As a result of the negotiations, a revised Code has been published under the authority of the four Associations, and came into force on the first day of the New Year. It may be considered as representing the normal method of conducting business in the trade, and although any of its provisions may be excluded by special agreement at the time of order, it is to be hoped that buyers and sellers alike will, as far as possible, assist in maintaining uniformity of practice.

The Immediate Future.

The circumstances of 1921 have been so consistently depressing throughout the world of commerce that the voice of the pessimist has been loud in the land, and the few remaining optimists have been accused of "whistling to keep their spirits up." In spite of incurring the risk of a similar criticism, we decline to view the future with anything but cheerfulness; and if the course of events during the last few years is considered in its true perspective, some justification will soon be forthcoming.

So much for the special conditions of the industry. When we consider the broader issues, there is even firmer ground for optimism. If the first months of 1922 see peace in Ireland, an international agreement for lessened expenditure on armaments, a substantial reduction in the cost of government, and a pronounced movement towards stability of foreign exchanges—and all these elements are quite likely to exist—there will be the opportunity for which the paper trade has been looking.

Finally, the outstanding factor which the pessimists overlook in all their calculations remains to be considered: the skill of the British papermaker, the excellence of his product and the efficiency of the commercial organisation which handles his goods. Napoleon called us a "nation of shopkeepers," and it may safely be claimed that, having "kept shop" for so many generations, the Britisher knows how to do it at least as well as other nations, if not a good deal better,

Cost Finding in the Printing Office.

Mr. R. B. Simnett Describes a Method which Has Proved Satisfactory.

At the last meeting of the South-West London Master Printers' Association, on January 3rd, at Chelsea Town Hall, Mr. R. B. Simnett, managing director of Messrs. Sanders, Phillips and Co., Ltd., Brixton, delivered a very lucid and interesting address on Cost-Finding. He described the system which had been in operation in his own works for a good number of years, and which had been found to be both successful and interesting.

Good Printing Needed.

Referring to price-cutting and competition, Mr. Simnett suggested as a chief remedy putting their backs into their work and turning out good printing. He did not think master printers would succeed half as much at the present time by low prices or by cutting prices as by giving the very best thing possible, with a "punch" and a "pull" in it. It seemed to him the great aim of travellers to-day was to cut in under the other man, whereas the question should be, could they do legitimate business and give their customers value for money? Master Printers ought to set out to do legitimate business of the first order, and, whether it was an octavo sugar bill or a catalogue, the work should be the best in its particular line that the firm could turn out. He believed at the present moment the whole secret of business success lay in good work at fair prices; they would succeed along these lines better than in any other way.

Now came the question, having got their business, did they know what it cost them? Mr. Simnett described how this point was forced upon him by an abnormal charge for ink, which he was obliged to investigate. When they got a job into the house could they say what it really cost? Did they know whether it paid, or whether it did not? The only way they could determine that point, in his opinion, was that they should know in every individual case—whether it was 500 octavo memos or 10,000 64-page catalogues—what it cost in each detail, and that they should have at the same time a *bona fide* record of that cost.

In order to make a success of a costing system they must first of all give every assistance to the compositor and their other employees to enable them to work their job as economically as possible. It was wasteful to have a man walking about the composing room from morning to night looking for "sorts," and it was no use having a stone with a couple of drawers containing a lot of furniture that had to be sawn up. Mr. W. J. Fox had helped the costing system enormously by bringing out his excellent scheme of working stones in the most economical manner with all the furniture of the right kind at the worker's hand. If the compositor began fair and square and was provided with a decent lot of type and everything to hand, not only to

compose but to make up his formes and get them on to the machine, then the employer had done his part towards performing the work according to his estimate.

Accurate Time Recording Necessary.

In the next place it was necessary to devise a system whereby they could know exactly what their costs were. One of the most important features was that the time occupied on any job should be accurately set down. He thought this work should be undertaken in the office by an independent person. While they had to have many sheets and forms, his scheme rested principally upon the cost book, which contained a permanent record of every job that went through the house. This was the most fascinating book in any printer's office. It analysed every job and showed the individual cost in each department. It had a double advantage, because they could turn up particulars of a job previously executed and compare the cost with what it was to-day, and in that way put their hand on the weak spots.

Mr. Simnett went on to describe the order sheets which were provided for every job going into the house, and upon which appeared every possible cost. These jobs were entered into an order book, each job being given a number which identified the job throughout. Against the particular number on the time dockets was entered by each man the amount of time taken on the particular job. From these dockets the particulars were calculated each night. Although it seemed a large amount of work, it was purely mechanical if carried out in a systematic way. In the counting house every morning the time worked by each man, was entered on the sheets from the dockets, and in this way the file kept for the job was complete and they knew that upon these sheets they had every hour that had been worked. The costing standard rates were charged on to these sheets, and they could see how much the job had cost in labour in each department. At the side of each of the sheets was a record of the costs on the last occasion when the job was done, and when charged up they could see at once how the cost compared for each operation with 6, 12 or 18 months before. With these sheets they had in their hands a complete record of the costs on the job.

Having got all the costs properly entered on the sheets at the end of the week, these sheets were charged up to the customer and went into the sales book, having previously been entered into a cost book, ruled for every department. The number against the job was recorded in the cost book, and there they had, at the end of the week, months, or any period they liked, a full record of every job permanently registered. The order book gave them a record of every order coming into the house, and it showed them whether the order had gone

through the cost book and been charged to the customer.

Value of Patterns.

The speaker emphasised the importance of keeping patterns of every job turned out. If the job was charged out to the customer, they entered the number, the date on which it was charged, and the quantity on to the pattern. Having a drawer for each customer, they could go to a particular drawer and turn up the pattern and a job executed three months or 10 years previously. This method cost a little in carpentering, but it paid. The systematic keeping of patterns had saved his firm from difficulties hundreds of times. Generally speaking, the patterns did not increase to any great extent, because they only kept the original and the last one.

Mr. Simnett based the value of his scheme on the cost book, because although they might lose a cost sheet from the file, the cost book was always with them. On the question of file copies, Mr. Simnett assured his audience they did not get mixed up if kept systematically.

Having gained the information as to the cost of a job, he was not so interested in the question of what the profit should be. Every business varied, and the question of the net profit was a matter for each individual firm to decide. He did not think there should be, or could be, any standard rate of profit, except for general work. But he did emphasise one thing, and that was that their costs should be there and that they should be proper costs. They could, however, soon learn, if they kept the cost book constantly in front of them, whether their costs were such as they could work their business upon. He did not think they could run a business of any size without a standard costing system! Some people might say 5.5 an hour for composition was too much and they could make it pay at 5. But if they got somewhere round the costing standard rate they were right on the bed-rock principle of costs. Their proportionate overhead charges and expenses were included in that, and then they had a really genuine cost.

The Small Man's Misapprehension.

Mr. Simnett mentioned the cases of small businesses carried on by the principal, who worked by himself and who made no charge for his own time, calculating that everything he got out of the work was profit. That was the greatest mistake for a small man to make. He might be undercutting his brother printers to a certain extent and getting increased business, but the moment he got that increased business and came into the position of employing labour, down came his theory to the ground and he found himself in difficulties. If, by working himself or with his brother or son, such a man could make a bigger ratio of profit, so

A BOOKLET published by Linotype and Machinery Limited describes how the printer's greatest requirements

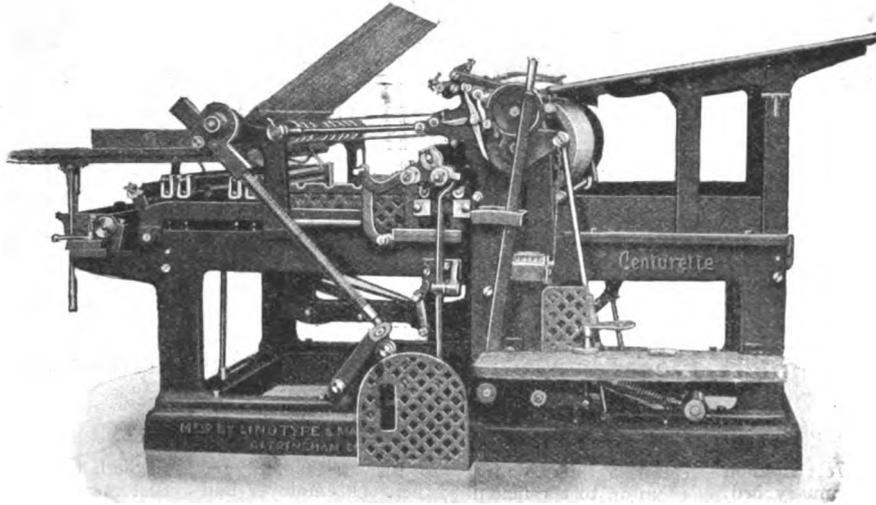

PERFECT PRINTING & RAPID OUTPUT

have been combined in one machine. This booklet illustrates the chief components of the

Centurette

the machine that is *built* to print a 24-in. by 37-in. sheet up to 3,000 impressions per hour, and does it day after day.

Users tell us that the Centurette is as economical on short runs as it is on long runs, and that its accessibility of forms and ease in making ready show a distinct advance in press manufacture.

Send to-day for a copy of the Centurette Booklet No. 65.

much the better for him; but do not let them run away with the false impression, because they were in a position to do a job a little cheaper than somebody else, that that was going to be a permanent thing.

In conclusion, Mr. Simnett referred to the question of analysing the weak spots in a business, and by his system he maintained they could tell whether they were losing money in any department. Incidentally, he remarked that his experience was that a ruling department paid less than any other, and it was a mystery to him how trade rulers made anything out of it. (Laughter.)

In connection with the meeting, slips had been passed round in order that members might enter their costs for various operations, and these showed singular variations. Hand composition varied from 1/6 to 5/5; machine composition per 1,000 ens from 1/9 to 2/9; double crown, 3/- to 6/6 (the standard costing rate being 5/6); double demy, 3/3 to 6/6; double royal, 5/6 to 7/-; crown folio, 2/9 to 4/6.

Aim of a Costing System.

Mr. A. Williamson, who was cordially received, pointed out, in opening the discussion, that a costing system should not exist to find out how much to charge a customer, but to find out how to reduce cost in the first place, and how to increase production. While an advocate of the Federation Costing System, because he believed it to be the finest available at the present time for printers, he had nothing but endorsement for the method outlined by Mr. Simnett. It struck him, however, that the latter system was not quite elastic enough. They needed some kind of machinery to prove to them whether 5/5 per hour for composition was enough or too much, and the Federation System did prove that. They had to have regard to the hundred and one small items which entered into the cost, and which, unless they were tabulated in some form, were likely to be overlooked. Mr. Williamson went on to speak of the value of the advocacy of a cost system from a man who was actually using it, as in the case of Mr. Simnett. Some years ago it would have been a remarkable thing for a member of an Association to explain his own methods of business to his fellow members. (Hear, hear.)

The speaker went on to urge the need for a standard system, and instanced the case of a small piece of ironmongery which had been reduced in price and improved in quality as the result of a consultation of cost accountants in that particular industry. He was confident that unless the printing industry worked on similar lines they would continue in the condition in which they found themselves to-day. They had first of all to find out what it cost them to produce, and then they would be able to find out the means of reducing that cost. The cost of printing would have to be lowered, but not by price-cutting. There was a line called the equilibrium line—that was, the average number of hours in the composing room which they could charge out to their customer, and the average number for the different machines. Not until they found that line could they begin to investigate where their costs ended and their profits began. Mr. Williamson commented on the fact that 26 printing businesses had recently come under the hammer, and suggested that a large proportion of these concerns had not been run on proper lines.

Mr. Spring, who carried out a similar system to that of Mr. Simnett, mentioned that through the system his attention had been called to the reduced cost of making ruled pads, and on looking into it he had found that the price of paper to-day was a third what it was 18 months ago, namely 4½d. per lb. as against 1/2. The speaker disagreed with Mr. Williamson's figure of 32 hours a week for composition, pointing out that on a Monotype machine they got an average of from 37 to 38 hours a week per man.

A Baffling Problem.

Mr. Walmsley (Messrs. Vacher & Co.) raised the problem of the fluctuation in the printing trade and the varying volume of business. To-day, for instance, only 66 per cent. of the machinery in the printing industry was running, and only two-thirds of the normal staff of compositors employed. They were living in abnormal times, and while their costs were founded on an average, let him say, of 38 hours per week, if they only got two-thirds of the normal production, the real costs would not be met by the costing rates charged, with the result that the profit added would not have matured. Therefore, if they did not have the production, how were they to deal with that baffling problem? It was perfectly obvious, if the composition rate was 5/5 on 32 hours, it would be less on 38. The problem remained that if compositors were not employed to the same number as in busy times, they would find,

however perfect the costing system might be, unless they got the volume of production, the profit was only a profit on paper and did not mature.

Mr. Simnett said the only remedy for fluctuating trade was to concentrate on getting business. They must fill their factory as far as it was possible. It was no use, because they had a smaller volume of business, to increase their charges, else they would get no business.

Mr. Young said the standard costs were all very well, but he doubted, if they priced their charges on the system, whether many of the jobs would be placed with them. A printer had to ask himself whether he was justified in regarding the standard rates as being his own costs. It seemed to him it was very largely a question of size of business. Referring to the present parlous state of the industry, Mr. Young said they had to face the fact that not only were there too many compositors in the printing trade at the present time but there were probably too many employers. (Laughter.) Although it was poor consolation for those who had to go to the wall, it was necessary for some of them to give way in order that others might survive, because in the time of adversity the trade could not employ the same number of master printers. In the next few years the employers either would have to accept less income from their businesses, or a great many of them would have to go out altogether. The speaker emphasised the safeguard provided by an auditing of books.

Examples from Abroad.

Mr. Johnson (organiser from headquarters) quoted from Mr. Eaton Hart's address printed in *The British & Colonial Printer & Stationer* of December 15th, in the course of which Mr. Hart said that so highly did the keen business printers of America esteem the costing system that they now refused membership to those who would not adopt it.

Mr. Simnett referred to the very handsome building which the German printers had erected at Leipzig, where every new invention that came up in any way affecting the industry was represented by a model for the benefit of every member of the craft. He also mentioned the system prevailing in Germany, whereby master printers agreed to send out the same estimate. He urged combined effort among the master printers of this country, without which they would never get down to a living wage. Their weakness was lack of combination and the need for being fair and square with each other. As things were, the only one who profited was the consumer.

The Chairman, in closing the discussion, gave figures to show that there were small printers in America, and went on to say that the costing system was the best thing that the Federation or any other organisation had given to the printing craft. The trouble was they did not value it sufficiently. He expressed the gratitude of the meeting to Mr. Simnett for his address, to Mr. Williamson for his contribution to the discussion, and to Mr. Johnson and Mr. Peters for their presence.

Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

CANADA.

A manufacturers' agent in Montreal, already representing Canadian and American firms for calendars, etc., desires to obtain the representation of United Kingdom manufacturers of translucent transfer signs for glass, also advertising utilities, on a commission basis, for Montreal. (Reference No. 6.)

ITALY.

An Italian citizen, established in Milan, desires to secure the representation for Italy of United Kingdom exporters of raw or half-worked materials used in the paper and other industries. (Reference No. 16.)

MESSRS. SUCKLING AND Co., papermakers' agents and merchants, Royal London House, Finsbury-square, London, are issuing with the compliments of the season two very elaborate calendars. As last year, they take the form of reproductions of famous oil paintings—one by Turner and the other by Landseer—the reproduction being a clever imitation of the original brush work on canvas. The date slips are attached in such a way as to leave the pictures unharmed.

Printers and Postal Rates.

The Joint Industrial Council of the Printing and Allied Trades of the United Kingdom (representing 5,000 employers and a quarter of a million workers), meeting at Montagu House on the 11th inst., received a letter from the Postmaster-General in which he said that he is not yet in a position to make any announcement as to a reduction of postal rates for printed matter and post cards.

Subsequently the Council issued a statement in which it is mentioned that a deputation from the Council had on several occasions met the Postmaster-General and discussed with him the effect of the present postal rates on unemployment in the printing industry, and had at his request furnished details showing the disastrous effect of the present postal rates on the picture post card trade and the way in which the present high rates for printed matter are driving trade abroad. The deputations have been requested by the Postmaster-General to have patience, and to give him time to effect economies by which he hoped that it might be possible for him to indicate reductions in these rates, to come into force at a later date. Even an intimation for relief at a fixed date some months hence would have helped the situation and afforded traders a chance of making preparations.

The Council point out that some of the economies effected in the Post Office in the form of curtailment of public services have been most detrimental to industry, but it was thought well to suffer these inconveniences and losses in the hope that they might lead the way to a reduction in rates. The Council also points out that many large advertisers decide early in the New Year the amount they intend to spend on advertising and how any sum is allocated to different forms of advertising. In such decisions the questions of the postal rates is an important determining factor, and at present they have reached a prohibitive rate. The Council regards it as vitally important to the whole trade of the country that various forms of publicity should be encouraged to the utmost.

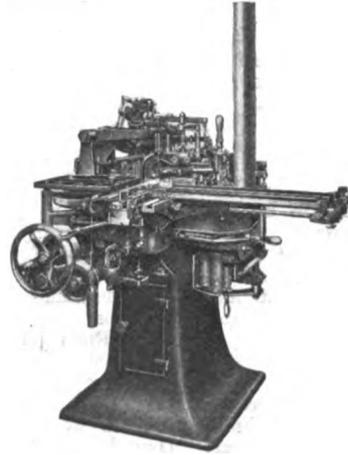

In conclusion, the Council desires to impress upon His Majesty's Government in the strongest possible manner the necessity of the present postal rates being immediately amended, and asks the Press and the various organisations of employers and employees throughout the country to use their utmost endeavours to assist the Council in attaining this end.

Market Prices of Paper.

The prices given below are based on current quotations for mill lots of not less than 3 cwt. For merchant's supplies and small orders allow 10 per cent. to 15 per cent. extra.

Trade Notes.

MR. WILLIAM LOXLEY, the veteran Sheffield printer, has passed away at the age of 92.

THE Newcastle, Gateshead and District Butchers' Association has decided to support the local Master Printers' Association in their protest against the proposed municipal printing press.

THE printing and stationery works and the paper warehouses of Messrs. Philip and Tacey, Ltd., have been removed from Singer-street, Finsbury, to new buildings at 69-79, High-street, Fulham, S.W.6.

SOUTHWARK BY-ELECTION ECHO.—An incident connected with the posting of election bills during the recent Southwark by-election was the subject of an appeal at London Sessions on Friday last. The appellant was Herbert Russell, a bill-poster, who had been sent to six weeks' imprisonment for assaulting George Duffill, a compositor, and his appeal against this conviction was allowed. Russell, said counsel, was posting bills for the Conservative Party, and Duffill thought he was going to place one over a poster of Mr. Naylor. He resented this, and protested, whereupon the appellant struck him in the eye, causing a severe cut.

"DAILY HERALD" AT 1D.—The *Daily Herald* announces that the General Council of the Trades Union Congress and the Executive of the Labour Party have resolved to assist the *Daily Herald* in its efforts to secure a larger circulation by reducing its price to one penny. These two national bodies have found means to enable the paper to be sold at one penny as from Monday, January 23rd. In order that the Joint Movement may have a voice in determining the policy of the paper, Mr. R. B. Walker and the Right Hon. Arthur Henderson, M.P., will consult with the directors of the *Daily Herald* on matters of policy.

A CONCERT in aid of the Printers' Pension Corporation at the "Cauliflower" Hotel, Ilford, realised £55. The chair was taken by Mr. H. Murch, of the *Daily News* and *Star*.

THE Printers' Nonpareil Musical Society held a successful concert on Saturday at the "Cambria" Hotel, Camberwell, S.E.15, in aid of the funds of the Printers' Pension Corporation. The chair was occupied by Mr. Ernie Platt (Messrs. J. J. Keliher and Co.), and the good plate, combined with the excellent quality of the programme, made a very enjoyable evening.

AUXILIARY CONCERT.—The fifth of a series of concerts run by the South London Auxiliary to the Printers' Pension Corporation was held on Saturday at the "Horns" Assembly Rooms, Kennington park, the chair being occupied by Messrs. Fred Body and George Kingsman. Considering the difficult times, the plate realised—£40—was quite good. An excellent programme of music was gone through, and a vote of thanks to the chairman, moved by the secretary, brought a successful evening to a close.

NEWCASTLE DISTRICT COMMITTEE.—The first of a series of social functions in connection with the District Committee of the J.I.C. in Newcastle-on-Tyne was held on Friday, the 8th inst., and took the form of a whist drive and dance. Over 400 employees and a number of employers were present, including Mr. J. Leslie Smith, president of the Newcastle Master Printers' Association, and Mr. C. Bowes, president of the North-Eastern Alliance. Mr. A. E. Goodwin was invited to present the prizes, and in doing so alluded to the success which had attended District Committee work in South Wales. He suggested that the Newcastle District Committee should start a holiday home for the printing trade at Whitley Bay, Bamborough and Saltburn.

WILLS.—Mr. Edward Arthur Bonnor-Maurice, Lord of the Manor of Llanfechain, a director of the Solicitors' Law Stationery Society, Ltd., £43,713; Mr. Henry Wilson Fox, M.P., for the Tamworth Division of Warwickshire, editor of the *South African Mining Journal*, £63,020; Mr. Thomas Nelson (otherwise Thomas Shiel Nelson), of Parliament-hill-mansions, Highgate-road, N.W. (died October 9th), for many years member of the staff of *The Times*, £1,926; Mr. Henry Dawson, printer and stationer (died October 26th, 1920), £10,683; Mr. W. H. Poole, of Stamford, the editor of the *Lincoln, Rutland and Stamford Mercury*, £791.

THE death has occurred of Mr. John Davey, printer and publisher of the *Chemical News*.

A MEMORIAL to the 310 members of the staff of Messrs. W. H. Smith and Son who lost their lives in the war, was unveiled at the firm's new premises, Strand House, Portugal-street, last week, by Viscount Hambleden.

A SERIOUS fire broke out on the premises of the Yorkshire Stock Paper Co., Leeds. During the operations of the firemen on the first storey, the floor gave way, and one of the firemen was found to be dead on being extricated four hours later.

WOOD-CUT POSTERS.—The revival of an old branch of art for commercial purposes is illustrated by the application of wood cut design to advertisement posters. The London Brighton and South Coast Railway Co. has recently issued a striking wood-cut poster by Mr. C. D. McGurk, the subject being a picturesque corner of Arundel.

MR. ROBERT THORNBERRY, of Newspaper House, Fleet-street, has presented a cup, to be known as "The Publicity Club Cup," to be awarded annually by a special committee to the person whose signal achievement in their opinion best deserves recognition.

A NEW YORK telegram to the *Chicago Tribune* (Paris) states that the publishing house of Dodd, Mead, and Co. has acquired the business of the John Lane Co., including a working alliance with the London firm of John Lane.

THE calendar issued for 1922 by the St. Bride Foundation Printing School, executed by the students, makes a very neat production. In a plate-sunk panel, on a card 15 in. by 10 in., there appears an excellent reproduction of a windmill scene printed from an etching in photo-lithography.

MESSRS BIRLA BROS., a prominent Marwari mill-owning and merchant firm of Calcutta and Bombay, have acquired control of the *Bengalee*, founded many years ago by Sir Surendranath Banerjee, who is now Minister in the Bengal Government. Eighteen months ago Mr. Ganshyamdas Birla purchased the English-owned and English-conducted *New Empire*.

It is reported that the Finnish War Ministry has asked the Ministry of Justice to institute proceedings for treason against seven Communist newspapers, which are accused of publishing statements contrary to national safety.

AN EFFICIENCY EXHIBITION.—A Business Efficiency Exhibition, organised by the Association of Office Appliance and Equipment Manufacturers and Traders, will be opened by Mr. Gordon Selridge in the Central Hall, Westminster, on February 8th. It will be open for 10 days, and is designed to call attention to the various devices which have been proved in practice to be necessary for the commercially efficient handling of trade. Efficiency experts will explain various ideas in the way of short cuts to accountancy, methods of keeping stock, plans of sales promotion, and how to organise efficiently an office of any description.

MR. WILLIAM R. LAWSON, who has passed away at the age of 81, was on the staffs of the *Daily Telegraph*, the *Standard*, and the *Edinburgh Courant*, the last of which he edited from 1875 to its demise in 1886. In 1887 he joined the staff of the *Financial News*, and later was for a time editor of that journal.

THE death is announced of Mr. Edwin Drew, the well-known Dickensian, from bronchitis. As a journalist, Mr. Drew was chiefly engaged on "free lance" work, and he recalled with pride his meeting with Charles Dickens during the time the novelist filled an editorial chair in "the street."

MR. SIDNEY HEAD, a well-known journalist, died on Saturday, aged 46 years. He had been prominent in West-country journalism, serving for many years on the *Western Daily Mercury*, and in London later served on the sub-editorial staffs of the *Globe* and *Daily Chronicle*.

A VERDICT of "Death by misadventure" was recorded by the Hampstead coroner on Saturday at the inquest on Edmund Stewart Smith, aged fifty-two, a journalist. He was found in his room unconscious, gas escaping from a ring.

THE death has occurred of a well known Cheshire journalist, Mr. Lionel Davies, formerly of the literary staff of the *Chester Courant* and *Chester Observer*, and latterly editor of the *Western Weekly News*, Plymouth.

PRINTING, paper and office appliances will form one group at the International Industries Fair to be held at Utrecht, Holland, from February 21st to March 3rd.

Trade Union Matters.

"NATSOPA" SECRETARYSHIP.—The Executive Council of the National Society of Operative Printers and Assistants give notice that at the request of Mr. G. A. Isaacs the office of general secretary will be declared vacant on February 28th, 1922. This course is taken to enable members to express confidence or otherwise in Mr. G. A. Isaacs following upon the charge of fraud and improper performance of duty made in connection with and in the legal action against the Society. Mr. Isaacs has consented to be re-nominated and to contest the election against any other candidate submitted to ballot, and thus test the feeling of the membership and to clear his name of the accusations that have been made. The Executive Council now invite the nomination of candidates for the post of general secretary. Nominations close on January 21st.

A CAMBERWELL STRIKE.—On account of a dispute regarding wage reduction all the employees, numbering 130, of Messrs. Joshua Jones and Co., Ltd., showcard mounters, of Southampton-street, Camberwell, and the City, have come out on strike. The strikers (of whom 95 are women) are members of the National Union of Printing and Paper Workers. We understand that the Ministry of Labour is exerting its good offices towards an early settlement of the dispute.

FOLLOWING upon an invitation from the Ministry of Labour, the Typographical Association have entered into an arrangement whereby dependency grants disbursed in accordance with the provisions of the Unemployed Workers' Dependents Act will be paid by the branch secretaries of the Association. A protest was made to the Ministry against the official decision that nothing would be allowed for administrative expenses, and also against the inadequate amount allowed under Section 17 of the Unemployment Insurance Act, but eventually the agreement was signed on the terms laid down by the Ministry of Labour.

THE TYPOGRAPHICAL ASSOCIATION.—At the request of the Newcastle Branch of the T.A., the Executive Committee are about to issue a ballot paper to their members containing the following question: "Are you for or against a levy of 1s. per week in order to build up the funds of the Association to the sum as agreed upon by resolution at the Hastings delegate meeting?"

THE Typographical Association have been notified by the secretary of the Co-operative Wholesale Society of an impending change in the conditions of working and rates of pay in the printing establishments under their control. Hitherto the wages paid have been a few shillings in excess of the standard rate. Now, "owing to excessive competition and trade depression, it is intended to revert to trade union rates of wages, hours, and other conditions of employment." The new conditions will become operative at the Co-operative Works at Manchester, Leicester, Newcastle and Warrington. On the initiative of the Newcastle members of the firm, the Typographical Association Executive have been asked to arrange a conference with the directors with a view to a continuance of the existing privileges.

THERE was a large attendance of members of the Newport Branch of the Typographical Association at a lecture given by Mr. A. Liddington Johns, of the *Directory* office, Newport, describing the various phases of the costing system. The speaker held his hearers' interest for two hours, and at the conclusion was accorded a hearty vote of thanks on the motion of Councillor W. Cadogan. Mr. Johns, in response, expressed his willingness to conduct a costing class if sufficient students came forward.

THE T.A. Executive Committee report that Mr. Henry Wilson, a superannuated member, who died in November, and who was formerly employed as a composing-room overseer at the offices of the *Manchester Guardian*, has bequeathed a legacy of £100, free of duty, to the local superannuation fund of the branch.

ALL Bolshevik newspapers are to be formed into a single Trust.

The Printing Trade in 1921.

Reviewed by Mr. E. G. Arnold.

Though we have in a previous issue published a brief review of printing trade history in the year that is past, readers will doubtless find many points of interest in a retrospective article from the pen of Mr. E. George Arnold, the well known Leeds master printer, who was president of the Federation of Master Printers from 1916 to 1918. The article appears in the *Yorkshire Post Annual Trade Review*, which gives a comprehensive résumé of the country's trade and industry of the past year, and is as follows:—

The printing group of trades is one of the principal industries in Leeds and district, and, from its very nature, it always acts as an accurate reflection of general trading conditions. This is so, not only in the immediate district in which the factories are situated, but throughout the whole country; the Leeds firms draw their trade from all over the British Isles and also the Colonies and Dependencies.

General commercial depression throughout the world—excepting perhaps Central Europe—has brought about a shortage of orders unparalleled in the history of the industry. Short time has been general, and there has been the fiercest possible competition for such moderate amount of orders that have been on the market, with the result that while the ultimate purchaser has gained, the printer and allied traders have suffered severely from lack of proper profit.

Labour Matters.

Realising that the price of the finished product was above its economic value, and being fully convinced that trade could not improve until prices fell considerably, the employers began to press the Federated Unions for a reduction in wages in the spring of the year.

Negotiations dragged on interminably, and at the finish a reduction of 5s. with a subsequent 2s. 6d. for males at varying dates, and 2s. with a subsequent 1s. for females, was partially agreed to at the end of September. Two or three of the unions, however, refused to agree to the second deduction at all.

The result of the deduction did not, however, bring down the price of the product to anything like the extent which customers expected, because all the overhead charges—taxation, coal, power light, heat, etc.—remained unduly high; and by the time the trade unions had settled down to the reduction, short time was so general that the majority of the employers felt they could hardly ask for still further reductions, even though they were convinced that, until sweeping reductions do take place, the industry will remain in its present condition. To put it another way, if a male or female worker is only earning about half normal wages, because the factory is only working about half-time, there must of necessity be considerable difficulty in asking for still further reductions of wages. It is a source of gratification to note that employers, speaking generally, have kept on the major portion of their staffs, both administrative and operative, even when there was insufficient work for the whole of them, and when the cold dictates of economics would have justified a large number being dispensed with. This, however, cannot continue indefinitely, and, unless trade revives, still further dismissals will have to take place.

Paper Prices.

So far as the cheaper kinds of paper are concerned—and it is, of course, of those that the heaviest tonnage is used—the bottom went out of the market in the autumn in consequence of the receipt of quotations for paper from Central Europe at ridiculous prices, prices so low that in many cases delivery was never made, although substantial orders were placed. This naturally stamped the British mills, as they had to lower their prices accordingly, without any regard to the economic value or the consequential result accruing from such action. Taken on a strictly economic basis, the cost of paper, particularly the cheaper kinds, cannot fall to any marked extent until the price of coal has fallen, and fallen very considerably; that is, unless the mills are willing to trade at a loss. It is an axiom that, for cheap writing and printing papers, it takes three tons of coal to make two tons of paper.

During the trying period under review congratulations can be given without stint to the breadth of view and the common sense with

which the majority of the leaders of the trade unions have dealt with such matters as have arisen. While it is obvious that their first duty is to those whom they represent, and while there are times when differences with the employers are acute, yet it is generally admitted that those who lead and advise organised labour in the printing group of trades are, speaking generally, men and women of unusual breadth of view and wide experience.

Postal and Railway Rates.

Printing has probably been affected more acutely than any other industry by the obstinacy of the Postmaster-General in refusing to reduce the abnormally high postal charges. Customers using advertising matter naturally stay their hands on account of the extra postal charges. A return to the halfpenny post rate for advertising matter, for post cards and for book post communications would bring about an immediate revival in the industry, but such does not seem imminent.

One unexpected consequence of the high postal rates has led to large quantities of advertising matter being posted from various countries on the Continent because of the cheaper postage, and latterly this has developed, as was only to be expected, in the printing of such advertising matter also being done abroad. Urgent representations are being made to the postal authorities, and there are rumours that a reduction in postal charges is coming in the early part of 1922.

The State Printing Office.

The whole trade is concerned greatly at the growth of Government competition through the State Printing Office at Harrow, owned by His Majesty's Stationery Office, and a ceaseless watch is being kept on its activities. It will be remembered that on February 25th last a division was taken in the House of Commons regarding a further development near Manchester on the part of His Majesty's Stationery Office, and that the Government majority fell to 10. A number of Stationery Office contracts which have recently been on the market have, however, been allocated to private firms, even although the "model" printing office—i.e., the State Works at Harrow—had quoted for such tenders, showing clearly that on this occasion private enterprise produced a cheaper article than a State owned and managed printing factory.

At the moment the prospects for 1922 cannot be described as bright, because the adverse influences mentioned above still prevail, and show but few signs of passing away. But the printer and his allied traders in the industry are invariably optimists, and there is a feeling that as soon as some of the adverse conditions above referred to pass away or are modified a brighter day will come, not only for the industry, because orders will be given more freely, but for the general business and professional public, who will be able to obtain their requirements at prices more nearly approaching those which prevailed before the war.

German Exports.

Printing Machines and Machines for Working-up Paper.

Under the above classification the exports from Germany during May-September, 1921, were as under:—

	Double Centners.	Value in 1,000 Marks.
May	11,795	33,417
June	10,940	28,797
July	15,341	39,517
August	11,289	33,641
September	10,794	31,511

The exports during the five months mentioned were to the following countries:—

	Double Centners.
Belgium	4,303
Denmark	1,472
France	3,652
Great Britain	2,025
Italy	4,069
Netherlands	8,120
Norway	561
Czecho-Slovakia	3,335
Finland	1,238
Sweden	2,849
Switzerland	5,550
Spain	3,028
South America	3,516
Other Countries	16,441

MASTER PRINTERS

OF

West and North-West London.

Interesting Debate at January Meeting.

The meeting of the Association of Master Printers of West and North-West London on Wednesday last week introduced a feature of special interest, the transaction of the Association's business being followed by a debate on the subject of "Trade Union v. Open House" between Mr. F. A. Davies, assistant secretary of the London Society of Compositors, on the one hand and Mr. C. Allen, of the Solicitors' Law Stationery Society, on the other. The stormy evening probably kept away some who would otherwise have been present, but there were enough representative master printers present, with a few visitors, to make the meeting a thoroughly interesting one. The chair was occupied by the president of the Association, Mr. E. W. Wormald.

After the reading and confirmation of the minutes of the last meeting, the secretary announced that Messrs. Johnson and Peters, the headquarters organisers, had been successful in obtaining eleven new applicants for membership.

Mr. Johnson interposed with a few words of commendation for the work of Mr. Searle who in his efforts on behalf of the Association had gone over the whole of the ground in his neighbourhood, Hammersmith, as a result of which the organisers were now able to reap where Mr. Searle had sown.

The election of the eleven applicants was duly proposed, seconded and agreed.

Allocation of Funds.

The chairman then introduced the question of whether the grants of money from headquarters to district associations—to cover expenses of local propaganda, etc.—should be increased, or what other proposals members might wish to bring forward as to the allocation of subscriptions.

It was intimated that at a meeting of district representatives that day it had been recommended that the allocation should be increased by a small amount, and a proviso made whereby special local expenses should be met in addition, according to requirements.

The hon. secretary, Mr. J. R. Burt, moved that the Association accept that recommendation, and after a short discussion this was agreed.

The chairman next drew attention to the Benevolent Fund, and explained the purpose of this provision for necessitous master printers.

The treasurer, Mr. F. Scarsbrook, suggested that the L.M.P.A. financial report should give some indication as to the expenditure from the Benevolent Fund; the amount spent and the number of beneficiaries might be disclosed.

It was agreed that this suggestion be passed on to headquarters.

"Trade Union v. Open House."

The chairman then welcomed Mr. Davies. He said he thought the debate that evening—the credit for the arranging of which was due to Mr. Burt—would make one of the most important events in the syllabus of the West and North-West Association. Such a meeting tended to the closer bringing together of employers and employed and might have important effects upon the Association's future policy.

Mr. Davies stressed first the advantages of collective bargaining and uniform conditions as against chaotic competition, and affirmed the necessity for a certain amount of equality between the parties to a bargain and the consequent need for the retention of the strike weapon as a remote possibility for the protection of the workman. He set forth at some length the advantages claimed by the trade union shop as against the open shop, particularly in regard to the easy obtaining of good workmen and the securing of harmonious working.

Mr. Allen said he was not opposed to trade unionism in theory nor to collective bargaining, but was opposed to trade unionism as a political force. He described the open house as the alternative to compulsory trade unionism, laying stress on the liberty of the individual. He dissented from Mr. Davies' claims as to the relative proportion and quality of union labour as against non-union, and accused the union of restricting output by eliminating competition amongst workers and by imposing tyrannical regulations. He

claimed that the strike weapon could be eliminated, and adduced as an example the experience of the Printing Trades Alliance in the recent wages dispute.

A short discussion, and a cordial vote of thanks to the speakers, concluded a very interesting debate, of which we hope to find room for a full report in next week's issue.

This Journal Appreciated.

SIR,—Will you allow me to offer my congratulations on the return of your journal to its larger format?

I am sure that the fuller space you are able to give to matters of interest to the whole printing industry will still further enhance the value of the *British and Colonial Printer and Stationer*, and that, in the future as in the past, your journal will be of great assistance to all movements that tend to the uplifting of the craft.

Yours, etc.,

A. E. GOODWIN,
 Secretary, Federation of Master Printers and Allied Trades of Great Britain and Ireland.

24, Holborn, E.C.1.,
 January 17th, 1921.

The Printer and His Paper.

SIR,—It is, indeed, gratifying to find that a very short talk to a coterie of master printers has interested so thorough a papermaker as Mr. W. H. Silvester. He and I have common interests in that we desire progress in paper, and, as far as I can see, we do not differ on anything material. There are two points, however, on which a few words may be useful and informative.

Mr. Silvester asks, "What is a specialist?" May I answer by reference to a small fantasy of mine, entitled "The Paper Doctor," which appears in *St. Bride Cake*, a publication issued by St. Bride Foundation Printing School in aid of the Printers' Pension Corporation. There I have pictured a doctor of science, who has commenced business as a consulting specialist for those who meet troubles in paper. As sometimes happens, what was intended for light reading contains the germ of a matter of progress. A specialist, in connection with the printer and his paper, is one who knows a good deal of the detail of each industry, and, by using his knowledge, is able to trace the origin of troubles arising in the use of paper, and can then prescribe the means for overcoming them. There are, as I have indicated, incurable ills, such as paper or boards badly cockled on the long edges, but for most troubles there is a way out, and the specialist fulfils his function in pointing the direction. The South-West London Master Printers endorsed the opinion I have of the value of the specialist.

The beaterman or machineman, skilled in the production, storing and handling of paper and box board, is undoubtedly a specialist—in his sphere.

Static electricity in paper sets up troubles that are inconceivable by the papermaker. Automatic feeding becomes impossible. Register is difficult. Set-off prevails, and spoils work. A great deal of electricity may be eliminated at the paper machine, it is true, but that is not sufficient. The printer demands that all electricity shall be removed from the paper before he can use it efficiently. But the papermaker cannot ensure its entire absence. After paper leaves the mill, various conditions, such as wide variations of temperature, will induce electricity in paper, and will give rise to the troubles already detailed. The reporter at the meeting did not give publicity to the cure. Chapman's Neutraliser is a well-tried apparatus for dealing with the trouble, being used at one or more points of the printing machine in order to ensure the neutralisation of electricity which may be set up by friction of the machine, as well as any that may be present in the paper before printing.

The papermaking details of Mr. Silvester's letter are rather deeper than I usually take the printer, but indicate, as I always maintain, that if the user could become more intimate with the manufacture of his material, he would pause longer before he grumbled.

Yours, etc.,

EDWARD A. DAWE.

Wallington, Surrey.

SPECIAL PREPAID ADVERTISEMENTS

The Minimum Charges for Three Lines, with an average of seven words to the line, for Advertisements under the headings given below are as follows (extra lines at proportionate rates):—

THURSDAY, JANUARY 19, 1922.

Cheaper Postage Demand Growing.

THE Postmaster-General's explanations and apologies for failure to remove the postal burden upon industry have evidently failed to carry conviction, for there is a marked increase in the amount of protest that is forthcoming, not only from the printing trade but from business men generally. Thus at the quarterly meeting of the Association of British Chambers of Commerce, held in London on Tuesday, a strong resolution was passed condemning the high postal charges, Lord Southwark declaring that there had been enough talking and writing to urge the Postmaster-General to carry out urgent reforms; the charges were destroying trade, increasing unemployment, and robbing the Chancellor of the Exchequer; they hoped soon to be in a position to submit a practical policy to the Prime Minister. The printing trade also is to take this same course. Speaking at Birmingham, Mr. James MacLehose, president of the Master Printers' Federation and chairman of the Joint Industrial Council of the Printing and Allied Trades, said that the council had unanimously decided that, in view of the reply received from the Postmaster-General that he was not in a position to make a statement as to the change in the postal rates, the Prime Minister should be asked, immediately on his return from France, to receive a deputation from the Joint Industrial Council, representing 5,000 employers and a quarter of a million workers. The statement on the subject by the Joint Industrial Council (cited on another page) has been sent to all members of Parliament, trade associations, joint industrial councils and trade union organisations. The seriousness of the situation is indubitable, and it is to be hoped that action by the Prime Minister may lead to long overdue mitigation.

Newcastle's Municipal Printing.

CORRESPONDENCE in the local Press regarding the municipal printing plant at Newcastle-on-Tyne has continued throughout the week. A Mr. Adams having challenged the master printers to print their rules, so as to substantiate their denial of the existence of a printing "ring," several correspondents, including "an employee," registered a vigorous protest at the unjust accusations made, and Mr. A. E. Goodwin wrote pointing out that the Federation's rules are printed in the

"Master Printers' Annual," which is on sale to the public. We understand that the deputation from the Newcastle Master Printers' Association was not received by the Newcastle Corporation last week, as the special committee had not finally completed its report. Very probably the question will come forward at the Corporation's next meeting in February.

Printers' Health.

IN many printing offices there has been a determined effort to minimise dust, and to promote in every way healthy conditions of employment. It has been contended that dust is one of the causes of printers' phthisis, and it is important to notice that the Medical Research Council has confirmed dust (silica) as being the active factor in the causation of pulmonary tuberculosis. One of H.M. Inspectors of Factories expresses the opinion that printing is not a dusty trade, in an article in the current Home Office Annual Report, and the longevity of many printers points to the fact that conditions under which they work have no harmful effects. However, the question of dust reduction deserves the closest attention, and few will disagree with Dr. E. Halford Ross that dust plays a dangerous part in the health of our lives.

Day Continuation Classes.

THE printing trade, more than some other trades, has reason to realise how very desirable it is that boys and girls after leaving school should give some time regularly to the continuing, under efficient instruction, of their general education. In this connection perhaps not every employing printer takes the interest he should in the facilities for such instruction provided by the London County Council. The work of the L.C.C. day continuation schools is designed to secure for the boys and girls, first and foremost, that they are kept fit and healthy for their new condition of life; and, secondly, that they should be so equipped that if they desire to progress in any walk of life they are possessed of the foundation knowledge which will enable them to succeed. The courses of instruction given, therefore, all contain physical training for one or one and a-half hours out of the eight hours per week attendance which the law demands. The remaining seven or six and a-half hours are devoted to instruction in English subjects and some kind of handicraft or science, together with a little mathematics and drawing. We are glad to note that Mr. Geo. Eaton Hart, a printing trade enthusiast for technical education, is doing his best to emphasise the value of day continuation classes. The more enthusiasm we have for education the better for the trade; for the wider spreading of education among printing trade employees means the advancement of the industry as a whole.

German Trade Activity in China.

GERMANY is showing great activity in cultivating the Chinese market, and the footing gained by British manufacturers will have to be carefully nursed if a permanent and increasing business is to be assured. China is a country of great potentialities, and pre-war British exporters showed considerable enterprise, which, of course, was temporarily suspended during the war, and gave Japan and America an opening. It is the insidious methods of the Germans, however, that now seriously count, especially as they are carrying on business in partnership with the Chinese. Among the articles imported into China from Germany paper appears to be making great progress. From January to July, 1921, the supplies of packing paper were 290,000 kg., and printing paper 40,000 kg.

MR. THOMAS E. CURTIS, paper machinery and accessories for wholesale paper merchants, etc., has removed from Shoe-lane to 16/20, Farringdon-street, E.C.

Men and Things.

A Good "Blowing-Up."

"It pleased his Majesty"—says John Evelyn, writing on September 5th, 1666 about the Great Fire of London—"it pleased his Majesty to command me among the rest to look after the quenching of Fetter-lane end, to preserve, if possible, that part of Holborn." He adds that "the rest of the gentlemen began to bestir themselves, who hitherto had stood as men intoxicated with their hands across, and they began to consider that nothing was likely to put a stop to the fire but the blowing up of so many houses as would make a wider gap than any that had yet been made by the ordinary method of pulling them down. This, some stout seaman proposed early, and had it then been done it should have saved nearly the whole city, but this, some tenacious and avaricious men, aldermen, etc., would not permit, because their houses must have been of the first."

Violent attacks often necessitate violent remedies. And the remedies should be timely. The "avaricious men" of the Great Fire episode after all did not save their houses any more than they saved the City.

It was very understandable that they did not want to be among the first to suffer. Evelyn himself wouldn't have been seen had his Deptford home been in question. The fire might go out, you know, or it might be put out. Hope springs eternal in the human breast. Moreover everyone at first seemed dumbfounded, "as if intoxicated"; standing "with hands across."

But they woke up. They were Englishmen. And after all Englishmen, by testimony of Evelyn's contemporary, John Milton, are "not slow and dull, but of a quick and ingenious and piercing spirit, acute to invent, subtle and sinewy to discourse, not beneath the reach of any point, the highest that human capacity can soar to."

They reached the "point" that a great sacrifice of houses blown up across a wide area was necessary; and reaching that point, they acted on the conclusion they had reached.

A tremendous fire of unemployment has been ravaging the world during 1921; and ravages it still. That fire must be stopped. If great personal sacrifices, corresponding to the blowing-up of houses must be made, well, so must it be; and so it will be. And in the leadership towards whatever sacrifices are called for, men of this nation will be found, and conspicuous among them, men of our printing craft.

John Milton wrote also: "Now once again by all concurrence of signs and by the general instinct of . . . men as they daily and

solemnly express their thoughts, God is decreeing to begin some new great period. . . . What does he then to reveal himself to his servants and as his manner is, first to his Englishmen. . . . Behold now this vast city (of London). . . . The shop of war has not more anvils and hammers waking . . . than there be pens and heads there, sitting by their studious lamps, musing, searching, revolving new notions and ideas. . . . Others, as fast reading, trying things, assenting to the force of reason and conviction. What wants there to such a towardly and pregnant soil but wise and faithful labourers to make a knowing people, a nation . . . of sages and of worthies."

"There are," says Milton, "no small number of as great spirits among us as his was who, when Rome was high besieged by Hannibal, being in the city, bought that piece of ground at no cheap rate, whereon Hannibal himself encamped his own regiment."

I have Scots readers I hope. Greatly daring, I wonder if I may not catch the eye of even our Federation President, Dr. McLehose himself. My dear doctor, blame John Milton, not me. It was he who wrote "Englishmen." And why shouldn't poor old Englishmen say a word for themselves sometimes? Why not say, as the Oxford don said of the Cambridge dons—"After all, they are God's creatures, poor things."

Englishmen, Scotsmen, Welshmen and Iri—members of the Irish Free State and Ulstermen, all of them being now "studious" of the post-war conditions of the world, being also quick and acute and not beneath the reach of any point of necessary action, will bestir in whatever direction to prevent present evils becoming worse and to change them to present good. Beginning with anything. What of beginning say with the post office?

The General Post Office must be blown up. Certain firms, like Spicer Bros. particularly, are exploding away at it incessantly, forcibly; but they must be helped. Business-destroying postal rates must be smithereneed. The Master Printers' Federation killed one Post Office proposal during war-time.

And note what Mr. Kellaway said in last Sunday's *Observer*:—

"I withdrew the proposal to increase the foreign rate on printed papers going abroad. This I did as a result of very weighty representations, made to me by the newspapers. They pointed out that the circulation of British publications abroad benefited our overseas trade."

What Rowland Hill did on the great scale, what our Federation did on the small scale, that we can do again. And surely must.

Mr. Kellaway is a bit droll without knowing it. He says that as a result of increased

charges he had hoped to balance post office accounts. He adds, "As I pointed out in moving my estimates, a great deal depended on the state of trade." . . . But trade, he says, worsened. To be sure it did. Increased postal rates helped to worsen it. The result of risking injury to trade in order to help the Post Office was apparently that trade was injured right enough, but the Post Office wasn't helped.

There are germs of business "flu" in the air which must be dispersed. A certain lethargy, even a fatalistic despairing—that must be blown sky high. A new force, a new explosive is wanted. What of Co-operative Advertising?

Here, peculiarly, printers by their organisations might help to start operations. Mr. F. H. Bisset, lately secretary of the Scottish Master Printers' Alliance, tells a very heartening tale of what co-operative advertising has done, in the book which the Thirty Club of London, the promoters of the International Advertising Exhibition of last year, have just brought out, the book entitled "What I know about advertising." He says that in the United Kingdom makers of Scotch tweeds have put up £54,000 between them, which they use to develop the market for genuine Scotch tweed, incidentally protecting it against misdescription. The Irish Linen Society in Ulster, in concert with a New York office, have joined in unitedly pressing on the merits of Irish linen. The British Trawler Federation is advertising fish. No brand, no monopoly, just fish. A Rubber Association and a Federation of British Spas, and various municipalities and the British Music Industries, are other cases of combined action directed to arouse public attention and confidence.

The British Commercial Gas Association spends large moneys with the printer. No names of makers or of appliances are mentioned, nor are gas undertakings necessarily mentioned. Mr. F. W. Goodenough, of the Gas Light and Coke Co. was the prime mover in this campaign.

In America co operative advertising is somewhat older; and its results are more definitely tabulated, and Mr. Bisset quotes case after case of striking results. As when he says that the Calefornian Fruit Growers' Exchange, through their co-operative publicity, saw their sales increase by 800 per cent. while their expenses fell. He names one group of competitors, co operating in this connection, who, in 1913, sold 110,000,000 lbs. of raisins, leaving 30,000,000 lbs. produced and unsold. Collective advertising and selling altered this by 1917 to 326,000,000 lbs. produced, and sold.

Why shouldn't printers co-operate to advertise printing in this United Kingdom? To increase the printing habit?

FRANK COLEBROOK.

Personal.

THE RIGHT HON. C. W. BOWERMAN, as vice-chairman of the Joint Industrial Council of the Printing and Allied Trades, is approaching the Prime Minister with a view to arranging for a deputation to wait upon him in the matter of the postal rates.

VISCOUNT BURNHAM is to preside at the fourth annual banquet of the National Advertising Society which will take place on February 13th at the Connaught Rooms, and has issued an appeal for financial support.

SIR WILLIAM WATERLOW presided on Tuesday at Watford at the second of a series of meetings to inaugurate a district committee for Hertfordshire.

MESSRS. A. E. GOODWIN, A. E. Holmes and J. Yates were among those present.

SIR WILLIAM NOBLE, engineer-in-chief to the British Post Office, opened at the head offices of the *Liverpool Courier and Express*, on Monday, a new relay automatic telephone exchange linked up with the public service which has been laid down for the use of these journals.

THE Council of the Newspaper Society last week entertained to luncheon two of their colleagues, Sir Meredith Whittaker and Sir Joseph Reed, together with Sir Charles Hyde, Bart., who, like the other two, is a member of the Committee of Management of the Press

Association, in recognition of the honour recently bestowed upon them by the King.

MR. VALENTINE KNAPP, president of the Society, proposing the health of the guests, regarded the honour as a recognition not only of the public work accomplished by the three gentlemen in their own cities, but more especially of the work they had performed for the provincial newspaper Press.

MR. W. H. TUCKER, the retiring president, occupied the chair at the annual meeting of the Cardiff Master Printers' Association, when the following officers were elected: President, Mr. E. W. Holder; vice-president, Mr. Edward Roberts; secretary, Mr. F. Verner Nicholls; treasurer, Mr. Fred Glossop.

MR. ROBERT WEBBER tendered his resignation from the executive committee, but it was unanimously agreed to ask him to reconsider his decision in view of the great services Mr. Webber has rendered in the past to the Association and the printing trade generally.

MR. WALTER SMITH, a member of the committee, was congratulated upon his recent appointment to the Commission of the Peace for Cardiff.

THE Lord Mayor of Cardiff is expected to attend the Association's annual dinner, arranged to take place on January 30th.

MR. A. E. HOLMES, secretary of the Printing and Kindred Trades Federation, was among the guests of the "Safety First" Association at dinner at the Trocadero Restaurant on Monday night.

MR. J. E. REEVE (general manager, George Mann and Co., Ltd.), has consented to become president of the Lithographers' Auxiliary for the ensuing year. The task of getting money for the Printers' Pension Corporation is not easy just now, but no doubt the high reputation in which Mr. Reeve's name is held among printers and printers' engineers will go a long way in lessening any difficulties that may exist.

His first concert of the season is to be held at the Cannon-street Hotel on February 28th, and he has fortunately been able to secure the services as chairman of Mr. Harold Strong, of Messrs. Strong, Hanbury and Co., Ltd., who is a nephew of the late Sir T. Vezey Strong, a gentleman who did much in his time for the Corporation.

MR. A. CHADWELL and Mr. W. Bullett were re-elected president and secretary respectively of the Electrotypers and Stereotypers' Managers' and Overseers' Association at the annual general meeting on Tuesday at St. Bride Foundation Institute.

HERR VON HAGEN has been appointed Press Attaché to The Hague Legation.

MR. EDWARD A. DAWK desires to tender to all friends who have expressed their sympathy in the recent bereavement the warmest thanks of Mrs. Dawk and himself.

MR. HENRY JOHN HOLMES, who has been in the service of Messrs James Wrigley and Sons, Ltd., Bridge Hall Paper Mill, Bury, for over 43 years, for 19 of which he has been secretary of the company, has retired.

DIVIDENDS AND REPORTS.

LINOTYPE AND MACHINERY LIMITED.—Net profit of Linotype and Machinery Limited for year ended June 30th, 1921, after deducting reserves and depreciations, was £132,128, compared with £101,697 for preceding year. After providing interest on debenture stocks, payments to trustees for debenture stockholders and guaranteed dividend on leased company's shares, there remains £50,207. £55,000 has been written off balance of accumulated profits in reduction of amount standing under head of trade investments, leaving accumulated profits, including profits for year, £275,864, which Board recommend be carried forward. Trustees purchased and cancelled further debenture stock, making total of £138,618 "A" stock and £173,139 "B" stock purchased at June 30th. Amount added to reserve, resulting from further purchases and from balance in hands of trustees not at present applied to cancellation of debenture stock, was £28,800.

NEW COMPANIES.

RAWSTORNE PRESS, LTD.—Capital £2,000 in £1 shares; printers, lithographic printers, electrotypers, type founders, stereotypers, photographers and colour printers, etc., and to adopt agreements (1) with W. James and (2) with J. A. Woodley. Private company. First directors: J. A. Woodley and W. Ollis. Registered office: 48, Rawstorne-street, Goswell-road, E.C.1.

ARTHURDE PRESS, LTD.—Capital £2,000 in £1 shares; wholesale paper and string merchants, general printers, manufacturing stationers, etc. Private company. Subscribers: Arthur Shurek, Abraham D. Dubowski and Mrs. Gertrude Shurek. Office: 6. Wheler-street, Commercial-street, E.1.

D. GESTETNER, LTD., has been registered as a "private" company with a nominal capital of £90,000 in £1 shares (60,000 9 per cent. cumulative preference and 30,000 ordinary. Object: To adopt an agreement with D. Gestetner and to carry on the business of manufacturers of duplicating machines and accessories as formerly carried on by the said vendor at the Neo Cyclostyle Works, Tottenham, N., and elsewhere. Signatories to the Memorandum of Association: F. T. Smith and F. Mann. Signatories to appoint first directors. The amount remaining undischarged of moneys borrowed or raised by the directors (other than by issue of share capital) shall not exceed at any one time £100,000. Qualification, £10.

THE BELGRAVIA TRUST, LTD., has been registered as a "private" company with a nominal capital of £100 in 1s. shares; financiers, merchants, manufacturers, printers, publishers, etc., in the United Kingdom and Russia or elsewhere. Signatories to the

Memorandum of Association; W. H. Baslick and E. Rascock. Signatories appoint first directors. Registered by W. H. Baslick, 141, Victoria-street, S.W.

A. J. STASNEY MUSIC Co., LTD.—Capital £500 in £1 shares; music publishers, sellers, printers and importers and exporters of music, publishers, and printers' agents, etc. Private company. Directors: S. Pennals and B. H. Gower. Registered office: 62, Oxford-street, W.

T. H. FLORENCE, LTD.—Capital £5,000 in £1 shares; to take over the business of a plain and fancy box maker, etc., carried on by T. H. Florence at 3, Charles-street, Manchester. Private company. Subscribers: T. H. Florence and P. Florence. Registered office: 3, Charles-street, Manchester.

BOOTH GRIFFIN PHOTOGRAPHIC SERVICE, LTD.—Capital £1,500 in £1 shares (1,200 participating preferred and 300 ordinary); photographers (commercial and trade), advertising contractors, dealers in works of art, etc. Private company. First directors: H. Wm. S. Booth and P. A. Court. Registered office: 346, Soho road, Handsworth, Birmingham.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

P. W. TURNER AND Co., LTD. (Colour process and half-tone engravers, etc., Birmingham).—A. First debenture dated December 14th, 1921, to secure £300. Holder: A. E. Skidmore, 55, Newhall-street, Birmingham. B. Second debenture, of even date, to secure £500. Holders: D. E. Bateman, 48, Frederick-street, Birmingham, H. W. Cheshire, Kildare, Blakebrook, Kidderminster, and P. W. Turner, 58, Holyhead-road, Handsworth, Birmingham. C. Particulars of series of £300 debentures, authorised December 1st, 1921 (present issue £150). All charged on the company's undertaking and property, present and future, including uncalled capital.

W. T. MOULTON AND Co., LTD. (Printers, etc., Brighton).—Satisfaction in full on September 29th, 1921, securing £500.

DE GRUCHY AND Co., LTD. (Stationers, printers, etc.).—Satisfaction to the extent of £500 on December 13th, 1921, of debentures dated August 7th, 1920, securing £2,000.

JAS. TRUSCOTT AND SON, LTD. (Printing and stamping contractors, etc.).—Particulars of £25,000 debentures, authorised July 11th, 1921; present issue £10,000; charged on the company's undertaking and property, present and future.

EDSON (PRINTERS), LTD.—Mortgage, and as collateral security thereto, a debenture, both dated December 24th, 1921, to secure £6,040, charged on 15a, Springdale-road, Stoke Newington, and the company's undertaking and property, present and future, including uncalled capital. Holders: National Institute for the blind.

W. H. COTTON AND Co., LTD. (Paper stock importers, etc.).—Particulars of £1,000 debentures, authorised December 5th, 1921; present issue £400; charged on the company's property, present and future, including uncalled capital.

COOPER, DENNISON AND WALKDEN, LTD. (London, Glasgow, Birmingham or elsewhere).—Satisfaction in full on December 1st, of mortgage dated March 11th, 1921, securing all money due or to become due.

EBURITE PAPER Co. (1919), LTD. (Paddington).—Issue on December 20th, 1921, of £7,500 debentures, part of a series already registered.

L. UPCOTT GILL AND SON, LTD.—Issue on December 21st, 1921, of £3,000 debentures, part of a series already registered.

FLEET PUBLISHING Co., LTD.—Debenture dated December 9th, 1921, to secure £1,000 (of which £150 is now advanced and £850 is now

due and owing for goods sold and delivered) charged on the company's undertaking and property, present and future, including uncalled capital. Holders: George Mawson and Co., Ltd., 71, Fleet-street, E.C. (Registered January 5th, 1922, pursuant to Order of Court.)

STANDARD CATALOGUE Co., LTD. (London).—Issue on November 18th, 1921, of £2,250 "B.S.E." debentures and on January 4th, 1922, of £4,500 "B.S.E." debentures, parts of a series already registered.

ST. SWITHIN'S SYNDICATE, LTD. (Music publishers, etc., Charing Cross-road, W.C.).—Particulars of £12,500 debentures authorised December 16th, 1921, present issue £6,500, whole amount issued; charged on the company's property, present and future, including uncalled capital.

BANKRUPTCIES, etc.

Re WM. EDWARD TUCKER (printer, etc., 14, Arthur-street, E.C.).—The first meeting of creditors was held under this failure at the London Bankruptcy Court on Monday before Mr. Warren, official receiver. The receiving order was made on December 22nd upon the petition of a creditor. According to the debtor's statements he was formerly in business as a lithographer at Worcester, and traded under the style of W. E. Tucker and Co. In 1896 the business was converted into a limited company which went into liquidation four years later. The debtor then removed to London, and for 20 years was employed by a firm of printers. In September, 1920, he took offices at 14, Arthur-street, E.C., and carried on the business of a printer under the style of Tucker Bros.; but he had done practically no business during the last twelve months. He did not admit insolvency, and attributed his present position to having become surety for his brother to the extent of £1,000 to enable the latter to carry on the Country Life Club at Datchet, and to the fact that a creditor had obtained judgment against him for the said £1,000. The debtor returned his liabilities at that amount and valued his interest in the equity of the Club House at £4,000. The meeting was adjourned for three weeks to enable the debtor to submit a proposal to the creditors.

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIPS DISSOLVED.

Thomas Ernest Vasey and John Wetherill printers, Gladstone-lane, Scarborough.

Alfred James Doe, Gilbert Caxton Inman, Arthur Ramsden Facer and Lewis Gordon Causton Swornsbourne, advertising contractors, Bon Marché Chambers, Briggate, Leeds; so far as regards Alfred James Doe.

RECEIVING ORDERS.

Edgar Bowden, Arthur William Robert Seaton and David Charles Brain, 29, New-foundland-street, Bristol, printers, Jan. 13th.

Frank Cartwright, Clarence House, Sirhowy, Mon., newsagent, January 9th.

UNDER the title of "Attainable Ideals in Newspaper Advertising" an interesting compilation setting forth a series of advertisements to demonstrate the use of illustration and typography best adapted to newspaper advertising has been issued by the Dorland Agency, Ltd., of 16, Regent-street, S.W.1.

MESSRS. LEIGHTON SON AND HODGE, LTD., send us a most serviceable reading case for the London Telephone Directory. The case, which is handsomely produced in crimson cloth gilt, is an excellent example of sound workmanship, and is of exceptionally neat and substantial appearance. The only indication of its origin is a small gilt imprint inside the front cover. Silk straps with snap fastenings are provided for holding the directory in place. The whole forms a most useful and tasteful gift.

A Smart Paddington Printery.

Morton, Burt and Sons' New Works.

It is perhaps unique for the conversion of a stately residence into a factory to be declared a decided improvement to any neighbourhood. Yet, this, we hear, is the general opinion in Bayswater where Messrs. Morton, Burt and Sons, Ltd., have contrived to transform what was for some years, outwardly, an eyesore to the district into a very neat and prepossessing printing establishment.

The building, a substantial detached four-storied one, in the early Victorian style, stands in a plot of land at the corner of Porchester-road and Westbourne-gardens, and adjoins the site on which the Paddington Borough Council have just decided to proceed with the erection of their new Public Hall and Baths. Messrs. Morton and Burt, Ltd., of Edgware-road have combined their jobbing works there with those of the Burt and Sons branch and have taken the opportunity of combining at the same time the two styles of their firm into that of Morton, Burt and Sons, Ltd., by which they will be known in future. The new title and description of the firm's business is set out between the different floors and lower windows of the building in artistic character of white lettering outlined in black on a subdued grey background, and the high surrounding wall is similarly treated in one long band at the head, leaving space below for the display of some of the fine poster work which this firm produces. The general impression is exceedingly pleasing, giving an effective advertisement without vulgar prominence or detriment to the surrounding property.

A Big Reorganisation.

Internally, the building has been completely transformed and now contains four large open floors strengthened by substantial steel girders, with overseer's office, readers' box, females' rest-room, etc., in convenient side rooms, and roomy stores in what were formerly attics, the whole suitably decorated in a colour scheme of pale green, slate and claret. The plans for the conversion of the building were prepared by, and the work carried out under the direction of, Mr. Owen Thirtle, A.R.I.B.A., the heating being entrusted to Messrs. Bilbie, Hobson and Co., and the removal and fitting-up to John Burt and Son, Ltd. It is intended to erect a shelter for the employees on the surrounding land and we shall not be surprised if they in their turn interest themselves in beautifying the remainder of the grounds when favourable weather permits.

After a short tour of inspection of the new premises we congratulate this enterprising house upon a forward movement which should have good results in extending a business which is already held in high repute. The firm has an old and honoured name in the printing trade. Its origin dates back to the early years of the last century, and the business has steadily grown until to-day it covers a large and important field of varied work, including municipal printing, railway printing, the production of numerous magazines, printing for hospitals, societies and other institutions, and printing of many other kinds.

The Firm's Personnel.

The progress made bears eloquent testimony to the capability of those at the head of the concern. The late principal of the firm, Mr. C. W. Burt, died last year at the hoary age of 87, and the chairmanship of the company then passed to his elder son, Mr. J. R. Burt, who, with his brother, Mr. A. H. K. Burt, had for many years been a managing director of the company and has had life-long experience in the business. The other director, Mr. J. Emlyn Jones, has also been associated with the firm ever since coming out of his time over 30 years ago, and his marked abilities have been demonstrated by the way in which he climbed all the rungs of the ladder up to directorial status, and also by the success attending the departments under his control. Messrs. Burt and Jones are active members of the local branch of the London Master Printers' Association, and Mr. J. R. Burt also serves the industry as a member of the L.M.P.A. Executive Council.

The opening of the new premises means that the bulk of the firm's work will now be executed at Bayswater, but Messrs. Morton, Burt and Sons, Ltd., have no intention of giving up their other offices—at Edgware-road, Willesden-green and Shepherd's-bush. These offices will be retained, and, by co-

ordinated effort towards making the best of the firm's improved accommodation and extensive resources of up-to-date plant, it is hoped that the near future will see still further expansion of this already successful business.

Portsmouth & Southampton Printers.

A joint meeting of master printers of Portsmouth and Southampton was held at the latter town on Monday. Major W. H. Barrell (president of the Portsmouth M.P.A.), presided, and welcomed the Southampton members and Messrs. R. J. Byland and Percy D. Michael, as representing the Home Counties Alliance, and Mr. A. E. Goodwin, secretary of the Federation of Master Printers.

Mr. J. Goldsmith, president of the Southampton M.P.A., stressing the value of meetings of master printers to discuss common problems, expressed the hope that in the summer they might arrange a more ambitious gathering, to include all the master printers of Hampshire and Sussex in conference.

Mr. A. E. Goodwin spoke of the general work of the Federation, and emphasised the unemployment caused by the high postal rates and the Postmaster-General's failure to give any promise of amelioration. He produced examples of foreign printing widely circulated in this country. In regard to railway rates, he said the Federation hoped to secure substantial concessions, and he also mentioned the action taken to prevent gold leaf being brought within the scope of the Safeguarding of Industries Act. He stressed the need, in these days of reckless competition, of the adoption of Federation costing methods, and promised to send a member of the costing staff to the district at an early date.

Mr. Byland contributed a most effective speech, and his appeal at the close caused seven non-members to apply for membership of the Association.

Mr. Penney, of Southampton, spoke on the cost of monotype composition, and Mr. Michael gave many instances of the value of the organisation of the home counties. Mr. Barnes, of Southampton, in the closing speech of the evening, was very happy in his references to the benefits the small printer receives by membership of the Federation.

A hearty vote of thanks was accorded Major Barrell for his efforts in arranging and presiding over so successful a meeting.

Trade Exhibits at Selfridge's.

The printing and allied trades are represented in a small industrial exhibition which is being held by Messrs. Selfridge and Co. with a view to showing their visitors some of the interesting processes involved in the production of the goods retailed at the big Oxford-street emporium.

In the way of printing, there is a monotype caster and keyboard, from the type produced by which proofs are pulled on a hand press. These proofs are pulled on paper which proceeds direct from a papermaking machine—a working model by Messrs T. J. Marshall and Co. This machine, which attracts a great deal of attention, shows the process of papermaking right from the wet pulp to the finished paper. It measures about 7 ft. in length and, though not to scale, is a very instructive model.

Bookbinding is represented by an exhibit of hand sewing and finishing, well carried out by craftsmen from Sangorski and Sutcliffe. There is also an exhibit of hand marbling of paper, showing this interesting handicraft being carried out on a small scale.

THE Bulgarian Government is issuing two new postage stamps bearing the photograph of the late Mr. J. D. Bouchier, an English journalist who for many years represented the London Times in the Balkans. The honour is unique in journalism. Mr. Bouchier died on December 30th last year, and the new stamps were announced to be issued on the anniversary of his death.

Books were imported into Ceylon during the seven months ended July, 1921, to the value of 3,01,000 rupees, as against 3,00,000 rupees in the corresponding period of 1920, and 2,87,000 rupees in the seven months of 1919.

The Offset Process Explained.

Lecture at Camberwell.

On Friday last, the 13th inst., at the London County Council School of Arts and Crafts, Camberwell, in connection with the Artistic Typography Classes, with Mr. J. A. Cooper, (Messrs. Cooper and Budd) in the chair, a lantern lecture on offset machinery and the offset process, entitled "Offsetography," was delivered by Mr. Frank Heywood (a director of Geo. Mann and Co., Ltd.) to a good audience of students and many outside friends in the printing trade.

Around the room were displayed a very fine collection of samples, produced by this well-known process, in which keen interest was shown, particularly the examples of photolithography.

By means of a series of excellent slides, the evolution of the present-day offset machines was unfolded, special mention being made of the romantic side, whereby tin-plate printers were using this principle of printing from rubber over forty years ago, and yet did not realise its possibilities when applied to paper. The lecturer described, by means of basic diagrams and illustrations, the many and varied models made by his firm ranging from the smallest demy folio to that unique production, their two-colour and perfecting rotary offset machine. Emphasis was laid on the many facilities provided to enable the highest class work, as well as the commonest, to be produced efficiently. The last section of the lecture was devoted to a discussion of the merits of this process, particularly the latest phase, which enables the process to do work hitherto regarded as exclusively belonging to the typographer, special mention being made of the latest development in this connection, viz., a copy of the *Blackpool Times*, which, as already mentioned in our pages, is the first British newspaper to be produced by the photo litho offset process.

The chairman in a humorous speech, proposed a very hearty vote of thanks to the lecturer, and said that as a letterpress printer he would from then onwards have to look into the merits of this process, and Mr. A. Williamson (of the Costing Committee of the Federation of Master Printers), in seconding the vote, expressed himself as being extremely interested in what had been said from the point of view of cost of production, etc., a subject on which, of course, he is an expert. The very fine rotary machines, he said, now produced by printers' engineers, not only save a large amount of space and use less power, but also give a far greater output than the old flat-bed machine.

Mr. Heywood, in reply, returned thanks for the enthusiastic appreciation of the lecture, expressing the hope that it would be eventually to the benefit of all concerned.

Photo-Mechanical Processes.

Under the auspices of the Rochdale Master Printers and the local Education Authority, a series of nine lectures have been arranged to be given by the lecturers from the Manchester College of Technology.

On Thursday the opening lecture was given by Mr. J. H. Harrison on "The Photo-Mechanical Processes." The lecture was admirably illustrated by nearly a hundred slides.

Mr. Harrison first gave an historical sketch of the development of the illustration process from the wood-cut to the latest in rotary photogravure and the step-and-repeat machine method, followed by a detailed description of the production of a line block. He dealt at some length with faults in line blocks—broken lines, etc.—and showed their cause. Illustrations were shown of faulty dot and line formations and their causes, and how the printing suffered in consequence.

Admirable hints were given to the artist regarding the preparation of drawings for line blocks and the use of the right materials. Following lectures will deal with half-tone, three and four colour blocks, and rotary photogravure, and the latest developments in the illustration world.

MR. A. J. W. GILES, paper specialiser and mill agent, has removed to 20-21, Queenhithe, Upper Thames-street, London, E.C. T.N., Central 8672.

Stationers' Social Society.

Mr. Lionel Savory Elected President at Annual Meeting.

Members who attended the annual meeting of the Stationers Social Society at the Cannon-street Hotel on the 6th enjoyed a bright and pleasant evening. One or two "hardy annuals" came up for discussion, and enlivened the proceedings. Mr. P. W. Kennett, who completes a year of very useful and earnest work on behalf of the society as its president, occupied the chair.

Following the reading of the minutes, the secretary (Mr. A. E. Mist) presented the balance sheet, which disclosed a satisfactory state of affairs.

New President.

The next business on the agenda was the election of a president in succession to Mr. Kennett, who, in putting forward the name of Mr. Lionel Savory on behalf of the committee, spoke of the respect in which Mr. Savory is held throughout the paper trade. In his hands the affairs of the society would be safe, and the objects for which it was established would be faithfully carried out.

Mr. Savory, who is a partner in the firm of Savory Brothers, paper agents, has had a long association with the paper trade. Born at Warham, on the north coast of Norfolk, he commenced his career in the paper trade with Messrs. James Spicer and Sons in October, 1882, and remained with that firm until the end of December, 1896, when he was appointed agent for Messrs. Wm. Sommerville and Son, Ltd. To this agency, a few years later, he added that of Messrs. Smith, Anderson and Co., Ltd. Subsequently Mr. Lionel Savory was joined by his brother, Mr. Harrison Savory, and the firm of Savory Brothers was established. The business was originally started at 60, Queen Victoria-street, but in December, 1917, the offices were removed to Tudor-street. Mr. Lionel Savory is an old member of the Stationers' Social Society, but has not previously held office. His recreations are golf and shooting. As in the paper trade, so at North Finchley, where he has resided for twenty years, the new president is held in high regard, and not least for his sympathetic interest in the charities of that district.

Mr. Kennett, on relinquishing the office of president, automatically becomes vice-president.

Secretaries Re-Elected.

Mr. A. E. Mist and Mr. J. W. S. Johnston were unanimously re-elected secretary and assistant secretary respectively. Their efforts during the year have helped to stimulate interest in the society, especially through the highly successful social functions which have been held.

The Committee, which has worked so well during the past twelve months, was re-elected *en bloc*.

Mr. A. V. Prankerd and Mr. R. L. Jeffery were appointed auditors for the ensuing year.

Alteration of Rule.

Mr. F. L. Cayzer had given notice of a resolution adding the following words to Rule 2, "but the Committee shall have power to declare eligible for membership any other gentlemen connected with the trade." In the unfortunate absence of Mr. Cayzer through illness, Major Craster moved the motion. With the further alteration empowering the annual general meeting to elect such members, the amendment was carried.

Hitherto the rules had prevented the election of gentlemen who were not "actually engaged in the paper trade, as a papermaker, papermaker's agent, wholesale stationer or as representative of such." It had long been desired to confer the courtesy of membership upon Mr. Fredk. Gillis (*World's Paper Trade Review*) and Mr. J. L. Greaves (*Paper Maker*). With the alteration of the rule this was rendered possible, and these two gentlemen were duly elected members of the Society.

Mr. M. Henry had given notice to move that the words in the same rule "that the name of any gentleman" should be altered to "that the name of any lady or gentleman."

In spite of Mr. Henry's strong advocacy, the amendment was not carried.

A cordial vote of thanks was passed to the chairman (Mr. Kennett) on the motion of Major Craster, and a similar compliment was paid to the trustees.

In proposing a vote of thanks to Mr. Mist and Mr. Johnston for so well carrying out their respective duties of secretary and assistant-secretary, Mr. Porteous spoke in high praise of their whole-hearted activities.

STONHILL & GILLIS, 58, Shoe Lane, London, E.C.4.

"PHOTO-ENGRAVING PRIMER," by Stephen H. Horgan. "BYEPATHS OF COLOUR PHOTOGRAPHY," by O. Reg. London: Percy Lund, Humphries and Co., Ltd., Amen-corner, E.C.4. Price 5s. each, nett.

These two books which have just been issued from the Country Press deal with their respective subjects in a clear and concise manner, which makes them easily understandable and renders them important contributions to the allied crafts of photography and process engraving. Mr. Horgan is a well-known and experienced writer on photo-engraving processes in the United States, and is editor of the process section of the *Inland Printer*, and anything from his pen has the quality of authority. In this primer he gives concise instructions for apprentice engravers, or for those seeking a simple yet practical knowledge of line and half-tone engraving. The author deals with the studio, the camera, the lens, the dark room and its illumination, the chemicals, metals and other requisites of the art, and goes over the whole method of securing the negative and turning out the finished plate ready for the printer. Much valuable instruction is given as to the etching of the plate; in fact the various methods are so minutely set forth that he would indeed be a simpleton who could not grasp them and follow them out in actual practice. The book has a glossary of terms used by photo-engravers, with their definitions and synonyms, and the copious index given renders any reference to the text easy. In the author's preface he points out that "no changes have been made in the methods used by photo-engravers during the past few years. This would indicate that photo-engraving has about reached the limit of its development, hence this would be the proper time to record present-day procedure."

In the "Byepaths of Colour Photography" we have an important contribution to the literature of the subject, by a practical photographer who has devoted many years to the study of colour photography, and who here gives to others the benefit of his experiences, which cover a wide field. The various camera methods of securing the necessary three-colour negatives are dealt with, and the theories of leading workers in this field analysed. The theories of Du Hauron, Maxwell, Ives, and others are quoted, and illustrations given of the methods used in various cameras specially designed by these workers. One-exposure cameras are also described and the uses of prism and reflectors are touched on. The author deals only with the three-negative methods of colour photography, and does not touch on the Autochrome, Paget, Omnicolor, or other one-negative methods, but these of course belong to a different class of colour photography from that which he has set out to explain, and there is no doubt that to the process engraver who makes colour blocks this handbook will be of the utmost value. The making of lantern slides in colour, and the production of prints by superimposition are dealt with, and there is a chapter on Cinematography in Colours, in which field the author has had considerable experience, and another on Kino-Stereoscopy, for which, as yet, no really practical method has been invented although many complicated methods have been tried and found wanting.

Both books have been edited by Mr. W. Gamble, the well-known editor of "Penrose's Annual," who also writes a preface for each of them, and the contents appeal to all who desire to attain to a thorough knowledge of the subjects dealt with.

THE THAMES PAPER CO., LTD.—This enterprising firm, whose board manufactures hold a high reputation on the market, have again distributed a most useful blotting pad to their customers. The side openings contain slips for memoranda and weekly tear-off sheets for engagements neatly encased in leatherette boards. A table of counts and substances is included, also postal information and calendars for 1922 and 1923. The blotter will be greatly appreciated by the recipient, and the case in which it is contained also serves as an excellent example of the high class manufactures emanating from Purfleet Mills.

LIFE is too short to remember unpleasant things.

German Paper Exports.

Statistics for the Three Months, July, August, September, 1921.

Considerable interest attaches to the foreign paper trade of Germany, and we have been able to obtain the figures for three individual months of last year, with details as to country of consignment, as follows:—

HIGHLY-FINISHED CARDBOARD.
(Glazed Cardboard and other Highly-Finished Cardboard, Artificial Leather Cardboard, Fine Cardboard, Vulcan Fibre, Cardboard of Wood Pulp, etc., and other Rough Cardboard).

To—	JULY.	AUGUST.	SEPT.
	Double Centners		
Denmark	3,620	2,674	3,057
Great Britain... ..	1,436	3,534	3,763

Italy's Duty on News-Print.

The controversy which has been carried on for long months between Italian papermakers and printers respecting the free importation of news-print has ended. The result is the imposition of a duty of 50 gold lire per metric ton, or 240 paper lire, upon this variety of paper, hitherto free of duty. Italian technical periodicals, especially the *Industria della Carta*, draw attention to the importance of this decision and its good effect in business circles.

A Paper Criticism.

How Papermakers Might Help the Printer.

In discussing the subject of co-operative effort between the allied trade, Mr. Robert F. Salade, in "The Printing Art," gives one or two hints as to how the paper-maker might help the printer. In the course of his article, Mr. Salade says:

There are many different kinds of paper on the market, most of them good, of course, but some of them defective. While it is true that the leading manufacturers of paper have made great improvements in their product during the last few years, it is likewise a fact that additional improvements in paper stock are still needed so far as the mechanical work of printing is concerned, and the paper manufacturers who will make these betterments will be giving the printers real co-operation.

For example, take those grades of paper which have two different sides—a "right" side and a "wrong" side. Every practical printer knows that paper of this variety will cause a great deal of trouble in presswork. You cannot print so well on the "wrong" side of a bond paper as you can on the smooth side. The same is true with all grades of paper which have two different surfaces. When cutting paper in the large-size sheets it is a hard matter to keep the various "lifts" of stock stacked up together with the smooth surface of the paper always at the top. The "lifts" of paper are often inverted at intervals, and when the pressman receives the stock he must either turn over the inverted lifts, or trust that work to the feeder who is to run the job. If all the sheets are not properly turned with the smooth surface running in consecutive order, some sheets are bound to print lighter than others, and vice versa.

What are we to do about this kind of material? The paper manufacturers will probably say that it is a mechanical impossibility to make both sides of certain grades of paper exactly the same. But nothing is impossible. The time has come for making this most essential improvement in the grades of paper that need it. There should be no such thing as paper with a "right" side and a "wrong" side. It would doubtless

require a large expenditure of money and a great deal of experimental work to bring this change about, but is it not an improvement worth all that it may cost?

We also have trouble in the pressroom with paper that is not of uniform thickness. Frequently, a fine half-tone job is printed defectively because some sheets of stock are lighter in weight than others in the same pile. We recently handled a large order for wall calendars, printed from half-tone plates in process colours on coated one-side litho stock. The variations in the thickness of that stock were numerous. One sheet would print right, another sheet would print dark, still another sheet would print light, and so on. It was impossible to produce a first-class process colour job under these circumstances, and we simply had to let it go through in defective shape.

I know that the paper manufacturers have made wonderful improvements in the way of uniform thickness of sheets and standardisation of sizes, as well as in the quality and finish of fine papers, but much still remains to be accomplished. For instance, it is hard to find enamelled or coated paper having a surface that will not "pick" or lift, when printing upon it from heavy-face type, solid plates, and so forth. Not long ago we had difficulty in printing a two-colour job on enamelled paper. The solid detail of the half-tone plates continually stuck to the surface of the stock, and, in pulling away, took some of the clay surface along with them. The paper man declared that the ink was at fault: the ink man blamed the paper. As a matter of fact, both paper and ink were at fault, and the pressman had to solve the problem by doctoring the ink. For there seemed to be no way of "doctoring" the paper.

A CORRESPONDENT has sent us for inspection copies of two old maps of Cambridgeshire which show the location of Teversham Paper Mill. The more ancient of the two maps is dated 1610, was "performed" by John Speede, and in size is 17 1/2 in. by 20 1/2 in. The other, in colours, was printed by Blaeu of Amsterdam. The site of the mill is about three miles north-east of Cambridge, and it is suggested that these entries are the first mention of a paper mill on a map of Cambridgeshire. The maps are for disposal.

Exports for Canada.

Marking of Goods with Country of Origin.

Exporters of paper and manufacturers of paper to Canada are concerned with the regulations concerning the marking of goods on importation into Canada with the country of origin. The new regulations came into force on January 1st, and the items relating to books and publications and to paper and paper stock are as follows:—

Books and Publications.

"(i) 'Printed in ' or 'Made in ' will be satisfactory indications of the country of origin with respect to books or publications, which should appear on books, booklets or pamphlets on the inside or outside front or back cover, on either side of the title page or on the back page.

"(ii) Books or publications already printed may have the required indication of the country of origin indelibly impressed thereon with a rubber stamp.

"(iii) Each of the following publications will be required to have thereon an indication of the country of origin: Books, booklets, pamphlets, advertising matter, posters, circulars, folders, catalogues, post cards, fashion publications, globes, maps, sheet music, calendars, calendar pads, greeting cards, pictures, photogravures, engravings, and embossings.

Paper and Paper Stock.

"(i) The following commodities to have the required indication of the country of origin printed or stencilled on each sheet or article: Printed envelopes, expanding document envelopes, printed paper for duplicating machines, letter heads, invoice blanks, billheads, statements, photo mounts, abrasive papers, paper bags, blank books, loose leaf covers, blank refills (bound) and tags.

"(ii) The following commodities when imported in rolls to have the required indication of the country of origin on each roll: Paper, building papers, abrasive papers, printing paper, tracing paper, gummed tissue, insulating paper, kraft paper, gummed kraft tape, wax papers for photographs.

"(iii) The following commodities, when imported in wrappers, packages, boxes or containers, to have the required indication of the country of origin on each wrapper, package, box or container: Carbon paper, film support, sensitised paper, sensitised film, blank paper, blotting paper, blue print paper, tracing paper, braid paper, cardboard, bristol board, oil board, oiled sheets, pasted stock, chipboard, strawboard, binder's board, box board, cut cards, blank: cover papers, eyelet disc, glassine paper, gummed paper, stay paper, lace papers, glazed papers, fancy paper, ream paper, tissue paper, and wrapping paper."

British Miniature Paper Machines.

A little controversy is being carried on in Canada as to the origin of the miniature papermaking machine which was exhibited by the courtesy of the American Writing Paper Co. at the Convention of the U.T.A. in Toronto. It had been stated that the machine in question had been made in Germany.

The machine, as we stated some time ago, is of British manufacture, being one made by Messrs. T. J. Marshall and Co., London, and Mr. T. Linsey Crossley, in a letter to the *Pulp and Paper Magazine*, gives some interesting information concerning it which he obtained from Messrs. Marshall in 1910, when they stated, in sending a specification of the machine: "We are constantly exhibiting these machines all over this country, and we have one running for six months at the Anglo-Japanese Exhibition this year for the *Daily Mail* newspaper and also one at the Pageant of Empire at the Crystal Palace for the *Daily Mail*."

On the occasion of the recent Exhibition in Toronto, Mr. Crossley saw the machine and it was explained to him how the wet end of it had been made by Marshall, and how Mr. Sindall or Mr. Bacon had become so interested in it that the dryer section, calendars and winder had later been added from their designs.

Mr. Crossley adds: "I think it is no use allowing our German friends to get away with any more than their rightful credit in these matters, and the enterprise of Messrs. Marshall, of London, England, should be recognised."

Card Printing Patent Invalid.

The *Illustrated Official Journal (Patents)* publishes a report of an appeal following an action for infringement of patent brought by the Simplex Lithograph Co. against Sir Joseph Causton and Sons, Ltd.:—

The plaintiffs were the owners of a patent for "improvements in sample cards." Claim 1 of the complete specification was as follows: "A sample card for displaying textile fabrics, comprising a body portion and an embossed panel struck up from the said body portion having a surface forming a replica of a sample of textile material." Claim 2 was as follows: "A sample card for displaying textile fabrics, comprising a body portion, and an embossed panel struck up from the said body portion having a surface forming a replica of a sample of textile material, and sharply defined edges raised above the body portion a distance substantially equalling the thickness of a sample of textile material." Claim 3 was substantially Claim 1 with the addition of the words "and a sample of textile material attached to said sample card." At the trial of an action for infringement of the patent the defendants admitted infringement, but alleged that the patent was invalid for want of subject matter. It was admitted by the plaintiffs that the striking up of panels and the embossing of the surface representation of the texture of the material were both old, but the plaintiffs contended that the combination was novel, and produced a particular result which was commercially successful. It was held at the trial that, in view of the existing common knowledge at the date of the patent, there was no subject matter, and that the action must be dismissed with costs. The plaintiffs appealed, but the appeal was dismissed with costs.

Window Envelopes.

Postal Regulation which May Injure British Manufacturers.

British manufacturers of window envelopes are concerned as to the effect of the resolution of the International Postal Congress at Madrid which decided that the postal regulations should specify that only a particular pattern of window envelope should be allowed to pass through the post from one country to another. It so happened that this kind of envelope is not that which is turned out in this country and for the manufacture of which British firms put down new machinery at great expense, and in one case we understand a big contract had been made with a British colony for large supplies of these envelopes.

The permissible envelopes in which the window is an integral part of the article are chiefly manufactured in other countries. It can readily be seen that if the new regulation is allowed to come into operation, a great injury will be done to the manufacturers in this country who spent so much capital on developing the envelope of the attached window type.

The matter came before the Interim Industrial Reconstruction Committee of the Envelope Making and Manufacturing Stationery Industry and the following resolution was unanimously adopted:—"That the Interim Committee, while learning with pleasure that certain ameliorations may be expected in the restrictive regulations, regrets that the industry was not consulted before the British Post Office signified its acceptance of regulations calculated to inflict serious injury upon an important British industry, with probable resulting benefit to the industries of former enemy countries."

Paper Market in Berlin.

In a reference to the paper market in Berlin *Papier Zeitung* observes: The wholesalers are able only partially to meet the demand for paper. The mills are delivering only slowly and in insufficient quantities. There is particularly a shortage of banks, typewritings, tissues and imitation parchments, and mills will only accept orders in limited quantities and for months forward delivery.

An Advertisement is always working.

“SLOGGER”

AUTOMATIC SHEET FEEDER

THE half-tone figures 1 and 2 show the new type Slogger Feeder attached to the Miehle 2-rev. Fig. 1 is a Near Side Rear View showing how all the control handles have been placed as near as possible in one position and all within easy reach of the machine minder's hand, as follows:

- 2. Pile Raising Adjuster for automatically regulating the Top Height of the Pile.
- 5. Stopping Handle.
- 6. Starting Handle.
- 7. Trip Re-setting Lever.
- 11. Air Valve for Controlling the amount of draught required to separate varying weights of paper.

Figure 2 is an offside rear view with gear guards removed showing how all working parts are equally accessible from either side of the feeder.

The Air Blower No. 9 has now been mounted centrally with the Feeder in one unit, and will in all cases where possible be driven by a separate and independent electric motor.

This makes the Feeder entirely self contained and gives the machine-minder clear access between his press and the feeder for making ready and attention to his forme.

In all cases where the press is in good condition perfect register is guaranteed and the press can be speeded up to the full speed guaranteed by the press makers.

One of the greatest advantages of the method of separation on the “Slogger” is the strong current of air directed through the sheets by oscillating blower which ensures each sheet being separated some thirty times before it is taken away to the press. This method of separation frees the paper from all dust and fluff and as a result the machine-minder does not have to wash his forme nearly so often as when feeding by hand or when using other feeders which do not blow the dust or fluff out of the paper.

PERFECT REGISTER.

Trade Union v. Open House.

The Pros and Cons of Trade Unionism Debated Before a Meeting of London Master Printers.

The balance between the advantages and disadvantages of trade unionism as found in the printing offices of to-day is still a live question for the trade, and it is one that lends itself to animated and instructive debate. Such debate occurred under interesting circumstances, when, at the request of the Association of Master Printers of West and North-West London, Mr. F. A. Davies, the well-known assistant secretary of the London Society of Compositors, put forward the trade union case at the Association's meeting on the 11th instant, and Mr. C. Allen, of the Solicitors' Law Stationery Society, upheld the case for the open house. The free discussion of trade union policy by a union official before a meeting of master printers is rather a novelty, and to Mr. J. R. Burt, secretary of the W. & N.W. Association, is due the credit for the introduction of a precedent that could be widely followed with advantage to the mutual understanding of the employers and employed in the printing industry.

Mr. Davies' Address.

The debate was opened by Mr. F. A. Davies, whose address was substantially as follows:—"I take it that there is no difference of opinion amongst us as to the value of collective bargaining. It should be obvious that if employers and employees can agree collectively to certain rates of wages and conditions of work, this must be advantageous, not only for the employees, but also for the employers. To standardise wages must be as important as standardising the costs in any other department. I take it we all agree that it is a good thing there are trade unions and masters' associations to decide upon rates of wages, rather than that we should have a state of pure competition on both sides, which would mean chaos in the way of costing, and would have the effect of setting one master printer against another.

The Strike Weapon.

"I believe that there has previously been a meeting of this kind, at which a representative of the Printing Trades Alliance addressed a master printers' association. I want to say straight away that although I believe that organisations of workmen are valuable, not only as a protection to the workman himself, but also from the point of view of the employer, yet, as far as I am concerned, the organisation of workmen is for the benefit of the workmen—its first function is to protect the workmen; and that brings us right up against those people who think that you can have trade unionism and wholly and completely eliminate the strike weapon. My position is that you cannot do that while trade unionism exists

—at any rate under its present constitution. But while that is so, let me assure you that it is a growing belief throughout the Labour movement that the strike weapon is the last weapon to use, and not only the last, but the last of the last weapons, and that it must be resorted to only when no other weapon is possible. Any society of workmen that starts out with the object of protecting its members, but makes no provision for the compensation necessary for this purpose, is not fulfilling the elementary functions of a trade union. There must come a time when, in isolated cases, the mass of the employers agree to a certain reduction of wages, but some individual employer insists upon obtaining a larger reduction. What is the position, then, of a so-called trade union which says, 'We will have nothing to do with strikes'? How will they prevent victimisation of their members? I say that though the strike weapon must be the last to be used, we must retain it as a possibility. Now, my union is considered to be a fighting union, and I want to show you in what position the strike weapon is as compared with the other functions of a trade union. During 1921 my society spent £86,925 15s. 5d. in unemployment benefit, nearly £87,000; in super-annuation benefit, £29,442 3s.; strike benefit, £348 18s. 4d. So you will see that the strike forms an almost infinitesimal part of the functions of a trade union. Moreover, in view of the provision made by the Joint Industrial Council for co-operation between the unions and the employers and for delay in taking aggressive action, the strike weapon becomes still less a real factor. Nevertheless, it has always to be retained in view of the possibility of need for its use.

The Open Shop.

"Now, as to our position in regard to the open shop. We are opposed to it, and for very good reasons. I believe that in London the reasons are almost as good from the point of view of the employer as of the workman, and I believe the same can be said of the whole of the country. The unions have a larger proportion of the workmen in their ranks than they have ever had before. I know of only one really important printing works in London, or perhaps I should say two important ones, that are not trade union shops. That being the case, we are in the position to supply labour, and it is extremely difficult for the employers to get their labour except through us. Therefore, it is most important for the employer that his house should be a union shop. Moreover, we have nearly all the good workmen in the trade. Of course, of 15,500 members there are some that are not good, but the average mem-

ber of the society is superior to the average man outside the society. The non-society workmen in London are largely men of irregular habits in regard to payment of subscriptions. The man who is irregular and careless in regard to his own well-being is the man who will be irregular and careless in regard to his work, and the man who is regular and careful in regard to his own well-being will be regular and careful in regard to his work.

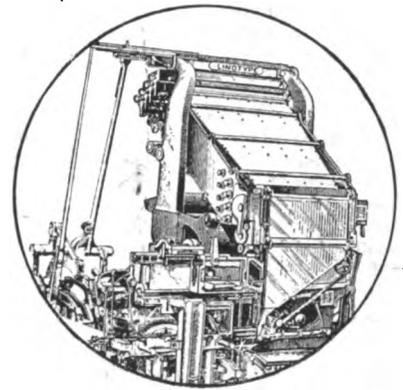

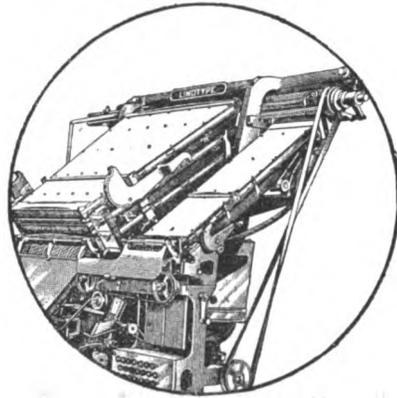

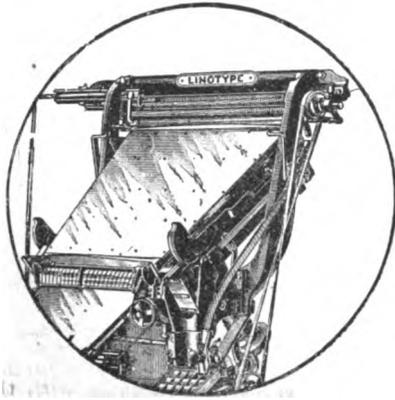

Friction in Workshop.

"Again, take the house where there are members of the society, is it to be expected, human nature being what it is, that men who are paying towards benefits for themselves and for others are going to work amicably with the man who says he will not contribute anything towards these objects? The men who contribute towards providing our unemployment benefit totalling nearly £87,000 are making a sacrifice for their fellows. We are faced now with a great unemployment crisis. There are men out of employment now who were never unemployed before—thoroughly good, sound, industrious, capable men. We have about 1,300 of them, and my members say that these men must not be allowed to come to absolute want. Therefore we are paying them 50s. a week or so whilst unemployed. My members are making sacrifices for their less fortunate fellow craftsmen and for that reason the open shop is not likely to be looked upon with favour. Nothing makes for production more than good fellowship amongst the men. You get the maximum of good feeling where the men have one common bond; and their effort to improve the lot of the workman forms the common bond among the members of our society. Thus it is up to the employing firms who want easy working in their offices and want to be able to get the best men they require, to become trade union houses. You hear a lot about petty pin-pricks, about sticking to rules that do not apply to every office, but in the 750 London offices that are trade union houses it is extremely rare that any difficulty arises in working according to trade union rules. A large number of employers have expressed the fear that if they turn their businesses into union houses, any dispute arising would endanger their trade. Looking back over about 40 years, I can remember one dispute occurring; that was in 1911. I venture to say that, at the time that occurred, non-union employers were worse off than the union employers. At that time there was a demand for non-union labour for 50 or so offices affected by the strike. They all wanted men, and were prepared to offer the highest wages. Non-union employers lost their men, and found it extremely difficult to find others. Thus, keeping outside the union is no guarantee that a firm will not be disturbed in case of industrial disturbance, but I venture to say a union house possesses great advantages in the way of the harmonious working of its employees."

Mr. C. Allen Replies.

Mr. Davies having resumed his seat, reply was made by Mr. C. Allen, whose remarks were, in substance, as follows:—

"I want to make it perfectly clear at the

WHY MORE THAN ONE LINOTYPE MODEL IS MADE

The Linotype is built in various models for the convenience of printers. The models are arranged in two classes: (1) Linotypes with Single Distributors; (2) Linotypes with Multiple Distributors.

Standard Linotypes with Single Distributors are suitable for book printers and others requiring the usual range of roman and italic in various bodies.

Multiple-Distributor Linotypes enable users to set, in addition to the work detailed above, a variety of type faces (roman, italic, display faces, and special characters) in one line, for catalogue work, encyclopedias, etc.

A model is also supplied for the composition of large display lines for headings, general commercial work, etc. Another model is equipped for the continuous composition of text matter up to 14 point and display matter up to extended 36 point.

As a result of this arrangement of models, no printer need purchase a Linotype with a larger equipment than he actually needs. At the same time the system of construction enables the Linotype user to add to his plant when he needs further equipment, without sacrificing any part of that already installed.

To-day any printer can install a Linotype to set fully 95% of his composition, or he can install a Linotype to set any particular portion of the work he wishes to handle that way. In either case he invests his money in the machine best suited to his requirements; he is not saddled with equipment for which he has no active use, and therefore does not lock up his capital in unproductive plant.

The flexibility of the Linotype system of typography enables every letterpress printer to have at least one Linotype

outset that I am not opposed to trade unionism in theory. I have not a word to say against the principle of collective bargaining, but I do say most emphatically that the trade unionism we know to-day is not what the founders of the movement intended it to be. It has become a political organisation of a most insidious and dangerous kind. Had trade unionism adhered to its original objects—to provide on the one hand a benevolent organisation, and on the other hand an organisation able to meet the employers and enter into fair and reasonable bargaining—I don't think any office in any part of this country would be against the principles of trade unionism.

What an "Open Shop" is.

"First of all, let us understand what an 'open house' is. An open house is not necessarily a house engaging non-union labour. The principle of the open house is that an employer has a perfect right to engage non-union or union labour as he chooses, just as a workman has a perfect right to decide whether he shall join a union or not. We are up against the principle of compulsory trade unionism. I object to compulsion. Compulsion in the interests of the State—yes; but on behalf of a political organisation—no! It is an encroachment upon human liberty. When the Conscription Act was going through the House of Commons labour leaders and prominent members of trade unionism fought for—and took advantage of—a clause safe-guarding liberty of conscience. There is terrible inconsistency here—to insist on liberty of conscience for themselves, and then to tell workmen that before they take their coats off they must belong to a particular trade union.

"Mr. Davies stresses the point regarding unemployment and superannuation benefits. Trade unions have done an enormous amount of good in this respect, but you can get exactly the same benefits by joining other organisations, without joining a militant trade union. So that argument does not stand good for the closed house.

"Mr. Davies tells us there are only two important houses in London where the L.S.C. are not engaged, and which are not closed houses. I don't know where Mr. Davies gets his figures from, but I understand that on the roll of the London Master Printers' Association there are 1,047 houses. Out of these, there are 400 strictly union houses, leaving 647 open houses in London.

Danger of the Tied House.

"The tied house is a danger to the community, because the tied house tends more than anything else to the restriction of output. As a workman, I say that one of the greatest evils to-day in this country is restriction of output. In a trade union house the workers are practically all treated as on one level; competence, superior intelligence, superior knowledge—all these things count for nought. The trade union enforces a minimum rate of wage, and this tends to become the maximum rate, for discrimination between employees leads to jealousy and trouble. Do you think that a man who can produce 30 to 40 per cent. more than the man at his side will do it if he knows he will get no more for it? He would be a fool if he did. That tends to the restriction of output. This is harmful to the workman, to the employer, and to the community as a whole. The tied house puts a premium on the indolent workman. If a man finds that, no matter how ambitious he may be, he is up against tyrannical restrictions laid down on output, hours of labour, etc., he is going to lose his ambition and become a drone, a stereotyped worker who will never rise to a higher level than that to which his trade union will allow him.

"Mr. Davies said the London Society of Compositors have the best workmen in their ranks. I say the finest men in the trade to-day come from the provinces, and the finest men outside the L.S.C. are provincial men. And the L.S.C. knows it, because at different times in the society's career they have put every obstacle in the way of allowing these men to join their union.

"Mr. Davies has said that L.S.C. men will not go into a non-union house. They will sometimes, but only when sent by the officials of the L.S.C. Some of them tell the overseer the truth; some of them say they haven't a card. They gradually 'wriggle'

their way in, until they have a majority with cards, and eventually the employer has to capitulate.

Eliminating the Strike.

"Mr. Davies told us we could not eliminate the strike weapon. I stand here to-night unashamed to admit that I am a member of the Printing Trades Alliance, though I did not come here on their behalf; I came to defend the open house principle. There is a means by which the strike weapon can be eliminated. Let me carry you back to the last increase granted to the L.S.C. The increase, I think, was 5s., and I think the parleying that preceded it lasted several months and strikes were threatened. They asked 10s.; they accepted 5s. The organisation to which I belong refused to accept that. We went before an arbitrator. Both sides argued their cases, and, as it happened, the workmen came out on top. Instead of getting 5s. we got from an unbiased arbitrator an award of 7s. 6d.

"Of course Mr. Davies will say, Yes, you got the award, but did the employers pay it? I may anticipate that by answering that many of the employers did pay it, but many, I am afraid, did not. But if we were strong enough as an organisation, and if all the employers would sit on the opposite side of the table to the workmen and pledge themselves to settle every labour dispute by this method, by arbitration, we should be able to dispense with the terrible threat of a strike or lock-out. It would be eliminated by using the arbitration court.

The Employers' Shortcomings.

"In conclusion, let me say the employers are quite as much to blame for the present condition of things as the workmen. Employers are so short-sighted. They will never pay any more wages than they are compelled to pay, be a workman good, bad or indifferent. Further than that, they have not the courage of their convictions. There is not a master printer in London who, if he were asked the question privately, would not say in effect, 'I have no use for trade unionism as we know it to-day.' He knows that militant trade unionism leads to tyranny and imposes many irksome rules and regulations, but he submits to it because he finds it a convenient method by which he can get casual labour rather than keep a workman permanently on a decent wage. Further, the master printer will put his hand in his pocket and give £5, £10 or £20 to fight a trade union in the case of a strike, but, if asked to pay an extra shilling in case of an arbitration award, says he cannot afford it. When employers and workmen are tired of the present system and prefer an arbitration court it will be a better thing for the industry.

"Mr. Davies said he did not see why the non-unionist should get the benefits that the trade unionists pay for. On the face of it that point looks sound. But because you believe a thing to be right, have you any moral right to say that someone else must do as you do? Without Christianity, life to-day would be practically unbearable; but because I get the benefits of Christianity—indirectly at all events—would Mr. Davies agree that every man and woman should be compelled to go to church? Parliament has no right to compel us to join a trade union, and no body of men has a right superior to that of Parliament. In short, the workmen of this country have the right to sell their labour to the best of their advantage to any employer as they see fit."

THE DISCUSSION.

In throwing the meeting open for discussion the chairman, Mr. E. W. Wormald, said he thought they had heard the worst of each side. The debate was not quite what the Association was accustomed to hear at their meetings, but he felt certain it was for their good.

Mr. Sidders objected to the claim that the trade unionist was paying for the benefit of his fellow workers. It was primarily a matter of insurance for the man himself.

Mr. Davies pointed out that, besides the fact that the Benevolent Fund was part of the organisation, it must also be remembered that the conditions under which the men worked would not be the same if there were no union.

Mr. Hunger remarked that the extraordinarily low amount of strike pay in the L.S.C. balance sheet was accounted for by there being no strikes. There might easily be a year when the proportions were reversed. The amount paid out in unemployment benefit, however, was an immense tribute to the value attached by the men to their trade

union. Mr. Hunger suggested that it was rather late in the day to fear that the organisation of workmen would result in the detriment of the trade by which they got their living. As to infringement of personal liberty, he referred to the innumerable compulsions of the present day, in respect of registration and so on; these compulsions were imposed on the whole community for the benefit of the whole community. The interests of the trade would be advanced by every man being in his own union and every employer in his Association.

Mr. Trill pointed out the large increase of present-day wages over pre-war rates, and asked if there was any employer getting the same increase of income. Was it not time—especially in view of the large amount of unemployment benefit being paid—that the trade unions should propose a further reduction of wages in accordance with the fall in the cost of living.

Mr. Davies' Reply.

Mr. Davies, being called upon to reply, dealt first with the last point raised, and mentioned that the question of wages was again under discussion between the London Master Printers' Association and the L.S.C. He went on to say there seemed to be some difference of opinion as to the meaning of "collective bargaining." There must be some measure of equality between the two parties before they could bargain. An employer could sit tight for a fortnight, but the unprotected workman could not sit tight for more than a few days. As to eliminating the strike weapon, he asked Mr. Allen what the Printing Trades Alliance would do if, after an agreement for an increase of wages, some employer refused to grant the increase. They could not call their men out because they had no strike fund. He contended the Alliance had not a leg to stand upon in regard to collective bargaining. Mr. Davies denied the charge of limitation of output, and instanced the L.S.C. demand that all machine composition should be on "piece." In regard to the restriction of individual liberty, that could not be helped; we lived in an imperfect world, and the progress of civilisation had meant the progressive restriction of individual liberty. He denied that the L.S.C. was an "insidious political organisation." The political part of the work of the society was kept absolutely distinct from the industrial part, and nearly 3,000 of their members did not contribute to the society's political work.

Mr. Allen's Reply.

Mr. Allen, dealing first with Mr. Davies' question as to the Printing Trades Alliance and a recalcitrant employer, emphasised the fact that he was not representing the P.T.A., but he believed the Alliance had rules and regulations for dealing with such a position; furthermore, they would not compel a member to work for less than the wage agreed, and if a member were thrown out of work for refusing to accept less, he would get financial support of the Alliance.

The organiser of the Printing Trades Alliance, who was present, supported Mr. Allen's representation, and remarked, further, that he was surprised to find Mr. Davies attacking the P.T.A.; if Mr. Davies cared to ask for a debate with him on the subject he would accept the proposal.

Mr. Allen, continuing, emphasised further the advantages of conciliation over a resort to force, and the danger of eliminating competition among the workers. He remarked that the tied house led to the "gift" house. He objected to the tied house because it restricted competition—the driving force both of employers and men—it restricted output, and was a gross infringement of the liberty of the individual.

Mr. Burt, who, in the course of a short speech, remarked that the speakers did not altogether confine themselves to the correct limits of their subject, proposed a very hearty vote of thanks to Mr. Davies and Mr. Allen.

Mr. Scarsbrook, in seconding the vote of thanks, emphasised the growing co-operation between employers and trade unions, and hoped the two sides would go on to work together for the good of the craft generally. He did not think so much now of some of the petty troubles with the union which had annoyed them in the past. If an employer conducted his business in a large-hearted way he would get the best out of his men.

The vote of thanks being heartily carried, the meeting closed with a few words of response from Mr. Davies and Mr. Allen.

The value (in millions of Finnish marks) of exports of products of the paper industry from Finland in November was 186.7 and in the period January-November 977.9.

Trade Notes.

THE Federation of Master Printers is still waiting, we understand, for a communication from the Prime Minister to specify a date on which he will receive a deputation on the urgent question of the modification of the postal rates.

POSTAGE AND CONTINENTAL PRINTING.—A further example of the deplorable effect of our high postal rates, coupled with the depreciated Continental exchange, comes from Lancashire, where, it is stated, business men are receiving trade catalogues issued by Liverpool firms, but franked with German postage, so avoiding heavy home charges. One Budapest firm offers to print, address and post to British traders 10,000 circulars for £714s., whereas the cost in this country of postage alone would be £41 13s. 4d.

THE Federation of Master Process Engravers has been in touch with one of the important newspaper societies with a view to closer co-operation between the two associations.

THE funeral of Mr. Rowland Lee, advertisement manager of the *Daily Telegraph*, took place on Thursday last in Richmond Cemetery, among the mourners being Mr. Ronald Lee (son), Mr. Charles Lee (brother), Lieut.-Colonel Lawson (representing the proprietors of the *Daily Telegraph*), and prominent men in the advertising world.

ADVERTISE!—Speaking at a meeting of the Federation of British Industries last Thursday, Sir Charles Higham, M.P., said every trade making British goods should advertise and tell the public why they should buy them. "If you can't compete with the foreigner, put up your shutters," he added. "If you can compete, buck up and advertise."

WIRELESS PRINTING.—In a paper before the Wireless Section of the Institution of Electrical Engineers, Lieut.-Colonel A. G. T. Cusins said the direct recording on paper, and indeed printing, of wireless signals can now be accomplished by experimental apparatus at speeds over 1,000 words a minute. He looked to the time when at each important town publishing a newspaper a receiver would be installed operating a direct printing telegraph machine, and in this way one single transmission would result in the news being received in plain printed English throughout the country simultaneously.

IN connection with the department of journalism, the Senate of London University recently appointed Mr. J. A. Strahan, Reader of Equity at the Inns of Court, to deliver during Hilary and Easter terms a special series of lectures on "The Law Relating to Newspapers."

THE *Daily Herald* duly made its appearance as a penny paper on Monday. Besides the price being reduced, the size was increased Monday's issue consisting of twelve pages.

MR. G. W. BACON, the well-known map-maker and founder of the firm bearing his name, has died, at the advanced age of 92. He commenced business in London in 1860, and was at the time of his death a director of the company, having retired from the position of managing director in 1912.

WILLS.—Mr. John Spiller, of St. Mary's-road, Canonbury, N., at one time interested in Brooks, Simpson, and Spiller, Ltd., aniline dye and printing ink manufacturers, a member of the Council of the Institute of Chemistry from 1880-83 (died November 8th, aged 88), £8,815; Mr. Henry Brereton Marriott Watson, of Shere, Guildford, Surrey, the well-known novelist, formerly assistant editor of *Black and White*, and of the *Pall Mall Gazette* (died on October 30th, aged 58 years), £1,111 4s. 2d.; Mr. Henry Mortimer Hobson, of Durdant House, 93, Kedleston-road, Derby, newspaper proprietor, editor, and managing director of the *Derbyshire Advertiser*, £29,559; Mr. Walter Baxendale, of Blackwell Heath (Hants), for many years kennel editor of the *Field*, £867.

RUMOUR has it that a new Liberal weekly newspaper will shortly appear, under the editorship of Mr. A. G. Gardiner, former editor of the *Daily News*.

IN connection with the recent appeal on behalf of disabled ex-sailors and soldiers, members of the London Master Printers' Association are now being asked to specify dates in 1923 and 1924 (particularly 1923) when they will have vacancies, as arrangements have been completed so far as the present year is concerned.

THE *Nottingham Journal*, established in 1710, reached its 30,000th issue last week, and the event was marked by the publication of a souvenir supplement, containing extracts from early copies of the *Journal* and articles on Nottingham's history during the two centuries.

CAPTAIN HAROLD SPENCER, editor of *Plain English*, and Messrs. G. T. Holder, A. E. Holder, and G. F. Holder, the printers, trading as G. Holder and Sons, were at the Bow-street (London) Police Court, last week, committed for trial at the Central Criminal Court on charges of publishing an alleged libel concerning Mr. Sigismund Goetze, the artist, in an article referring to frescoes painted by Mr. Goetze at the Foreign Office. The magistrate allowed bail, accepting the defendants' own recognisances in £50 each.

PRINTING AND BINDING MACHINES.—A business man in Constantinople desires to obtain the representation of United Kingdom manufacturers of printing and binding machines for Turkey. Applications for name and address (quoting Reference No. 47) must be sent to the Department of Overseas Trade, 35, Old Queen-street, London, S.W.1.

CANADIAN postal rates on newspapers and periodicals have been increased as from January 1st, 1922, to 1½ cents per lb. This is the second increase of the newspaper postal rate during the past 12 months, and it threatens to injure commercial interests, without materially increasing revenue.

AT Bedford Assizes last week, the foreman of the Grand Jury complained that only three printed calendars were provided for them. Justice Horridge replied that he did not believe in such economy in the administration of justice.

THE death has occurred at Liscard, aged 38 years, of Mr. Arthur Henry Walters, eldest son of the late Arthur and Mrs. Walters, 141, Wallasey-road, Wallasey (partner, H. Walters and Son, printers, South Castle-street, Liverpool).

"BLACKPOOL TIMES" PLANT.—This newspaper, to whose new method of production we referred last week, is printed on one of Messrs. Geo. Mann and Co.'s quad crown two-colour and perfecting rotary offset machines. This machine is capable of printing two colours on the front of the sheet, the same colour back and front of the sheet, or two different colours back and front of the sheet. It is a machine which has been well tested, and at the present more than 200 of these machines are actually at work on all classes of lithographic printing.

DUBLIN NEWSPAPER'S NEW OFFICES.—The *Irish Independent*, and its associated papers, the *Dublin Evening Herald* and the *Weekly Independent*, will shortly move into new offices in Middle Abbey-street, Dublin. The present scheme of offices was initiated by the late Dr. W. Lanbard Murphy, proprietor of the papers, who gave special instructions that the buildings had to be designed with a special view to the health of the workers engaged there. These instructions have been well carried out, as the arrangements of the new offices, are fitted with ample news rooms, baths and sanitary accommodation and modern heating and ventilation.

TERRORIST JOURNALISM.—The *Clonmel Nationalist* was recently ordered by the local commander of the I.R.A. to publish an article denouncing the Treaty under pain of suppression. It refused, and received a promise of protection from the Minister of Defence. On Wednesday, last week, when the newsboys set out to sell the paper, their copies were seized by the I.R.A., who had previously warned the boys that they intended to burn the papers. A similar article was published under duress by the *Cork Examiner*. Commandant O'Duffy, Chief of Staff of the I.R.A., states that steps are being taken to ensure that this journal and the Irish Press generally are not further interfered with.

AMONG many interesting items which Messrs. Sotheby will sell by auction on Monday, January 30th and two following days, are many productions of the Kelmscott, Doves and Essex House Presses.

WE acknowledge and reciprocate an expression of good wishes sent us by the Monarch Printery, Ahmedabad, India.

HAVING decided to raise an advertising fund with the object of bringing before the public the attractions which the town offers to visitors, the Folkstone Chamber of Commerce is inviting designs for a new pictorial poster.

THERE were offered for sale at the White Swan Hotel, Alnwick, on Monday, eleven

£10 shares in the *Alnwick and County Gazette* Printing and Publishing Co. The shares were sold to Mr. Weallans, Amble, for £13 10s. each.

THE death is reported from Johannesburg of Mr. Charles Marx, chairman of the *Argus* Printing and Publishing Co. A pioneer of the Rand, he was associated with many Transvaal undertakings.

THE adoption by the *Star* on Monday of the uniform use of brevier throughout its pages in place of the minion, in which some of its features were formerly set, is undoubtedly an improvement. The bigger-size type has necessitated an increased number of pages.

Trade Union Matters.

NEWSPAPER WORKERS' WAGES.—Several of the London trade unions—including the Correctors of the Press, the Electrotypers and Stereotypers, the London Society of Compositors, the Machine Managers, Machine Minders, "Natsopa," and the Printing and Paper Workers—are now considering proposals put forward by the Newspaper Proprietors' Association. This association conducts negotiations with the various unions separately, there being no joint negotiations as is the case in the general printing trade. We gather that although the proposals to different unions vary, substantial wages reductions are being asked for in all cases, and modifications of agreements in regard to restriction of night work and other conditions of labour. The National Union of Journalists is not affected. The proposals specify the first pay-day in February as the date when the new proposals should come into operation.

MONOTYPE SCALE.—The monotype section of the Compositors' piece scale has not been approved by the Council of the London Master Printers Association, who have referred the matter back to the monotype sub-committee for consideration of certain proposed amendments.

LINOTYPE SCALE.—The linotype section of the same scale has unfortunately already given rise, in its practical application, to disputes, the union representatives having raised objections to employers reverting to 'stab conditions on finding the piece rates too expensive.

T.U. FEDERATION CONFERENCE.—It has been decided to hold the annual administrative council conference of the Printing and Kindred Trades Federation at Blackpool on May 9th, 10th and 11th, and arrangements are now being made to that end. It is expected that this year's conference will establish another record in respect of the numbers of representatives attending.

"NATSOPA" SECRETARYSHIP.—We understand there have been one or two alternative nominations in regard to the secretaryship of the National Society of Operative Printers and Assistants, which becomes vacant on February 28th. We venture the opinion, however, that Mr. G. A. Isaacs will be reinstated by an overwhelming majority.

ON February 1st the London Branch of the National Society of Operative Printers and Assistants will hold a concert at the Central Club in aid of the London unemployed members of the Union. On January 12th the clerical section held a whist drive.

MR. R. M. LANCASTER, who until recently was the secretary of the Leeds Branch of the Typographical Association, has resigned his membership of the Leeds Unemployment Committee, and has been succeeded by Mr. Owen Camellan, also a member of the Leeds Branch, and formerly on the Executive Council of the Typographical Association. The chairman of the Committee has expressed the thanks of the Ministry of Labour to Mr. Lancaster for his services, and the regret of the Committee at losing him.

Colour Block-Making and Printing.

Lecture by Mr. W. Gamble.

Mr. W. Gamble, F.R.P.S., F.O.S., chose the interesting subject of "Colour Block-making and Printing" in lecturing at the January meeting of the Birmingham Centre of the Printers' Managers' and Overseers' Association. A good audience listened with close attention throughout the lecture, which was illustrated by lantern slides, whilst specimens of colour work were also on view.

Essentials of Three-Colour Work.

Mr. Gamble said the reason for the early troubles of the makers of three-colour blocks was not so much any deficiency in the theory or any want of knowledge of the conditions required, as the lack of the requisite means to carry out the idea. The fundamental conditions for the three-colour process were laid down many years before they were put into practice. The present-day methods did not differ in principle from the conditions at first laid down. The three essentials of the three-colour process were, as they had always been: Photographic plates of uniform colour sensitiveness, colour filters which would each select the required part of the spectrum, and inks which would correctly reproduce the colours selected. Given that these three conditions were fulfilled as perfectly as possible, the making of the three-colour blocks was hardly any different from the procedure of making blocks for single-colour half-tones. Many inventors of three-colour processes had claimed that their methods reduced "fine etching." Their efforts were usually directed to improving the results in the negatives, but so far there had been little improvement in that direction, and the fine etcher continued to be indispensable. The use of etching machines had not helped much in colour work, as there was so little straightforward etching to be done. It was an advantage to give the first etch in the machine; the result was cleaner, and there was no undercutting of the dots. The proofing of colour plates was a very important and costly part of the work. There was always the first and second proofing, and there might be one or more subsequent ones. A great deal of the success of the work depended on the skill of the proofer.

Inks for Colour Printing.

The question of inks was a very difficult one both for the process man and the printer who had subsequently to machine the blocks. It had to be confessed that there was still no standard. Every blockmaker had his preference for the inks of some particular maker, and sometimes he would use a red from one, a yellow from another, and a blue from a third maker. To his credit, he it said, he puts on his proofs the name of the inkmaker, and the printer could obtain his inks accordingly. There had been cases in the past where the proofer had faked the inks to cover up the deficiencies of the blocks, but that was not the case now. The present chaos in respect to the inks was no doubt good for the inkmaker, but it was bad for the printer, and did not make for progress in colour printing. In America there had been an effort to arrive at a standard, but it did not seem to have been reached yet. One important point in regard to the inks was the question of using permanent and non-permanent inks. The three-colour theory called for inks which were of a non-permanent character made from aniline lakes. These non-permanent inks gave the brightest and most correct colours. There was no doubt that if ink makers could make the theoretical colours more permanent it would greatly simplify three-colour work and tend more quickly to bring about some standardisation.

The Choice of Paper.

The choice of paper was an important matter. The block-maker did not mind what he paid for his proofing paper, in reason, so long as he could get the right quality, as he used only a small quantity for proofing each job. He selected the whitest and smoothest doubled-sided chromo enamel of

a good substance, but the printer probably could not get his customers to pay the price of this paper for a run, and by using a cheaper paper he found it difficult, if not impossible, to match the engraver's proof. It would be best to insist on the engraver pulling his final proof on the paper the job had to be printed on.

The mounting of the blocks correctly was of the utmost importance, but it was a point to which insufficient attention was given. Good overlays were important and mechanical overlays were the best.

Colour-Printing Machinery.

The use of good machinery for printing colour work had to be emphasised. Only the best was good enough for colour work. Solidity of impression, correct register, full rolling power, and perfect ink distribution were essential features. The temperature of the machine room was a very important factor in successful colour printing, and every effort should be made to keep it uniform. For printing in artificial light the daylight lamp was a useful adjunct. It was invaluable when printing the yellow form, and it was good for keeping the other workings standardised.

No Future in Three-Colour Work.

The lecturer regretted to confess that he saw no future in three-colour work; that is to say, no great improvement in the methods was in sight, and it did not seem possible that there could be any. Colour block-making and printing was a cumbersome method at the best, and seemed to defy any standardisation. The lecturer's firm belief was that it would eventually be superseded by offset and photogravure, or by some modification of colotype. This latter was most promising, because we should thereby get rid of the ruled screen, and that would help in many ways. Offset was almost as difficult as block printing for getting good results if one must use the ruled screen, but if an offset method could be devised without ruled screen it would be a powerful competitor of blocks. Photogravure was still in its infancy as regards colour work, but promising results were being achieved. It was a process to be reckoned with. Some very beautiful results in colour printing were obtained by the colotype process.

Three-Colour Limitation.

There were a number of thoughtful people who were coming to the conclusion that the three-colour idea had had its day, and there were some who doubted its validity, believing that four colours must be used to render correctly all the hues of nature. The inability of the process to reproduce pure greens and blues, and the fact that we did not get brilliant crimsons, violets, pure blacks and homogenous greys was its drawback. It was contended in one quarter that by introducing a green printing, with suitable modification of the colours, a far better result would be obtained. This seemed to foreshadow a revolutionary change in colour printing methods, and some such change was likely sooner or later to be brought about.

Trade in Printing Type.

EXPORTS.—Printing type was exported from this country during last year to the extent of 287 tons (of the value of £105,329) compared with 292 tons (£89,345) in 1920 and 514 tons (£89,729) in 1913.

IMPORTS.—During the twelve months of 1921 28 tons (of the value of £13,748) of printing type was imported into this country compared with 26 tons (£10,521) in the year before and 75 tons (£12,207) during 1913.

MR. THOMAS HOPWOOD, who has just died at the age of 93, was the father of Mr. Hopwood, of Drew and Hopwood, printers, Birmingham.

PRINCESS MARY has been pleased to accept a copy of Lett's Housekeeper's Diary, bound in Royal blue French morocco, with gilt edges, published by Cassell and Co., Ltd.

Electrotypers and Stereotypers

MANAGERS & OVERSEERS' ASSOCIATION

Annual General Meeting.

The annual general meeting of the Association was held on Tuesday last week at St. Bride Institute, Bride-lane, E.C.4. The president (Mr. A. Chadwell, United Newspapers, Ltd.), occupied the chair, and a large representation of the members attended. The annual balance-sheet for 1921, in the hands of the members, elicited nothing but praise for the satisfactory manner in which the Association's finances had been managed. There was a large excess of income over expenditure in spite of a big donation granted during the year to the War Orphans' Fund of the Printers' Pension Corporation. The outlook for the coming year, therefore, notwithstanding the heavy claims the Association may be called upon to face, augurs well for its continued steady progress and usefulness.

The minutes were read and confirmed.

Election of Officers.

The retiring president, Mr. Chadwell, said he would be pleased to stand down in favour of someone else. He thought he had been their president long enough.

Mr. A. E. Wood, proposing the re-election of Mr. Chadwell, said the Association a few years ago was at a very low ebb and it was due to the energy displayed by Mr. Chadwell that it was brought to the successful position it was in to day.

Mr. J. Black, in seconding, said he was perfectly satisfied with the excellent work the president had put into the Association, and he would be very sorry to lose the services that Mr. Chadwell had so graciously given on their behalf.

The re-election of Mr. Chadwell as president was carried unanimously, and he briefly returned thanks.

On the proposition of Mr. E. Warren, seconded by Mr. W. J. Bishop, Mr. W. H. Longley was re-elected treasurer.

Mr. W. Bullett (W. H. Walbrook and Co., Ltd.), on the proposition of Mr. Longley, seconded by Mr. W. M. Forsyth, was unanimously re-elected general secretary.

The trustees elected were Messrs. F. Le Grys and G. W. Sharvell, senr.

Members of the council elected were: Messrs. J. Black, J. Craske, H. Filkins, W. M. Forsyth, J. Parker, senr., G. W. C. Sharvell and A. E. Wood.

The Balance-Sheet.

On behalf of the auditors Mr. H. Evans gave testimony as to the thoroughness with which the books and accounts of the Association had been kept.

On the proposition of G. W. Sharvell, seconded by Mr. J. Black, the balance-sheet as presented was unanimously adopted.

The election of a new honorary member, Mr. F. M. De Luzy was next proceeded with, and subsequently endorsed.

Mr. Sharvell said they would be sorry to hear of the loss sustained by one of their old members, Mr. C. S. Yeates, in the death of his wife, and proposed that the Association through the secretary should send a letter of condolence to him.

The president, on behalf of the members, made sympathetic references to Mr. Yeates, and the proposition was carried unanimously.

In reference to an accident that befel one of the members, Mr. J. Reavely, who, while overlooking machinery, had the misfortune to lose both his hands, Mr. A. E. Wood formally moved that the Association grant a sum of £100 from the funds.

The proposition was supported by the president and Messrs. Black, Forsyth, Parker, Sharvell and others, and the sum as proposed was carried with the hearty assent of the meeting, Mr. Wood returning thanks on behalf of Mr. Reavely.

Mr. Forsyth proposed that a letter of thanks be sent to the "chapel" of Messrs. Odhams for the interest it had taken in Mr. Reavely and that it be recorded in the minutes.

On behalf of the Association the president thanked Mr. Bullett for the splendid success of his concert in aid of the War Orphans' Fund.

In connection with the next monthly meeting in February the president said he hoped to see a large gathering of the members when Mr. J. R. Riddell is to give a lecture on "Technical Training in the Printing Industry."

A vote of thanks to the chairman closed the proceedings.

City Livery Companies
 AND
CRAFT TRAINING.

Mr. J. R. Riddell, principal of St. Bride Institute and hon. secretary of the Stationers' Livery Committee, when addressing the members of the City Livery Club at a recent meeting, emphasised the need that the City Livery Companies who were representative of our national crafts should identify themselves more closely with craft interests and in particular the training of those engaged in the trades which they represented.

It was stated that there were only two City Companies at the present time taking an interest in technical training as applied to their own particular trades and giving financial assistance for this purpose. A number of the City Livery Companies made grants to universities and technical institutes for general purposes, but not specifically for furthering the craft efficiency of those engaged in their own trades. The lecturer urged the Livery of the City Companies to use their influence to bring their Companies into line with present-day conditions. It was his view that unless they did so, the time was not far distant when, like the City churches, they would come under the X-ray investigations of a commission who would have little sympathy with the traditions for which the City Guilds stood. No better means could be employed than by taking an active interest in the training of those who were to help to maintain the best traditions of the British craftsman. As an instance of what could be done, the work recently undertaken by the Stationers' Company along with representatives of the printing industry was mentioned. In this case a Joint Board had undertaken the arranging of examinations and the awarding of certificates, etc., to those engaged in the various sections of the printing industry. Much was to be hoped for through the inspiration gained by those students who sat for a test of craft efficiency in the historical Stationers' Hall with all its memories of the old worthies, who by their industry, skill, and pride of craft, did so much to raise the dignity of British printing in the eyes of the world.

An interesting statement was made that there was no statutory obligations on a local education authority to provide technical instruction, therefore, if there were to be "cuts" in education, in all probability it would be the craft side which would suffer.

The address to which Mr. Thomas E. Curtis has removed is 16/20, Farringdon-avenue, not Farringdon-street.

TENDERS WANTED.

BOROUGH OF SCARBOROUGH.

ABSTRACT OF ACCOUNTS.

THE Town Council of Scarborough are prepared to receive Tenders for printing the Abstract of Accounts for the years, 1919-20 and 1920-21 respectively. Further particulars may be obtained from the undersigned. The lowest or any tender will not necessarily be accepted.

SYDNEY JONES,
 Town Clerk.

The Town Hall,
 Scarborough.
 January, 1922.

SPECIAL PREPAID ADVERTISEMENTS

THURSDAY, JANUARY 26, 1922.

Trade Union Rules.

THE question of "Trade Union v Open House"—an interesting debate upon which is reported on the front pages of this issue—raises points on which there are doubtless strong differences of opinion among the various interests comprised in the printing industry. We think there will be pretty general agreement, however, on the necessity for thorough organisation, both of employers and of employed, a process which must inevitably be carried to still further lengths than at the present day. The points on which reform is necessary will, we believe, be found to lie in such regulations as cause avoidable restriction of the liberty of the individual employer or of the individual workman. That some trade union rules will in time have to be modified is hardly open to question. Only on Tuesday we had Mr. Clynes, the chairman of the Parliamentary Labour Party—speaking as the chief guest of the Imperial Commercial Association at a luncheon in London—saying there were some rules of trade unions which were old-fashioned—though in the higher trades and professions there were regulations to safeguard personal interests as rigid as those adopted by trade unions. "Some trade union rules," he said, "may be considered to operate even to the detriment of workmen, and personally I believe that some of them do." He hit the nail on the head when he went on to look for the cause of this in the unprincipled class struggle of the past. The unions, he pointed out, grew up in spite of all attempts to destroy them, so no wonder that many of their rules were framed in the narrow terms of self-defence and in terms of fear. Those rules, he said, should be broadened in these days to meet modern conditions of production and trade. This admission by Mr. Clynes is an important one, and doubtless in this era of ever-improving relations in industry, reforms are on the way. It is in the growing sense of communal responsibility now felt by all sections of the printing industry that the hope of our future lies. The evolution of the communal spirit—which throws motives of fear and class hatred into the background, and leads on both sides to the subordination of sectional interests to the interests of the industry as a whole—holds promise of betterment for all concerned.

Schools for Employers.

THE need that special training should be available for employers as well as for work-people is already to some extent recognised in the printing industry. At St. Bride Printing School, for instance, classes are already successfully established for providing such people as the sons of master printers with the special instruction required by the directive head of a business, who must have not only a general technical understanding of the trade but also such business and managerial knowledge as will qualify him as a responsible head of an up-to-date printing concern. There is, however, a big field still open for development in this direction—in the printing industry as well as in other trades of the country.

Mr. Howard Hazell's Proposals.

WE note with interest that Mr. W. Howard Hazell, whose services to the technical education of printers are well known, contributes a timely article to the *Times* (Trade Supplement) on this subject under the title "Training Employers." The article is quite a general one, not being concerned with the printing industry in particular, but is of interest to printers, as to other industrialists, in many of its observations. We quote the following: "The training of the men who hope to be the employers of the future is usually obtained in some business with which they are connected, and in which they hope to hold a responsible position. The training they receive, and their knowledge of methods and management, will depend upon the organisation of the particular business with which they are connected. The methods may be antiquated, the machinery obsolete, and the managers and overseers conservative in temperament and narrow in outlook as to the future needs of the factory. . . . The rapid development in recent years of all forms of labour-saving machinery and methods of production, and the fierce competition which we have to face in the future, all point to the necessity for training and teaching more efficiently than in the past all who are connected with our great industries. . . . There are technical schools for craftsmen in many trades in different parts of the country, which could easily be adapted as training centres for the employers. The plant is principally used in the evening, and whole-time day classes for the employers could be arranged with little expense. The curriculum should be arranged so that the course of instruction should be on special lines to suit the needs of the students. The planning and lay-out of factories, the relative advantages of different methods of production in this and other countries, and the qualities and prices of materials should all be dealt with in addition to instruction in, and actually working at, the different processes. It is vital that the equipment of the school should be the most modern and best obtainable, as the whole object of the course of instruction should be to show the students the recent developments in their industry. . . . The outlines of scientific management and motion study should also be taught, so that when the student returns to his own business he can compare the existing machines and methods with what he has seen and learned at the school. . . . In addition, there should be classes for accountancy and bookkeeping, costing as applied to the industry, office organisation and correspondence, and some outlines of commercial economics. The instruction in these commercial subjects would be the same for many industries; hence it would not be necessary to arrange special classes for each trade, and the expense would, therefore, be reduced. . . . The organisation of the schools or colleges for training the employers could well be undertaken by the Federation of Employers in each industry. The ultimate result would be of benefit to the trade as a whole."

THE Home Labour Market depends upon patronage of British Industries for the much desired revival. Every imported finished product helps to keep back the revival.

Personal.

VISCOUNT BURNHAM, Sir William Waterlow and Sir William Berry are among the vice-presidents of the newly-formed Brighter London Society.

LORD BURNHAM on Friday visited Leeds, and addressed at luncheon the members of the Leeds Nineteen Club, of which Mr. A. G. Baker, of the literary staff of the *Yorkshire Post*, is president. Lord Burnham was welcomed by Mr. Arthur Mann, the editor of the *Yorkshire Post*, who expressed the gratitude felt by all journalists to Lord Burnham and his family for the high traditions they have set in the conduct of a great paper.

THE Lord Mayor of London (Sir John Baddeley) was entertained by the London Press Club on Saturday evening.

MR. HERBERT S. OAKLEY presided, and Mr. Stanley Machin was one of the speakers, and paid a high tribute to the British Press—"the most intelligent and most fair body of men in the world."

LADY STRONG has presented a bronze bust of the late Sir Vezey Strong, by Courtenay Pollock, to the City Corporation of London, in memory of her late husband. The bust has been placed in the members' reading-room. Sir Vezey Strong was Lord Mayor of London in 1910-11.

SIR JOHN R. FINDLAY, K.B.E., presided at the annual meeting of the Edinburgh District of the Newspaper Press Fund, which was held in the City Chambers, Edinburgh, on Friday, when a record membership of 52 was reported.

SIR JOHN was re-elected chairman, Mr. John Duncan vice-chairman, and Mr. Thomas Gibson hon. secretary.

MR. J. MACLEHOSE, M.A., LL.D., president, and Mr. A. E. Goodwin, secretary, of the Federation of Master Printers, are attending an important meeting of the Newcastle and District Master Printers' Association on Saturday morning next—the choosing of a Saturday for the occasion being found necessary on account of the multitudinous engagements which the president is being asked to fulfill in all parts of the country. The live question of municipal printing will doubtless not escape their attention.

MR. MACLEHOSE is to be the principal guest at the annual dinner of the Cardiff Master Printers and Kindred Trades' Association on January 30th.

ARISING out of our mention last week of Mr. J. R. Burt, in the course of an article about the firm of Morton, Burt and Sons, Ltd., we are reminded of Mr. Burt's pioneer efforts in the formation of the district associations of the London Master Printers' Association.

In 1913, after efforts in other directions, Mr. J. R. Burt prevailed upon a number of the best-known printers in W. and N.-W. London to attend a meeting in Paddington addressed by Mr. W. Howard Hazell on "Costing," and followed it up by a series of local conferences, till, on July 29th, rules were framed which have since, with very slight alterations, been adopted by all the other local associations.

On his retirement, after an association of 25 years, from the active direction of the publications of the Trader Publishing Co., Ltd., Mr. W. A. Standring was presented with a silver salver by the chairman of the company, Mr. Edward M. Iliffe.

MR. STANDRING remains a director of the Trader Publishing Co., Ltd., which took over the Cycle Trade Publishing Co., Ltd.

MR. A. E. DENT has taken over the duties of secretary of the Federation of Master Process Engravers, and the Federation has removed to new offices at Room No. 268, Bank-chambers, 329, Holborn, W.C. The new telephone number is Holborn 5746.

MR. FRANK COLEBROOK, of 146, Fleet-street, E.C.4, has been elected a Fellow of the Auctioneers and Estate Agents' Institute.

ALDERMAN J. B. BURMAN, printer of Birmingham, is one of a special committee appointed by the City Council to inquire into the operations of the Corporation Housing Committee.

ALDERMAN W. L. HUTTON, the proprietor of the *Ormskirk Advertiser*, and Mrs. Hutton, on Saturday last celebrated their golden wedding. Alderman Hutton continues to take an active part in public life, giving much time both as a county alderman and as county magistrate.

MR. THOMAS KEMP, J.P., of Dalkeith, has been elected chairman of the Edinburgh and East Scotland district of the Institute of Journalists.

MR. ALFRED HAUSON, the editor and manager of the *Macclesfield Times*, has been elected to the directorate of that journal. Mr. Hauson was formerly on the staff of the *Essex Weekly News*, and has been at Macclesfield eight years.

MR. JENKIN HOWELL, printer, Victoria-square, Aberdare, suffered a bereavement last week in the death of his wife, who passed away in her 43rd year. Mrs. Howell returned only a few months ago from South Africa, where she had been in search of health.

MR. G. A. RICHES, who was apprenticed as a lithographer to the London firm of Messrs. Sprague and Co., leaving this country for South Africa some thirty-seven years ago, is the subject of a biographical article under the heading "Prominent Printers" in the *South African Printer*.

MR. RICHES has been very successful as managing director of the firm of Brown and Co., Ltd., of Durban, and is a prominent representative of the Durban Master Printers' Association.

MR. JOSEPH J. DALLAS, who has been for the last two years assistant manager of the Boston (U.S.A.) office of the Lanston Monotype Co., has resigned from that office, and is now general manager of the Boston Graphic Arts Exposition, the big printing exhibition to be held in Boston, August 28th to September 2nd, 1922.

The Nickeloid Electrotype Co., Ltd.

Successful Annual Dinner.

A most enjoyable evening was the result of the Nickeloid Electrotype Co.'s annual dinner at Carr's Restaurant on Saturday, January 14th, when the staff of the engraving and electrotyping sections sat down to be entertained both inwardly and outwardly. The service was splendid, and in addition there was a good musical entertainment, interwoven with speeches both "sarcastic and sweet," which kept the company in top-hole humour.

In the absence of Mr. J. A. Corey, owing to indisposition, the chair was taken by Mr. F. Napier, supported by Mr. Andrew Spottiswoode, Mr. James Miller, Mr. John Dawson ("Joe"), Mr. A. Barber and many other well-known friends of the trade.

The toasts of the evening included that good old evergreen, "The Old Firm," with allusions to the general welfare of the business, which meant prosperity for all (so far as it is possible in these times), and the speeches of Messrs. Napier, Miller, Dawson, and Snoswell, kept the company in good fettle.

Mr. Andrew Spottiswoode made a very happy speech, which combined comradeship with craftsmanship, so much so that the company expressed their feelings in "For He's a Jolly Good Fellow."

The musical programme was really good, and the activities displayed by Messrs. Ager, Cartali, Rock and Eaton, were very much enjoyed. Messrs. Hoare and Mowlem's duet, "Venetian Song" was heartily encored. These were only a few among other excellent "turns."

Great interest was shown in the suggestion of preparing for the firm's summer outing, and a substantial sum was assured, so that the event is as good as "on the way."

The stewards, Messrs. Eaton, Hill, and Skitterall, are again to be congratulated on the smooth and even running of the evening, which was entirely due to their strenuous efforts for the welfare and comfort of everybody.

Gold Leaf and Protection.

The application was further considered on Tuesday at Westminster for the imposition of a tariff on imported gold leaf. The applicants were the Master Gold and Silver Beaters' Federation, the Gold Beaters' Trade Society, and the Womens Gold Leaf Workers' Society, and the opposition consisted of the Gold Leaf Group of the London Chamber of Commerce, the London Chamber of Commerce Bookbinding Section, the Master Bookbinders' Association, the Federation of Master Printers, the Scottish Alliance of Employers in Printing and Kindred Trades, the Edinburgh Master Bookbinders' Association, V. Goulding and Co., merchants, the French Cigarette Paper Company, and the Associated Book Edge Gilders.

Mr. Mackenzie Wood, M.P., who appeared on behalf of the London Chamber of Commerce and other opposing bodies, argued that the whole of the evidence given by the applicants at the previous sitting was intended to influence the Committee to presume that the present depression of trade was due to the depreciated exchange. The assumption would not bear examination, because the depression in the industry was due to a variety of causes.

Mr. Basil Wickham Willett, a director of John Lane, the Bodley Head Ltd., book publishers, said that if the price of gold leaf were raised by the imposition of a duty it would, to a large extent, mean the discontinuance of the use of gold leaf in books.

Mr. Robert Leighton, of Messrs. Leighton, Son and Hodge, wholesale bookbinders, said that the use of gold leaf had been increasing with the decreasing price. As long as witness could remember the foreign leaf had been the staple supply.

Mr. E. J. Hubbard, secretary of the Book Edge Gilders' Trade Society, gave similar evidence, and added that in 1921 they paid out more "out-of-work" pay than in any three previous years. If they put a tax on the German gold leaf it would keep his members out of work.

Mr. A. E. Goodwin, joint secretary of the Joint Industrial Council of the Printing and Allied Trades, said that a considerable quantity of gold leaf was imported prior to the war and used for gold blocking. The ornamentation of books had already been reduced to a minimum, and if books were not produced in as attractive a form as they wished it would affect every section of the printing industry. Evidence had reached him from every part of the United Kingdom that if the cost of gold leaf were increased there would certainly be a smaller quantity used.

After supplementary evidence was given by the applicants the committee concluded its public sitting.

Remedies for Industrial Unrest.

Major D. C. McLagan, D.S.O., of the Central Council for Economic Information, gave a highly informative address on "Remedies for Industrial Unrest" at St. Bride Printing School on Friday last.

The lecturer presented his subject in an interesting manner, putting forward the suggestion that round-table conferences between employers and employees, not necessarily to settle disputes, but to give a greater interest in management, would do much to create an atmosphere of confidence, assisting to remove the suspicion under which industry laboured at the present time. Special reference was made to the underlying aspirations of labour and the recommendations of Whitley Committees.

A spirited discussion took place after the lecture, in which Mr. T. W. McAra, J.P., who was in the chair, Messrs. Geo. Eaton Hart, J. W. Carley, A. W. Langford, L. J. Cumner, T. Ellwood, and the Principal of the School, Mr. J. R. Riddell, took part.

A vote of thanks was proposed by Mr. Geo. Eaton Hart, seconded by Mr. J. W. Carley and enthusiastically supported by those present.

Mr. T. W. McAra, J.P., took the chair in place of Mr. T. E. Naylor, M.P., who was unable to be present on account of an important political engagement.

On February 3rd the students of the School are arranging a musical entertainment, the proceeds of which will go towards the completion of St. Bride Students' Pension Fund. Tickets can be obtained at the School or from students.

DIVIDENDS AND REPORTS.

LANSTON MONOTYPE.—The report of the Lanston Monotype Corporation, Ltd., for the year ended September 30th, 1921, states that the net profit, after providing for depreciation and other charges, is £43,499, and increment in the value of war bonds, etc., £3,046. To the total is added the balance from the previous year's accounts, which, after providing for general reserve account of £50,000, reserve for excess profits duty of £58,000, and final dividend for 1920 of £13,086, amounts to £149,117, making a total of £195,662. Deducting the interim dividend and a small sum for deferred profits, amounting to £5,326, there is a balance of £190,336. The directors recommend a final dividend of 4 per cent., making 6 per cent. for the year; that £50,000 be placed to the general reserve, and the balance carried forward.

NEW COMPANIES.

W. H. TYERMAN, LTD.—Capital £100,000, in £1 shares; to take over the business of a printer, stationer and engraver, carried on by F. W. Tyerman in Liverpool and elsewhere as "W. H. Tyerman." Private company. First directors: F. W. Tyerman, C. E. Kenworthy and W. A. Tyerman. The two first-named are permanent managing directors. Registered office, 6, Lancelots Hey, Liverpool.

NOBLO, LTD.—Capital £1,000, in £1 shares; manufacturers and importers of, agents for and dealers in appliances for athletic and other sports, etc.; publishers, book print sellers, art and picture dealers, etc. Private company. First directors: C. F. Glenny, H. N. Harrison, N. M. Harrison, F. R. S. Harrison, J. Hart and C. F. Saffery. Registered office, 36, Queen-street, E.C.

THREE TOWNS PRINTING CO., LTD.—Capital £100, in £1 shares; printers, publishers, lithographers, photographic printers, advertising agents, newspaper agents, etc. Private company. Subscribers: S. Powell and Miss Ida B. Soden.

BOYDEN AND SMITH, LTD.—Capital £2,000, in £1 shares. To acquire (1) the business of a stationer and paper merchant carried on by P. Boyden at Red Lion House, Red Lion-court, Fleet street, E.C., as "Boyden and Shipton," (2) the benefit of the said P. Boyden in the Work Organiser Specialities Co. (Inc.), and (3) the goodwill of the paper department of J. W. Smith as carried on at Wharf-road, City-road, E.C. Private company. First directors: P. Boyden and J. W. Smith. Registered office, Red Lion House, Red Lion-court, Fleet-street, E.C.

RIGID CONTAINERS, LTD.—Capital £2,000, in £1 shares; to carry on at Desborough,

Northants, the business of box case manufacturers, manufacturers of articles from paper, wood pulp, paper pulp and papier mache, manufacturers of paper, paper bags, cardboard or other boxes, etc. Private company. First directors: L. E. Holland, Harry Burditt and Howard Burditt.

KIRTLAND AND CO., LTD.—Capital £1,000, in £1 shares; manufacturers, importers, exporters and brokers of and general dealers in rubber goods, machinery, spare parts and printers' requisites and accessories, etc. Private company. First directors: J. Kirtland (managing director), S. Gosman and N. Gosman. Registered office, 281, Tooley-street, S.E.

WAKEFIELD EXPRESS SERIES, LTD.—Capital £30,000, in £1 shares; to take over the business of a printer, stationer, publisher, newspaper proprietor and newsagent, carried on by T. P. Robinson, as "J. Robinson and Son," together with the newspapers known as the *Wakefield Express Series*, and the property used in connection therewith. Private company. First directors: Mrs. S. C. Robinson, C. H. Robinson, A. J. Pyrah, H. Goodison and J. H. Gloyne. Registered office, 2, Southgate, Wakefield.

SCARBOROUGH STANDARD NEWSPAPER CO., LTD.—Capital £4,000, in £1 shares; proprietors, printers and publishers of newspapers in Scarborough, Yorks. Private company. First directors: Sir Gervase, Beckett, M.P.; J. W. Butler, Sir John Harrowing, Capt. Sidney Herbert, G. Handcock, G. W. Tindall and Capt. W. H. L. Wordsworth. Registered office, 31a, St. Nicholas-street, Scarborough.

JOHN WOODCOTE AND CO. (1922), LTD.—Capital £100, in £1 shares; general merchants, mercantile and financial agents, publishers, press agents, etc. Private company. Subscribers: P. O. Knowles, junr.; O. Birley. S. M. Fay is first director. Registered office, 52, Goschen-buildings, 12-13, Henrietta-street, Strand, W.C.2.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

SHREWSBURY "CIRCULAR" PRINTING AND PUBLISHING CO., LTD.—Mortgage on 17, 18 and 19, Princess-street, Shrewsbury, dated December 31st, 1921, to secure all moneys due or to become due from company to Lloyd's Bank, not exceeding £800.

B. WINSTONE AND SONS, LTD. (printing ink makers, etc., London).—Satisfaction in full on December 30th, 1921, of charge dated January 16th, 1911, securing £10,000.

LYLE BARRS AND CO. (OFFICE EQUIPMENT PRINTERS, LTD.)—Particulars of £4,000 debentures authorised January 9th, 1921; present issue £2,450, charged on the company's undertaking and property, present and future, including uncalled capital, subject to outstanding first mortgage debentures.

E. B. HORWOOD AND CO., LTD. (stationers, printers, etc.).—Land Registry charged on 117, Middlesex-street, E., dated January 5th, 1921, to secure all moneys due or to become due from company to N.P. and Union Bank of England.

DEVAS, ROUTLEDGE AND CO., LTD.—Satisfaction in full on December 22nd, 1921, of charge dated December 25th, 1920, securing £2,000.

HUNTERS, LTD. (manufacturers of printing and other machinery, London).—Second debenture, dated January 4th, 1921, to secure £3,492 3s. 10d., charged on company's property, present and future, including uncalled capital (subject to £10,000 7 per cent. first mortgage debentures, of which £6,000 has been issued. Holder: Controller of the Clearing Office (Enemy Debts), Cornwall House, Stamford-street, S.E.

BRIGHTON HERALD, LTD.—Particulars of £2,150 debentures, authorised January 2nd, 1922; whole amount issued; charged on company's undertaking and property, present and future.

HUDSON SCOTT AND SONS, LTD. (printers, tin box manufacturers, etc., Carlisle).—Satisfaction to the extent of £1,000 on December 31st, 1921, of debenture dated October 1st, 1991, securing £8,000.

FLEETWAY PRESS, LTD.—Satisfaction to the extent of £2,500 on December 31st, 1921, of "B" debentures dated July 28th, 1920, securing £58,200.

JOHN ALLINSON, LTD. (printers, etc., Oldham).—Satisfaction to the extent of £5,000 on December 1st of mortgage dated July 26th, 1919, securing £10,000.

BANKRUPTCIES, etc.

Re THOS. WALTER CALVERT, publisher, etc., 3, Pleydell-court, Fleet-street, E.C.—The creditors under this failure met on January 16th, at the London Bankruptcy Court, before Mr. W. P. Bowyer, senior official receiver, who reported that the liabilities were roughly estimated £1,000, and the assets were represented by the value of a book in preparation, £300. The debtor attributed his present position to loss incurred in running a publication with too little capital and the difficulties of publication arising out of the war. The case was left with the official receiver to be wound up in bankruptcy.

Re Bert Horwood.

Cardboard Box Manufacturer, Wellingborough.

A meeting of the creditors of the above was held at Wellingborough on Thursday, when the following statement of affairs was presented: Unsecured creditors expected to rank, £2,557 8s.; stock in trade, machinery and book debts, £407 17s. 6d.; share on real property, £150; from which has to be deducted preferential claims for rent, rates and taxes, £86; leaving available for dividend and expenses, £469 17s. 6d.

It was resolved that the estate be wound up by the trustee for the benefit of the creditors.

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIPS DISSOLVED.

Arthur Fearnside, Lloyd Fearnside, and Fred Sykes, manufacturing stationers, Bako Works, Croft-street, Morecambe. Edward Oliver Beck and Claud Ernest Bird, stationers, Wisbech, Saint Peter, Cambs. Edward Frank Schroeder, Thomas Edward Horwell, Charles Sweetinburgh, Herman Williams, and Edward James Wild, glue manufacturers, 35, Tabernacle-street, Finsbury.

THE BANKRUPTCY ACT, 1914.

RECEIVING ORDER.

Arthur Percival Robinson, 30, Westcliffe-grove, Harrogate, journalist, January 19th.

At the meeting on February 7th of the S.-W. London Master Printers' Association, Mr. J. R. Riddell will speak on "Technical Education."

Photo-Lithography and Lithotex.

P.M. and O.A. Manchester Lecture.

The January meeting of the Manchester Centre of the Printers' Managers and Overseers Association was held in the Mitre Hotel, and there was a good muster of members present.

New Year greetings by President Rignall and the reading and passing of the minutes were dealt with quickly.

Mr. Ralph Shaw, Platt Bridge, was admitted to membership.

London having agreed to a National Conference being held in Nottingham on February 4th next, Messrs. Thos. Rignall and F. J. Hughes were appointed as delegates.

Following the ordinary business, a special general meeting was held to consider a suggested alteration to Article of Regulations for Affiliated Centres, whereupon the Manchester Centre agreed to the following amendment: "That on acceptance of a member the nomination form and other necessary particulars be forwarded to the Parent Association for safe keeping."

There being no further business, Mr. Ernest Garrett was called upon to deliver his lecture on "Photo-Lithography and Lithotex." He first of all gave historical facts concerning photography and lithography, and remarked that it was not an every-day feature in process negative making to get a half-tone negative possessing a true translation of gradation, partly on account of the screen itself, and partly because of the requirements of the letterpress printer. When exposure was made for high lights the shadows had to suffer, and *vice versa*. The present method of half-tone negative making involved a certain amount of local treatment in the form of staging or fine etching; therefore, to minimise this labour it was almost a universal practice to expose for the middle tones.

Litho Rotary Offset.

During recent times the litho rotary offset process had become established, and it was generally recognised that half-tone work printed on these machines had a peculiar charm and beauty; furthermore, most delicate values could be retained on almost any kind of paper and a high rate of speed achieved. Colour work of every description was being done by this method, thereby restoring lithography to its place in the sun of reproduction processes. In photo-litho there was no need for a dot in the high lights, consequently a half-tone negative possessing a full range of gradation was essential. There were several methods of obtaining high light negatives which proved satisfactory for reproduction on zinc or aluminium, and when printed by the offset method on an antique or rough material exhibited qualities which could not be produced in any other manner. It was well known that the ruled screen had many drawbacks, especially when reproducing colour work. The careless adjustment of screen angles, distances and other vexatious operations produced disagreeable patterns. This compelled experimenting with screens of irregular texture, and attempts to eliminate the screen altogether by using a collotype base for transfers or by modifications in the sensitive solutions. The lecturer's experience was that patterning by these methods was non-existent and the necessity of making a screen negative avoided.

The Lithotex Process.

By direct photo-lithography from a single negative printed down on either zinc or aluminium, utilising a special printing down frame, large editions could be printed, the quality of which possessed exactly every feature of the original. The same single negative could be used to produce a number of images, but for this to be done accurately it was necessary to use a printing down frame which permitted of laying the negative to any pre arranged position of the printing plate. With earlier printing frames this was impossible, but with the Lithotex patented printing down frame, and utilising the same company's patented system, exact register could be secured, as it was the best face-up printing frame in the trade. The printing of several images on one plate from a single negative for the register of subsequent colours—while possible and in fairly extensive use—depended on the human element. By the use of the Lithotex Step-and-Repeat machines the element of doubt and uncertainty was replaced by mechanical precision to one-thousandth part of an inch. The mechanism and uses of the Lithotex Step-and-Repeat machine were fully ex-

plained, and excellent examples of work executed by various users were greatly admired.

Mr. Thomas Rignall, after examining a sheet of labels, remarked that no transfer could do the work so accurately, and he wondered what would be the probable time to produce the sheet. He thought the letterpress printer had been left a long way behind, therefore he advised those people employed in that branch of the craft to put their house in order and make further advancements.

Litho versus Half-Tone.

Mr. Chas. N. Knowles did not admit that the half-tone letterpress printer was in danger, as his work was sharper and better produced than by the lithographic processes. A good many lithographers claimed that anything printable could be done by the offset process and they usually compared rough surfaces with that of coated art paper, saying that the latter was objectionable owing to its glossy surface. For catalogue work the rough surface was of no value. The half-tone three-colour process was far preferable to anything produced by the lithographer, whose work had not the crispness and clearness required for accurate production. Seeing that the letterpress printer could produce in three colours what might take a lithographer fourteen impressions to complete, he still held to the view that the letterpress printer was very much on top.

Mr. Edward McVay declared that the letterpress printer could not get the range of tone produced by the lithographer, and he himself had an objection to the dot surface print. Speaking commercially, if the statements alleged to have been made recently by Lord Leverhulme that the value of advertising would in the future have to be conveyed to the public by words and not by illustrations, he did not see where the letterpress man would be required. A quarter of a century ago he was with a New York firm whose organisation would compare favourably with any modern British printing office. In one section of that house they had seven sister lithographic machines producing continually a colour job, and each machine was so timed that the work from one machine was ready for the next to take up, the sheets being printed on both sides. The average British printer would not spend money on developments, neither would the average craftsman exert himself to master any new process that was placed upon the market. Lithography was an art, and he could see that in future everyone would be seeking to enter the lithographic branch in preference to the letterpress branch.

Mr. Jas. Worthington questioned whether the whirling machine was a necessity. In the East he had found that the whirler was not in use.

Mr. J. Winstanley remarked that the machine had not reached finality, and one point struck him very forcibly—that the craftsman had to be both a printer and a mathematician when operating a machine. If it could be so built that every time the operator could start from zero, things would be simplified.

Messrs. E. Murphy and J. H. Nuttall also spoke.

Mr. E. Garrett, replying to the chairman, said that one and a half hours would be the time required. The coated or glazed paper used by the letterpress printer was both heavy and costly, and owing to its shiny surface caused irritation to the eyes. The whirler

was one of those appliances that one could do with better than without. Of course, the Lithotex machine had not been claimed as one that had reached finality.

WEBB MAC.

Window Envelopes.

The New Postal Regulation Causing Trouble.

Already the new regulation with reference to the style of window envelope which may be sent through the post to foreign countries is causing trouble and annoyance. The regulation which came into force on January 1st last, is not being generally observed, and, in consequence, many letters in panel envelopes are being stopped in the post. The Postmaster-General therefore draws renewed attention to the restriction. The transparent panel, as we stated in our last issue, must form an integral part of the envelope, and must be parallel to the longer side, so that the address appears in the same direction; it must be placed so as not to interfere with the impress of the date stamp, and must be of a substance that will take writing. Articles forwarded in envelopes with a transparent panel must be registered.

As a modification of the conditions, the Postmaster-General has arranged that in the case of envelopes addressed to any part of the British Empire or to the United States of America the panel need not form an integral part of the envelope.

For this latter modification British manufacturers of the attached panel style of envelope will be grateful, but the concession only seems to show that the original regulation was unnecessary, and in any case the regulation places our manufacturers at a disadvantage at the outset.

More Congratulations.

SIR,—I had quite intended to have written you ere this, but it slipped my memory until I read in your current issue the letter of Mr. A. E. Goodwin, the respected secretary of the Federation of Master Printers.

If you will allow me to do so now I beg to offer my sincere congratulations for the improved appearance of your journal which permits of more useful and interesting matter being given to its many readers, and that weekly, too, which keeps one posted up to date.

I think you were wise to adopt the intermediate size rather than that of the original, which was too cumbersome to handle comfortably.

Wishing your journal every success, I am
 Yours, etc.,

CHAS. T. JACOBI.

Printing and Allied Trades Charity SPORTS ASSOCIATION.

Annual Dinner and Reunion.

The annual dinner and reunion of the committee of the above-named Association, held at the Manchester Hotel, on January 14th, was unanimously declared to be one of the most pleasant functions hitherto held in connection with the printing and kindred trades. Mr. Charles H. Roud, an ideal chairman, was supported by Mr. E. H. Raynham, Mr. John Fry, Mr. Percy J. Moss, and many other well-known ladies and gentlemen.

In proposing the toast of "The Charity Sports Association," the chairman said that he had been very pleased to do what lay in his power to assist the good work in which he found this committee engaged, because that work was to benefit all sections and conditions of those engaged in the printing industry. First, there was the social element that brought together, as it did that night, employer and employee. Then it encouraged sport, to develop the muscles and improve the health of those living sedentary lives and give them more interest in the welfare of their fellows. Lastly, it was a great aid to the trade charities. He could therefore most sincerely ask them to drink to the future prosperity of the Association.

Hon. Secretary's Review.

The hon. secretary, in responding, said that Mr. Roud had rightly interpreted the spirit of the Association, for the friendship of both the employer and the employee had been of great benefit to all concerned. Proof of this was evidenced by the fact that although four employers had to be found each year as presidents for the various sections, yet there had never been the slightest difficulty in obtaining their kind offices and support. This year the committee deliberately broke the rule of seeking only employers as their presidents, by honouring one of the most generous managers in the trade, who would preside over their destinies during a period that would be recognised as the worst year of trade ever known. Thus Mr. Roud had to assist in creating a record of making pensions when money was so scarce. By Mr. E. H. Raynham's assistance they were enabled to name four pensions and say that the committee held the record of pensions named in one year by any Auxiliary connected with the trade. During the year, Mr. John Fry had presented each section with a perpetual trophy as a culminating effort to his charitable contributions of last year's presidency, which the committee gratefully acknowledged by naming a pension in honour of his most charming wife. Mr. W. C. Jewell, the hon. sports secretary, they would be sorry to hear, was away ill; they all would wish him a speedy recovery. Mr. George V. Maddams would be leaving them, but as it was to better himself they wished him all prosperity in his undertaking. Mr. George H. Marks (Fry's Metal Foundry) had promised to fill the breach. Their good friend Mr. A. G. Wills, was leaving London, and they were certain that he would be as popular and as much sought for in Tonbridge as he had been in London. Mr. Charles Anderson and his committee had earned golden opinions for the management of the Boxing Section, over which their generous patron, Mr. A. G. Gronow, presided. Mr. A. J. Pescud, the popular hon. secretary of the Miniature Rifle Section, and an expert shot himself, was to be congratulated upon the great success of this section. Grateful thanks were due to Mr. Edgar L. Waterlow and to Sir William A. Waterlow for their generous support. In addition to the four pensions referred to, the committee had been able to give £130 to the Vellum Binders' Pension Society to complete a pension with that most deserving institution, and also £23 to the Caxton Home, the Lloyd Memorial Seaside Home, the Alf Evans Home and the

Natsopa Memorial Home. It still remained for the committee to eke out a little for the Bookbinders' Pension Society and the Printers' Medical Aid to wind up a memorable year's work. If the committee avoided petty squabbles and agreed to play the new game of put and take all for the benefit of trade charities they would continue to prosper and be worthy of the toast which had been accorded them.

"The Visitors."

Mr. A. Oddy (the hon. treasurer), in proposing "The Visitors," said that it was both a pleasure and an honour to have the presence of so many ladies. It made the function brighter and pleasanter. He would like to couple with the toast the names of Mr. E. H. Raynham and also Mrs. John Fry. The toast met with an enthusiastic reception.

Mrs. John Fry said that the pleasure was hers, for she had thoroughly enjoyed herself, as she felt sure every lady present had done.

Mr. E. H. Raynham said that when he was asked to preside at the Hotel Cecil concert he was under the impression it was to be only a small function. He found, however, that it was really a very large and important gathering of all sections of the trade, and in consequence he had to work hard to get level with the situation. He was glad to know that his services had been so successful.

Mr. John Fry congratulated the chairman on his successful termination of his year of office, and thanked Mr. Roud for giving him the pleasure of being present.

The toast of "The Chairman" was admirably put by Mr. E. A. Lowe (vice-chairman of the Association), and received with musical honours.

A New Cup Presented.

Mr. Charles H. Roud briefly replied, stating that he had done his best to carry out the objects and wishes of the Association; if he succeeded, then he was satisfied. He should continue to take a live interest in the work, and as an earnest of this desire he would like Mr. Oddy, on behalf of the Association, to accept a cup for team competition in the Miniature Rifle Section.

Mr. Oddy, in accepting the cup, said that it was both unique and handsome, and the committee were glad to accept a gift that would for many years remind them of the pleasant times they had spent with their esteemed president.

The inscription was as follows:—"Charles Roud Cup, for an annual team shoot in the Printers' Rifle League Competition. Presented by the president—Chas. H. Roud." A vote of thanks to the dinner stewards concluded one of the most pleasant gatherings in the history of the Association.

The next sports will take place at Stamford Bridge grounds on Saturday, July 15th. Anyone wishing information should communicate with Mr. H. F. Parker, 8, Albion Road, Wandsworth Road, S.W.8.

Football.

The following matches have been played and resulted as indicated:—

Printers' Football League.

On Saturday, 14th inst.:—"Oyez," 3; Bain's Athletic, 1. Waterlow's, 2; Blades, East and Blades, 1.

On Saturday, 21st inst.:—Bain's Athletic, 9; Fryotype, 0. Amalgamated Press, 11; Jayswood, 0. "Oyez," 8; Falcon, 0.

BIOGRAPHICAL particulars of the late Sir Arthur Pearson and many tributes to his character and achievements confer much interest upon the special "Sir Arthur Pearson Memorial Number" of the *St. Dunstan's Review*, which has just been issued, price 1s. This little magazine forms, in its ordinary issues, a monthly record of the work and play of St. Dunstan's men all over the world, and as such is sent to them free. It has also a large circle of subscribers amongst the general public interested in St. Dunstan's work, to whom the annual subscription is 7s. 6d.

The Printing Crafts' Guild.

The New Year social evening was held in the Municipal College of Technology, Manchester, there being present about 400 ladies and gentlemen, including Mr. John Taylor (president), Major Charles W. Gamble, O.B.E., M.Sc.Tech. (director of the printing and photographic departments), Mr. Wm. Johnson (president Manchester and Salford Association of Master Printers, Lithographers and Bookbinders), Mr. E. H. Bethell (president Lancashire and Cheshire Alliance of Master Printers), Messrs. John Allan (chairman) and Thos. Sproat (secretary the Amalgamated Society of Lithographic Printers of Great Britain and Ireland), Mr. Chas. Keane (chairman of the Handcrafts Committee) and many other persons prominent in the printing industry in Lancashire and Cheshire.

The first half of the evening was devoted to musical items given by the Carola Costume Party, the two directors being Messrs. Edgar Ashton and W. M. Menzies.

Just before refreshments Mr. E. Bethell remarked that after perusing such an excellent syllabus he thought a membership of 400 was small when one considered that in the Manchester area there were employed in the printing trade several thousands of men and women. The Guild had not taken advantage of the avenue of publicity, otherwise the membership would have been larger. As president of the Lancashire and Cheshire Alliance he would see what could be done by the employers to strengthen the work of the officers of the Guild. In many things Manchester was behind London, and if it were possible for the Guild to get together ten or twenty apprentices desirous of spending a week end in London he would endeavour to fill up their time by visiting some of the finest offices in the kingdom. He advised the apprentices to take a keen interest in their work, and they would find persons willing to give them every assistance.

Mr. Thos. Sproat said it was surprising how many students failed to take advantage of the opportunities which the Guild offered for their advancement. Many benefits could be secured by joining in the visits to some of the modern offices, which welcomed craftsmen and desired to assist. Of course there was a difficulty in the printing trade, as some persons thought they knew all they wished to know, and it was those individuals who would not listen to any reasoning for making them more efficient.

A hearty vote of thanks being accorded the artistes the rest of the evening was given up to dancing. Extra turns of violin solo, legerdemain and ventriloquial humour, including Mr. W. M. Menzies, the mimicking star of football field and electioneering campaign.

Thanks are tendered to the president for gift of programmes, Miss Gamble, Miss Lodge and Miss Edith Hughes for assistance with the refreshments.

WEE MAC.

Printing Notes from Australia.

Wage Reduction Agreed—Apprentice-Training Changes—New Company—Fire in Sydney—Country Newspapers in Australia.

(From Our Sydney Correspondent.)

THE Master Printers' and Connected Trades Association having applied, in accordance with the Board of Trade's decision, for a reduction of 3s. in the wages of compositors, operators, stereotypers and electrotypers, type foundry products' employees, letterpress machinists, bookbinders and paper rulers, cardboard box and carton makers, and lithographic workers, with proportional reductions for juniors, the union representatives said that they would not oppose the application, and the order has accordingly been made.

WITH the object of bringing about a better system of apprenticeship in Victoria a series of conferences was held recently between representatives of the Victorian Master Printers' Association, the Printing Industry Employees' Union and officers of the Education Department. In a statement issued by the Director of Education, who presided over the conferences, it was stated that the representatives considered that the term of indenture should be in future six years, instead of seven, and that it should commence not earlier than the age of fifteen years. During the first and second years of apprenticeship the apprentice was to be required to attend an approved evening class at least one night a week. The essential subjects of the course of this school were to be English and arithmetic, but other culture subjects might be prescribed.

THE most important determinations arrived at by the conference related to the technical training of apprentices. Future indentures were to provide that during the third, fourth and fifth years the apprentice should attend the technical class in printing at the Working Men's College, or some other approved school. The employers had agreed to pay the college fees for their apprentices, and would further permit them to attend the class for one half day a week without loss of wages. Further, they had agreed that apprentices who attained each year the standard of technical education prescribed for the year should receive a bonus of 2s. 6d. per week in addition to the wages provided in the indentures. A committee, consisting of Mr. G. Anderson, representing the Victorian Master Printers' Association; Mr. R. Elliott, representing the employees; and Mr. G. Leslie, of the staff of the Working Men's College, were appointed to prepare a case for the establishment of day classes in printing, to be submitted to the Minister of Education. The conference asked that the Working Men's College printing trade advisory committee should be reconstituted, so that all branches of the printing trade might have representatives. It was suggested that for the future the committee should include four members from the Victorian Master Printers' Association, four from the Printing Industry Employees' Union, two members from the Melbourne Printers Overseers' Association, one representative of the Education Department, and one representative from the Working Men's College council.

A NEW company, with registered office at Brisbane, and a capital of £20,000, is that of Birmingham and Fowler, Ltd. Objects, to manufacture an improved roll ticket printing machine, the joint invention of Thomas Joseph Birmingham, Francis Fowler, and Eric Burgoyne Owen Cowlshaw, to deal in all classes of machinery appertaining to the said invention. The above-named to be first directors.

A FIRE in Sydney, which caused damage totalling thousands of pounds, was responsible for the destruction, *inter alia*, of a building housing Messrs. Townsend and Co., printers.

THE Premier, Mr. Dooley, opened the 22nd annual conference of the New South Wales Country Press Association, held in Sydney in October. The report of the secretary, issued on behalf of the executive, stated that the association had decided at the last conference that an experimental test of the 44-hour week

should be made in representative offices during the year. The result of these, as placed before Judge Beeby, showed that the compulsory adoption of a 44-hour week would seriously injure, if not cripple, country newspaper enterprise. His Honour brushed all evidence aside, and directed the 44-hour week to become a common rule to the industry as from June 18th. Reports since received from members showed that this arbitrary decision had imposed great hardship on them. Indeed, it would appear that no industrial decision had ever had such injurious result upon country offices.

THE NATIONAL Association of Wholesale Stationers AND PAPER MERCHANTS.

National Council Meeting.

The monthly meeting of the National Council was held at the Council Chamber, 11, King's Bench-walk, Temple, E.C.4, on Thursday, January 12th, Mr. J. W. Cooke (the president) being in the chair.

The Paper Trade Customs, which have recently been revised by this Association in conjunction with the kindred Associations, have received very satisfactory criticisms in the recent trade press.

The Council considered the position of the trade as regards the Safeguarding of Industries Act, 1921, and the representation on the Permanent Panel set up under Section 7.

The General Secretary had received full information as regards the proposed voyage of the British Trade Ship, which aims at the development and extension of world markets for British goods, and also of various trade exhibitions being held throughout the world. It was agreed that a reduction in the pre-

sent postal rates was essential, since these are not only non-productive, but are also inimical to the trade; and the Council agreed to take the matter up with the kindred associations and press for an early reduction.

The Council was informed that the Manchester Chamber of Commerce was supporting the application made by this Association to the various shipping companies as regards shipment of paper at freight calculated on the weight.

It was reported that there was now a likelihood at an early date of the Federation of Master Printers arranging to meet the Committee appointed by the National Association to discuss the question of standardisation and other matters of mutual interest both to merchants and printers.

It was arranged that the annual meeting of the National Council and the annual general meeting of the Association should both be held on February 9th, when the new office bearers will be elected; and the various districts and national sections were advised to nominate their delegates on the National Council before that date. On the same day the National Wrapping Paper Section and the National Writings and Printings Section will also hold meetings, so that a full day's business is assured.

The annual dinner will take place on February 9th at Claridge's Hotel, Brook-street, W.1. The President, Mr. J. W. Cooke (Messrs. Butt Bros. and Cooke, Ltd.), will be in the chair, supported by the incoming president, and it is hoped that in addition to a representative gathering of members, a number of important members of the trade will be included amongst the guests.

At the dinner the presentation will also take place of the National Cup given by the President for an Annual Golf Competition, Mr. A. Dykes Spicer being the holder for the first year.

AN order of the Board of Trade provides for a census of production to be taken in 1923.

Danish Customs Tariff.

The New Proposals.

A translation of the proposed new Customs Tariff for Denmark appears as a supplement to the *Board of Trade Journal*. The following items, with the proposed rates of duty, appear under the heading of paper, pulp, pasteboard, and paper:—

Wood pulp, straw pulp, rag pulp and the like, free.

Board, produced in the mass or in layers, not coloured or of a uniform colour right through, even if calendered or with impressed patterns, varnished, oiled, covered (sprinkled) or impregnated with asphalt, tar and the like, or combined with sand or slate; felt, impregnated with tarry materials, e.g., for sheathing ships; vulcanised fibre and similar fibre board in sheets, and compound sheets of asbestos, silk waste and the like; paper with or without holes for Jacquard machines; coarse wares of paper pulp or of chemically treated fibre, such as tubes, rods, wheels, tools, handles, pulleys, ornaments for building, tubs, buckets, bowls and similar coarse articles for household or industrial use; bobbins, 7½ per cent. *ad val.*

NOTE.—Pasteboard (except ordinary white wood pulp board produced in the mass) weighing less than 350 grammes per square metre and board with pasted on paper, are dutiable as paper and cardboard.

Ordinary uncoloured news-print paper; emery paper, sandpaper and similar smoothing materials, even in cut pieces of other than rectangular form, 5 per cent. *ad val.*

NOTE.—Ordinary white paper, not calendered, slightly sized and containing at least 60 per cent. of wood pulp, which is declared on importation as being intended for printing daily or weekly newspapers, trade papers and periodicals, is classified as news-print paper.

Sensitised photographic paper and cardboard; fly papers, 7½ per cent. *ad val.*

Paper and cardboard, not coloured or of a uniform colour right through, even calendered, with impressed patterns, oiled, varnished, asphalted, or sprinkled or impregnated with tar; linoleum with foundation of pasteboard, paper or paper fabric; ruled paper, when the ruling does not appear as patterns and the like, 10 per cent. *ad val.*

Paper money, Government bonds, shares, bills of exchange, and similar monetary documents; manuscript; also price lists, catalogues, notices, "directions for use" and the like, consisting exclusively or to a large extent of Danish text, free.

Written or printed books, magazines, weeklies, newspapers, and notices with or without text, and parts or supplements therefor, with or without pictures incorporated in the text or bound, sewn or paged therewith:

Exclusively or to a large extent in Danish text, imported for sale or circulation, provided they have not been published mainly for the use of Danes abroad: Bound, 20 öre per kilogram; unbound, 10 öre per kilogram. Other, free.

Pictures (etchings, copper and steel engravings, wood cuts, lithographs, photogravures, etc.), for framing; photographs; photo-lithographic copies; maps or charts, whether or not pasted up on pasteboard, canvas and the like, bound or not; globes with or without stands; patterns and pattern books; pianola rolls, 30 öre per kilogram.

All other pasteboard, paper and cardboard not mentioned above, and manufactures of pasteboard, paper and paper pulp, not specially mentioned: Combined with silk, 20 per cent. *ad val.*; other, 15 per cent. *ad val.*

NOTE TO PAPER, ETC.—Paper and pasteboard bearing the names, trade marks, quality marks of the foreign manufacturers or sellers, foreign marks of origin, etc., are dutiable without regard to such inscriptions.

WISDOM is oftentimes nearer when we stoop than when we soar.

Points of Omission in Estimating.

Some Oversights and Errors that Contribute to Ridiculous Disparities in Printers' Quotations.

Notwithstanding the progression in matters of costing and cost-finding systems, there is still ample evidence of a lack of harmony between the figures of various estimates for similar classes of work. Both in America and England, examples are given from time to time of extreme variances between quotes for certain jobs, although the houses in competition are running costing schemes and have adopted hour rates which are supposed to conform to a common standard. If big differences accrue, despite the adoption of official hour rates, it is obvious that there is somewhere a problem for consideration. Our purpose is to examine in detail some of the many factors which contribute to inefficient estimating, taking it for granted that the hour rates for various operations and processes are passably correct.

Some Paper Pitfalls.

First, consider the paper question. If the selection of paper is left entirely to the printer, there is here a fruitful field for building up a big variance in estimates. Printing stock may run from 3½d. to 6d. per lb. and still seem to give just the most appropriate grade for the inquiry. If a large batch of stock is requisite, the ultimate difference of a halfpenny per lb. totals up to an enormous comparative sum. The best plan, if the customer is making a round-the-town call, is to obtain his ideas on paper value. Failing this, alternative suggestions should always be submitted, so that the other printer will not score solely by means of a low grade stock. When over this difficulty, the next point is the calculation of stock quantity. The most frequent error here is to quote half-quantity. Every printer knows the difference between a page and a leaf; every customer doesn't. Still, in reckoning out the total, it is the simplest thing imaginable to become confused between leaf and page, with disastrous effect. So far as the customers' instructions are concerned, it is always policy to get a thorough understanding as to whether he really means pages or leaves. Particularly does this apply to account book inquiries. Perhaps the client requires a folioed cash book with right and left-hand pattern. He does not say that the paging is to run 1-1-2-2, etc., nor does he know that a page is half a leaf. What he knows is that the book must run to 500 or 1,000, as the case may be; consequently, he says 500 or 1,000 pages. The estimator fails to elicit

exact information and quotes on pages, ultimately to obtain the order and find through the paging or folioing particulars that follow, that the book is going to make double the thickness he quoted. In addition, the ruling, printing, binding and material costs are considerably augmented. Of course, the estimator objects, but the client sticks on the argument that if a book is right and left pattern the clerk should know his business well enough to take pages as leaves. It is very difficult to drive home with effect to such a client that account book makers are as familiar with right and left hand patterns that are paged 1-2-3 as those that are paged 1-1-2-2. To prevent errors of this description, full details of the job throughout should be taken before quoting.

Sheets and Their Subdivisions.

In the case of bookwork estimating, double and quad sizes often create a stumbling-block for the fresh estimator. The calculation of paper quantity should always be checked from a printed standard, such as is obtainable from most wholesale stock dealers. As a help to paper reckoning, the following may be quoted:—

A single sheet size gives	8 4to pp.	or	16 8vo pp.
„ double	„ „ 16	„	„ 32
„ quad	„ „ 32	„	„ 64
„ eight	„ „ 64	„	„ 128

Again, as a trick to help the memory in remembering the number of leaves out of a sheet the following may be retailed:—

For 4to leaves, multiply	1 (single sheet)	by 4 (4to)
„ „ „	2 (double sheet)	„ „
„ „ „	4 (quad sheet)	„ „
„ „ „	8 (eight sheet)	„ „

If the leaves are 8vo. substitute the factor 8 for the above multiple 4.

The chief essential is to hold a clear grip throughout the quote on the fact that you are working in leaves or pages, as the case may be.

Estimating for Machining.

Following the subject of paper, we may pass by composing and machining, for few mistakes are committed here, provided the hour rates are right. If trouble is encountered through wrong estimation of machining, it may be the fault of basing machine runs on the amount of paper when the latter is a wrongly calculated quantity. In practice, the machining time should be reckoned on the number of formes, ignoring the paper estimate, then the one becomes a check on the other.

Size of machine to size of sheet is another matter that sometimes leads to error in esti-

imating. It is always wise to take the machine a size larger than the sheet. For example, a double-medium art paper could not be worked upon a double-demy press, yet many estimators would fail to see the necessity for basing price upon the double-royal rate. It should be laid down as an unalterable rule that all heavy jobs should be quoted on machines a size larger than the sheet in hand, then there would be no fear of loss in that direction.

The Ink Problem.

We come now to the most important (because most neglected) factor in the estimate, namely, ink. In the first place, the word ink should be boldly printed on the estimating sheet—so bold that it cannot be overlooked. Once the importance of making some allowance for ink is observed, it remains to devote detailed consideration to the factors which influence its amount and price. The character and mass of type-face calls for first consideration. A light faced modern 10-point might use up 1lb. of 3s. black per thousand runs of 64 pp. demy 8vo., on the other hand, Jenson or Bold Roman would account for nearly 25 per cent. more ink. If these allowances hold good for a S.C. printing paper, what would be the result of using soft and absorbent antique laid stock? We should require to allot fully 33½ per cent. more ink. If the ink is higher grade, a less quantity would be required; if poorer, a much greater amount would be consumed. Obviously the conditions of working are vitally essential to a successful calculation of ink quantity.

Some Ink Figures.

To show more efficiently the divergence that may be created in an estimate by the mode of handling the ink question, take the following figured comparison. A hundred thousand 32 pp. demy 8vo sheets of hard S.C. stock are printed in 10 point light-faced type, and the amount of ink consumed or estimated is 50 lbs. at 2s. 6d., which equals £8 5s. The same job on soft antique laid stock printed in 10 point bold, would require 70 lbs. of ink, which, at 2s. 6d. per lb., would equal £8 15s. Imagine the influence of ink if the book had consisted of 320 pp., the usual thickness for a modern novel. In the above case the difference in the ink bill would amount to £25. This is no inconsiderable item, and might easily result in bringing the job round with a decided loss, or, at least, a lack of reasonable profit. Ink, typeface, solidity of matter,

WE have much pleasure in announcing that the recent re-adjustment of wages in the engineering industry has enabled us considerably to reduce our manufacturing costs. We have therefore arranged to give our customers the full and immediate benefit of these lower rates by making

SUBSTANTIAL REDUCTIONS IN PRICES

of the Composing, Letterpress, Lithographic, and Stereotyping Machinery manufactured by us at our Works at Altrincham, Cheshire. These reduced prices affect the following :

LINOTYPE COMPOSING MACHINE	J&M TRANSFER PRESS
MIEHLE TWO-REVOLUTION PRESS	J&M GRAINING MACHINE
CENTURETTE TWO-REVOLUTION PRESS	JUNIOR AUTOPLATE
J&M DIRECT LITHO ROTARY	AUTOSHAVER
J&M SINGLE-COLOUR OFFSET LITHO ROTARY	J&M MATRIX MANGLE
J&M TWO-COLOUR OFFSET LITHO ROTARY	J&M MATRIX DRYER
	J&M AUTOMATIC METAL FURNACE

These new reduced prices are now effective, and we ask our friends in the printing trade to take full advantage of the position by placing orders for our machines whilst the prices continue in their favour. Meanwhile we shall be pleased to send revised estimates for outstanding quotations, or to send prices to anyone interested on receipt of details of requirements.

and character of paper; these are linked-up factors which cannot possibly be considered apart from one another in an estimate of any dimensions without disaster.

In the direction of three-colour work, the great mistake in estimating the ink is to bundle up the various amounts and total the gross weights at an average price. No true value can thus be gathered; the only sensible plan is to study the subject and masses of colour, allotting separate amounts of yellow, red, and blue ink, and totalling up at respective costs.

We need not dwell upon the addition of handling or expense percentages; if these are not realised by now there is little hope for the trade at large.

Charging the Final Processes.

The estimating treatment of the final stages incidental to the production of printed matter is vitally important to the successful compilation of an estimate. By final stages we mean the cutting, counting, banding, knocking up, packing, boxing, cost of string, wrapping, gummed sealing tape, and cost of delivery or carriage. Very few estimators devote detailed consideration to these finishing items. It is not right to say they are included in the overhead charges, except perhaps in some cases the packing material may be covered. Even so, there is every reason to make a specific charge where the amount of material is large, or in any way extraordinary. As to the other items, no matter whether the inquiry is for a thousand or a million, some or all of them will have to be performed, and the carriage or delivery time paid. If the latter is automatically recovered, the former should not be, but should be charged direct to the recipient of the goods. It is manifestly unfair to make the local clients pay a share of the delivery charge on long distance customers' goods.

Cutting and trimming makes costly machine time, and in this respect the exigencies of the job must be considered. A 4to job may be simply trimmed and cut before printing, a pamphlet may be trimmed, cut, split, and trimmed again after printing and wrapping. The bulk of the books, capacity of the machine, and number of cuts must be duly considered and allowed for in estimating. The time spent on counting and knocking up accounts for a considerable sum in the case of pamphlet and ticket work especially, yet it is frequently ignored. A 100,000 lot of tickets, counted, banded, and packed, may take from 50 to 100 hours, according to the class of ticket; and as many ticket jobs far exceed this quantity, the time expended at the packing end is obviously important in an estimate. Time dockets should be installed at this end of the business in order to obtain something like a true guide for future estimating.

One thing is certain, if the customer does not pay for the time, the printer must, and his profit and loss account is affected accordingly. The same with tape, string, wrapping paper, and boxes. Wherever possible, charge the material on the job and make a profit on it, as much as on paper, blocks, or ink. Don't expect all the expense to be recovered in the overheads; it doesn't always pay, and it is assuredly unfair to expect the small customer, who costs little or nothing at the packing and delivery end, to pay a part of the cost occasioned by the large or faddy client whose demands on the packing end are exceptional.

German Paper Exports.

Among the items under the heading of paper, cardboard, and wares thereof which are on the German list of goods which do not require export licences (based on the Proclamation of December 1st) are the following: Printed matter destined and suitable for distribution among the clientèle of a German business for purposes of information or advertisement; sock soles; postage stamps, used and unused. Also in the list are daily newspapers; periodicals exported through the medium of the publishers' despatch offices. The effect of the December Proclamations is to subject to export licence requirement all goods not enumerated in the "Export Free List."

A Prominent Cardiff Printer.

Mr. E. W. Holder's Many Activities.

Just elected as president of the Cardiff Master Printers' Association, Mr. E. W. Holder—whose business as printer, book-binder, stationer, etc., is at 30 and 32, Bridge-street, Cardiff—is an example of those printers whose activities extend far beyond the confines of their own businesses, and are applied to the betterment of the printing industry as a whole and even then leave some energy available for the service of municipal and national purposes.

Born in 1871, at Arlingham, Gloucestershire, Mr. Holder went to school at Cheltenham, and was apprenticed with Messrs. Norman, Sawyer and Co. of that town. He went to Cardiff in 1892, and was with *Western Mail*, Ltd., Walkey Thomas and Co., and held the post of manager for A. McLay and Co., Ltd., for 6½ years. He commenced business on his own account 14 years ago. When that occurred he had already taken his place in the organisation of the industry, and was secretary to the Cardiff Master Printers' Association at that time, but gave up the position when he started business, though he continued as a member.

During the war, Mr. Holder was a member of the Cardiff Tribunal, secretary of the Cardiff

Mr. E. W. Holder.

Chamber of Trade War Savings Association and a member of the V.T.C., and he is at present a member of the Court of Referees, Employment Section of the Board of Trade. He was president of the Cardiff Chamber of Trade in 1919-20, is vice-chairman of the Cardiff Committee of the Joint Industrial Council (Printing and Kindred Trades), a member of the Cardiff Technical Advisory Committee and Telephone and Telegraph Advisory Committee, member of the Board of Management of King Edward VII. Hospital, Cardiff, and serves on three important committees of the hospital.

In addition to these industrial and public services, Mr. Holder finds some time to devote to Masonry. He is a Past Master of the Loyal Commercial Lodge of Freemasons (No. 2720), a member of the "Hendre" Past Masters Lodge (No. 3250), a founder of the Amethyst Lodge (No. 4026), a member of the Royal Arch Sir George Elliot Chapter (No. 960), and Masonic Librarian for the Province of South Wales (Eastern Division).

His recreations are simple—bowls and music, with reading when he can find time. Apropos of music, he has been successful in conducting choirs, and has won four batons in male voice competitions. He still leads the "Cardiff City Gleemen."

Mr. Holder's business is not a large one; we gather that as his only son is in the Civil Service, he is not out for big developments, having ambition rather to serve his day and generation in other ways. We doubt not Mr. Holder will merit the "well done" of his Association when his year of office is

ended, and we hope he may then find further opportunities to serve the J.I.C., which has already done so much good work in Cardiff.

Not a politician, Mr. Holder is not out for honours, but rather for service: when asked his motto he quotes "I serve"—not a new motto, but a very worthy one. In all his activities Mr. Holder has the sympathy and the frequent help of his wife, to whose assistance he attributes much of the success he has achieved in the many tasks to which he has put his hand.

Window Envelopes.

British Manufacturers Recover a Point.

The notification of the postal authorities, mentioned in our last issue, that window envelopes which are not of the integral character, may be posted to any part of the British Empire and to the United States, is a valuable concession secured for envelope manufacturers in this country, though it is hoped that a further abandonment of the restrictions may follow upon action of the English-speaking countries.

The original regulation which was passed at the Postal Union Convention of Madrid on the motion of the German delegate, and which was opposed by the British and United States representatives, is as follows:—

"(a) Envelopes which are entirely transparent or have an open panel are prohibited.

"(b) Transparent panels must form an integral part of the envelope, and be placed lengthwise in such a position as to show the address lengthwise and as not to interfere with the date stamp; the panel must be so transparent as to ensure that the address is perfectly legible, even by artificial light, and must be so prepared as to take writing.

"(c) Articles sent in envelopes with transparent panels are admitted to registration."

This regulation, if enforced, would, as we have already pointed out, have inflicted great hardship upon envelope manufacturers in this country. These manufacturers had put in extensive and expensive plant, and employed a very large number of people in England and Scotland on the production of the type of envelope which, had the regulations come into force, would no longer be available. The result would, of course, have been that the machinery would have had to be scrapped and unemployment would have been increased owing to the discharge of the workpeople engaged in producing the envelopes.

In order to prevent such a disaster, the matter was taken up by the Employers' Federation of Envelope Makers and Manufacturing Stationers, and ceaseless pressure was brought to bear upon the Government Departments concerned, with a view to securing the amelioration or the abandonment of the proposed restrictions. At the same time the interest of the kindred organisation in the United States was aroused, and through it the American Postmaster-General approached. The trade unions in the industries affected were equally alive to the seriousness of the regulation, and the resolution passed by the Interim Industrial Reconstruction Committee appeared in our issue of January 19th.

The result of this agitation was the announcement which we made last week, that, as a modification of the conditions the Postmaster-General has arranged that in the case of envelopes addressed to any part of the British Empire or to the United States of America the panel need not form an integral part of the envelope.

On securing this measure of justice for British manufacturers, the Employers' Federation of Envelope Makers and Manufacturing Stationers are to be congratulated. As intimated above, it is hoped that a further abandonment of the restrictions may follow, and it may be that the British Postmaster-General may be induced to take other action in regard to postal rates which will ease the labour situation in the allied industries.

To complete the modifications up to date, it may be mentioned that, as announced by the Postmaster-General, while prior to January 1st, envelopes with transparent panels were not admitted to registration if addressed to places abroad, they may now, under the new regulations, be registered, although registration is not compulsory.

Replying to a protest by the Liverpool Chamber of Commerce, the Postmaster of Liverpool says it has been decided by the Postmaster-General that, although the ordinary panel envelopes do not comply with the regulations as laid down on page 55 of the Post Office Guide, they will, for the present, be sent to destination at sender's risk.

P. M. SHANKS & SONS, LTD.
 GENERAL LETTERFOUNDERS

ISH to call the particular attention of all Printers and Publishers to the fact that their extensive selection of specially designed Modern and Old Style Book and Display faces is now cast on the generally accepted British-American Point System,

¶ That they have recently designed a number of beautiful letters intended to assist in the production of up-to-date Art Booklet and Catalogue work,

¶ That they are constantly adding to their already numerous series of thick, thin, wide and condensed faces of Sans-serif, Gothic, and Doric,

¶ That the maintenance of their established reputation for Hard Metal and accuracy of workmanship receives their constant attention, and

¶ That the large stocks kept enable them to execute promptly all orders sent to their Foundry in Red Lion Square, London, W.C. 1. Tel: Central 2438.

JUBBS' PRINTING METALS

are Manufactured in the

Largest and Most Up-to-Date Foundry
 in the Kingdom,

solely devoted to the manufacture of

METAL for PRINTERS.

Works : HUNSLET, Leeds.

GLASGOW : 15/17, Clyde Place.

LONDON : 63/64, Chancery Lane, W.C.

Trade Notes.

MUNICIPAL PRINTING IN NEWCASTLE.—The committee of the Newcastle Corporation appointed to consider the establishing of a Corporation printing department met last week and decided to obtain information as to the cost of municipal printing for last year before going further with the scheme.

TENDERS are being invited by the Central Tenders Board of the Government of Palestine up to noon on Tuesday, February 28th, 1922, for the supply to the Palestine Government of paper, stationery, small stores, drawing materials, typewriters, etc. Printed forms of tender and conditions may be obtained on application at the offices of the Crown Agents for the Colonies (Pattern Room G.5), 4, Millbank, Westminster, S.W.1.

LONG-SERVICE employees of Messrs. Ed. J. Burrow and Co., the well-known printers and publishers of Cheltenham, have been presented with diplomas, the Mayor of Cheltenham visiting the works to make the presentation.

A RUMOUR was current in London last week to the effect that *Truth* was to be sold. Mr. R. A. Bennett, the editor of that publication, has informed the Press that there was no truth in the rumour. He declares that he wishes the rumour of its sale to be contradicted on his authority.

AT St. Bride Foundation Printing School a musical entertainment arranged by students of the school on behalf of St. Bride Students' Pension Fund, will be held on Friday, February 3rd, 1922, at St. Bride Institute, at 6.30 p.m.

THE South-East District Association of the London Master Printers' Association will hold a meeting of master printers of Woolwich and surrounding districts at the Shakespeare Hotel, Powis-street, Woolwich, on Tuesday, February 14th, when the present crisis in the printing industry will be discussed. The president of the L.M.P.A., Mr. R. A. Austen-Leigh, will speak, and Mr. G. Eaton Hart (St. Clements Press) will speak on impressions gained in his recent extended tour among printers in the United States. All master printers, whether members or non-members, are cordially invited. Tea at 4 p.m. Meeting to commence at 4.30 p.m.

WE understand that a fire which occurred last week at Alexandra Works, Stratford, the printing-ink factory belonging to Messrs. Johnstone and Cumbers, Ltd., has not interfered in any way with the course of business, notwithstanding considerable damage that was done.

ADOPTING monotype composition, the *Weston-super-Mare Gazette* has remodelled its pages, and is making a general forward movement which necessitates the removal of the editorial, commercial and photographic staffs to new offices, at Glover's Printing Works, St. James-street.

LECTURING on Journalism, at the Royal Institution last week, Lord Burnham commented on the value to a newspaper of a distinctive colour of paper. He did not believe that the possibilities of tinted or coloured paper had yet been anything like exhausted. He remarked also that in America colour printing was a great feature of the Sunday editions of all the big papers, and it was bound before long here also to lay hold of the popular Press.

WILLS.—Sir Cyril Arthur Pearson, Bart., chairman of C. Arthur Pearson, Ltd., the founder of the *Daily Express* and of *Pearson's Weekly*, £93,926; Mr. Kennedy Jones, M.P., at one time assistant editor of the *Birmingham Daily Mail*, afterwards director and news editor of the *London Evening News*, and one of the founders of the *Daily Mail* and *Daily Mirror*, £206,537; Mr. Arthur Crosby Lockwood, of Crosby Lockwood and Son, technical publishers, Stationers' Hall-court, E.C., £41,584; Mr. Marie Joseph Landy, of Landy and Co., Newman-street, Oxford-street, music publishers, £18,764; Mr. William Erskine Reid, formerly a member of the firm of Messrs. Scott and Reid, who for many years supplied law reports to newspapers, £6,417; Mr. Alexander Louis Teixeira de Mattos, of Chelsea, the translator of Maeterlinck, Fabre Zola and others, formerly editor of *Dramatic Opinions*, and later of the *Candid Friend*, during the war Secretary of the Intelligence Section, War Trade Intelligence Department, £2,831; Mr. Francis Maurice Drummond Drummond, formerly editor of the *World*, and at one time serving on the *Pall Mall Gazette*, £1,350.

ARTHUR SWAN, aged 60, a printer, was last week seized with illness at the junction of Oxford-street and Tottenham Court-road, and died.

NEGOTIATIONS for the sale of the Caxton Insurance Company having fallen through, it has been decided to reorganise the board, with Lord Grimston as chairman, to carry on direct business.

THE annual general meeting of members of the Newspaper Press Fund will be held at the offices of the fund, 11, Garrick-street, Covent-garden, London, on Saturday, February 25th, at noon.

THE *Star* companionship held their annual concert on Saturday at the London and Brighton Hotel, Queen's-road, Peckham, in aid of the funds of the Caxton Convalescent Home, Limsfield, the printer and superintendent of staff, Mr. Murch, being in the chair. As a result of the effort, the sum of £36 was raised. This was the second concert given by the *Star* last month, the previous one being at Ilford, in aid of the funds of the Printers' Pension Corporation, Mr. Murch also presiding over that concert, when a sum of £55 was obtained.

SIMPLIFIED SPELLING.—There were four fundamental reasons why we should have a simplified spelling system, declared Professor Ripman in a lecture on Monday at the English Language Club. (1) It would mean the saving of a year in the educational life of every child; (2) a good standardised English speech would be the more efficiently taught; (3) it would forge more closely the links of Empire; (4) be the means of removing the very last obstacle for English becoming the world's great language.

AT the Brussels Commercial Fair, which will be held this year from April 3rd to April 19th covered stands cost 350 francs per stand and may be shared by several firms. Allocation of space will be made on February 15th and applications should reach the directors (19, Grand Place, Brussels), before that date. Further particulars may be obtained from Belgian consulates.

AT the International Book Fair to be held in Florence during May, June and July, 1922, a special section will be devoted to: Recent inventions in printing machinery and appliances; new processes applied to printing; photography and cinematography in relation to printing. Costs will be: Floor space, per square metre, lire 150; wall space, per square metre, lire 80.

COPIES of the *Clonmel Chronicle* containing the report of the organised workers' protest against the I.R.A. attack on the *Nationalist* offices because of that paper's refusal to print the I.R. manifesto against the Peace Treaty and Free State were seized in the streets by the I.R.A. men. Practically the whole town's issue was confiscated. Further reprisals against the *Nationalist* are threatened when it resumes publication.

THE death has occurred of Mr. Douglas McIntyre, a journalist well known in Fleet-street. Born at Aberdeen about fifty-two years ago, he came to London when a young man, and held successively appointments on various daily newspapers, having been for the past thirteen years on the staff of the *Financial Times*.

MR. WALTER LEE, editor of the *Grantham Journal*, died last week, aged 57 years. He joined the newspaper as a pupil in 1881, and with the exception of several years following apprenticeship served it continuously, becoming editor twelve years ago.

MR. JAMES STRACHAN, M.A., of Edinburgh, has died at the age of 60 from pneumonia, following influenza. Twenty-three years ago he joined M'Dougall's Educational Co., Edinburgh, and became editor of the M'Dougall publications and a director of the company.

MR. WILLIAM LOW DAVIDSON, reader, for 35 years in the *Scotsman* office, died on Friday at Portobello.

THE death has occurred of Mr. William S. Call, of Margate, locally well known as a journalist on the staff of the *East Kent News* and formerly of the *Isle of Thanet Gazette*. He was Margate correspondent of the *Star*.

THE death occurred on Sunday of Mr. Godfrey Turner, the well-known journalist. He wrote numerous special articles for London, Australian and American newspapers.

THE death is reported of John Kendrick Bangs, the well-known American author. Mr. Bangs was associate editor of *Life*, editor of the *Drawer*, and of *Literary Notes* before he became literary editor of *Harper's Magazine*.

THE death is announced at Wilkes-Barre, Pennsylvania, of Mr. George A. Edwards, who left Cardiff forty years ago, and became one of the foremost newspaper men in Pennsylvania. For many years he had been an editorial writer on the *Wilkes-Barre Record*, of which he became editor.

THE offices of the Société Linotype Française are being transferred to new and commodious premises at Rue Servan, 52, Paris (XIe).

IN Paris on Thursday night burglars broke into the offices of a Russian newspaper directed by M. Milioukoff, who was Foreign Minister in Kerensky's Cabinet. This journal, the *Dernières Nouvelles*, wages a violent campaign against the Bolsheviks. Documents bearing on Russian subjects residing in Paris or abroad, and lists of correspondents and subscribers to the paper, were stolen.

N.Y. ENGRAVERS' STRIKE.—The agreement between the employers and employees in the photo-engraving field of New York came to an end on December 31st, and, as no agreement had been reached for an extension of arrangements, the shops were closed and notices posted which shut down the work for about fifteen hundred men. Newspaper engravers, being under a different agreement from those in the general trade, are not affected.

MR. GEORGE REED, managing director of Reeds, Ltd., printers and stationers, Penrith, a prominent Freemason, left £12,487.

Trade Union Matters.

LONDON SOCIETY OF COMPOSITORS.—As the political work of the L.S.C. is kept entirely distinct from its industrial activities no political work is discussed at the ordinary delegate meetings of the Society. The election of Mr. T. E. Naylor to Parliament, however, provides an occasion when a political matter has to be considered by the industrial side of the Society. At the quarterly delegate meeting of the L.S.C. arranged for yesterday evening (Wednesday) the Committee were to suggest arrangements under which Mr. Naylor, while retaining the secretaryship of the Society, would be relieved of some secretarial duties by the assistant secretary and the financial secretary.

NEWSPAPER WORKERS' WAGES.—Although the proposed new agreements between the Newspaper Proprietors' Association and the trade unions contain a clause specifying the first pay-day in February as the date when the new agreements shall become operative, we understand that no new agreements have yet been signed, though conferences with several of the unions have taken place.

LEEDS TYPOGRAPHICAL SOCIETY.—Results of the election of officers of the Leeds branch of the Typographical Association were announced on Saturday last as follows:—President, Mr. J. H. Fraser (Messrs. Chorley and Pickersgill); vice-president, Mr. F. Naylor (Messrs. Beck and Inchbold); treasurer, Mr. J. E. Nettleton (Messrs. Sproston and Son); secretary, Mr. James Musgrave; auditor, Mr. T. Brayshay; committee, Messrs. O. Connellan, F. W. Bulmer, W. Calvert, L. Robertson, W. Senior, R. Alderson, J. M. Grail (linotype representative), and R. Luxford and E. Weston (machinemen). Mr. W. Bottomley has been re-elected as Leeds representative on the executive council of the Association.

THE Typographical Association has issued a quarto report of over 140 pages upon the proceedings of the Triennial Delegate Meeting held at Hastings.

MEMBERS of the National Society of Operative Printers and Assistants who have been transferred to the Typographical Association under agreement are to be permitted, if they so desire, to pay double subscriptions to the T. A. Superannuation Fund, and be credited with two week's probationary period for super-benefit for each of such payments—this to continue long enough to cover their previous N. S. O. P. and A. membership.

Melt, Refine, and Produce Your Own Stereo and Type Metals.
 Cut out your dross and renovating metal losses.
 The only Temperature-controlled Melting Furnaces.

Master Printers at Newcastle.

Important Meeting of North Eastern Alliance Discusses Postal Rates and Municipal Printing.

There was a big rally of master printers at the special general meeting of the North-Eastern Master Printers' Alliance, held at the "Crown" Hotel, Newcastle, on Saturday. The meeting, which was preceded by a luncheon, provided a welcome opportunity for the members to meet the president of the Federation of Master Printers and Allied Trades of the United Kingdom (Mr. James MacLehose, M.A., LL.D., Glasgow) and the Federation secretary (Mr. A. E. Goodwin).

The gathering was presided over by Mr. C. F. Bowes (president of the North-Eastern Master Printers' Alliance), and those present—besides Dr. MacLehose and Mr. Goodwin—included Mr. W. H. Thomas (vice-president of the North-Eastern Master Printers' Alliance); Mr. J. B. Leslie-Smith (president of Newcastle and District Master Printers' Association); Mr. W. Doig (hon. secretary); Mr. A. A. Mann (vice-president); Mr. M. Hennegin (Edinburgh Federation costing staff); Mr. N. H. Patterson (president, Sunderland Master Printers' Association); Mr. W. G. Appleyard (president, Middlesbrough Master Printers' Association); Mr. H. E. Woolston (secretary, Middlesbrough Master Printers' Association); Mr. A. Salter (president, Hartlepool Master Printers' Association); Mr. Sidney Reid (Andrew Reid and Co., Ltd., Newcastle); Mr. A. C. Wilkie and Mr. C. Allan (R. Robinson and Co., Ltd., Newcastle); Mr. J. C. Gibson (Mawson, Swan and Morgan, Ltd., Newcastle); Mr. J. English (secretary, North-Eastern Master Printers' Alliance).

Mr. Bowes, from the chair, extended a hearty welcome to the national president and secretary, and referred in appreciative terms to the services of Dr. MacLehose on behalf of the industry. Referring to Newcastle municipal printing, he said, it was suiting their opponents to say that they were a "ring." "If for one moment I thought our Association was a 'ring,' I would be one of the first to retire from it," declared Mr. Bowes.

The President's Address.

Dr. MacLehose said it had been contended that the urgent requirements during the war (particularly the printing required for food rationing) could only have been met by the Government acquiring several printing works. But even supposing it was necessary to acquire these works as a war measure, that did not justify the Government in continuing to run these businesses now, when peace conditions prevailed. During the months of November and December last, 36 contracts were issued for tender by the Stationery Office. The competition for such contracts was very keen and it was understood that the Government printing works were invited to tender for these contracts on the same terms and conditions as the ordinary trade printers. The Government printing works secured one contract, of an approximate value of £400 per annum, and the remaining £69,000 went to trade printers, because they were cheaper. Again, out of these 36 contracts, nine were retained by the previous contractors, and 27 changed hands. It was, therefore, evident not only that the cost of obtaining printing through the ordinary trade channels was less than in the Government printing works, but that there was no combination against the Government. Had the trade printers combined, they would not have found 27 out of 36 contracts changing hands.

Losses by State Printing.

But a very large volume of work had been given to the State printing works without any tenders having been invited from outside firms, and it was hard to say how much money had been lost to the country by such action. The telephone directories had been satisfactorily produced for many years by a large firm of printers. About two years ago this work was taken away from these contractors. They had no opportunity of quoting a price for the next issue, nor were tenders issued to the printing trade in order to ascertain the price at which any other printer would be willing to produce the directories. More than this, the contractors who had the directories standing in type were not even told that the work was being taken from them and sent to the Government works. The

cost of setting up the type of these directories must have been thousands of pounds, and the value of the standing type was entirely lost. The Post Office Guide was another similar instance of Government extravagance in printing matters.

In order to cope with the large amount of printing that the State printing works had undertaken in the last year or two, it had been necessary to spend a very large sum of money in buying plant and buildings at very high post-war prices. In 1921, an expenditure of £228,000 appeared in the supplementary estimates. Whilst this money had been expended by the Government, an enormous amount of similar plant was lying idle in the works of printers throughout the country. The majority of this plant, in the hands of trade printers, was bought at pre-war prices, and the cost of running this plant was, therefore, considerably less than with the new plant bought at post-war prices. Any advantage that might be derived from this low cost of plant would be obtained by the Government, if they were to invite tenders for the whole of the work that was now being produced in the State printing works. Any facts or figures based on prices or conditions of the printing trade a year or more ago were absolutely incorrect at the present time. He appreciated highly the honour paid to him by the 4,000 employers, in the industry in Great Britain when they elected him as their president last year. But he would not hold the post for one moment if it implied, or could imply, that he was to assist in any ring or combination to force their customers to pay unreasonable prices. He believed in competition, and that our trade could only prosper where there was the free competition which existed just now.

The Federation Costing System.

It had been hinted that the costing system in our industry was run in a secret way, and that it raised prices and mulcted the consumer. All details of the costing system were open to the public. They were printed in published volumes which could be bought by anyone. So much for secrecy. As to the merits of cost-finding, he thought that no sensible business man had a doubt. If a man did not know his costs, he did not know what he ought to charge. And a knowledge of costs enabled a manufacturer to see where he could economise, and so produce goods for the customer at a lower price.

Newcastle Corporation Printing.

They were faced in Newcastle with the possibility of an extension of the Corporation factory for printing. Wide experience had shown that when the ratepayers combined in such ventures, they added to their own taxes, and theirs must be a wonderful factory if it was an exception to this rule. Marvellous figures were always produced, showing on paper wonderful savings. But when these figures were submitted to the careful scrutiny of a chartered accountant, the profit vanished and the loss became glaringly apparent. No Corporation could keep its staff regularly and profitably employed on such work.

The High Postal Rates.

The efforts which the Joint Industrial Council had been making for the reduction of postal charges were evidently bearing fruit. It was easy to show a profit if the Government insisted on the whole community paying profiteering rates for Post Office services. And the danger was that those Post Office profits might be raided to reduce general taxation. Nothing could be more suicidal than to retain unnecessary taxation paid daily in order to reduce the annual demands. And while the Postmaster was hauling in money by high charges with one hand, he was throwing it away with another. He (Dr. MacLehose) had an English catalogue, of which 150,000 copies were posted on the Continent because of our high postal rates. This country had to deliver these catalogues in England, but the Continental countries received the payment. And this was going on every day. One of the reasons why trade was so bad was that the Post Office had been handicapping all industries and increasing unemployment.

But the country now realised that these high rates must come to an end.

Local Figures Criticised.

Mr. A. E. Goodwin, secretary of the Federation, said statements had been made in the local Press with reference to the costing system which indicated that a strange misunderstanding existed. When the Federation began in 1911 to advocate the adoption of scientific cost-finding, it was because a considerable quantity of printing was then being sold at prices well below cost. Obviously this was harmful to the printing industry, and it was also harmful to the whole community. It meant that if one customer bought his printing below cost, either other customers paid considerably above a proper figure, or printers would all have gone bankrupt. Printers were, therefore, urged not to join a ring, not to agree to any fixed standard of prices, but to adopt certain scientific methods of finding out in their own works the cost of every process and of every job, and the fixing of prices was left to the discretion of each printer. He wished this system had been installed in its entirety at the printing works of the Education Committee, because it had been stated, for instance, that the cost of hand composition at the Education Office printing department last October was 3s. 5d. per hour, whereas Newcastle printers were charging the municipality 6s. 3d. per hour.

"Ridiculous."

It was impossible for their costs to be 3s. 5d. and no Newcastle printer would dream of charging 6s. 3d. per hour to the Corporation for composition. Going on to indicate the wages and hours of compositors at the time mentioned, Mr. Goodwin calculated that the bare wages cost equalled 3s. 4d., and the reading, proportion of management, rent, rates, light, heat, interest and depreciation was said to be covered by 1d. per hour. This was ridiculous. That £8,000 could be saved out of £24,000 by the Corporation doing their own printing and stationery could only be accounted for in three ways. Either Newcastle printers were incompetent, or they charged exorbitant charges, or the above statement was incorrect. After careful study of the figures so far available, anyone with a knowledge of the trade would accept the last explanation, that at no time could the Corporation have done for £16,825 work for which printers would have charged £24,967. It had been said that if anyone asked for a price for printing in Newcastle, Manchester, Leeds, etc., there was some arrangement for fixing the price and determining who should do the work. An emphatic denial had been given to this. It should never have been made if it could not be proved. Competition was to-day as keen as ever in the printing trade.

Post Office Surplus.

Mr. N. H. Patterson, president of the Sunderland Master Printers' Association, moved a resolution in the following terms: "That this meeting of employers in the printing and allied trades, from Newcastle, Sunderland, Stockton, Middlesbrough, Hartlepool, Darlington, North Shields, Wallsend, etc., expresses its earnest protest against any attempt to divert the surplus of the Post Office to the general revenue, and strongly urges the Government to reduce the postal charges on printed matter and post cards, so that the serious unemployment in the printing and allied trades might be immediately diminished."

Mr. Charles Allan (Messrs. R. Robinson and Co., Ltd., Newcastle) seconded the resolution, which was carried unanimously and ordered to be sent to the Prime Minister, the Postmaster-General, the Chancellor of the Exchequer and local Members of Parliament.

The members subsequently held a conference in private, at the conclusion of which Dr. MacLehose and Mr. Goodwin were heartily thanked, on the motion of Mr. W. H. Thomas, seconded by Mr. J. B. Leslie Smith, for their attendance and addresses.

THE NICKELOID ELECTROTYPE CO., LTD., of New-street Hill, London, E.C.4, send us an ordinary three-colour half-tone print which has been treated and mounted so as to give it a hand-made paper effect, as if it were the artist's original sketch. The result is, in our opinion, a distinct advance on the ordinary half-tone printing, and should prove to be a help in securing that class of work which some clients require: a little in advance of the ordinary three-colour half-tone which they usually have on chromo paper.

Government Contracts.

Contracts were placed with the following firms during December:—

Stationery Office.

- PRINTING, RULING, BINDING, ETC.

THE HOUSE ORGAN.—Mr. W. H. Harford general manager of the *Daily Herald*, London, addressed the Cardiff Business Club recently on "The House Organ." Mr. Harford described the house organ, or as some would prefer it to be styled the house magazine, as probably the most fascinating phase of modern advertising, salesmanship and publicity. There were many forms of the house organ, but all of them, to whatever public they appealed, were a sort of silent messenger of the man behind them and that perhaps explained why they were so powerful. The speaker said the object of this type of publication was to help the manufacturer to sell his goods or his service to the retailer and in turn to the public; to create good will between employers and employees; and to assist manufacturers to sell their wares direct to the public. Mr. Harford emphasised the importance of the human appeal in the house organ. On the motion of Mr. R. P. Henry, advertising manager of the *South Wales News*, the speaker was cordially thanked. The next lecture is to be given by Sir Herbert Morgan.

PICTURES of some of their printing operations at work have been a feature lately of the *Daily Herald*.

SPECIAL PREPAID ADVERTISEMENTS

The Minimum Charges for Three Lines, with an average of seven words to the line, for Advertisements under the headings given below are as follows (extra lines at proportionate rates):—

	Three Lines
	s. d.
Agencies	3 0
Situations Wanted	1 6

FOR DISPOSAL, £750, City PREMISES: lease 19½ years; ground rent £25; also small stock Wrappings and Twines, Furniture and Fixtures; telephone.—Box 18646.

LUNCO, "THE INEXPENSIVE TYPE-WRITER PAPER." Six colours and White always stocked. Price 1s. 3d. per quarto ream, boxed. Advertising matter free. Trade only supplied.—Please apply for samples to W. Lunnun and Co., Paper Mills Agents, 59, Carter-lane, London, E.C.4. 13863

PORTABLE TYPEWRITER wanted; must be in good condition; state lowest price.—Box 13881.

PRESS CUTTING AGENCIES in principal British Colonies are invited to communicate to Box 13882.

WASTE PAPER: ITS RECOVERY AND RE-MANUFACTURE. By James Strachan. A Fund of Information; price 12s. 6d.—Stonhill and Gillis, Publishers, 58, Shoe Lane, London, E.C.4.

BUCHANAN'S EQUIVALENT WEIGHT CALCULATOR. A Time-saving Pocket Companion for Papermakers and Paper Users. Standard size (12-in. long) in boxwood; £2 2s.—Stonhill and Gillis, Publishers, 58, Shoe-lane, London, E.C.4.

"Book" Post in Australia.

Fantastic Post Office regulations as to what is and what is not a "book" have, as previously mentioned in these columns, caused much annoyance to printers in Australia. The situation has now been clarified somewhat by the Postmaster-General's having issued a list of the publications which should not be regarded as "books." In the excluded list are fashion journals, directories, Acts of Parliament, law reports (but not digests), statistical works, turf and stud registers, cookery books and music books, all of which are classified as printed matter chargeable at 1d. for every 2 ozs. The rate for books is 1d. for every 8 ozs. when printed in Australia, and when printed elsewhere 1d. for every 4 ozs.

 Africa, United States, South America, Canada, etc.

THURSDAY, FEBRUARY 2, 1922.

The Prime Minister and Postal Rates.

THE Prime Minister has intimated, we understand, that he is not prepared to receive the proposed deputation from the printing industry on the subject of postal rates until he has been able to review the whole of the national revenue. This is very unpleasant news for the trade—the more so in that it indicates, we fear, that the Prime Minister fails to grasp just the point that seems so vitally important to printers (and the commercial community generally), namely, that the chief function of the Post Office is to provide cheap and efficient means of communication, and thus contribute to the financial well-being of the country to a degree out of all proportion to what it could do by any economy or profit achieved in respect of the Post Office balance-sheet. Very timely were Dr. MacLehose's words on Saturday at Newcastle—reported on another page—as to the danger of the Post Office attempting to raise profits by enhancing its charges, thus possibly gaining some mitigation of direct taxation at the expense of suicidal indirect taxation on industry. The Prime Minister will surely have something more to say on this subject. Let him insist, if he will, upon the Post Office being self-supporting—though the wisdom of this is open to question; but to sap the very life-blood of commerce by transforming the postal service into a profit-making concern is very obviously to adopt the policy of killing the goose that lays the golden eggs.

Business Men's Growing Concern.

THE increasing resentment of the business community against Post Office policy is indicated by the support that is now being given to those who are urging the need for postal reform. The secretaries of the Joint Industrial Council of the Printing and Allied Trades have received letters from other joint industrial councils and trade associations, strongly supporting them in the views put forward that the existing postal rates should be revised immediately. Many members of Parliament of all shades of opinion, including Sir Harry Brittain, Sir Rowland Blades, Mr. P. J. Hannan, Mr. F. O. Roberts, Captain J. Bertram Watson, Rear-Admiral Sir Reginald Hall, Colonel C. R. Burn, Mr. P. Wilson Raffan, Major-General Sir C. V. F. Townsend, Mr. James Brown, Mr. J. R.

Remer, Mr. R. J. Davies, Mr. J. Wignall, Sir Ernest Wild, Sir James Remnant, Mr. A. Hailwood, and Sir Charles Oman have intimated their readiness to assist in securing an early revision in the interests of industry generally.

Chambers of Commerce Active.

THE Association of British Chambers of Commerce has come to realise very acutely the detrimental effect of high postage upon national prosperity in general. At Lord Southwark's suggestion a special sub-committee has been studying the postage question, and the Association has arranged for to-morrow (Friday) a great conference of members of Chambers of Commerce, commercial, industrial and financial undertakings to consider what concrete proposals can be urged upon the authorities—including the Prime Minister. Among the organisations which have accepted the invitation to attend the conference is the Joint Industrial Council of the Printing and Allied Trades.

Individual Efforts.

IN connection with the efforts of the J.I.C. on the postage question, every industrial firm in the kingdom and every master printer and employer in the allied trades has been urged to write to the Prime Minister and local members asking for the immediate re-establishing of the halfpenny postal rate on printed matter and the reduction of the postcard rate. Such individual effort has a cumulative effect and should not be undervalued. We note Mr. W. H. Burchell, hon. secretary to the London Central District Association of Master Printers, has again during the past week found opportunity to ventilate this urgent subject in the daily Press. Mr. Burchell estimates the loss to labour by the high postal charges at £500,000 per week, with increased unemployment in the printing and allied trades, and the ruin of the picture postcard industry. "What value," he asks, "is it to the Government if one of its departments, by raising postal charges, makes up a deficit of £3,500,000, and causes a year's loss of £26,000,000 to labour? The increased unemployment thus caused has to be met by the payment of the out-of-work dole. Live registers of the employment exchanges contained the names on December 30th, 1921, of 71,590 more unemployed persons than in the previous week. A great number of these unfortunate people belonged to the printing and allied trades, the cause of this great unemployment being the shortage of work caused by the abolition of the halfpenny stamp. Thus cheap postal rates create work."

Printed in Germany.

THIS country has been inundated during the last few days by a seed catalogue of an English firm, which has been printed and posted in Germany. It runs to 72 pages, 6 in. by 8 in., and therefore represents a considerable quantity of paper and a great amount of printing. The general appearance of the catalogue is of the cheap foreign type, but it answers its purpose, no doubt, though we fancy that horticulturists of taste would prefer their seeds offered in more attractive form. The catalogue is produced entirely in Germany, and it comes into English hands with the German stamp and post mark upon it. The objection to the catalogue lies in the fact that it represents so much work lost to British workpeople. No wonder a paper-maker who received the booklet by post wrote and told the salesman "to sell his seeds where he bought his paper," and, as another correspondent remarks: "No wonder British trade is in a bad condition." The catalogue marks a grave tendency. The British printer is even more concerned in this matter than the paper-maker, for probably even more labour is represented by the printing and binding of the catalogue than in the manufacture of the paper.

THE Home Labour Market depends upon patronage of British Industries for the much desired revival. Every imported finished product helps to keep back the revival.

Men and Things.

BRAVO, Burchell! You were always one of the world's first-jump men. You had, I think, as much as anyone to do with the founding of the Printers' Managers and Overseers Association, which has done more than any other body for the extension of technical and business mastery of the craft. I think I may say that you set on foot various other organisations which still continue in full force and serviceableness or which, if now perhaps superseded, did for a long period maintain their usefulness. You are to-day the live-wire, honorary secretary of the Central London Master Printers' Association, and in that character are stirring up the Post Office. It can do with it. More power to your elbow!

o-o-o

My old friend, David Harris, of A. B. Fleming and Co., himself a bit of a Boanerges, had, I believe, a saying about some lives that "went out at a mark like a cannon ball," and other lives that "dribbled as through a sieve." Go on Burchell, at the Post Office mark!

o-o-o

ANOTHER Harris gleaning comes to mind. He assured me that one of their Berlin customers cabled: "Send immediately two dozen dense black had same two years ago." The message arrived:—

"Send immediately two dozing dense blockheads sane two years ago."

o-o-o

DR. MACLAGAN, a scientist, brother of an Archbishop of York, and Mr. A. B. Fleming, a well-known personality in the insurance world of Scotland, started A. B. Fleming's business together, I suppose about sixty years ago. They had a capital of a thousand pounds each. After about a year they had just concluded ruefully that they must close down their disappointing enterprise, when, the same morning's post brought an ink order from *The Times* in London, and from the *Argus* in Melbourne. From the moment of that encouragement they never looked back. The problem before us to-day is how to recover this Melbourne *Argus* sort of business—in other words, our overseas trade.

o-o-o

TRADE decreased in value last year by 1,593 millions to 1,897 millions sterling, a fall of 45.6 per cent. This on the authority of *The Times* Annual Financial Review for 1921.

o-o-o

THE whole world to-day is wanting just exactly the filip which that Melbourne order gave. Consider what it meant. Perhaps the profit on the two orders that day received was £200. But would it not be more correct to say that really, in terms of the new potency, the new efforts which were evoked, the profits on those orders were more like £200,000?

o-o-o

THERE is another hint for us. It relates to cheapened production. We have to reconcile two things to-day—considerably higher wages than those of pre-war, and cheaper production. When in '96 I was talking to David Harris he said to me: "When I joined Fleming's" (in the early seventies) "we were selling ink for 1s. 6d. a lb., which I now sell at 4d., and our profits to-day are as great as our turnover was then." Other times, other prices, of course. 1922 is not 1896. But the main considerations, the main business factors, remain much the same.

o-o-o

My friend Mr. W. Brown, who is responsible for the weekly appearance of that very able paper, the *Hornsey Journal*, is one more of the type of man whom John Milton had in mind when he wrote of those who by their studious lamps were searching, reflecting, revolving all matters of common concern. Mr. Brown plumps boldly for a scheme whereby each man, married or single, should be paid a fair living wage adequate for present support and for provision for the future, and the employer shall also make certain payments to the State wherewith the State shall be enabled to make a grant of so much for each dependent for whom the workman is responsible. And along comes Lansbury writing in *The Times* as to the different ways in which employers pay wages and Guardians pay out relief.

o-o-o

A SLOGAN of advanced men in the labour world has long been: "From each man according to his capacity; to each man according to his need."

WELL, here's to every man who does a bit of hard independent thinking; who adds his contribution to the common stock. "Opinion in good men," said Milton, "is but knowledge in the making."

o-o-o

AND everything is challenged to-day. All kinds of questions are being asked. Nothing is sacred to a sapper. To be sure nothing in the way of accepted usage, nothing at all which ought to be sapped, can be sacred.

o-o-o

An obvious criticism of the Brown scheme is that it seems to involve a lot of inquisitorial work; it looks too grandmotherly. I know that some reply: "Does that matter so long as each man has a say, has a share in the administration; so long as every man is his own grandmother?"

o-o-o

"EVERY man his own grandmother" has a cheery sound to be sure. We'll agree to a moment's chuckle at that, and let the curtain fall for this week.

FRANK COLEBROOK.

Master Printers of Cardiff.

The annual dinner of the Cardiff and District Master Printers and Kindred Trades Association was held at the Royal Hotel, Cardiff, on Monday evening. There was an exceptionally large attendance, and the gathering was one of the most successful of its kind ever held in the district. Among the guests was the Lord Mayor of Cardiff (Mr. F. Harold Turnbull). Mr. E. W. Holder was in the chair, and among those who addressed the gathering were Mr. James MacLehose, M.A., LL.D., president of the Federation, and Mr. R. A. Austen-Leigh, vice-president.

Important London Amalgamation.

An interesting and important announcement is made by Messrs. Harrison and Sons, Ltd., Printers in Ordinary to His Majesty, of 44-47, St. Martin's-lane, W.C.2, and Messrs. Perkins, Bacon and Co., Ltd., of Southwark-bridge-buildings, S.E.1, who inform us that they have made arrangements whereby, while their businesses will be carried on under the same management as before, their resources will be combined, so that all classes of steel plate and other engraving, printing from plate, offset lithography or letterpress, binding, stationery, etc., will be executed by the associated firms in whichever department is most suitable and economical.

Messrs. Perkins, Bacon and Co., are the well-known engravers who in 1840 produced Rowland Hill's original penny postage stamp, and for forty years supplied the British public with "Queen's Heads," while Harrison and Sons, who have been confidential printers to the Government for close upon two hundred years, have since 1911 produced the British stamps by the surface printing process at their modern works at Hayes (Middlesex).

The association of these two firms of British stamp printers (both established over one hundred years ago) is in a way unique, and should present a very strong combination of skill and efficiency in the classes of work in which the associated firms respectively specialise.

An Argus Night.

The Walthamstow Musical Society held a very successful bohemian concert at the "Common Gate," Hotel, Walthamstow, on the 21st ult. The concert, in aid of the funds of the Printers' Pension Corporation and the Caxton Convalescent Home, was of an exceptionally high order, and was supported by a large attendance. The chair was occupied by Mr. H. Woodcock (works manager, Argus Printing Co., Ltd.), by whose untiring efforts a plate of close upon £52 was realised. During the evening a reproduction of a clever cartoon, depicting Mr. Woodcock as a pavement artist raising funds for the Corporation, and executed by Mr. Edward Howe, a linotype operator on the staff of the Argus, was passed round for sale on behalf of the funds, quite a considerable sum being collected by this means.

Personal.

SIR J. J. BADDELEY, Lord Mayor of London—who is a member of the London Master Printers' Association—is the prime mover in the Mansion House Fund for the provision of a wedding gift to Princess Mary.

PRINTERS are accordingly taking a special interest in this fund, and Mr. R. A. Austen-Leigh, on behalf of the L.M.P.A., is writing to all members of the Association to bring the matter to their personal notice and suggesting that they help to make the contributions of London master printers worthy of so interesting an occasion. Donations are limited to £1 and should be sent to Mr. Austen-Leigh at 24, Holborn.

WHEN Lord Burnham presides at the annual banquet of the National Advertising Society on the 13th inst. at the Connaught Rooms, it is expected that the Lord Mayor and Lady Mayoress, Lord Riddell, Sir Frank Newnes, Sir Charles Starmer, and Sir W. E. Berry will be present.

THE American Ambassador has also intimated his intention to attend.

LORD RIDDELL was entertained by the American Luncheon Club in London at the Savoy Hotel on Friday, and in response to invitation gave some impressions of his recent visit to the United States.

He amused the company by a story of an American newspaper correspondent, who said to him one day, "Would you mind tell me are you a blood peer?" "In reply," said Lord Riddell, "I said, 'If you use the term in the same sense as you speak of a pedigree bull, I must confess that I am not,' whereupon the lady said, 'Then, good God, how did you get it?'"

LORD ATHOLSTAN, who has offered a prize of \$100,000 to the first person to discover a medicinal treatment for the effective cure of cancer, was formerly Sir Hugh Graham, well-known as a Canadian newspaper proprietor.

SIR CHARLES F. HIGHAM, M.P., was honoured at a complimentary dinner given to him at the Connaught Rooms on Saturday evening by friends representative of advertising interests.

THE chair was occupied by Sir Eric Geddes, M.P., who referred to the report of the Economy Committee and made an earnest appeal that the report should be "given a chance."

SIR ROBERT HORNE was present and spoke, as did also Viscount Burnham, Mr. H. Gordon Selfridge (who made humorous reference to his advertising negotiations with Lord Burnham) and Mr. T. Wareham Smith.

OTHERS present included Lord Riddell, Sir William E. Berry, Sir Herbert Morgan, Sir Rowland Blades, and Mr. Carl Hentschel (acting hon. secretary).

LORD DOVERDALE, that veteran papermaker, continues to take an active interest in the economical working of the industry, and his name is attached to a patent which has recently been taken out for the recovery of paper pulp from the waste waters of paper-making machines.

MR. RICHARD N. SALTER, business manager of Blades, East and Blades for many years, has been elected a director of the company in the place of Mr. Laurence H. Blades, who has resigned his seat on the Board owing to ill-health.

MR. GEORGE A. ISAACS, general secretary of the National Society of Operative Printers and Assistants, has been adopted as Labour candidate for Gravesend.

MRS. SWANNACK (nee Gladys Robertson), formerly of the editorial staff of the *Newcastle Daily Chronicle*, has been appointed lady editor of the *Yorkshire Post*.

MAJOR FRANK H. BOWATER has been elected a member of the City of London Corporation in the room of the late Mr. E. S. Jacob.

DIVIDENDS AND REPORTS.

LIVERPOOL DAILY POST, MERCURY and ECHO announces final dividend of 6½ per cent., making 12½ per cent., less tax, together with bonus of 5 per cent., free of tax, placing £50,000 to reserve, making it £100,000, carrying forward £70,409, against £50,251 brought in.

BURY PAPERMAKING Co., LTD.—Report states that for half-year ended November 26th there is a loss on the trading account of £13,577, after charging interest and depreciation, £5,131, there is a debit balance for half-year of £18,708. From this amount must be deducted £2,611 brought forward. The sum of £10,000 has been transferred from reserve fund, reducing debit balance to £6,097. Directors recommend dividend of 10 per cent. per annum on the preference shares, leaving debit balance of £6,332 in profit and loss account.

NEW COMPANIES.

ASHLOCK, LTD.—Capital £30,000, in £1 shares; to adopt an agreement with C. A. H. Bullock, and to carry on the business of printers, stationers, etc. Private company. First directors: L. Savory, F. J. Horne, W. E. Stratton, A. Van der Leer, C. A. H. Bullock and A. Grout. Registered office: 11, Ludgate-square, E.C.

DEAN, MELTON AND Co., LTD.—Capital £3,000, in £1 shares; printers, stationers, publishers, advertising contractors and agents, etc. Private company. Subscribers: A. Dean and A. E. Melton.

GRIFFITH AND Co. (PRINTERS), LTD.—Capital £2,500, in 2,400 ordinary shares of £1 each and 2,000 deferred shares of 1s. each; to adopt an agreement with H. P. Bastow, of 45 and 46, Avenue-chambers, Vernon-place, W.C., for the acquisition of the business of a magazine and general printer, stationer, advertisement agent and publisher carried on by him, and to carry on the same and the business of art journalists, etc. Private company. First directors: H. P. Bastow, H. A. Robertshaw and J. A. Seddon, C.H., M.P. Registered office: 45-46, Avenue-chambers, Vernon-place, W.C.1.

G. E. WHITEHOUSE, LTD.—Capital £1,000, in 900 10 per cent. preference shares of £1 each and 2,000 ordinary shares of 1s. each; to acquire the business of issuer and publisher of the monthly magazine called *Impressions*, and of a publisher, bookseller, printer, advertising agent, etc., carried on by G. E. Whitehouse under his own name. Private company. First directors: G. E. Whitehouse and Olive Cruickshank.

ELECTRIC PRINTERS AND DESIGNERS EQUIPMENT, LTD.—Capital £500, in £1 shares; to take over the business of an electrical photo copier, designer and draughtsman, carried on by F. J. Morgan at 30, Wind-street, Swansea, as the "Electrical Blue Printing Co." Private company. First directors: F. J. Morgan, R. N. Perkins and T. A. Goskar. Registered office: 30, Wind-street, Swansea.

ORION PUBLICITY SERVICE, LTD.—Capital £500, in £1 shares; to take over the business of advertising agents and consultants, designers, photographers, printers and publishers, carried on by W. B. Price, A. F. Beard, and A. H. Lodge at Stockport, Cheshire, as the "Orion Publicity Service." Private company. Permanent directors: W. B. Price, A. F. Beard and J. Ridgway. Registered office: Mansion House Chambers, High-street, Stockport.

CHARLES TAYLOR AND Co., LTD.—Capital £3,000 in £1 shares; to adopt an agreement with L. O. Atkins, and to carry on the business of advertisement contractors, paper merchants and agents, manufacturing and general stationers, envelope and paper bag makers, etc. Private company. First directors: L. O. Atkins, G. G. Hill, and A. J. Pawsey. Registered office: 30-32, Fleet-street, E.C.

TRADE AND TRANSIT, LTD.—Capital £2,000 in £1 shares (500 8 per cent. cumulative preference and 1,500 ordinary); to take over from G. J. Ramsey the business of a publisher and printer of a trade journal and advertising contractor carried on at Sheffield, as the "Trade and Transit Publishing Co." Private company. First directors: G. J. Ramsey and W. Osborne. Registered office: 10, Woodhead-road, Sheffield.

MORRIS AND CLARK, LTD.—Capital £1,000 in £1 shares; to take over the business of a bookbinder, machine ruler and account book manufacturer carried on by Morris Krako at Mount-street, Nottingham, as "K. Morris and Son." Private company. Subscribers: Morris Krako and Robert W. Clark.

WALKER LONERAGAN AND Co., LTD.—Capital £1,000 in 500 8 per cent. cumulative preference shares of £1 each and 2,000 ordinary shares of 5s. each; to acquire the business carried on as "Walker Loneragan and Co.," at 2-3, Red Lion-court, Fleet-street, E.C., to carry on the business of artists, designers and engravers, whether for commercial, educational or other purposes, etc. Private company. First directors: A. Walker, C. Loneragan, and Leo Scheff.

ATKINSON AND PARTNERS, LTD.—Capital £6,000 in £1 shares; to take over from S. Atkinson the literary and artistic material accumulated by him or under his control, and to secure his services as managing director and editor-in-chief, and to carry on the business of printers, publishers, art journalists, print sellers, newsvendors, stationers, literary and theatrical agents, engravers, etc. Private company. First directors: S. Atkinson, Mrs. A. Atkinson, J. W. Wanless, and A. G. Linney. Registered office: 48, Russell-square, W.C.1.

NEWPROCE ADVERTISING SYNDICATE, LTD.—Capital £3,000 in 5,000 15 per cent. cumulative participating preference shares of 10s. each and 10,000 shares of 1s. each; manufacturers of cameras, projectors and appliances relating to photography and cinematography, pictures, works of art, posting and advertising of all kinds, wholesale and retail printers, publishers and stationers, etc. Private company. Subscribers: J. F. White and C. Jenkins. Registered office: 5, Henrietta-street, W.C.2.

COMMERCIAL PAPER Co., LTD.—Capital £5,000 in £1 shares; to purchase and to sell by retail or wholesale all sorts of paper bags, boxes, twines, ropes, etc., to act as agents and distributors for same, and to carry on business as printers, publishers, booksellers, paper manufacturers, etc. Private company. Subscribers: D. S. Irvine, W. J. Irvine, and

N. M. Clure. Registered office: Waterloo-street, Londonderry.

N.B.—This is one of the first batch of companies incorporated at the new Registry of Joint Stock Companies just established at Belfast to deal with registrations within the jurisdictions of the Government of Northern Ireland.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

JOHNSON, RIDDLE AND Co., LTD. (printers, etc., London).—Satisfaction to the extent of £500 on December 31st, 1921, of debenture dated October 21st, 1902, securing £30,000.

FLEET-HAMMOND Co., LTD. (printers, London).—Debenture dated January 5th, 1922, to secure £200, charged on the company's undertaking and property, present and future, including uncalled capital. Holder: T. Malcomson, Powerscourt, Redhill, Surrey.

CHARLES MARSDEN AND Sons, LTD.—Satisfaction to the extent of £3,900, on January 1st, 1922, of debentures dated November 26th, 1920, securing £300,000.

MANETTE PRESS, LTD.—Satisfaction to the extent of £1,000 on January 9th, 1922, of debenture dated November 30th, 1920, securing £4,500.

WALTER KING, LTD.—Trust deed dated January 9th, 1922, to secure £10,000 debentures charged on 11, Bolt-court, Fleet-street, E.C., and the company's undertaking and other assets. Trustees: C. A. King, "Lyndale," Second-avenue, Frinton-on-Sea; and W. R. King, Westfield, Ryton-on-Tyne, Durham.

MAGNET PRINTING Co., LTD.—Particulars of £1,600 debentures, authorised December 22nd, 1921; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

SIR ISAAC PITMAN AND Sons, LTD.—Land registry charge on "Thorncliffe," Seven-sisters-road, and 9, Adolphus-road, Stoke Newington, dated January 17th, 1922, to secure £2,300. Holder: P. J. Poels, St. Bartholomew House, 58, West Smithfield, E.C.

BROOMHEAD Bros., LTD. (printers, stationers, etc.).—Deposit on January 4th, 1922, of deeds of shops and property in Packers-row and Middle-pavement, Chesterfield, to secure all moneys due or to become due from company to L.C.W. and P. Bank.

PORTALS, LTD.—Issue on January 16th, 1922, of £4,000 debentures, part of a series already registered.

DRAWING OFFICE SUPPLIES, LTD.—Satisfaction to the extent of £4,000 on December 31st, of debentures dated August 25th, 1921, securing £44,000.

BANKRUPTCIES, etc.

Re OLYMPIC PRESS, LTD.—Under a compulsory winding-up order made last June against this company, which carried on business at 48, Russell-square, W.C., accounts have been lodged showing total liabilities £5,359, of which £3,446 are unsecured; assets valued at £1,949, almost entirely absorbed by the preferential and debenture holders' claims; a deficiency of £3,250 in assets to meet the liabilities; and a total deficiency of £21,355 as regards contributories. Mr. G. D. Pepys, official receiver, reports that the company was formed in June, 1919, with a nominal capital of £40,000, to take over from Mr. Samuel Atkinson the literary and artistic material accumulated by him for the production of a magazine to be called *Sports and Sportsmen*, and to secure his services as managing director and editor-in-chief, and to carry on business as printers and publishers,

The company agreed to acquire all Mr. Atkinson's rights in the literary matter, copyrights, manuscripts, etc., for £5,000, payable in shares of the company which were duly issued to that gentleman and his nominees on July 13th, 1920. A prospectus was issued in May, 1920, and another in July, 1920, in response to which 11,555 shares were issued for cash. The other shares issued were 5,000 under the purchase agreement; 900 as fully paid for services rendered in lieu of cash, and 650 as fully paid on consideration of obtaining cash subscriptions for shares. The first issue of *Sports and Sportsmen* was in Nov., 1920, and it was published each month until April, 1921, but no publication has taken place since then, the directors deciding on April 21st, 1921, owing to want of capital, to postpone publication. A debenture for £1,620, covering the company's undertaking and assets, was issued on April 14th, 1921, as security in respect of loans, interest and rent. At the beginning of May, 1921, the company's printers recovered judgment and furnished the bank balance and other amounts owing to the company, and on May 9th, 1921, Mr. A. R. King Farlow, I.A., 50, Gresham-street, E.C., was appointed by the Court as receiver and manager on behalf of the debenture holder. The sums recovered by the judgment creditors amounted to about £690, including a balance at the bank of about £332. The failure of the company is attributed to depression in trade and to the cutting down of advertising expenditure which should have been a great source of income to the company. Since the date of the winding-up order the debenture proceedings have been stayed as the floating charge secured by the debenture was created within three months of the commencement of the winding up, and was given for a past consideration. Mr. King Farlow, as receiver, collected about £183 in respect of book debts, and after deducting his expenses, legal costs and remuneration, an amount of £47 10s. has been handed over to the official receiver, who remains in charge of the liquidation. In addition to the said £47 10s., the official receiver had realised £180 from book debts, £29 10s. from furniture, and £102 from magazines (unsold and returned copies). The stock of paper is at present in the hands of the printers who claim a lien thereon in respect of the balance of their account.

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIP DISSOLVED.

Alexander Erskine Coutts, Sidney James Hawes and Herbert James Leese Hillary, loose-leaf manufacturers, 199, Upper Thames-street, E.C., so far as concerns Sidney James Hawes.

THE BANKRUPTCY ACT, 1914.

RECEIVING ORDERS.

Herbert Melancthon Ford (trading as H. Ford and Ford), Church-street, Temple, Bristol, stationer, January 23rd.

Horace Stanley Page-Henderson, 22, Pandora-road, West Hampstead, stationer's agent, January 27th. Public examination, April 4th at Bankruptcy-buildings, Carey-street.

The next meeting of the Association of Master Printers of the London Central Districts, on Wednesday, February 8th, will be devoted to a consideration of the important question, "Unemployment in the printing trade," under the presidency of Mr. J. D. McAra, F.C.I.S. Mr. W. H. Burchell will speak on the causes and effects of unemployment and suggested remedies. Mr. J. Crowle Smith, J.P., is to add a word on the subject, and, of course, there will be a full discussion.

Over a hundred players attended a whist drive and dance held at Cardiff on Saturday in connection with the Caxton Bowling Club, the recently formed printers' organisation, when handsome prizes were awarded. These were presented to the winners by Mrs. Robert J. Webber, wife of the president.

Lanston Monotype Corporation, Ltd.

The annual general meeting of the Lanston Monotype Corporation, Ltd., was held on Monday at Cannon-street Hotel, E.C., Lord Askwith, K.C.B., K.C. (vice-chairman), presiding.

The chairman, referring to the various influences which were hindering trade, said the company had been free from industrial disturbance but emphasised the seriousness of the question of the foreign exchanges and the importance of stability therein. They sold their machines to all European countries, and they found that at the present time either the machines could not be taken or, if taken, long credit was asked for, or that payments were deferred, while the demand was less than it otherwise would be if they could be supplied more cheaply. With regard to the question of taxation, this comparatively small company, with a share and debenture capital of £544,000, had had to pay altogether the large sum of £128,000 in excess profits duty. Again, the income-tax was very heavy, as compared with the pre-war income-tax, and the high rate existed when double as much capital was required for the development of business generally. The thanks of the shareholders were due to the managers and the staff both in London and at Horley. The managing director, Mr. H. M. Duncan, who had been indefatigable in his work, had visited the United States, and dealt with the company's contracts, and he was going shortly to Germany and Czecho-Slovakia to look after the condition of their patents and business in those countries.

Dealing with the balance-sheet, his Lordship pointed out that if the buildings or plant had to be replaced at the present moment they would have to pay a very much larger amount than the figure at which those assets stood in the books, and stated that £58,000 had been transferred to reserve account for excess profits duty. The directors had also transferred to general reserve account, being profit invested in the business, a further sum of £50,000. The net profit on trading, after providing for depreciation and other charges, was £43,498, and it was proposed to pay a final dividend of 4 per cent., making with the interim dividend 6 per cent. for the year.

Mr. H. M. Duncan (managing director), replying to questions, said that the works in Berlin were intact, and the company had sustained no real loss except with regard to the profits which were derived from the sale of accessories during the war. What those profits were they were now engaged in computing. The large sum of £268,457 had been written off patents, which were regarded as goodwill. At present they owned 800 patents instead of the 12 originally acquired, and these represented improvements of all kinds.

The report was unanimously adopted.

Health Hints for Printers.

There are now available for circulation a series of leaflets dealing with questions of health, which have been prepared by the Health Committee of the Joint Industrial Council. There are three leaflets addressed respectively to all engaged in the trade, to the employed and to the employer, in which useful hints are given for the maintenance of healthy conditions in workshops. There is also a three-page leaflet, written by Dr. H. A. Ellis, advising precautions against consumption.

A set of these leaflets is being sent to every member of the Federation of Master Printers, and also (by the workers' panel of the J.I.C.) to the Father of the Chapel in printing offices throughout the country.

Under the chairmanship first of Mr. G. A. Isaacs and now of Mr. W. H. Thomas (Middlesbrough), the Health Committee has given a great deal of consideration to these and other questions, and it is hoped that printers generally will co-operate in giving practical effect to the work of the committee, by seeing that attention is directed to these leaflets.

A poster dealing with consumption is also being prepared. The committee makes the suggestion that a copy of the poster should be posted on the wall of every room in every factory.

M. BOISSEVAIN, director and chief editor of the Dutch newspaper *Handelsblad*, died on Tuesday.

Irish Printing Trade Wages.

Irish Provisional Government Helps In Dispute.

As reported recently, the T.A. members in provincial Ireland have been balloting on the question of accepting or rejecting the request of the I.M.P.A. that wages should be reduced 5s. on the pay day in the week ending January 21st, and a further 2s. 6d. on the first pay day in March.

The ballot being against acceptance, notices were suspended for a week to permit of a further conference, and this took place in Dublin on January 17th and 18th. As the minimum demand put forward by Mr. French meant the withdrawal of the employers' claim for a reduction for at least six months, it was not possible to reach settlement, but a suggestion by Mr. Kenny that the wages question should be referred to the Ministry of Labour of the Provisional Government met with the acceptance of the T.A. representatives on condition that the Ministry should act as a conciliation committee rather than a board of arbitration.

On the officials of the Ministry being interviewed, they undertook to act as suggested by the jointly-signed request of the parties affected, and the case was heard last week, the following recommendation being afterwards issued on behalf of the Provisional Government, Ministry of Labour:—

"A dispute between the Irish Master Printers' Association and the Typographical Association having been referred to the Minister of Labour for settlement, a conference was held at the offices of the Ministry on January 24th, 1922, at which representatives of both parties stated their respective points of view to a representative of the Ministry.

"After hearing the arguments on both sides, the following suggestions were made on behalf of the Ministry:—

"(1) That a committee consisting of equal numbers of representatives of employers and workers be appointed to consider forthwith any anomalies in the re-grading scheme adopted by the parties in September, 1919, with a view to the removal of those anomalies. Such committee to issue its decision not later than February 28th, 1922.

"(2) That the wages of the workmen concerned employed by all members of the Irish Master Printers' Association be reduced by 2s. 6d. per week for a period of three months, the first reduction to take effect on the pay day falling within the week ending February 4th, 1922. Where notice of reduction has not yet been served, the customary notice to be given before any reduction takes place.

"(3) That the Joint Labour Council consisting of representatives of the respective associations shall meet within three months for the purpose of devising a scheme for the regulation of wages of the workmen concerned which shall apply after the expiration of the said three months. Should the Council fail to devise such a scheme before the expiration of the said three months, and should any dispute as to wages result, the matter shall be referred again to the Minister of Labour.

"(4) That both parties should recommend to the members of their respective associations that the foregoing terms be accepted."

The willingness of the Ministry to act as mediators, and the alacrity shown in hearing the case and declaring their award, must be accepted as evidence of their desire to maintain harmonious relationship between employers and workers, but the inconclusive character of the recommendations made discounts to a great extent the value to either party of the services they would have rendered by a more definite and stable finding.

Football.

The following matches were played on Saturday and resulted as follows:—

Printers' Football League.

Cornwall Press, 2; Drakes, 0. "Oyez," 4; Britannia, 4.

TOILET ROLLS.—The finest British made paper. Moderate price. Trade only supplied. Please apply for samples to the Makers' Agents—W. LUNNON & Co., 59, Carter Lane, London, E.C.4. 16296

The British Industries Fair.

A Post Office Concession.

The Post Office authorities of this country—though in view of our trade-killing postal rates the printing and allied trades are inclined to regard them as representing "the limit" in bureaucratic obstinacy—are evidently able to take a step in a new direction if they are pushed hard enough. To the Department of Overseas Trade—now busy completing arrangements for the forthcoming British Industries Fair—is due the credit for providing sufficient "push" to persuade the Post Office to introduce a novelty in the way of date stamps used in the post offices for the cancellation of postage stamps. The accompanying illustration shows the first use in this country of a post mark embodying an advertisement. This post mark is now being used on some local London letters, and it is, we understand, being applied to all outgoing overseas mails from the City.

The First British Advertising Postmark.

The Fair, which will be held concurrently in London and Birmingham from February 27th to March 10th, gives promise of success despite the prevailing depression of trade. A million invitations are being sent out to buyers in this country, and 48,000 to overseas buyers, in addition to some 15,000 dispatched at an early date to distant parts of the world. The extensive publicity matter produced to make the Fair known universally has included 80,000 explanatory pamphlets in nine different languages.

The London exhibition will again be at the White City, and the Wood-lane entrance will give immediate access to the section devoted to printing, stationery, publishing and fancy goods.

"Daily Chronicle" Dinner.

The composing-room staff of the *Daily Chronicle* held their annual dinner at the Manchester Hotel, Aldersgate-street, E.C., on Saturday, and it proved as usual a very enjoyable function.

Mr. G. Mascord (mechanical superintendent), Mr. Arthur Richardson (advertisement manager), and Mr. Bateman (editorial) were in happy vein with their after-dinner speeches and anecdotes, as were Messrs. J. Syred (father), J. Lyon and O. K. Macdougall on behalf of the companionship.

Among the guests were Messrs. Culmer (publishing), W. Carling (machine) and A. Chadwell (stereo).

During the evening the following well-known artistes appeared: Mesdames Jessie Wood, Madelin Rose and Elsie Beaumont. Humourists: Messrs. Victor Lodge (musical monologues), Tom Tiddler and Fred Temple. Mr. S. F. Weatherdon (bass) was in fine voice, and the finished artistry of Mr. P. J. Pascall in violin solos was a feature of the programme. Mr. James Richardson presided at the piano.

The excellent catering of Messrs. R. and E. Jones was greatly enjoyed.

The Late Henry P. N. Dixon.

Memorial Tablet at St. Bride.

A brief but impressive ceremony took place in the technical library of St. Bride Foundation Institute on Wednesday, last week, the occasion being the unveiling by Mr. Percy Squire (chairman of the Governing Board) of a tablet in memory of Lieut. Henry P. N. Dixon, late chief assistant in the technical library.

Almost immediately after the outbreak of war Mr. Dixon joined the 24th London Regiment, "Queen's," and soon saw active service in France, where he attained the rank of sergeant. In 1916 he entered a cadet school, gained his commission, and was gazetted to the Northumberland Fusiliers. He was last seen on September 2nd, 1917, going over the top at the head of his platoon. On that day he was wounded, and he died in the hands of the enemy two days later.

Mr. Dixon received his professional training

in the Croydon Public Libraries and was appointed to St. Bride's in 1913. He was a man of exceptional merit and ability, and one whom the profession could ill afford to lose.

The tablet, which was unveiled in the presence of the Governors and the staff of the Institute was the work of Messrs. Swain and Son, Ltd. The proceedings closed with a brief address and prayer by the Rev. A. Taylor, Vicar of St. Bride's.

A Linotype Achievement.

An excellent example of high-class book printing is furnished by Linotype and Machinery Limited, who have issued a limited edition of Goldsmith's fine poem, "The Deserted Village." The production, 9-in. by 12-in., is worthy of the subject, and that it should have been entirely set by the linotype and printed on a Miehle machine is an achievement of great importance in the history of printing. The type face selected for the text is 18-point Bodoni. The other types utilised are different sizes of the same series, and are the exclusive property of Linotype and Machinery Limited. It is nearly the same length of face as that used by Bulmer in printing his 1804 edition, but conforms more to the pure lines and individual characteristics which distinguished the types of the Italian master.

The reprint is intended to demonstrate to printers, publishers and others that printed work of the highest degree of excellence can be produced equally well (and at much less cost) by the linotype composing machine as by the slower method of hand-setting. And in this big claim it must be conceded that Linotype and Machinery Limited are justified.

The booklet is embellished with wood engravings after the Bewick's originals. These productions have been superintended by Mr. Geo. W. Jones, Gough-square, Fleet-street, who has linotyped the work and printed it on a Miehle press.

Mr. James Dellagana.

A Deserving Candidate for a Printers' Pension.

This is a world of ups and downs, and while one man prospers another may meet with reverses and go to the wall—through no fault of his own, but entirely owing to adverse conditions which are beyond his power to combat. Circumstances are our masters in many cases, and this is illustrated by the fact that a well-known member of the allied trades, Mr. James Dellagana, is soliciting the votes of subscribers to the Printers' Pension Corporation at the election in March next. Our London readers will remember that Mr. Dellagana was an electrotypist and stereotypist. He was apprenticed to his father, Mr. B. Dellagana, of Shoe-lane, E.C., and afterwards assisted in the management of the business until his father's death in 1882, when the concern was turned into a limited company and Mr. James Dellagana was appointed general manager, a position he held for nearly ten years. Leaving the Dellagana firm he commenced business in Richmond as a printer and stationer, and carried on there for several years. Taking up his old profession he again in 1900 started in business as an electrotypist and stereotypist, at the Viaduct Foundry, Turnagain-lane, Farringdon-street, E.C., and was successful until the war broke out in 1914. The depression in trade that ensued caused the closing down of the foundry in October, 1917. Since then Mr. Dellagana has fallen on evil days. He has been blind for some years with cataract in both eyes, and has just regained a measure of eyesight after several operations; he is also a great sufferer from chronic rheumatic gout. He has been a life subscriber to the Pension Fund (1890), Almshouse Fund (1890) and Orphan Fund (1890), and has subscribed to most of the Auxiliaries. His recommending subscriber is Mr. C. S. Yeates, 14, Hatton-wall, E.C. We have no doubt that Mr. Dellagana's old friends in the trade will rally to his support in March and give him their votes and interest, as he is a very suitable candidate for the benefits of the Corporation. Proxies will be thankfully received by Mr. Dellagana, and should be sent to him at 62, Henslowe-road, East Dulwich, S.E.22.

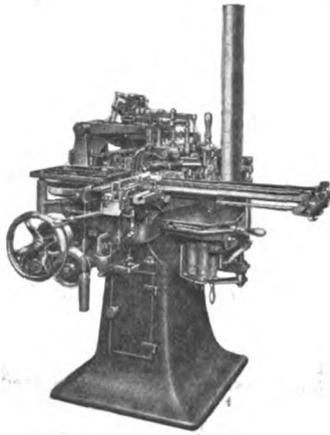

Messrs. Philip and Tacey's Social.

The lofty and commodious Town Hall at Fulham was the scene of an interesting trade function recently, the occasion being a reception by the directors of Philip and Tacey, Ltd., the old-established manufacturing stationers, booksellers and school furnishers, of their London staffs, in celebration of the complete opening of their new premises and works at Fulham. In addition to the managers and employees of Fulham, those of the Imperial Joinery Works, Grape-street Export House and Holborn Showrooms were also present, to the number of approximately 300. A feature was the presence of several former members, some occupying some important positions in the stationery trade. The company partook of a substantial tea, followed by a most enjoyable concert.

The speeches were of excellent quality. The chairman of the company, in welcoming the guests, made reference to the remarkable progress shown by all departments, and the ever-increasing importance of the business. Mr. F. Tacey, managing director, congratulated the staff on the removal of the mass of machinery, paper, etc., from Finsbury without outside help or interruption to business. Mr. W. Tacey expressed appreciation of the enthusiastic reception accorded the directors, and considered they were exceptionally fortunate in having the support of such a loyal and capable personnel, and such fine buildings to house them in. Mr. J. Tacey made reference to the improved facilities afforded by the joining up of the works and distributing houses. Mr. Pizzey, in proposing a vote of thanks to the directors, assured them of a continuance of the whole-hearted support and co-operation of all in their employ.

The Misses Ridpeth and Gray, Messrs. F. E. Tacey, E. G. Slowe, J. Marshall, C. H. Roberts, P. E. Goodchild, R. C. Cary and R. Montgomery were heartily applauded for their contributions to the musical portion of the evening, and the work of the committee and their untiring secretary, Mr. E. Goodchild, was accorded grateful recognition.

Unemployment in Allied Trades.

Increases Indicate State of Industry.

The depression in the British paper trade which marked the close of last year is revealed in the official statistics relating to unemployment. A report on the state of the industry says: Much unemployment and short time was reported, and a number of mills were closed down. Of nearly 7,700 workpeople covered by returns received, 34 per cent. were losing on an average 16 hours in the week ending December 17th.

Out of an estimated number of 59,870 workpeople in papermaking and staining there were, at December 30th, 8,289 unemployment books lodged, of which 5,924 represented males. The total percentage of 13.8 showed an increase of 2.9. The number of short time workers claiming benefit were 5,163, an increase of 201, males being represented by 3,569, an addition of 179. The total of 8.6 marks an increase on the month of 0.3.

According to information received from those employers making returns, 10,396 workpeople engaged in the paper trade received in wages £27,088 in the week ending December 17th, decreases of 7.4 compared with a month before and of 28.3 in the twelve months, the comparison, of course, being affected by reductions in rates of wages.

Manufactured Stationery.

The total estimated number of workpeople in the manufactured stationery trade was 69,190, 47,870 being females and 21,320 males. The number of unemployment books remaining lodged at December 30th stood at 6,207, 4,196 being females and 2,011 males. Total percentage of unemployed stood at 9.0 per cent.—8.8 per cent. females and 9.4 per cent. males. In respect of short time workers claiming unemployment benefit, these numbered 1,537 for the period under review, 1,202 being females and 335 males. Compared with December 2nd last this represents an increase of 226 in males and females combined, an increase of 254 in females, but a decrease of 28 in males. The percentage on systematic short time of the combined workers was 2.2 (2.5 per cent. females and 1.6 per cent. males). Compared with December 2nd these figures show an increase of 0.3 per cent. in the case of the combined workers, a decrease of 0.1 per cent. for males and an increase of 0.5 per cent. females.

Printing.

Of the 218,500 estimated employees in the printing, publishing and bookbinding section 76,940 were females and 141,560 males. A total of 17,182 unemployment books were lodged at December 30th—5,919 females and 11,263 males. The number on systematic short time was 4,294 (3,393 females and 901 males). Compared with December 2nd, the combined figure is larger by 2,082, increases of 2,018 females and 64 males. The percentage on systematic short time at the end of December of the combined workers was 2.0 per cent., 4.4 per cent. as regards females and 0.6 per cent. males. Compared with December 2nd this represents an increase of 1.0 per cent. on the total workers and an increase of 2.6 per cent. females.

British Paper Exporters.

While so much is being said about developing British export trade, it is encouraging to know that some of our great paper houses are pressing forward in that direction, as they have done for so many years. Thus we learn that Messrs. James Spicer and Sons (S.A.), Ltd., have entered the new building which they have had built for themselves in Durban, and which is known as "Forward House." Under the management of Mr. Arthur Herbert, the South African enterprise is working up to the title of the new premises. With a floor area of 18,000 sq. ft. and a very imposing frontage, Forward House will represent, according to the *South African Printer and Stationer*, one of the largest, if not the largest, paper house contained under one roof in South Africa. No expense has been spared in the provision of the most up-to-date facilities for handling paper stock, and, generally speaking, everything that is required for the "Forward Service." Mr. Herbert, and their Cape Town representative, Mr. Walton, directed the removal into the new building last month.

Costing Examination.

The following are the awards gained by the St. Bride Printing School students, who sat for the Stationers' Company and Printing Industry Technical Board's examination in costing at Stationers' Hall on December 19th, 1921.

Mr. W. Howard Hazell, J.P., the well-known authority on costing, was the examiner.

First Class Pass.

Berrey, R.; Bradford, A.; Brett, E.; Bunn, W. C.; Cleverley, Miss E. D.; Cook, A. H.; Denton, E. T.; Emerson, A. R.; Gray, E.; Gray, J. H.; Humm, R. C. (second prize); Jones, B. J.; Kendall, A. H.; Kingston, W. H.; Kirby, E. W.; Medcalf, C. F.; Mills, J. R.; Moore, F. A. E.; Morgan, E. B.; Osborn, S. E.; Payne, Miss A.; Pearson, H. A. (first prize); Pullinger, F. W.; Sheppard, Miss G. Continental Paper Market.

War Prices in France.

There has been little change in the paper industry of France during the past weeks of the year. High prices are maintained for nearly all kinds of paper, and in the case of some special types war prices are current, says *La Papeterie*. Crystal paper, for example, which requires not only special plant but also considerable power, is much in demand and prices are very firm.

Italian competition is taking a great deal of the cigarette paper trade, especially in the East. The increase in consumption of paper is ascribed by some to the larger size of Paris and provincial dailies. The paper trade is in a much better condition than last year.

BELGIUM.

Belgian paper mills are busy, order books are full and prices are firm. Glazed printing paper, quoted at 120 and 125 francs at the beginning of January is now 150 francs. A new import duty recently came into force; 40 per cent. *ad valorem* on all paper.

DENMARK.

The paper mills are making arrangements to obtain supplies of raw materials, stocks of pulp being small. Prices of paper and board tend to fall, though in some cases war prices continue. German competition makes itself felt in all branches of industry.

HUNGARY.

Cost prices of paper have increased to an alarming degree, owing to cost of raw materials and the drought. Scarcity of wagons paralyses a good number of the Austrian, Bohemian and Czecho-Slovakian industries.

CZECHO-SLOVAKIA.

The Zilina cellulose mill (annual production 16,000 metric tons) and Rosengerg mill (16,000) have been amalgamated by an exchange of shares. The managing director is M. Mecas, director of the Zilina mill.

Dermatitis Among Printers.

The United States Public Health Service recently undertook an investigation into conditions in the printing industry, with a view to determining preventive and remedial measures for the dermatitis, which is known to exist to a considerable extent. The inquiry included such matters as the processes causing dermatitis, the medical examination of workers affected, analysis of inks, oils, and soaps, preventive measures, treatment, etc.

This form of dermatitis affects chiefly the arms and hands, and is similar to that found in the case of chimney sweeps, varying in gravity from ulceration to slight erythema.

The examination showed that the ink causes neither dermatitis nor even irritation if the skin is unbroken, but that it retards the healing of any abrasion. The severity of the affection is directly related to the dry or greasy nature of the skin of the worker and to the quantity of linseed oil in the ink used. Brown and green inks have the most retarding effect on the healing of abrasions, black ink the least, while inflammation due to black ink is the most easily cured.

In order to avoid as far as possible the risk of dermatitis the workers should, before beginning work, rub their hands with a mixture of lanoline and olive oil, and, on leaving work, wash them with liquid soap and sawdust.—*International Labour Review.*

New Inventions.

Rotary Offset Presses.

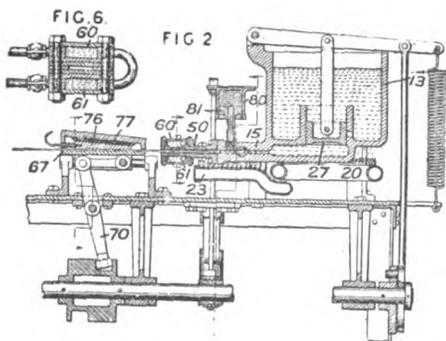

An invention that relates to rotary offset presses has been patented by the Harris Automatic Press Co. It deals with presses of the kind comprising two forme cylinders, two offset cylinders, and a single impression cylinder, all the cylinders being of equal diameter, and adapted for printing a continuous web or sheets either in two colours on one side or for perfecting, the impression cylinder in the latter case acting as a re-transfer cylinder receiving the design from one of the offset cylinders, and consists in the particular operative arrangement of the parts of such presses, as follows:— Mounted on the framework 3 are the forme cylinders 4, 13, the offset cylinders 5, 10, and the impression cylinder 8. In the

arrangement shown for printing sheets, upper and lower feed-tables 31, 34 are provided, and grippers 37, 38 are carried by the impression cylinder 8, and lower offset cylinder 10, respectively. For perfecting, the sheets are fed from the pile 32 on the upper table 31 along the feed-board 33 between the cylinders 5, 8, whilst for printing in two colours on one side, the sheets are fed from the lower pile 35 along the feed-board 36 and thence round the cylinder 10 and between the cylinders 5, 8. In both methods of working, the sheets are delivered by the chain delivery mechanism 39 provided with grippers 40. As arranged for printing a continuous web, the latter is led direct between the cylinders, 5, 8 for perfecting, and round the cylinder 8 for printing in two colours on one side.

Casting Printers' Leads.

In machines for casting a continuous metal bar for use in making printers' leads, slugs, and rules, as patented by Mr. B. Elrod, molten metal is injected into one end of an open-ended stationary die in which it is cooled, and a solid bar is intermittently

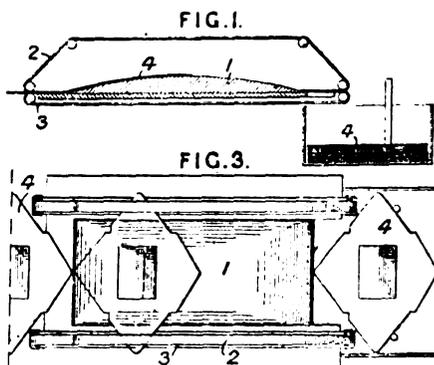

drawn from the other end of the die, the molten metal being subjected only to sufficient pressure to cause it to follow through the die-channel. Molten metal contained in a melting-pot 13, Fig. 2, is injected into a die 50 by a reciprocating pump 27, the pot, its spout 15, and the adjacent end of the die

being heated by gas-burners 20, 23. The die consists of upper and lower plates separated by liners so as to form a rectangular channel, and is cooled at the end remote from the melting-pot by water-chambers 60, 61, Fig. 6. The cast bar is intermittently drawn from the die by a reciprocating clutch device comprising a sliding casing 67 which is actuated by a lever 70 and contains a spring-pressed wedge 76, the upper surface of which travels on anti-friction rollers 77. The drawing of the bar from the die is facilitated by the introduction of lubricant into the spout 15 from a container 80 which is internally threaded and turns upon a threaded plunger 81, the container being intermittently rotated by ratchet mechanism.

Drying Envelopes.

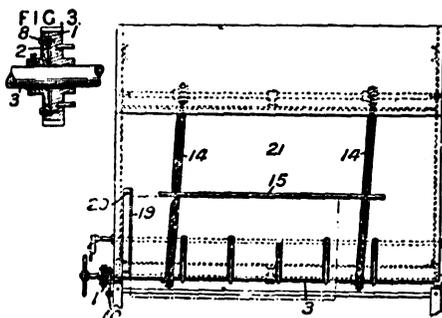

An invention by the Soc. Gaut Blancan, et Cie. relates to apparatus for drying varnished envelopes for use in combination with the varnishing-machine comprises a

metal surface 1 heated by electric or other means, over & in contact with which the envelope blanks 4 are carried by the conveyer belts 2, 3.

Feeding Sheets.

In an invention by Mr. G. W. Swift sheets of cardboard, tin, etc., are fed to box-making and like machines, for example, of the kind described in Specification 165,949 by a pusher 15 attached to sprocket chains 14 moving in grooves in a table 21, the chains moving in a direction inclined to the longitudinal sides of the table so as to register the sheets laterally against a side guide 19 adjustably held by set-screws 20 to the table 21. The sheets are registered

longitudinally so as to advance at the correct time to the box-making machine by adjusting the driving-pinion 1 of the front sprocket shaft 3. To adjust the pinion 1 it is held in a fixed position by a catch 10, and it is disconnected from a disc 2, Fig. 3, which is mounted on the shaft 3. This shaft is then adjusted to the desired position, and screws 8 are then used to fix the pinion 1 to the disc 2.

Paper Knowledge for the Paper Consumer.

Useful Hints for the Practical Printer and Stationer.

A thorough knowledge of paper is one of the most desirable assets to anyone who intends to make a successful career in the printing world. To the manager, paper knowledge is a first necessity; he must needs be a keen buyer and expert judge of the value of paper and its capacity for certain purposes. Further, he should be well experienced in paper defects and able to suggest probable remedies. To keep level, or possibly ahead of his paper staff and papermakers' callers, he requires to be fairly conversant with modern methods of papermaking.

The stationer, also, should know much more about paper than he usually does. The average assistant knows a certain number of watermarks and brands, is often well up in quantities, sizes and customs, but beyond that and judging weights (not too often accurately) he knows very little. To be thoroughly efficient the stationer or warehouseman should know something beyond the mere curriculum of the shop. There is the great variety of classes of paper which he only on rare occasions handles; these he ought to acquaint himself with. Then there is papermaking, testing, history, and many other branches of paper study which must be tackled if a man wishes to aim high in his business. The assistant who becomes embedded in the dull, monotonous routine of the shop will rarely achieve success and will never prepare himself fit and ready to take at a moment's notice the next higher position.

Printers' Lack of Paper Knowledge.

The compositor usually knows next to nothing about paper; therefore much of the typographic skill he expends on display work loses value because the relationship between typeface, ink and paper has not entered into consideration. The true embodiment of character in typography depends very largely upon the compositor's knowledge of the various factors constituting the whole.

The machineman, whether letterpress or lithographic, slowly gathers some experience of paper, principally concerning surface texture, ink absorbency and so forth. The modern printer cannot hope to rise above the crowd by waiting for experience to come round. If he proceeds in this manner, by the time he has learned a lot about paper, he has become old and the opportunities have passed away. There is only one way for the practical printer to get to know paper, and that is to force knowledge and experience.

The methods to adopt in the study of paper must necessarily differ according to the circumstances and requirements of the student. Naturally, the manager and stationer require a more extensive knowledge than the compositor or pressman, and they are undoubtedly much more favourably placed for obtaining it.

Comps. and machinemen are limited, but on their side they have a much better opportunity of studying certain aspects of paper, e.g., relationship between typeface, ink, and paper, the troubles, defects and remedies of paper, etc. Other phases of paper study which do not come their way in shop routine may be easily followed at home if the forthcoming suggestions are accepted.

Features of Paper Study.

Perhaps our subject may be classed and rendered more intelligible by arranging a summary of the chief features of paper study as it should be approached by the various classes of students.

The stationer should set himself to study the following aspects of paper:—

Sizes, weights, qualities, classification, grades, texture, finish, sizing, coating, suitability for various purposes, papermakers and agents and their qualifications. Following this, he will need to acquaint himself fairly well with the class and character of raw materials, as wood pulp, grass, rags, etc., etc., the routine of manufacture, testing of finished product, detection of injurious residue, remedies for usual troubles, etc. This tabulation by no means exhausts the list; for when the stationer has become intimate with his subject, he finds it so entrancing that he feels impelled to wade deeper. Thus, it is frequently to the stationer's interest to make himself familiar with elementary chemistry. In fact, a knowledge of this subject is essential to a sound understanding of paper and papermaking.

Again, the historical side of papermaking is so closely allied to printing that the acquaintance with one improves the knowledge of the other, and endless delight is afforded by the combined study. Another branch of paper study which may be successfully and profitably handled when the stationer becomes sufficiently expert is micrography. With the microscope the structural beauty and characteristic markings of the various fibres may be thoroughly examined and the nature of the manufacturing treatment gauged quite accurately.

The ideal printer's manager necessarily combines the foregoing studies with the allied subjects of engraving, printing processes, new methods, and modern and old style typographic reproduction. To make successful application of his paper knowledge, he should know the special requirements of the manifold varieties of printing production.

What the Practical Printer Should Know.

These subjects will be more fully ventilated anon. Meantime, we must consider paper study as it should be undertaken by

the practical printer. Considering first the compositor, the most useful knowledge he can gain on the subject concerns:—

Sizes and subdivisions of paper.

The effect of tone upon type-face.

The relationship between texture and type.

The effect of soft sizing and absorbency.

The embodiment of character in paper.

The machineman's most useful line of specialisation would be:—

Sizes and weights of paper.

Acquaintance with the properties and character of the various classes of paper.

Purposes of the various classes.

Capacity of paper for ink, allied to which are the problems of texture, absorbency,

class of sizing, nature of surface, mode of drying, etc.

Right and wrong side of paper.

Machine and cross directions.

Paper defects, troubles and remedies, maturing, etc.

The machineman should really possess an intimate knowledge of paper and should be fully acquainted with the similarities, differences, peculiarities, defects and characteristics of chromos, arts, S.C.'s and imitation arts, etc. It is very essential to a perfect training that a machineman should be conversant with the theory of papermaking.

As a general rule, the lithographer is a much better judge of paper than the letterpress man. Lithography demands much more care in paper selection than does letterpress printing, for there are always present the dangers of expansion or shrinkage, crease marks due to immature paper, colour reaction between ink and paper, damaged jobs due to injurious paper residues and many other forms of annoyance. Hence it becomes imperative that the lithographer should examine the paper for every job before printing, and the more he knows about paper the better equipped will he be to cope with the various difficulties as they arise.

In addition to the features of paper summarised for machinemen, the lithographer will, therefore, require to devote some time to the study of colour reactions between the ordinary and extraordinary constituents of paper and ink, the cause and effect of chemical residues, influence brought to bear on paper by the use of ink dopes, varnishes or dryers, and the requirements created in the ink by the type of paper surface and finish.

At first glance, the foregoing lists may seem to comprise a too formidable proposition, but experience has proved that they offer no insuperable difficulty. The most troublesome item is probably where to begin. It is little use expecting to become properly acquainted with paper by simply reading isolated articles on the subject in trade magazines. These

J&M

WE have much pleasure in announcing that the recent re-adjustment of wages in the engineering industry has enabled us considerably to reduce our manufacturing costs. We have therefore arranged to give our customers the full and immediate benefit of these lower rates by making

SUBSTANTIAL REDUCTIONS IN PRICES

of the Composing, Letterpress, Lithographic, and Stereotyping Machinery manufactured by us at our Works at Altrincham, Cheshire. These reduced prices affect the following :

LINOTYPE COMPOSING MACHINE	J&M TRANSFER PRESS
MIEHLE TWO-REVOLUTION PRESS	J&M GRAINING MACHINE
CENTURETTE TWO-REVOLUTION PRESS	JUNIOR AUTOPLATE
J&M DIRECT LITHO ROTARY	AUTOSHAVER
J&M SINGLE-COLOUR OFFSET LITHO ROTARY	J&M MATRIX MANGLE
J&M TWO-COLOUR OFFSET LITHO ROTARY	J&M MATRIX DRYER
	J&M AUTOMATIC METAL FURNACE

These new reduced prices are now effective, and we ask our friends in the printing trade to take full advantage of the position by placing orders for our machines whilst the prices continue in their favour. Meanwhile we shall be pleased to send revised estimates for outstanding quotations, or to send prices to anyone interested on receipt of details of requirements.

LINOTYPE AND MACHINERY LIMITED.

Code used: ABC 5TH EDITION.

are, no doubt, extremely useful, but they would be of infinitely more value to the printer if he knew his subject well enough to extract the full nutriment from the contributions. The study of paper can only be efficiently conducted under a pre-arranged system

The First Essential.

The first essential for all grades of students is a thorough grasp of sizes and subdivisions, the latter being an obviously easy proposition once the former are memorised. Combined with this study will be the mastering of sheets to quire, ream, etc. For this and other purposes purchase Mortimer's pocket book containing particulars of sizes and a host of invaluable tables. Seize every available moment, at home, in the car, dinner-hour, or any other time to thoroughly master the exact dimensions of the most used sizes, sheets to quire or any given number of quire, composition of reams, etc. Such sizes as emperor, atlas, antiquarian, pott and many others are too rarely used to be worth anything more than a bare idea of the dimensions, whilst double and quad sizes need not be laboriously memorised, as they are simple multiples of the standard size.

Having become competent in this branch of paper knowledge, the next procedure is to study the terms and more important customs. The stationer naturally becomes familiar with the meanings of laid, wove, azure, yellow, cream, toned, antique, rolled, M.F., S.C., etc.; but many apprentice printers are accorded no opportunities to gather any such information during working hours. The printer's plan must be, therefore, to obtain specimen books of various papers, as writings, printings, book papers, cover paper, tinteds, specialities, and so forth. Unused sets may, perhaps, be procured from a favourably disposed manager, warehouseman or clerk; failing which application might be made to some of our papermakers and agents, who are in most cases very obliging people. From these printed specimens, combined with the help of Mortimer's book, a wealth of information will be gleaned. Handle the sheets and hazard guesses at the terms and weights, stipulating, of course, a certain size. At the same time, make an attempt at the price per lb., and compare with the price list. The samples must be examined for appearance on the flat and in the look-through, rattled, torn both ways, crumpled between thumb and forefinger, tested with ink, wetted, and, in fact subjected to any little device the student may think of for eliciting information on quality and character.

If certain of the papers are of a peculiar grade or character their especial purpose should be noted or investigated. Many terms and descriptions will crop up which are not at the moment understood; but persistent inquiry and reference to certain books (including Mortimer), which will later be named, is bound to lead to success. After some weeks of patient exercise, a wonderful improvement will take place in the student's knowledge of paper and he may then be deemed competent to proceed a step further in the search for information.

(To be Continued.)

Australia and British Paper.

The preference which Australia is giving to British paper under the new tariff received the attention of Mr. H. H. Stevens, Minister of Trade and Commerce in the Canadian Cabinet, who at a banquet in Vancouver said one of the branches of his department was concerned with the making of trade agreements with the sister Dominions within the Empire. Proceeding, he said the completion of reciprocal trade agreements between the various sections of the Empire is not such a simple matter as might appear. At present we find probably the greatest industry that British Columbia possesses, the pulp and paper industry, threatened by a new tariff barrier recently raised by Australia. We have been endeavouring to arrange a reciprocal trade agreement between this country and Australia for years, but without success. This year the Federal House in Australia has raised a preferential tariff on paper in favour of the Old Country, leaving Canada on the general list. Owing to the long haul and the fact that Great Britain buys a large percentage of her paper cheaply in the Norwegian market, we cannot compete, and Australia will in future draw most of her pulp and paper from Norway.

Process Engravers' New Secretary.

Mr. A. E. Dent.

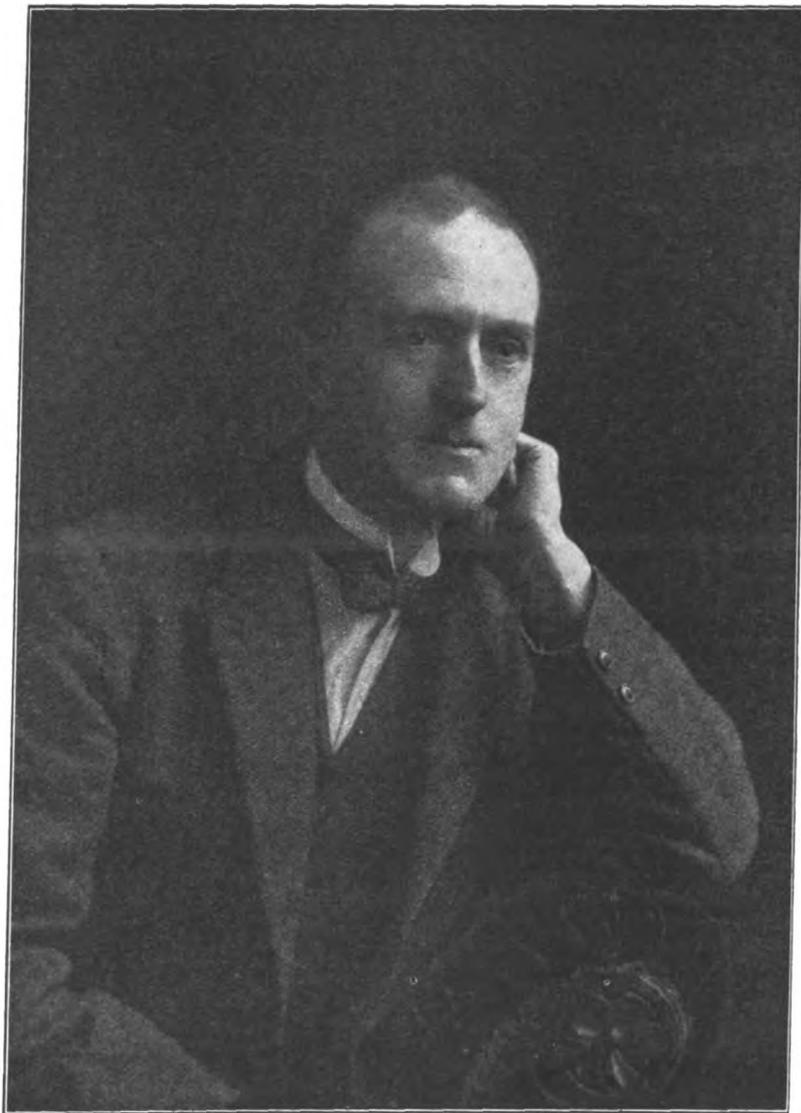

As previously mentioned in our pages, the Federation of Master Process Engravers recently elected as their secretary Mr. A. E. Dent, who is now established at 329, High Holborn, where the Federation has for the first time offices of its own devoted exclusively to the work of the process trade. When in business some years ago as a process engraver, Mr. Dent was well known to many readers of the *British and Colonial Printer and Stationer*, and we are glad to be able, by the courtesy of the Master Process Engravers' Federation, to reproduce herewith a portrait of Mr. Dent, together with some particulars of his career.

That he brings to his work a thorough knowledge of the process trade and all that

the process department of the *Illustrated London News*, where he came under the encouraging influence of Mr. T. W. Lascelles and made such progress that he soon felt the time was ripe for a venture he had long cherished, namely, commencing business on his own account. Consequently as a very young man he commenced in a modest way near Clapham-common, where he laid the foundations of the business which in 1905 he turned into a limited liability company and removed to the Broadway, Ludgate-hill.

The next thirteen years were spent in extending and consolidating that business which like so many others, was greatly interfered with by the declaration of war some nine years later, but during that period the work of A. E. Dent and Co. became well known for quality and finish, so that his house came to be considered as one that could be relied upon for work that was good in every way.

However, he did not completely restrict

Mr. A. E. DENT.

The newly-appointed Secretary of the Federation of Master Process Engravers.

appertains to it, may be taken for granted, as Mr. Dent has spent the whole of his business life in connection with the craft.

When he left the Westminster School at the age of 14, he went straight to the studios of Fritz Seifert, where he spent some six years learning the art of designing and engraving on type metal and steel. He, however, did not let slip the opportunity of further instruction for he spent his evenings at the Polytechnic in Regent-street. Here he came in contact with Howard Farmer and Charles Gamble, and, under their guidance, he studied photography and process work with so much success that he gained first-class honours in the City and Guilds examinations and was the proud recipient of two silver medals, one from the Institute, and one from the Polytechnic, and he further gained the first prize in these subjects, awarded by the Curriers Company. He, in after life, became one of the examiners for the City and Guilds examinations at the Regent-street and Chiswick Polytechnics.

Feeling himself sufficiently versed in process work to enable him to produce it creditably, he sought and obtained a situation in

himself to process work, for he continued his studies in photography and has for 20 years been a member of the Royal Photographic Society; and for several years he has served upon the sub-advisory committee at Bolt-court.

In 1918 an offer was made to him for the purchase of his plant by an eminent London firm of electrotypers who wished to add process work to their existing business, and eventually he decided to accept the offer and to give his next three years to launching and consolidating the new venture.

Consequently, about the middle of last year, he was free to visit America and in the late summer he sailed for the U.S.A. and Canada and spent between two and three months visiting some of the more famous process plants in that country, and in converse with the leaders of thought in process work in the U.S.A.

Master process engravers are confident Mr. Dent is quite exceptionally qualified to render the services they require, and they have every hope that their choice will prove an exceedingly wise one.

Trade Topics.

THE comparatively high piece rates for compositors, and the many anomalous conditions that rule in the trade, are no doubt contributory causes tending to prevent extensive orders for printing work being placed. The daily Press and also weekly newspapers appeal for amendment of existing rules which are a check to progress.

o—o—o

THE compositor should be paid a fair wage and should be prepared to give a fair day's work in return. That will be mutually recognised. It is when the piece hand exercises his privilege of charging for certain matter—or the equivalent space occupied—the use of which he has no knowledge of until he sees the printed sheet, that envy and discontent is aroused among 'stab hands.

o—o—o

THE writer knows of one office where a tabular statement is a weekly feature, and this always means nearly one pound a week extra to the piece hand to which the table falls due. Such a huge disparity suggests an unfairness in calculating "equivalents."

o—o—o

It has already been brought to the notice of the London Society of Compositors that the piece-work scale, from the employers' point of view, does not work satisfactorily, and it is time steps were introduced for a give-and-take policy instead of the "take all" system now prevalent.

o—o—o

It is not in the least surprising to know that many firms favour "stab" against "piece," as in an office with five or six men an extra man could be engaged without any further outlay, and thus more than cover any lack of efficiency owing to want of incentive.

o—o—o

MEN, however, have a strong objection to going back on "stab," and in consequence we know of instances where a fortnight's notice has followed. In one or more cases, to prevent a change-over, we believe modifications in the scale have been made.

o—o—o

ONE can quite understand the reversion from piece to 'stab is distasteful to the men. We are afraid that many an old comp who has lost swiftness and dexterity, or even the dirty comp, would eventually be weeded out, as the discriminating employer, whose business necessitates the utmost economy in all directions, would retain only those hands whose efficiency could not be disputed.

o—o—o

THE Three Shires Newspaper Society, at their recent quarterly meeting, passed a resolution that the Newspaper Society urge the Typographical Society for a reduction of 15s. per week, in six instalments of 2s. 6d. per month, in view of the high rate of wages still prevailing in the printing trade.

o—o—o

THE "Fatal Cost of Printing" is referred to by an editor of a scientific journal in a letter to *The Times*. The journal was suspended about a year ago on account of the expense of production, and information was wanted as to whether any amelioration of prices was likely, as otherwise the question of having the printing done abroad would have to be considered.

o—o—o

THE printers who were approached, in reply expressed regret that there does not seem any chance of an early decrease. They wrote: "The wages for male compositors, machine men, and stereotypers were pre-war 37s.; now they are 88s.; for girl compositors 21s., now 61s. 3d.; for warehouse girls 14s., now 40s. We have reduced our staff by half, and the rest are only working alternate weeks. Those on the off week receive the Government out-of-work dole, which helps them to make ends meet and prevents their agreeing to receive a lower wage."

o—o—o

ANOTHER obstacle that is sapping the life blood of the printing industry is the retention of high postage. It is to be hoped that the representative conference convened by the British Chambers of Commerce, and held on Friday last, will have good effect. A return to pre-war rates by three instalments by the end of the year was recommended. The immediate restoration of the Sunday collection of letters was also urged.

THE following associations have taken an active part in the agitation for cheaper postage, and were represented at Friday's conference:—

Federation of Master Printers
 Printing and Kindred Trades Federation
 Newspaper Proprietors' Association
 Association of British Manufacturers of Machinery for the Printing and Allied Trades
 Weekly Newspaper and Periodical Proprietors' Associations
 British Association of Trade and Technical Journals
 National Association of Wholesale Stationers and Paper Merchants
 Association of Christmas Card Publishers
 Machinery Users' Association
 Association of British Advertising Agents
 Incorporated Society of British Advertisers.

o—o—o

It was generally agreed by the conference that any anticipated surplus on the Post Office budget, instead of being appropriated by the Treasury, must be wholly devoted to the reduction of the existing postal rates. The various speakers emphasised the fact that without cheap postage industry is and must be crippled, trade destroyed, progress retarded, and unemployment increased, and it is their firm intention that there shall be a radical change.

o—o—o

MR. G. DELGADO, managing director of G. Delgado, Ltd., printers and publishers, raises objection to the new postmark which we illustrated last week, on the ground that it is an example of Government waste of effort, although in this case responsibility probably lies more at the door of the Board of Trade than the Post Office. He writes:—"I enclose the envelope of a letter I received this morning, which you will see is stamped, 'Visit the British Industries Fair, 1922, February 27th to March 10th.' This seems a very useless way of Post Office advertising, because the fair cannot be visited by the public, as it is confined solely to traders, and they have to receive an invitation from the Board of Trade before they can gain admittance. It is a pity the officials do not realise these details before wasting efforts in the wrong direction."

ARGUS.

St. Bride Musical Evening.

Another of the meetings which reflect the spirit within St. Bride Printing School took place on Friday evening last, February 3rd, when the students were responsible for "A Musical Entertainment." The whole of the proceeds, which are estimated at about £20, are to be given to the Students' Pension Fund. As usual at these functions, a large gathering was kept intensely interested in the excellent programme provided by the students and their friends. Such gatherings as these not only serve to bring out the talent with which the students of this institute seem more than usually gifted, but also shows in a marked degree the fine spirit of comradeship which is a helpful incentive to education and the development of character.

It would be invidious to refer to any particular item of an excellent programme which was under the direction of Mr. L. G. Askham, one of the students, but Mrs. K. D. Curry with her whistling solos, Mr. Rowland Cowper the ventriloquist, Mr. L. Barnes and his tubular bells and Mr. G. Culliford, conjuror, always call for enthusiastic responses. Mr. H. N. Croxall filled the role of pianist in his usual brilliant manner.

During the evening the Principal reported that over £450 had been contributed or collected by the students and their friends. He also mentioned that there were still a few copies of St. Bride Students' Cake available for those who made a contribution of not less than 10s. to the Fund.

WORKERS' SOCIAL GATHERING.—A pleasant and enjoyable evening was spent in the "Hambro Arms" assembly rooms at Hayes, Middlesex, recently, when the members of the various unions employed at Messrs. Harrison and Sons, Hayes, who had joined forces for the purpose, sat down to a good supper and enjoyed a social evening together. There were 80 members present, and an entertaining programme was gone through, many of the items earning well merited applause. The officials of the various unions are to be congratulated on the success of the evening.

AUTHORS' AND PRINTERS' DICTIONARY, by F. Howard Collins. London, etc.: Humphrey Milford, Oxford University Press. Foolscap octavo; pp. 408 + xi. Price, 3s. 6d. net.

We rejoice to have occasion to announce a new and revised edition—the fifth (sixth impression)—of this little volume which is rightly regarded by innumerable printers, compositors and printers' readers as their sheet-anchor in the stormy seas of "style." Mr. F. Howard Collins—to whose initiative and ability this dictionary owed its origin—died in 1910, during the period of the book's third edition. The fourth edition, slightly revised, came out in 1912 under the supervision of the late Mr. Horace Hart, Controller of the University Press, Oxford. This latest edition—though the volume remains substantially the same as before—has been still further corrected and improved by the publishers, and its already strong position as one of the principal authorities for the printing trade should thus be reinforced. Mr. Collins's interesting preface, printed in early editions, is omitted, but a useful substitute finds room in this edition, namely, an article entitled "Author and Printer" (reprinted from the *Athenæum*) by Mr. R. W. Chapman, secretary to the Delegates of the Oxford University Press. To authors who are ignorant of the technicalities of printing this article gives very sound advice as to the desirability that "copy" should be as nearly perfect as possible before it is handed to the compositor, and it gives him also a little insight into the implications of author's alterations, laying proper emphasis upon the trouble and expense too often inflicted upon printer and publisher by an author's "irritating afterthoughts and infirm vacillations."

"PROOFREADING IN THE FIFTEENTH CENTURY," by Douglas C. McMurtrie, and published through the Condé Nast Press, Connecticut.

The author of this interesting little booklet has, by a close study of the subject, contrived to give to his readers information concerning the work of the proofreader at the period of the incunabula, an era that marked the cradle days of the art of printing. In those far-off fifteenth century days, Mr. McMurtrie says, printers seldom had a corrector as a member of their staffs. The printers themselves were generally highly educated men and revised their own proofs. "Many of the problems of the modern proofreader were never encountered. Punctuation marks were few in number and used according to no consistent style. There were no rules for the division of words, the early printers breaking for a new line at almost any point that suited their convenience. There was usually only one size of type, and as the office generally possessed a single alphabet only, there were no wrong fount letters to watch for. There were no italics or small capitals to match any roman or gothic fount, and thus no uniformity to observe in their use. Capitalisation followed no fixed usage, even proper names being set with lower case initials in the great majority of instances. The one feature that makes fifteenth century composition look complicated to us is the extensive use of the Latin contractions. But these were well known to the scholars of the time."

An account is given in the booklet of some of the men who constituted this early coterie of proof correctors, and considering the qualifications of some of them a surprising number of errors occurred. An interesting one mentioned by Mr. McMurtrie occurred in a volume issued by the Soleil d'Or, in its second location in the Rue de Sorbonne, operating under the leadership of Jean Higman. The colophon at the end of the first part of a volume of verse by Domenico Mancini gives the date of printing as M.CCC.LXXXIII, or 1384, whereas the real date of issue was 1484, one C being omitted.

"CANADA TO-DAY" has reached its sixth issue with the 1921-22 number. It sets out in attractive form the wonderful possibilities of the Dominion. Features and conditions in the nine Provinces of Canada are described in detail in special articles, while much interesting and useful financial and commercial information is given in a further section. The 128 pages are fascinating apart from their utility.

Shall Postage be Cheapened?

Renewed Demand for Reduction.

The week has brought forth most convincing testimony as to the united demand of the industrial community that postal charges must, in the interests of British trade, be reduced at the earliest possible moment.

In June last Mr. Kellaway affirmed "any reductions in costs which are effected must go to reduce the charges. I got the Cabinet to agree that any gain which is effected will go, not to the Exchequer, but to the reduction of postal charges." Now this gain has been effected. Savings and cuts in Post Office expenditure have made it possible to anticipate a surplus of from £8,000,000 to £10,000,000 on the year 1922-23. However, it is stated on good authority that the Chancellor of the Exchequer (Sir Robert Horne) is urging that the Post Office surplus should be devoted to the remission of national taxation. This proposal would mean the use of the postal services as a means of indirect taxation, and is being strongly protested against.

On Friday there was held in London a large and representative conference of commercial, industrial, and financial organisations, which put forth very emphatic demands for cheaper postal facilities. The numerous organisations represented, of course, all sections of the printing and paper trades. Mr. J. MacLehose, M.A., LL.D., president of the Federation of Master Printers, was among the speakers, and laid special stress upon the need for opposing the suggestion that any surplus revenue from Post Office operations be appropriated by the Government. This influential conference passed a strong resolution calling for substantial reduction of postal rates and restoration of facilities at the earliest possible moment, suggestions being made for a reduction of half of the last additions to the charges by the end of June, and more or less a return to the pre-war charges on December 31st. It was resolved that the resolution be sent to the Premier, the Chancellor of the Exchequer, and the Postmaster-General, with the request that the Premier should receive a deputation on the subject.

The Federation of British Industries has addressed to the Postmaster-General a long letter, in which occurs the following forceful passage: "The Federation would urge that particular attention should be given to a prompt reduction of the postcard and printed paper rates, which not only most seriously affect the printing industry as producers, but also affect every other industry as consumers. In making this request, the Federation desire to support most emphatically the representations which have already been addressed to you on this subject on behalf of the printing trade. If, as they understand, the inland printed paper rate is not at present remunerative on account of the elaborate sorting which it entails, they consider that serious attention should be devoted without delay to the simplification of the regulations governing the postage of printed matter, in order that the expense of sorting may be reduced."

The National Alliance of Employers and Employed has sent to the Prime Minister, the Chancellor of the Exchequer and the Postmaster-General, copies of a resolution protesting against the continuance of the present rates and methods of the Post Office.

The Horticultural Trades Association has, on the motion of Colonel Fletcher, passed a resolution pointing out the damaging effects of high postal rates on the garden-seed trade, and voicing gardeners' demands for an immediate reduction.

The Joint Industrial Council of the Printing and Allied Trades regards the position as very serious, believing that if the present unemployment in the printing trade is to be relieved, it is imperative that the rate for 20% of printed matter should be restored to a half-penny and post cards reduced to a penny. Increasing co-operation is being promised the Council in their efforts towards a reduction. The names of Viscount Curzon, M.P. for Battersea, and Sir William W. Rutherford have to be added to the previously published list of prominent men who have expressed the sympathy with the efforts of the J.I.C.

THE GROUT ENGRAVING CO., LTD., of 7, Bridewell-place, E.C.4, send us a serviceable wall calendar, which is of the "perpetual" type, with movable cards upon a neat embossed backplate of bronzed metal.

To become a magnet be magnetic.

Post Office Advertising.

Tenders to be Invited.

Tenders are about to be invited by the Post Office for supplying, fixing and exhibiting advertisements for a period of three or five years inside the public offices in Post Office buildings. The form of tender is already printed and ready for issue.

The approximate gross amount of space available is believed to be about 350,000 sq. feet, and comprises wall space, the space on the cases containing stamp-selling machines which are fixed in certain Post Offices, and the space beneath the glass panels provided in some offices on counters or shelves for the writing of telegrams.

The buildings which will be available for advertisements will be grouped into districts, and the Controller of the Post Office Stores Department will probably offer intending advertisers the alternative of tendering for all or any of the groups.

Should there be a large demand the scheme will immediately be carried out. This may be followed by other schemes, such as advertising on the back of postage stamps and on telegraph delivery envelopes.

Universal Printers, Ltd., London.

£800,000 Combine.

Bemrose and Sons, Ltd., Derby, Alf Cooke, Ltd., Leeds, and Norbury, Natzio, and Co., Ltd., Manchester, have combined under a holding company entitled "Universal Printers, Ltd., London," with a nominal capital of £800,000. This is divided into £300,000 7½ per cent. cumulative preference shares and £500,000 ordinary shares, each of £1. The first directors are:—Messrs. Wright Bemrose, Harry Cooke and A. E. Natzio.

The whole of the issued capital has been taken up by the directors and shareholders of the combining companies. No public issue is contemplated at present. Each house will continue to trade under its own name, as now.

Printing Machine Mechanism.

On Wednesday Mr. W. T. Fielding, lecturer of the Manchester College of Technology, gave the first of his lectures on "Printing Machine Mechanism" to the Rochdale Master Printers' Association in the Rochdale Technical School.

He gave a critical comparison between the Wharfedale and the two-revolution machines, and between the flat-bed litho and the rotary litho and offset machines. By means of slides he made clear the differences in their construction and their relative strong and weak points, and displayed a working model of the bed-motion of a Furnival two-revolution machine.

Questions were asked upon several mechanical problems. In the next lecture Mr. Fielding will deal exclusively with the Wharfedale machine.

We are in receipt of No. 2 of the new series of *The Linotype Record*. As compared with No. 1, this has received entirely different treatment as regards layout and type dressing. The face used in this issue for the text matter is Linotype Bodoni Book; the other pages in the issue show the complete family of Linotype Bodoni. As set out on page 2 of the cover, the copy for this issue was sent to the printers with only one instruction: That the entire contents were to be set on their linotype machine. This issue is therefore another example of modern all-slug linotype typography. It was printed on a Miehle direct from the slugs, and makes an admirable demonstration of the high quality achievable by the linotype. The centre opening comprises a few pages from the booklet entitled "The Deserted Village," by Oliver Goldsmith, which was reviewed in our pages last week.

THE late M. Joseph Hermann Reinach, of Paris, a famous French journalist, for some years editor of *La République Française*, left, apart from large estates in France, personal estate in the United Kingdom of £10,381.

Bronzing Powders to be Taxed?

One of the latest suggested applications of the Safeguarding of Industries Act concerns the imposition of a protective tariff upon German-made gold and aluminium bronze powders, used to a considerable extent in the printing industry.

The Board of Trade give notice that they have received a complaint by Metal Powders, Ltd., supported by Radiant Products, Ltd., and the Aluminium Corporation, Ltd., that gold (brass) metal powders in various shades, and aluminium powder, manufactured in Germany, are being sold or offered for sale in the United Kingdom at prices which, by reason of depreciation in the value in relation to sterling of German currency, are below the prices at which similar goods can be profitably manufactured in the United Kingdom, and that by reason thereof employment in the industry manufacturing similar goods in the United Kingdom is being, or is likely to be, seriously affected. The Board of Trade, in exercise of the powers conferred upon them by Part II. of the Safeguarding of Industries Act, 1921, have referred the matter for inquiry to a committee constituted for the purposes of that part of the Act and consisting of Dr. J. H. Clapham, C.B.E. (chairman); Mr. F. J. Blakemore, F.G.I.; Mr. J. T. Brownlie, C.B.E.; Mr. J. W. Murray, D.L.; and Mr. Owen Parker, C.B.E., J.P.

The committee propose to hold their first sitting for the taking of evidence at 11.30 a.m. on Tuesday, February 21st, 1922, at 5, Old Palace-yard, Westminster, London, S.W.1.

The secretary to the committee is Mr. D. Haigh, Board of Trade, Great George-street, London, S.W.1, to whom all communications should be addressed.

St. Bride Students & Photo-Engraving

For a number of years St. Bride students have been enabled to see the making of printing blocks at the London County Council School of Photo Engraving, but this year it was found impossible to grant similar privileges. In looking round for a way to overcome the difficulty those responsible for arranging these industrial visits were fortunate in getting into touch with Messrs. Vitty and Seaborne, Ltd., photo-engravers, Crane-court, Fleet-street, who very painstakingly and interestingly demonstrated how relief printing blocks are made under commercial conditions. St. Bride students were indeed fortunate in having Mr. Seaborne as a guide with his wide experience in and enthusiasm for the photo-engraving section of the printing industry. The visit proved not only educationally valuable but highly interesting, and many friendships were made between Mr. Seaborne and the students of the School.—"It is an ill wind that blows nobody any good."

Football.

Printers' Charity Cup.

The following match in the above competition (Division I.) was played on Saturday, and resulted in a win for "Drakes" over the "Armoury" by 2 goals to 0. "Drakes" now meet Waterlow's in the final, the date of which is to be notified later.

THE report of the United States Government Printing Office points to an expenditure of \$11,111,111 as compared to \$13,000,000 the previous year. This office used 50,000,000 pounds of paper during its year's working.

TOILET ROLLS.—The finest British made paper. Moderate price. Trade only supplied. Please apply for samples to the Makers' Agents—W. LUXON & Co., 59, Carter Lane, London, E.C.4. 16296

Trade Notes.

MR. E. P. WOODMAN, chairman and managing director of the Fisher Bookbinding Co., Ltd., Herne Hill, London, S.E.24, writes as follows:—"It having come to our notice that some person or persons are spreading false rumours as to our financial position, if anyone will give us information to enable us to take legal proceedings, we will give a substantial donation to both the Printers' and Bookbinders' Pension Funds."

ARRANGEMENTS are now well advanced for the annual meeting of the Federation of Master Printers in Scotland. The Glasgow reception committee has a very attractive programme in preparation.

CASTER ATTENDANTS.—Representatives of the Monotype Users' Association are to meet representatives of the Typographical Association on Monday the 20th inst. to discuss the question of monotype caster attendants.

INTERESTING correspondence is going on in the *City Press* in reference to points raised by Mr. J. R. Riddell in his recent address to the members of the City Livery Club (reported in our issue of January 26th), when Mr. Riddell drew attention to the prevailing apathy of the City companies in the matter of craft education.

THE British Institute of Industrial Art has arranged for the third of the series of public discussions of various aspects of art in industry to be held in the North Court of the Victoria and Albert Museum, South Kensington, at 4.30 p.m. tomorrow, February 10th, when the subject for discussion will be "Printing." The chair will be taken by Mr. F. V. Burrige, and the discussion will be opened by Messrs. Geo. W. Jones, R. B. Fishenden, J. H. Mason and others.

RAILWAY RATES.—The Rates Advisory Committee is entering upon the final determination of the proposed General Railway Classification of Goods by Merchandise Trains, which was published at the end of 1920, and has been discussed by the railway companies and the traders since that date. Commodities have been divided into a number of groups for convenience of consideration, and the objections of traders to the railway companies' proposals are being brought before the Committee under the groupings at the Law Courts during the week.

PRINTER'S VAN FATALITY.—While passing over a level crossing near Purfleet Station, a motor van belonging to Messrs. Eyre and Spottiswoode was caught by a passing train and smashed to pieces. There were two occupants of the van, W. C. Belsler, aged 16, of Harrison-street, Gray's-inn-road, who was fatally injured, and the driver, who was very seriously injured. It was alleged at the inquest on Saturday at the London Hospital that the crossing was unattended at the time, and the driver of the train said that in the failing light he did not see anything in the way. The inquest was adjourned in order to allow the driver of the van to attend when he has sufficiently recovered.

CHARGED at the Old Bailey with having published a libel on Mr. Sigismund Goetze, the well-known artist, Mr. Harold Spencer, aged 31, newspaper proprietor, was last week sentenced to six months in the second division. George Thomas Holder, Albert Ernest Holder, printers, and George Frederick Holder, advertising agent, were ordered to pay the costs of the prosecution, each to pay one-third. The case arose out of a paragraph entitled "Our Foreign Frescoes," published in *Plain English*.

The meeting of master printers of Woolwich and surrounding districts, fixed for the 14th inst., at the Shakespeare Hotel, Powis-street, Woolwich, is attracting considerable interest. It comes at an opportune time when the present serious condition of the industry has to be considered, and a record attendance is expected. Much useful information will be gained from the addresses of such eminent captains of industry as Mr. R. A. Austen-Leigh (the president of the London Master Printers' Association) and Mr. George Eaton Hart, of the St. Clement's Press, the latter of whom is to give an address on his impressions gained during his recent tour among the United States printers. The time fixed—four o'clock—has been arranged as being an especially convenient time for printers at a distance.

The first issue of the new Unionist paper, the *Scarborough Standard*, was published on Friday.

THE death has occurred at Glasgow of Mr. Andrew Mudie, late assistant editor of the *Glasgow Citizen*.

THE funeral of Mr. George Austin, a member of the *Evening Standard* Parliamentary staff (formerly on the *Bristol Mercury*) took place at Wimbledon last week.

ON the application of Mr. J. H. Thomas, M.P., the Court has appointed a receiver of the property of the National Labour Press, Ltd., in respect of the £2,000 libel damages awarded in the *Communist* case, no part of which has been paid by any of the defendants. The appointment is subject to the prior rights of debenture holders.

IN the King's Bench Divisional Court a rule nisi calling upon the proprietors of the *Daily Express* and the editor, Mr. R. D. Blumenfeld, to show cause why a writ of attachment for alleged contempt of court should not be issued against them with regard to alleged improper comment on the Armstrong case was granted by Mr. Justice Shearman and Mr. Justice Sankey.

THE circulation departments of both the *Daily News* and the *Star* met at dinner on Friday at the Temple Bar Restaurant in the best of spirits. The circulation manager of the *Daily News* reported a handsome and progressive increase in sales, and it was announced that the *Star* has just completed the best year in its 34 years' record, as its published net sales certificates have shown.

A BREAKDOWN at the generating station of the Charing Cross, West-End, and City Electricity Supply Co. at Marshgate-lane, E., last Thursday, caused considerable inconvenience in the Strand and City areas for some hours during the morning and afternoon, but the majority of the London daily newspaper offices were able to draw on a second source of supply, and were not greatly inconvenienced.

THERE is perhaps some room for misunderstanding in connection with the production of the *Blackpool Times*, printed by Messrs. J. Robertson and Co., Ltd., of St. Annes-on-Sea. This very excellent impression, produced by photo-litho, has been referred to in the press as "transferred" work. The work has been produced from negatives made by Messrs. Robertson's photographic plant, in which is incorporated a complete Lithotex plant, and the negatives have been printed down in the Lithotex patented printing down frame.

BOARD OF TRADE RETURNS.—The following appears in the *Board of Trade Journal*:—The Newspaper Proprietors' Association and the Newspaper Conference, representing the London and the Provincial Press respectively, having expressed the view that no advantage is gained by the recently-adopted procedure of communicating in advance to the Press provisional aggregate figures of the monthly accounts of the trade and navigation of the United Kingdom, it is not proposed to circulate them in future months.

MORE good prices were given at Sotheby's on Monday for units of the library of Mr. S. Christie Miller, of Britwell Court, Burnham, Bucks. The proceeds of the sale already exceed £250,000. Dr. Rosenbach, United States, gave £3,600 for a copy of "Emaricdulfe," a collection of sonnets written in 1595 by "C. E. Esquier," an author who has never been identified.

ON the second day of the sale (Tuesday) Dr. Rosenbach paid £3,100 for a copy of Robert Chester's "Love's Martyr" (1601).

NEWSPAPER PRESS FUND.—The annual report of the West Riding District of the Newspaper Press Fund shows that the amount received in the district during the year had been £348, as compared with £625 in 1920, when exceptional circumstances made heavy calls on the fund. A resolution was proposed at the annual meeting approving in principle of the recommendation of the Central Council of the Fund to increase the subscription, but suggesting that the operation should be delayed for one month to allow of the admission of new members under the old scale. The resolution was defeated, and confirmation was given to the new proposal. Mr. James Sykes was elected chairman for the coming year, and Mr. F. R. Huxtable was elected hon. secretary.

A VERDICT of "accidental death" was returned at an inquest on William John Meadam, sixty-four, a linotype operator in the City, who resided at Forest Gate, and was killed on the District Railway by falling upon a live line.

A SOUTHWARK coroner's jury on Friday recorded a verdict of "Death from natural

causes" in the case of Charles Godfrey Turner, 33, a journalist, who was found dead in bed in West-square, S.E. Death was due to double pneumonia and influenza.

THE death has occurred in London of Mr. Frank C. Maycock, well known as a journalist in London and in the provinces.

THE late William Moore, who died last week, at Hexham, at 71 years of age, at one time carried on the business as stationer of the town.

THE identity of the man who committed suicide by leaping in front of a train at King's Cross Metropolitan Station on January 25th was established at the inquest on Thursday last. James Craig, of Ashford, Middlesex, said the body was that of his father, a printer, aged 58, who had been strange in his mind for some time. A verdict of "Suicide while of unsound mind" was recorded.

MESSRS. STANLEY PAUL AND CO., are issuing immediately a third large edition of Mr. J. F. Blacker's work "The A B C of Japanese Art." Japanese colour printing is among the many subjects dealt with.

A LETTER signed by a number of prominent public men, including several well-known journalists, has been addressed to the Premier, expressing concern at the sentence passed on Mr. Albert Inkpin recently for the publication of certain political writings.

AN all-Russian journalists' congress is being held in Moscow.

THE OLDEST BOOK.—A French translation has just been published of the two famous Chaldean cylinders, known as the Gondea cylinders, now in the Louvre. Gondea, priest-king of Chaldea, reigned a short time before the birth of Abraham. The French press claims that the two cylinders constitute the oldest book in the world, since they recount a series of events and facts, whereas the inscriptions on the Pyramids are purely religious.

LEIPZIG BOOK TRADE.—"Lithographers, printers and binders have enough to do at present," writes the Leipzig correspondent of the *Manchester Guardian*, "but they regard the future with some anxiety. Prices are uncertain, and it is very difficult to get paper. The paper mills cannot work much. Either they have no coals or, on account of the dry summer, no cellulose. Export business, which is so important for the lithographic industry, is very limited at present, especially with England since the anti-dumping legislation. The countries at our eastern frontiers and Russia can hardly be thought of; neither Austria, on account of the exchange. Switzerland and France have passed strict laws against imports, and so the northern countries are the only ones which can be taken into consideration."

AMONG the stationery requirements of the Secretariat to the League of Nations are 360,000 envelopes of various sizes, 12,000 newspaper wrappers, 10,000 boxes of carbon paper for typewriting, 600 reams of printed note paper, over 5,000 reams of typewriting paper, 50,000 reams of duplicating paper, 2,700 labels, 2,000 shorthand note books, 6,600 memorandum books, etc.

The LITHOTEX

Patented All-Metal Printing-down Frame

is responsible for much of the finest photo-litho metal plates now being printed. It is certainly the most practical tried-out Frame, and is appreciated by all users, amongst whom are Messrs. J. Robertson & Co., Ltd., of St. Annes-on-Sea, who are producing the "Blackpool Times" entirely by photo-lithography. The negatives made for this publication have been printed-down in the Lithotex Patented All-Metal 60" by 40" Printing-down Frame, which Frame is now available to any printer requiring it, hitherto having only been sold to purchasers and users of complete Lithotex Plants.

THE practical way to get such results as Messrs. Robertson have produced is to print-down on to metal, and the Lithotex Patented All-Metal Frame stands alone as an important appliance for this particular work.

The Company are also making cheaper Wooden Lithotex Frames, in which Frames the Company's patent for printing-down can also be utilised.

Up-to-date Printers should keep in touch with:—

THURSDAY, FEBRUARY 9, 1922.

The Postage Agitation.

THE volume of public opinion is growing tremendously on the matter of the postal rates which has now become a supreme issue. It appears to be established that there is a big postal surplus, and the question is now as to how this profit is to be allocated—whether it should be debited to a reduction of the present rates or appropriated for general revenue by the Treasury. Those who have insisted so urgently for the former course have every justification. Without a doubt the high postal rates are a burden upon the business community and operate as a serious hindrance to trade. Heavy expenses and trade depression have forced people to economise both in business and private affairs, and the high postal rates have doubtless checked a great deal of letter writing and circularising which would otherwise have been undertaken. True, the higher rates have produced a surplus, but what the Department gains on the swings it loses on the roundabouts, and the trading community is penalised. Printers, papermakers and stationers suffer perhaps more than anybody by reason of the exorbitant charges, for with cheap postage paper, envelopes and printing are used to a greater extent, with resultant employment for a vast army of workers. But it is not only the allied trades which are affected, as was demonstrated at a huge gathering in London on Friday representing the trading community of the country. Every phase of industry and commerce almost was represented at the meeting, and the feeling in favour of reduced postal charges and increased postal facilities was unmistakable. In thus focussing public opinion on vital question of policy, the Federation of Master Printers and the post card publishers are to be congratulated. They were, of course, the first to feel the evil effects of the restrictions and they have organised the campaign of opposition well. A little more pressure, and there is little doubt success will be achieved. The country is in urgent need of relief from financial burdens, which will help to remove the unemployment problem, and concessions by the Postmaster-General will go a great way to stimulate trade and restore the confidence which is sorely needed.

Crushing Taxation.

THE dangers of excessive taxation are being forced upon the notice of the Government from all quarters, and the Federation of British Industries (with whose activities printers are concerned) is for the second time warning the authorities of the seriousness of the position. It might well be that the grave financial burdens which industry and private individuals alike have to bear are responsible for much of the unprecedented depression which has overtaken the country. If profits are swallowed up by the State, it is obvious they cannot be employed in developing business, whereas the utilisation of money in this direction might well provide a useful oiling of the wheels, for, after all, it is often only a slight impediment which hinders progress. So relief from crushing taxation would be a great assistance in promoting commercial activity, and the coffers of the State might not suffer in the process, while the community would undoubtedly benefit. The Chancellor of the Exchequer has agreed to receive a deputation from the F.B.I. on the 15th inst., when he will be told very forcibly that the question is not now one of mere hardship or even of possible disaster to individual firms, but whether the whole industrial system of the country can possibly withstand any prolongation of the strain to which it has been subjected. Of course, the Government has indicated its appreciation of the importance of the matter by appointing the Geddes Committee, and the recommendations made by that body have raised various forms of opposition which show that the path of economy is not entirely popular. But there will be little objection from the general public to the suggestions of the F.B.I. that economy should be undertaken by a reduction in the rate of income tax, the abolition of the Corporations Profits Tax and the exemption from super tax of reserves properly employed in the business of private firms.

Printing Abroad.

FURTHER evidence is forthcoming of the enterprise of German firms in soliciting printing work from this country. A circular just to hand offers, "in consequence of the present rate of exchange," to print books at quite special value as to quality, price and finish. In connection with the seed catalogue to which we referred in our last issue, it is quite clear that even our postal service is also being undercut, as well as the papermaker, the printer, and others. Each catalogue weighs a little under three ounces and, with the catalogue enclosed in a wrapper, the postage in this country would be three-halfpence. From Berlin the booklets are sent at a cost which at the present rate of exchange works out at one-sixth of a penny each copy, and the firm can thus distribute nine copies posted at Berlin for the price which the British Post Office charges to deliver one. Presumably the German Post Office makes some gain, although the charge is only one-sixth of a penny. The British Post Office obtains no revenue from the German Government for delivering the circulars. The practice of having pamphlets printed and posted in Germany will probably become more popular as time goes on unless the Post Office takes some steps to reduce postal rates or takes other action to protect British industry and labour.

Wages and the State of Trade.

THE depression which has been so marked in the printing and allied trades cannot, of course, be attributed wholly to causes within the printing industry. To charge it all, for instance, to the high wages of the present day is manifestly unfair. Yet the high costs of printing are undoubtedly a very important factor among those making for the hindering of a revival in the printing trade. In this connection a frank statement of the case as it appears to the Author is perhaps sufficiently

THE Home Labour Market depends upon patronage of British Industries for the much desired revival. Every imported finished product helps to keep back the revival.

interesting to quote:—"We see, with great regret, that publishers, owing to the high price of labour, are making contracts with printers in foreign countries for the printing of English books; but this was bound to follow on the high wages which are being paid in the printing trade. The result will be very serious to the printing trade. We believe it is also a fact that printing is being placed in the United States, and sheets are being imported into England. Such action enables the author and the publisher to secure without much difficulty the United States copyright in addition to the British copyright. Even though printing in the United States is expensive, the printing in the States saves the double setting of type and the double work which is essential if the author and publisher desire to secure copyright in both countries, while the printing of the British edition is done in England. We do not think that the foreign printing is at all up to the standard of English work, either of pre-war days or of recent date. Still, it is essential, in many cases, both for the public and for educational purposes, that books should be on the market. In consequence it is more advisable to have the book than to have excellence in the style of printing."

Marbled Papers.

DURING the war, there was a fair amount of attention paid to marble papers for use in the bookbinding and boxmaking trades, stationery manufacturing, etc. The importation of foreign marble paper was reduced to negligible limits, and Belgium, the chief producer, was occupied by the German army. Immediately after the war, the Belgian mills settled down rapidly to the business of reclaiming the lost trade and the manufacturers of marble paper turned their attention to the English market. Spasmodic attempts had been made at home during the ration period to produce substitutes and imitation marble paper, and so long as price had no limit all was well. It is to be feared that English efficiency in this branch of specialisation was only bolstered up by the false conditions prevailing. More recently the user of fancy lining papers has been practically compelled to turn to the foreign product for his supplies, although in a good many cases he has realised that once having relaxed the custom of using marble paper, there is no specific reason for returning to it.

Retirement of Mr. Thomas Peebles

There was a notable and indeed unique ceremony at the Restaurant Frascati in Oxford Street on Saturday night, the 4th inst., to mark the retirement on pension of Mr. Thomas Peebles, after 34 years of honourable and valued service with the Argus South African Newspapers, Ltd. The whole staff of the London office of the company—from the manager, Mr. Gill (who was responsible for the organisation of the ceremony), down to the youngest boy—sat at the same table to dinner in one of the rooms of the restaurant, which had been tastefully decorated for the occasion, and the gathering was presided over by Mr. J. L. Siddall, chairman of the London Committee, who was accompanied by one of his colleagues on the committee, Mr. A. T. Schmidt. Mr. Peebles had for so long occupied the responsible position of buyer for the company that he had come into close contact with a number of manufacturing and shipping firms, and from all of them came striking tributes to the sterling uprightness of his character as a man of business. Extracts from these letters were read at the dinner by the chairman, who pointed out that they were not only in themselves remarkable testimonials to Mr. Peebles, but through him they redounded to the credit of the Argus Co. The chairman then presented the guest of the evening with a cheque on behalf of the company, and with a handsome travelling bag and clock, which were the gifts of the staff of the London office. In responding, Mr. Peebles told the gathering

the story of the Argus Co's career in London and some of the principal incidents of his own remarkable experience in its service.

Personal.

H.M. THE QUEEN visited on Saturday the British Institute of Industrial Art Exhibition at the Victoria and Albert Museum, a section of which is devoted to the printing and allied trades.

LORD MARSHALL of Chipstead, has presented a marble bust of the Prince of Wales, by Mr. Charles L. Hartwell, A.R.A., to the Corporation of London, to commemorate the Peace Year, when he was Lord Mayor of London.

MR. J. MACLEHOSE, M.A., LL.D., president of the Federation of Master Printers, is to visit Leeds on Tuesday next, 14th inst. Then on Wednesday, the 15th, he is to address the Liverymen's luncheon at Stationers' Hall on the subject of book production. On the Thursday he visits Bristol for the annual meeting of the Bristol Master Printers' Association.

MR. A. E. GOODWIN is visiting Grimsby to-morrow (Friday) with Mr. D. R. King, secretary of the Midland Alliance of Master Printers, to discuss trade topics with local printers.

MR. J. CROWLESMITH, who is a managing director of the firm of Hazell, Watson and Viney, Ltd., evidently makes his influence felt in the world of Methodism. The current issue of the *Methodist Recorder* contains a comment on his enthusiastic efforts on behalf of the temperance movement, and draws attention also to the fact that Mr. Crowlesmith is also a magistrate of the London Children's Courts, the steward of one of the most flourishing circuits in the First London District, a Methodist local preacher, and London editor of *Joyful News*.

MR. ROBERT DONALD, the eminent journalist, was on Monday evening entertained at dinner by the Authors' Club in their club rooms, Whitehall-court, and addressed them on the subject of "Authors and Journalists."

MR. T. E. NAYLOR, M.P., presided on Sunday over a conference on the subject of "Is the Modern Church Capitalistic?" following the evening service at the West London Mission, Kingsway.

COUNCILLOR G. A. ISAACS, ex-Mayor of Southwark and prospective Labour candidate for the Gravesend Division, addressed a meeting at Cuxton on Thursday evening last.

MR. F. V. HEYWOOD, of Messrs. Geo. Mann and Co., Ltd., on Tuesday evening delivered a much-appreciated lantern lecture on "Offsetography" to a large gathering of members of the Printers' Managers and Overseers (Parent) Association.

MR. ARTHUR COX was elected hon. general secretary of the Printing, Bookbinding and Kindred Trades Overseers' Association at its annual general meeting held on Tuesday at St. Bride Institute. Mr. A. W. Hunt and Mr. H. Milton were respectively re-elected president and vice-president. A report of the proceedings will appear in next week's issue.

MR. R. C. CONYERS, chairman of the Bristol Costing Committee, presided on Tuesday of last week over a special meeting called to consider means for dealing with the evils of the present day price-cutting.

MR. W. H. ANDREW, Ashton-under-Lyne, gave striking actual examples of advantages gained by the application of the Federation Costing System.

MR. A. E. GOODWIN, in stressing the necessity of scientific costing, pointed to the interest taken in the subject by men of the standing of Lord Wear and Lord Leverhulme, and others who were that week attending a conference on costing. He remarked that the printing industry was the first to establish a standard system of costing, and was the only industry providing expert assistance for the users of its system.

Trade Union Matters.

NEW WAGES APPLICATION.—We understand that all trade unions which negotiate wages with the Federation of Master Printers have received from the Federation individual requests for a conference to consider a revision of wages rates with due regard to the decrease in the cost of living. Conferences are proposed for the week commencing the 20th instant.

LONDON SOCIETY OF COMPOSITORS.—As briefly indicated in our last issue, an important delegate meeting of the L.S.C. was held on Wednesday, last week, when one of the points discussed was the question of Mr. Naylor's retaining the secretaryship after his election to Parliament. We understand that a little opposition, surprisingly small, was forthcoming—chiefly from the unemployed section—but that the meeting overwhelmingly approved the committee's recommendation whereby Mr. Naylor retains the main secretarial responsibility but that the assistant secretary, Mr. F. A. Davies, relieves him of a great deal of the Society's routine work. Another important subject on the agenda was the application by the L.M.P.A. for a reduction of 2s. 6d. in wages. The Society decided they were unable to accept the reduction.

THE L.S.C. has, by the death on Sunday of Mr. T. E. Peacock lost the oldest of the Society's officials. Until his recent retirement Mr. Peacock was senior assistant in the L.S.C. office. During his 30 years of service to the Society Mr. Peacock was deservedly popular, and will be mourned by a large circle of friends.

BINDERY GIRLS' WAGES.—A conference was held last week between representatives of the Bookbinding Section of the London Chamber of Commerce and representatives of the trade unions concerned, as to the remuneration of girl learners, who at present, unlike other workers in the trade, are working under no fixed scale of wages.

"NATSOPA" AFFAIRS.—The executive council of the National Society of Operative Printers and Assistants announces that a special meeting of the governing council has been convened to deal with the following matters:—1. Steps necessary or advisable to be taken arising out of the position in the Society occasioned by the legal actions and other accusations made by members. 2. To deal with the financial position of the Society. The special meeting of the governing council will be held on Monday, February 27th, in London. With regard to the secretaryship, nominations have been received as follows:—Messrs. H. Rumsey, H. E. Dunn and W. E. Siequien, of the London branch (one nomination each), and Mr. G. A. Isaacs (49 nominations). These four names are now submitted for ballot, the ballot to close on the 20th inst.

COVENTRY Typographical Association made a presentation on Saturday evening to Mr. H. E. Carss, as a mark of appreciation of his services for ten years as secretary. The presentation consisted of a Coventry-made watch, suitably inscribed, and accompanying it was a clock for Mrs. Carss. Mr. H. E. B. Ludlam, president of the branch, after having referred to the presentation, said the policy of trades unions had to be changed; they had to think not so much about themselves as about the community. The best way the trade union movement in the future could justify itself was not so much by advocating an increase of wages as by advocating a policy that would bring about a decrease in the prices of commodities they sold to the general public. By that process they could bring about an increase in the purchasing power of the money they earned.

THE Employers' Federation of Papermakers have submitted proposals for an amendment of the National Agreement No. 2, and their new proposals include:—Clause 1: In mills on three shifts the working week for shift workers be 144 hours, i.e., an average of 48 hours per week per person; in mills on two shifts 126 hours, i.e., an average of 63 hours per person per week. Clause 4, Wages: It is proposed that further reductions in wages shall take effect as follows: For every 10 points fall in the cost of living below 100—adult males and youths of 19, etc., 1d. per hour; women, 1d. per hour; boys and girls age 14 years, 1d. per hour, with a minimum for boys of 8s. and for girls of 7s. per week. Payment for holidays to be discontinued.

AN Advertisement is always working.

The Bookbinder.

Notes and News.

Bookbinders' Leathers.

The leather market remains steady, and prices have been practically unaltered for some months. As is usual about this time of the year, there are odd and sundry offers of clearance lines at remarkably cheap prices, mainly the result of stocktaking revelations. In this direction we have met with basils at 6d. per square foot and skivers as low as 3½d. per square foot, while fleshes have been offered at 5½d. and 6d. per foot. Apart from these clearance offers, leather values are firm at the low figures previously quoted in these columns, i.e., glazed skivers 4½d. to 6d., special colours and embossed designs 5½d. to 7d., pastegrains, 6d. to 8d., glazed basils 7d. to 10d., roller basils 6d. to 9d., fair basils 9d. to 1s., rough sheep 8d., fleshes 7d., rough morocco 10d., rough calf, 1s. 3d. seconds, 1s. 6d. best, fair or smooth calf 1s. 6d. seconds, 1s. 9d. best, pigskins 1s. 3d. to 1s. 9d., Anglos 1s. 6d. to 1s. 9d., hard grained goat 1s. 9d. to 2s., moroccos 2s. to 2s. 6d. All prices per square foot.

Displacement of Forills.

Forills are remarkably cheap, and requirements are remarkably small. The Government has issued comparatively few large contracts since the war. During the war the official demand was such that private requirements were passed over. As a consequence white bookcloth, buckram and imitation parchments took the place of foril and writing skins. It is safe to say that a great deal of this business will never get back to the fell-monger because in many cases the substitute has been found perfectly satisfactory, and the cheaper cost makes a good reason for keeping to it. At the same time it must be admitted that none of the substitutes in use has quite the same efficiency as the original, and the low level of price now reached in forills and parchments makes them worthy of consideration once again. Law stationers

and the legal profession generally might have been expected to return to their parchments at the first opportunity, but they are still making good use of the handmade substitute which can at least be guaranteed to equal the durability of modern parchments.

The Glue Market.

Glues, like leathers, remain unaltered in price. Present-day quotations range between 36s. and 45s. per cwt. for bone glues and 56s. to 65s. for hide glues. The chief complaint against the apparently cheap bone glue is its odour. If quality is a chief consideration with the binder of books he will certainly be well advised to pay the price for best hide glue, which can be relied upon to be free from objectionable smell and which, from the point of view of adhesive quality and covering capacity more than justifies its figure.

Marble Papers.

Not so much is seen of imported marble papers nowadays. Supplies are coming into the country regularly but tonnage is exceedingly small. In large contract work which has come under our notice plain tinted ends have been used and we have even seen several examples where common azure laid papers have been employed. British marble papers are available, but we must confess to some disappointment at the lack of initiative and enterprise which has been evident since the war restrictions became a thing of the past.

Price of Bookcloths.

Bookcloths are firm, but at three times the pre-war price there is reason to look for an early reduction. Apart from the standard English grades there are some low-priced varieties on the market, but they do not compare favourably against the former in point of quality and regularity. Linen buckrams range from 3s. 9d. per yard upwards, but union buckrams have fallen considerably in

recent months, the present price averaging about and below 2s. 6d. per yard.

Calicoes.

Calicoes are available in all the old-accustomed ranges and there has recently been an easing in quotations, notwithstanding which the ratio of difference between pre-war and present cost is too great. Fine white calicoes are obtainable at 5½d. and 6d. per yard while commoner grades are quoted from 3d. per yard upwards. Some agents are endeavouring to keep up the old price, but comparison against other supply houses will provide an opportunity for the buyer to help the agents to keep in tune with the times.

Cutting Sticks.

Composition cutting sticks are finding increased use in the bindery owing to the high price and low quality of the usual wood variety. Xylonite has also proved a vast improvement on lead and millboard as a punching base. There is now a new type of fibre product which has all the advantages of xylonite at something under half the cost. As a punching base it has already justified itself and we believe that it is now used in some binderies in the form of cutting sticks.

Strawboards and Millboards.

Strawboards are firm enough at the moment and there are fewer of the cut-price offers than were in evidence two or three months ago. The average price is £8 per ton, unlined, 8 to 18 ozs., with the usual extras for heavy weights. Agents claim that there is a distinctly improved demand, due no doubt to the depletion of users' stocks. Only small orders are being placed however. Millboards have fallen very considerably in recent months, and imported varieties of greyboard are being quoted from £20 to £30 per ton. Best English blackboards are still in the region of £40 to £45 per ton, but for high-grade work they are unsurpassable.

Blocking or Printing Book Covers.

There has lately been some difference of opinion between trade unionist workpeople concerned respectively with blocking and with platen printing, as to the method that should be used in putting the titling, etc., on certain book covers. As recorded in our pages, this difficulty recently cropped up in acute form, when bindery workers refused to handle covers in which certain work was designed to be done on platen machines instead of being blocked. This, as we pointed out at the time, raised a question having an important bearing on bookbinders' costs of production, for the substitution of blocking for printing would in many cases add considerably to the cost of a job.

The points in dispute were submitted to the London Printing and Kindred Trades Federation, and we are now given to understand that through the efforts of the Federation an agreement has been arrived at between the two unions concerned, namely, the binding section of the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers and the Platen Machine Minders' Society. It is agreed, we understand, that members of the binders' union withdraw their objection to handling cloth or other material which has been printed upon before its use in book covers, but that once a book cover is made up it must not go to a platen machine or be handled by non-binder members.

While this is a move in the right direction and partially removes the attempted restriction of cheapened production, it by no means meets the requirements of the master binder.

In the case, for instance, of the recent stoppage of work on a binding job at the house of Messrs. Burrup, Mathieson and Sprague, Ltd. (reported in our issue of September 29th last), the operation which gave rise to the trouble was one of plate-marking. The covers were to be plate-marked on platen machines after being made up. The binders' insistence on the work being done by blocking led to the work being done by neither union, for the customer refused to go to the expense of blocking and decided to do without the plate-making altogether. In such cases as this, therefore, the demarcation agreed on by the unions—cloth to the platen, but cases to the blocker—is not in accordance with that cheapening of production which is essential to the revival of the printing trade. The point at issue calls for further consideration.

Gold Leaf Protection Pled.

The recent application, under the Safeguarding of Industries Act, for the imposition of a tariff on imported gold leaf would, if successful, mean a still further enhancement of the already cruelly high costs of production in the bindery. To restrict the British bookbinder to the use of the heavy and costly British gold leaf—which he ordinarily employs only for expensive bindings—could not but mean an immediate raising of prices in the case of such gold work as can now be done comparatively cheaply by the use of the thinner and less costly imported gold leaf. And since gold leaf on books must now be regarded as a luxury, any considerable rise in

price would doubtless go a long way towards killing the diminished demand for gold which still remains. This would mean an extension of unemployment in the binding trade by the discharge of gold workers, as well as the loss of many orders involving the use of gold. That such results would follow a tariff on gold leaf is not mere assumption, but is strikingly borne out by facts and figures from past experience. This was made plain when an official hearing was given in London (as reported in our issue of January 26th) to objections against the proposed protective tariff, the opposers including representatives of the Master Bookbinders' Association, the Bookbinding Section of the London Chamber of Commerce, the Federation of Master Printers, and several other organisations. The evidence given by Mr. Robert Leighton was, we learn, particularly apposite in regard to the relation between the total amount of gold leaf used and the market price of the leaf. His figures showed a striking dependence of consumption upon price during the big price variations that have occurred since pre-war times. The rise of price to about 300 per cent. on the pre-war figures was accompanied by a decrease in demand of something like 75 per cent., whilst falling prices have been accompanied by increased consumption in about the same ratio. This refers to the total consumption, in which imported leaf overwhelmingly preponderates. In regard to English gold leaf—which is used mainly for purposes other than bookbinding—rising prices have not caused a fall in consumption of anything like the same magnitude, consumption having never decreased, we understand, more than about 25 per cent. The fact seems plain that home producers never have supplied the bookbinding trade to any con-

siderable extent, the chief reason being that the thin leaf required by binders cannot, apparently, be produced in this country. Thus the case for the imposition of a tariff on imported gold leaf seems a very thin one. The committee appointed under the Safeguarding of Industries Act has reported to the Board of Trade, whose attention is now being given to the facts and recommendations put forward by the committee.

Mr. George A. Eden.

A Brief Biographical Sketch.

The Printing, Bookbinding and Kindred Trades' Overseers' Association has sustained a real loss through the enforced resignation of Mr. Geo. A. Eden, its esteemed hon. general secretary. Not only can Mr. Eden's withdrawal from this post be considered a loss to the Association but to a wider circle in the bookbinding section of the trade where his position as secretary had enabled him from time to time to give much valuable assistance. His enthusiastic participation in the various movements for the advancement of the interests of the craft, charitable or otherwise, was always given in an unobtrusive manner, and his sterling qualities of head and heart have won for him the affections of the members of the Association to which he had been so closely attached.

Mr. Eden's Career.

Mr. George A. Eden was born at Greenwich in 1881, and is the son of the late Wm. Eden, who won distinction and promotion while serving in the Royal Marine Artillery during the rebel wars of China in the "fifties," while his aged mother still continues to take a constant pride in her youngest son's progress. Mr. Eden received his early education at a semi-private school and subsequently at Clarke's College, followed by an intermittent course at the Borough Polytechnic.

He was apprenticed to the late Henry Richardson, in Greenwich, and while mayoral and other public duties kept this dignitary from much intercourse with the

"youth of his adoption" Mr. Eden was fortunate in receiving personal instruction from Mr. J. R. Beynon-Davies, who was then fresh from the Principality. Mr. Davies is now, by the way, a director of H. Richardson, Ltd., and an instructor at the Blackheath School of Arts and Crafts. During the later years of his apprenticeship his social activities comprised, among other things, the duties of a drill instructor to the Church Lads' Brigade

Mr. George A. Eden.

and a connection with local orchestras as a violinist.

After nearly eight years, Mr. Eden left the protecting wing of his tutor in the craft and put the teaching to a practical test in taking charge of the Acme Tone Engraving Co.'s warehouse and binding department at Watford. He next migrated to Truscott and Sons, at Tonbridge, and thence back to London at the instigation of F. Hadley and Sons, Ltd., whose binding department he successfully managed for twelve years

First Connection with the Association.

Early in 1906 he was accepted a member of the Printing, Bookbinding and Kindred Trades Overseers' Association, being almost immediately elected to a small sub-committee for entertainment purposes. At the end of the first year he was drafted into the executive and later elected secretary. At this stage much pruning was beneficially performed, and after eliminating the "dead matter" the membership was whittled down to about 36, but that active "three dozen" formed the nucleus of the Association which flourishes to-day, he having held the secretaryship continuously for 14 years and has been re-elected annually without opposition.

Just before the war Mr. Eden successfully competed against 15 others from all parts of the country by securing first place in a Civil Service Commission examination for a vacancy in H.M. Stationery Office. After a varied experience in the accounts and ordering branches he became receiver of binding and was later transferred to the Army Forms Store, to be subsequently recalled to the head office at Westminster where he saw behind the scenes much of the work of wartime service. Though released for active service the sudden death of two colleagues rendered his retention imperative, and he was eventually granted exemption by the Minister of National Service on the application of the Controller.

Though his position as secretary of the Association has been held throughout with the entire approval of his various immediate "chiefs," the Controller now considers that his post in the Association is incompatible with his position in His Majesty's Stationery Office and has accordingly requested his resignation from the secretaryship of the Association.

Mr. Eden represents the Printing, Bookbinding and Kindred Trades Overseers' Association on the board of examiners in the Printing Industry and Stationers' Company Technical Board, and is also on the Council of the new Printers' Technical College. It will be the general wish of the members of the trade that his seat on both these bodies should be retained, not only in the interests of the craft generally but also in the best interests of H.M. Stationery Office.

"DRYLIO"

(REGISTERED).

PATENT LITHOGRAPHIC & OFFSET INK FOR WORKING WITHOUT DAMPERS.

"DRYLIO" means increased production; greater brilliancy of colour; large saving in cost of moleskin; life of printing plate more than _____ doubled; and smaller consumption of ink. _____

Sole Manufacturers—

B. WINSTONE & SONS, Limited,

100/101, SHOE LANE, LONDON, E.C.4.

BINDERS TO THE PRINTING TRADE.

PRINTERS who have the facilities for folding, sewing and casing up, can be supplied with cases made in Leather, Rexine, Pluviusin, Imitation Leather, Cloth, or any other material, blocked or embossed in Gold, Imitation Gold, White or Coloured Foil Leaf, ink in any colours.

Our staff consists of more than 300 capable workers, provided with the most up-to-date machinery.

We shall be pleased to submit samples for Trade Catalogues, etc.

NEW COMPANIES.

DREW AND HOPWOOD, LTD.—Capital £10,000, in £1 shares; to take over the business of printers and lithographers carried on by F. P. Drew and W. E. Hopwood, at King Alfred's place, Birmingham, as "Drew and Hopwood." Private company. First directors: F. P. Drew, W. E. Hopwood and F. P. Bradshaw.

PHOENIX WORKS, LTD.—Capital £4,000, in £1 shares; to adopt an agreement with J. D. Todd, J. D. Todd, junr., and Jane B. Todd, and to carry on the business of printers, lithographers, engravers, manufacturing stationers, paper merchants, paper bag manufacturers, dealers in leather and fancy goods, etc. Private company. Directors: J. D. Todd and J. D. Todd, junr. Registered office: Vine-place, Sunderland.

MARTIN'S PRINTING WORKS, LTD.—Capital £3,500, in £1 shares; to take over the businesses carried on by G. Martin (1) of a printer and stationer at West-street, Berwick-on-Tweed, as "Martin's Printing Works," and (2) of a billposter at Berwick-on-Tweed, as the "Border Counties Billposting Co." Private company. First directors: G. Martin (managing and permanent director), Margery Martin, R. Martin and Margaret G. Martin. Registered office: 64 and 66, West-street, Berwick-on-Tweed.

F. R. BRITTON AND CO., LTD.—Capital £3,500, in 4,000 7 per cent. non-cumulative preferred shares of 5s. each and 2,500 ordinary shares of £1 each; printers, colour printers, stereotypers, electrotypers, photographic printers, designers, lithographers and publishers of newspapers or other publications, fine art printers and publishers, etc. Private company. Subscribers: W. J. Knight and J. S. Mason. Registered office: 39, Victoria-street, S.W.

IRISH ANNUALS PRESS, LTD.—Capital £500, in £1 shares; printers, engravers, publishers, stationers, etc. Private company. First directors: J. Wheatley and P. Wheatley. Registered office: 57, Middle Abbey-street, Dublin.

THE FINANCIAL OUTLOOK, LTD.—Nominal capital £5,000, in £5 shares; to acquire *inter alia* the publication known as the *Financial Outlook*, and to carry on the business of newspaper proprietors, printers and publishers, stockbrokers, stock and share dealers, etc. Private company. Signatories to the Memorandum of Association: Mrs. M. C. England and E. B. Howard. Registered office: 119-125, Finsbury-pavement, E.C.

L. P. BARNES, LTD.—Capital £2,000, in £1 shares; to adopt an agreement with the

Aeolian Co., Ltd., and to carry on the business of manufacturers of musical instruments, publishers and sellers of sheet music, books and literature, etc. Private company. First directors: L. P. Barnschone, T. Powell and F. E. D. Hay. Registered office: 40, High-street, Tunbridge Wells.

SPIERS SERVICE, LTD.—Capital £2,000, in 1,900 10 per cent. preference shares of £1 each and 2,000 ordinary shares of 1s. each; general publicity specialists and advisers, billposting and advertising contractors and agents, etc. Private company. Subscribers: E. E. Spiers and I. Spiers. Registered office: 44, Fleet-street, E.C.

GORDON BOGGON PUBLICITY, LTD.—Capital £5,000, in 4,200 10 per cent. participating preferred ordinary shares of £1 each and 16,000 deferred ordinary shares of 1s. each; to adopt an agreement with G. Boggon, and to carry on the business of advertising agents. Private company. First directors: N. G. Boggon and J. Walker. Registered office: 1, Newman-street, Oxford-street, W.

FORD STAND, LTD.—Capital £50, in £1 shares; reservoir pen manufacturers, book-sellers, publishers, paper manufacturers, cabinet makers, manufacturers of or dealers in vulcanite, celluloid or metal goods, etc. Private company. Provisional directors: O. B. Wade and Lilian M. Davies. Registered office: Maypen Works, 354a, 356a, 358a and 360, Richmond-road, East Twickenham, Middlesex.

ROBERT H. FEAGON AND CO., LTD.—Capital £600 in £1 shares; to acquire the business carried on at 17, Cullingtree-road, Belfast, by R. H. Feagon, and to carry on business as wholesale and retail dealers in paper and everything relating to the business of paper-hangers, and the like, etc. Private company. Subscribers: R. H. Feagon and G. Martin. Registered office: 22, Mill-street, Belfast.

B. ROSEDALE, LTD.—Capital £1,000, in £1 shares; to take over the business carried on as "B. Rosedale and Co., Ltd.," and to carry on the business of wholesale and retail box, packing case, paper bag, carton and packing material manufacturers, merchants, agents, shippers and contractors, strawboard, millboard and cardboard manufacturers, paper mill representatives, papermakers, etc. Private company. Subscribers: E. T. Remfry and E. A. Perrin. Registered office: 148-150, Curtain-road, E.C.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

S. J. CLARKE AND CO., LTD. (printers, etc., London).—Particulars of £9,000 debentures authorised by resolutions of August 5th and September 1st, 1921; present issue £3,000, charged on the company's undertaking and property, present and future, including uncalled capital.

CAXTON PUBLISHING CO., LTD.—Satisfaction to the extent of £1,000 on January 20th, 1922, of debentures dated May 3rd, 1910, securing £40,000.

MORLAND AND IMPEY, LTD.—Two memoranda of deposit on January 24th, 1922, of deeds of certain properties in Northfield, Birmingham, to secure all moneys due or to become due from company to Lloyd's Bank, not exceeding £20,000 and £2,000 respectively.

BUVINGTON PRESS, LTD.—Mortgage dated January 7th, 1922, to secure £450, charged on 34, Monmouth-street, Bath. Holder: H. Buvington, Ferndale, Prior Park-road, Bath.

FIELD, SONS AND CO., LTD. (printers, publishers, manufacturing stationers, folding box manufacturers, etc., Bradford).—Satisfaction to the extent of £2,500 on January 1st, 1922, of deeds dated July 13th, 1911, securing £6,000.

WESTS', LTD. (music printers, London).—Debenture dated January 25th, 1922, to secure £750, charged on the company's undertaking and property, present and future, including uncalled capital. Holder: F. Shearman, Mount Stuart Dry Docks, Cardiff.

JOHN PETERS, LTD. (printsellers and publishers, etc., Birmingham).—Particulars of £1,500 debentures, authorised January 20th, 1922; present issue £1,450; charged on the company's undertaking and property, present and future, including uncalled capital.

LONGMANS, GREEN AND CO., LTD.—Issue on July 1st, 1915, of £8,000, and on October 18th, 1921, of £15,000; parts of a series. (Notice filed January 27th, 1922).

THOMAS BROTHERS AND CO., LTD. (paper and millboard manufacturers).—Charge on deeds and documents relating to Temple Mills, cottages and other erections, dated January 7th, 1922, to secure all moneys due or to become due from company to L. C. W. and Parr's Bank.

BANKRUPTCIES, etc.

Re WM. EDWARD TUCKER, printer, etc., 14, Arthur-street, E.C.—The adjourned first meeting of creditors under this failure was held on January 30th, before Mr. Warren, official receiver, at the London Bankruptcy Court, when a resolution was passed for Mr. F. S. Salaman, C.A., 1 and 2, Bucklersbury, E.C., to act as trustee of the estate. Particulars of the failure appeared in the *British and Colonial Printer and Stationer* on January 19th.

Re WM. HOWARD DAY (trading as W. H. Day and Son), photo printer, etc., 31, Charing Cross, W.C.—This bankrupt failed in September, 1920, and last week he applied to Mr. Registrar Hope at the London Bankruptcy Court for an order of discharge. Mr. W. P. Bowyer, senior official receiver, reported that the liabilities were returned at £1,249 and the assets realised £36. The applicant commenced business in November, 1917, without capital, and in August, 1920, the whole of his effects were sold under a distress for rent. He attributed his insolvency to bad trade, and heavy interest charges. The discharge was suspended for three years.

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIPS DISSOLVED.

Lewis Julius and William Stern, printers and stationers, 4, Finsbury-square, London, under the style or firm of Julius and Stern.

Cecil Hugh Bullen and Charles Sutherland, advertising agents, 25, Lord-street, Liverpool, under the style or firm of Bullen, Sutherland and Co.

RECEIVING ORDERS.

Reginald Arthur Gerald Master, London, formerly residing at Harrow, lately carrying on business in co-partnership with Francis De Wicke as advertising agents at 15, Took's-court, Chancery-lane, under the style of De Wicke and Master. Public examination, March 31st, at Bankruptcy-buildings, Carey-street, London, W.C.

Herman Darewski, 122, Charing-cross-road, London, W.C., music publisher, February 5th. Public examination, April 5th, at Bankruptcy-buildings, Carey-street, London, W.C.

Strawboard Supplies.

The countries supplying the British market with strawboards during December were as under:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
Bristol	Belgium	82	60
Hull	Netherlands	12,858	9,544
Manchester	Germany	12,286	4,636
	Netherlands	80	40
	Belgium	625	802

New Australian Board Mill.

Opening the Fairfield Board Mills of the Australian Paper and Pulp Co., Ltd., the Acting Prime Minister of Australia said there was no reason why the manufacture of news-print should not be undertaken in Australia. It was the determination of the Government to foster and protect industries provided they were efficient, and the Government would take care that industries would not be dumped out of existence by the manipulation of exchange or other means.

AN Advertisement is always working.

British Imports of Millboards.

During December the following consignments of millboards were received at British ports:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
Bristol	Norway	179	201
	United States	260	785

HEDNESFORD STAFFORDSHIRE
ESTABLISHED 1873

Telephone: Cannock 18. Telegrams: 'Bags', Hednesford

Mr. Hart at L.S.C. Guild.

Mr. Geo. Eaton Hart repeated his lecture on "Impressions of a Tour in America" before the members of the L.S.C. Guild, at the Institute of Journalists, Tudor Street, on the 25th ult. There was a good attendance, and among those present were Mr. H. Naylor (the secretary) and Mr. Slattery, of the Ludlow Co. Mr. E. Hanson, manager for Messrs. Stephenson and Blake, occupied the chair.

In the course of his remarks, Mr. Hart gave a vivid description of the re-organised composing room of the *New York Times*, and laid stress on the fine equipment of American newspaper offices, calling special attention to the *Times*, *Chicago Tribune*, the *Boston Herald*, and others, and made some impression by stating that notwithstanding his much higher wages, the American lino operator, owing to the greater output, actually produced composition at a lower price per 1,000 than in England.

At the close, many questions were put to the lecturer, and in answer to one Mr. Hart said he did not consider the American either intellectually or physically superior to the Englishman. He put down the greater output to several things; first, the larger wage undoubtedly encouraged the operator to do his utmost—he knew he would not be tolerated if he did not; then the machines were unquestionably more modern, and were kept up to a higher efficiency; and there was no doubt the rather wider face of the letter proved an advantage to the operator. But perhaps more than anything else the fingering of the keyboard was more practical and showed skilful training, for without apparent effort the operators' hands glided over the keys with a swiftness and effectiveness only born of high training. It was a pity operators in England did not pay more attention to this particular matter.

Specimens of many newspapers produced by mechanical composition were handed round and explained to the members, who naturally were keenly interested in the subject, and followed the lecture with much

attention. At the close votes of thanks, both to the lecturer and the chairman, were enthusiastically passed.

New Inventions.

Bookbinding.

In a method of bookbinding of the type in which folded sheets forming book sections are perforated along the folds, the sections being gathered into book form and their perforated folds covered with adhesive over which a fibrous backing is applied, the perforations are arranged in a series of groups and are made from the inside of the fold outwards so as to form projecting tangs which intermingle with the fibres of the fibrous backing. The perforations are larger on the inner side of the fold than on the other side, and may be made by tapered needles which may also apply the adhesive. The method may be applied to ledgers and office books, publishers' bindings, library and letter-press books, etc., and to temporary bindings such as magazines and weekly journals. In the application to library and letterpress books, the book sections 1, perforated as shown in Fig. 1, are collected in a box or trough having clamping end plates controlled by hand-operated screws, each book being separated

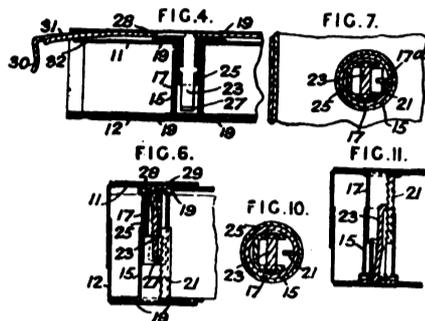

from its neighbours by a thin board not extending to the folded edges, so as to prevent the clamps from closing the perforations. A layer of powder such as French chalk is then applied to the perforations before the application of the adhesive, and fibrous material and also, in the case of heavy books, corrugated fabric, is applied over the adhesive to form a flexible back permitting the book to open flat. In the application to temporary bindings, sets of needles are mounted on a perforating machine or on a rotary folder so as to perforate and fold the sheets simultaneously, and the needles may also be adapted to apply adhesive to the perforations by means of side channels, Fig. 3, or other recesses in the needles, the adhesive being supplied to these channels by passing the needles through a trough containing adhesive. The groups of perforations may be set to a standard gauge for any publication, such as magazine parts, and may thus be utilized in the sewing of the final permanent binding, thus ensuring perfect register of the pages in this final binding. The invention is patented by Mr. J. Larmour.

Loose-Leaf Binders.

Mr. W. H. Averill has secured a patent in loose-leaf binders of the type in which tubular telescopic post members carry a rack and a lever, actuated by a controller bar to lock the members together, the lever is pivotally mounted in a bearing-member connected to one of the cover-plates and extends into the hollow posts, and the ratchet member is

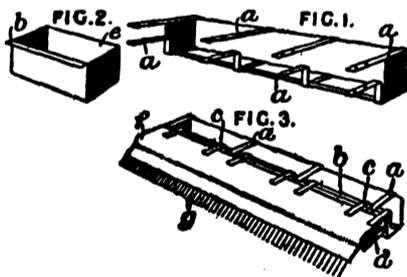

formed integral with the outer post. As shown in Figs. 6 and 7, overlapping angular cover-plates 11, 12 have hollow posts 15, 17 connected to them by lugs 19, the posts being of sheet metal and formed tubular by rolling. The outer and larger post 15 is attached to the cover-plate 12, and one of its edges is in the form of an integral serrated flange 21 which constitutes the rack and projects through a slot 17_a in the smaller tubular post 17. The

lever 23 is mounted in a U-shaped bearing member 25 its toe end 27 engaging with the rack, while the other end projects into an oblique slot 28 in a controller bar 29. The controller bar is movable endways by a finger piece 30, Fig. 4, to disengage the lever from the rack, and has a resilient tongue 31 engaging a slot 32 in the cover plate 11 to secure the elements in locked position. An ordinary bolt lock may be used for this purpose. In a modification, shown in Figs. 10, and 11, the integral serrated flange forming the rack is made on the inner and smaller of the tubular posts.

Ruling Machine Inkers.

Mr. A. Thornley has patented a ruling machine inking apparatus of the type in which ink is conveyed to the pens by suction from inkwells attached to the pen beam by means

of strips of flannel such as *c* dipping in the ink and resting on a flannel sheet *f* supported on the pens *g*, comprises a number of inkwells *e*, provided with projecting lips *b* and fitting within a holder fixed to the pen beam *d* by screws through a number of supporting arms *a*.

Preparing Printing Surfaces.

An invention in the name of the Pictorial Machinery, Ltd., F. T. Corkett, and J. Goodman, relates to a method of preparing planographic metal printing-surface having the design slightly etched, the design is applied with greasy ink or colour, the surface is coated with a resist, such as dragon's blood in alcohol, that is repelled by ink, the ink is removed, and the exposed design is slightly etched by a liquid that does not attack the resist. For zinc plates, the etching-fluid may consist of a weak solution of ferric chloride or nitric acid and alum; for aluminium plates, the etching-liquid may consist of weak hydro-fluoric acid. The surface is immersed in the liquid for a few minutes and is then withdrawn and washed. Re-transfer ink or a greasy fluid is then applied and, after the resist has been removed, the surface is rolled up with greasy ink or colour.

Offsetography—The Machinery and the Process.

Mr. F. V. Heywood Talks to Practical Printers on
a Subject of Great Importance to the Industry.

Offset printing, especially in view of its recent successes in the field of newspaper production, is a matter of outstanding interest at the present day, so it was not surprising that there was a "full house" at last week's meeting of the Printers' Managers and Overseers' (Parent) Association, when Mr. F. V. Heywood, of Messrs. Geo. Mann and Co., Ltd., lectured on the subject. The P.M. and O.A. provided a practical and appreciative audience, for, as Mr. Heywood said in his opening remarks, the association numbers among its members "some of the most expert lithographic printers in the world."

The lecturer's remarks were illustrated by a large number of excellent lantern slides, which greatly enhanced the interest of the lecture.

After a few introductory remarks, Mr. Heywood introduced his subject by a reference to the origin and general principles of lithographic printing. He touched briefly on the subject of flat-bed litho machines, then proceeded to deal with the important development brought about by the introduction of direct rotary machines, in which the cumbersome stone was replaced by the metal plate bent around a cylinder. These machines, said the lecturer, were up to 1914 made in sizes ranging from Demy, running at nearly 3,000 per hour, up to 64 in. by 48 in., running at about 1,500-1,600.

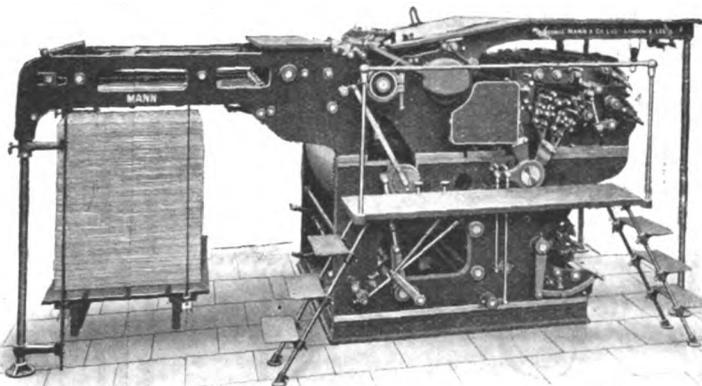

The Principle of Offset.

Then came the important development known as offset printing. Offset printing Mr. Heywood defined as the art of printing from a litho stone or a metal plate upon a rubber blanket, then this blanket in its turn printing upon paper, cardboard, canvas, silk, satin, celluloid, tin, etc., as required. He laid emphasis on these materials other than paper because he did not believe that offset printing was discovered upon a paper printing machine, but rather that it was evolved through tin plate printing. He emphasised the curious fact that though offset printing on tin dated back 40 or 50 years, no one had realised the enormous value and possibilities attached to the process when applied to paper. Over 30 years ago offset printing on cardboard, silk, etc., was practised on a tin-printing machine in this country, and thus the origin of the process could be credited to the British; though, to be quite fair, one must recognise that Rubel in America was the first to realise the practical possibilities of offset printing—but when he came to this country and had a rotary offset machine made it failed to make good.

Proceeding to divide offset and tin-printing machines into two main sections—flat-bed and rotary—the lecturer explained first the flat-bed type, in which the flat stone or metal

plate prints first on the blanket, which in turn transmits the impression to the material to be printed. Pointing out the similarity between the flat-bed offset machine and the tin-printing machine, he remarked that it was a very simple matter to convert a flat-bed tin-printing machine into a flat-bed offset machine, modifications of feed and delivery apparatus being all the alteration necessary. In regard to the rotary type, Mr. Heywood pointed out that the first efficient rotary tin-printing machine was made by Messrs. Geo.

speed, 3,500 per hour, at which it can be comfortably hand-fed, it being quite a common occurrence for an operator to make fifteen to twenty changes in a day, and print 5 to 10,000 sheets. Transferring cost is reduced to the very minimum, and its convenience and speed enable short runs to be produced much more economically than by any other known method. For longer runs it is also most economical, an output of 45-50 reams a day being quite a common occurrence on a straightforward run. The space this machine occupies

New Two-Colour and Perfecting Rotary Offset with P.S.U. Delivery.

Mann and Co., Ltd., in 1903, and it was a modification of such a machine that produced the rotary offset.

Principle of Rotary Offset.

Explaining the principle of the rotary offset machine, the lecturer showed the Mann Standard Model, and remarked upon its close similarity to the tin-printing machine, pointing out that it involved no change of plate, blanket cylinders, inking, damping, drive, or tripping mechanisms, but that a rotary tin-printing machine could be converted by merely reducing the diameter of the top (or impression) cylinder to one-half, and arranging the feeding mechanism and delivery apparatus for paper instead of tin, and that a direct rotary machine could be similarly converted by adding a two-revolution cylinder, so that the middle cylinder could be fitted with a rubber blanket.

A machine which the lecturer explained at some length was the Mann "Baby" (Demy Folio). He claimed that this machine is invaluable for short runs owing to the very high

is 5 ft. 8 in. by 4 ft. 4 in., and the horse power required only $\frac{3}{4}$.

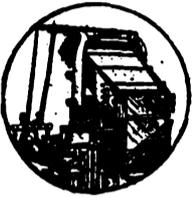

Dealing then with the Mann Standard Model, Mr. Heywood pointed out that it is built on the well-known two-revolution principle, carrying with it many advantages, fully appreciated by the practical lithographer. This machine is the one on which the Mann reputation has been built up, and its popularity is accounted for not only by its versatility but also by its simplicity for the operator and its great reliability.

An interesting new machine was next described. Photo-lithography having now become a pronounced success, a demand has arisen for a machine which will produce work hitherto regarded as strictly typographic, running at the highest possible speed at which it is possible to handle paper. This demand is met by the Mann Rapid Rotary Offset machine, which is built on the single revolution principle, adapted for any make of automatic feeder, and fitted with a pile or falling delivery, the pile delivery being entirely automatic, no adjustment being re-

An analysis of your newspaper will reveal an astounding amount of hand display composition which should be set on Display Linotypes.

THE hand composition in your paper is so scattered that perhaps you think it does not amount to much. But if you will paste on a roll of paper all the display lines which appear in any one issue of your newspaper, you probably will be surprised to see how much type matter is still being set in your printing works in the old and expensive way.

Display Linotypes have made it possible to set 98% of any newspaper mechanically. You can calculate the saving of time, labour, and floor space you could effect by adopting all-slug composition. By adding one or more Display Linotypes to your installation of these machines, not only would your composition be quickened, but the make-up would be simplified and distribution abolished.

Ask us to analyse your newspaper for display hand-composition waste, and report to you what you can save by setting display matter as straight-matter on the Linotype.

quired for different thicknesses of paper. The machine is at present made in double demy and demy sizes, but larger models will follow almost immediately.

Two-Colour and Perfecting Rotary.

The lecturer laid special stress upon what he claimed to be a unique machine, the Mann patent Two-Colour and Perfecting rotary offset machine. Its key-note, he said, was simplicity, it having only three main cylinders, and, size for size, occupying very little more space than a single-colour offset. Further, when being used as a two-colour machine the grippers do not release the sheet until both colours are printed, so that there is no possibility of bad register. The advantages of the two-revolution principle are retained. The machine was not to be recommended for short runs, but for anything of 25-30 reams and over its capacity was enormous. Mr. Heywood pointed out that the great feature of the machine is its ability to do perfecting as well as two colours, the time taken to change over from one to the other being only a matter of a few minutes. The machine is, therefore, admirably suited for letterpress work of every description, and the fact that both sides of the paper are printed simultaneously, entirely eliminates any danger of set-off. Recent developments in newspaper printing, to wit the production of the *Blackpool Times* entirely by the photo-litho offset process, bring this machine very much into prominence, as it is eminently suitable for such productions, on account of its adaptability and great output.

Perhaps the most interesting machine shown was one which we illustrate herewith, namely, the new model which was recently shown at the Printers' Exhibition. This new machine retains all the unique features of the previous model, but many improvements have been added, the principal of which are:—

Front-delivery, printed side up, with the sheet under positive mechanical control throughout its journey from feed board to pile delivery board; increased speed—the Quad Demy model being guaranteed up to a speed of 2,300 per hour (equivalent to 4,600 on a Single Colour Machine) when printing either two colours or perfecting; pile or falling delivery—the delivery board falling the correct amount for the thickness of the paper automatically, no adjustment at all being required by the operator for different thicknesses of paper; improved driving mechanism, consisting of single pulley friction clutch drive, running in ball bearings, this being claimed to be the simplest and most efficient drive yet designed for any printing machine, being perfectly silent in action, and sensitive to the most delicate touch.

Advantages Provided by Offsetography.

After throwing upon the screen some excellent views of Messrs. Mann and Co.'s extensive works at Leeds—showing them both under the conditions of normal activities, and under the special war-time conditions when they performed important service in the production of munitions—Mr. Heywood concluded by emphasising the advantage conferred by the offset process, remarking that no lithographer nowadays considered himself worthy the name unless he had an offset machine of one kind or another in his plant. Points of advantage referred to were: the superb quality of printing obtainable; the fact any kind of paper—even the roughest—could be used, and damping was unnecessary; the extraordinarily small quantity of ink required; the necessary pressure being reduced to one-third, with consequent minimisation of paper-stretching and reduction of wear and tear. Lithographers were now, said Mr. Heywood, "getting their own back," as letterpress matter was being produced more economically by offset than by any other process, half-tone or screen work could be done on practically any surface of paper, moreover colour work was being done which was impossible to letterpress methods or to tri-colour blocks. In rotary offset there was no make-ready, no type to wear out, no spaces or quads to rise and spoil the work, and no rules to cut the paper. Moreover, the longer the run of printing, the better was the work produced. The numerous advantages of the offset process were attributable to the remarkable resiliency of the rubber blanket. There was a splendid future before offset printing. This future could only be realised as the energies of the lithographer, typographer, photographer, process worker, artist and engineer were applied not individually but co-operatively.

The Discussion.

At the conclusion of the lecture the president expressed his appreciation of the lucid and straightforward manner in which Mr. Heywood had dealt with his subject, and he then threw the meeting open for discussion.

Mr. J. A. B. Reed, as a lithographer, said he endorsed all that had been said by the lecturer on behalf of the offset process. He commented on the strangeness of the fact that the process as used for tin-printing had not at an earlier period found wider application.

Mr. H. Roberts, who mentioned that he had the pleasure of putting down the first machine made by Mr. Heywood's firm, said that offset printing had never received full recognition from letterpress printers, who by its aid could dispense with all their stereotypes and run off at three times the speed.

Mr. H. W. Clayton asked if it was not a P. M. and O. A. member—Mr. A. J. Rowley—who was responsible for the first offset machine.

Mr. Heywood said he remembered that Mr. Rowley some 25 years or so ago had produced beautiful offset work on cardboard and satin on a tin-printing machine.

Mr. T. Ellwood, recalling the days of his apprenticeship when he was connected with experiments in tin-printing, suggested that Hudson and Scott, of Carlisle, were the first to do tin-printing by offset. He referred to American pre-eminence in offset printing, and hinted that this must be due to advantages in machinery as he did not believe the British printer to be behind the American in skill.

Mr. Heywood said he thought an early patent by Barclay and Fry was the first record of printing from rubber on tin, but Hudson and Scott might have been the first to put the process to successful use. Going on to speak of printing in America, Mr. Heywood stressed the wide use there of rotary machines, and said that Americans were much more ready than British printers to put their money into new machinery and try it out. What was holding offset back in this country was that the process was not up to the machines. Mr. Heywood referred to the *British and Colonial Printer and Stationer* of November 13th, 1913, in which appeared a report of a previous lecture on offset which he had delivered before the P. M. and O. A., and he drew attention to the fact that when speaking in 1913 he stressed the need for skill on the part of the printer, pointing out that without the intelligent co-operation of the printer, even the most perfect machine in the world would be a failure.

Mr. T. Peer spoke of his being in charge, 25 years ago, of a machine at Cohen and Co.'s which was made to print glass from a rubber blanket. It was not successful with glass, which was found to break in the printing, but it printed on paper, tin and even on brick.

The lecturer corroborated Mr. Peer's recollection.

Mr. A. E. Jarvis, who has more than once visited the United States, remarked that he noticed American work among the offset specimens exhibited around the room. Pointing to some of these, he said that such work could not be produced at the same rate in this country. He contended we were on the wrong line in machinery, and suggested that the chief mistake was in the use of one blanket per colour instead of only a single blanket. He looked upon the Mann offset as the best machine if they were only to put in one machine; it would produce work ranging from tissue paper to board, and from the lightest screen work to the heaviest colour printing. But he was interested to see the Mann small cylinder machine designed for fast running. We needed faster machines. In the States they were running machines twice the size at nearly twice the speed. Referring to the *Blackpool Times*, which was among the specimens displayed, Mr. Jarvis declared we had no newspaper offset machines in this country which would turn out the copies as quickly as letterpress machines. In Germany, he said, there was a machine running at 6,000 an hour; he thought about 2,000 an hour was the fastest here. Concluding, Mr. Jarvis designated engineers "the most stubborn creatures on earth"; Mr. Heywood, however, had been so reasonable that, if they hadn't been told otherwise, they might have thought he was a printer's manager. (Laughter.) He proposed a vote of thanks to Mr. Heywood, and also to the lantern operator, Mr. Stokes.

The vote of thanks was seconded by Mr. H. W. Clayton and heartily carried, after which Mr. Heywood briefly responded.

Training the Printer.

Throughout the country at the present time a great deal of attention is being given to the training of the printer, and, as is to be expected, the Principal of St. Bride Printing School, Mr. J. R. Riddell, is taking a prominent part. Some time ago he was in Sheffield, giving a lecture on this subject under the auspices of the J.I.C., and last week he gave a similar address to the members of the South-West London Master Printers' Association when he made a strong appeal for greater interest in the training and encouragement of the apprentice when he first enters the printing office. Emphasis was placed upon the need for a careful selection of a suitable type of boy as an apprentice, one possessing a sound general education, which, as the lecturer stated, was the basis of a successful career in the printing trades.

Before the war, said Mr. Riddell, labour was too cheap in this country. Therefore, there was not the same call as there is to-day to buy expensive labour saving machinery and the imperative need of obtaining high production. But, now conditions were changed, it was necessary to take the best and most expeditious means of training labour so that a greater efficiency would be obtained through the adoption of scientific methods, not only in workshop routine but also in the training and control of labour.

The responsibility for the training of the apprentice not only in the workshop but also the necessary supplementary training in a technical institute did not lie solely with employers. The workers themselves had an interest and must accept a measure of responsibility for the proficiency of the rank and file.

It was advocated that a pre-workshop training should be given in a technical institute—but one equipped and directed to meet the needs of a modern business. It was claimed that this would do much to remove many of the objectionable habits which an apprentice acquires when he first goes into the workshop. Further, it would prove a sound commercial proposition for employers even if they were to be responsible for the cost of this pre-workshop training.

Mr. Riddell made a strong appeal for the encouragement of the "craft spirit" which enables a man to have a pleasure in his work and which if developed might pave the way to solving much industrial unrest.

Interesting information was given in relation to the new printing school and the valuable financial support forthcoming from those associated with the printing and allied trades. Reference was also made to the new examining body of the Stationer's Company and Printing Industry Board, who arranges examinations held periodically in Stationer's Hall.

A keen discussion led by the president (Mr. Wise) took place after the address, a number of those present supporting Mr. J. R. Riddell in the views which he had put forward.

A vote of thanks in eulogistic terms was proposed by the president and enthusiastically carried by those present.

Belgian Printing and Postage.

Some Birmingham business houses, I hear, have had a rude shock, writes a *Daily News* contributor. Succumbing to tempting quotations from Belgian printers, who made no secret of the fact that their privileged position was due mainly to the lower rates of wages prevailing in Belgium, a number of firms established at the Mecca of Tariff Reform placed with them trial orders for commercial stationery. Last week the orders were delivered through the post, with a demand for excess postage amounting, in many instances, to 10s. or more—a very substantial proportion of the total cost. The Belgian printer sent the parcels at printed matter rate, but forgot that under our new postal rates stationery has no privileged position. Each parcel was therefore promptly surcharged at double the difference. In several instances, I learn, addressees declined to accept delivery. Therefore the parcels will be returned to the senders with a demand through the Belgian postal authorities for the excess postage. If the Belgian printers decline to accept responsibility, upon whom will fall the expense of the transport of these parcels across England and back again, and the extra clerical work involved?

Trade Notes.

THE annual dinner of the London Master Printers' Association has been arranged for March 29th, at the Connaught Rooms.

THE Association of Master Printers of W. and N.W. London held their usual monthly lunch at Pagani's, Great Portland-street, W., the president Mr. E. W. Wormald presiding. There was a good attendance of the members and Mr. A. Williamson and Mr. H. R. Danford opened an interesting discussion on overhead charges.

AMONG the week's receiving orders under the Bankruptcy Act is that of Jacob Schaffer (trading as Mark Miller), 6 and 8, Ward-road, Stratford, paper bag manufacturer. Public examination, April 11th, at Bankruptcy-buildings, Carey-street.

A BIG fire broke out last Thursday evening on the premises occupied by Allen, Maxey, and Co., Limited, envelope makers, manufacturing stationers, and paper merchants, at the corner of Upper Thames-street and Dowgate-hill. The firemen's work was difficult owing to the great weight of stacked paper on the several floors. Within an hour the whole of the premises with the exception of the ground floor were gutted. The building was on six floors, Allen, Maxey and Co. occupying the upper five.

ONE of the most destructive fires experienced in Dublin occurred last week at Messrs. Cahills printing establishment, Ormand Quay. The extensive works were completely destroyed, and the damage is roughly estimated at about £50,000.

THE *Westminster Gazette* will be issued at one penny instead of twopence on and from Monday next.

MR. WILLIAM AUSTEN-LEIGH, of Hartfield, Roehampton, senior Fellow of King's College, Cambridge, and formerly clerk in the House of Lords, who died on November 27th, a great-nephew of Jane Austen, and uncle of Mr. R. A. Austen-Leigh, left estate of the gross value of £21,538, with net personalty £20,471.

MR. HERBERT JAMESON WATERLOW, Past Master of the Stationers' Company, who died on November 13th, aged 76, left £6,519.

THE late Mr. Charles Edward Jerminham, better known as "Marmaduke" of *Truth*; for a short time editor of *Vanity Fair* left £2,161.

MR. EDOUARD LEBEY, ex-director of the Havas Agency, died in Paris on Tuesday, at the age of 73.

THE funeral took place, on Friday, at Smithdown-road cemetery, in the presence of many of his old colleagues, of Mr. Frederick M. Woodmansey, who for more than forty years was a member of the *Daily Post* and *Echo* composing staff, and had only recently retired owing to failing health.

THE death has taken place at East Witten, Weneleydale, of Mr. Christopher Towler, who for over thirty years was a well known figure in the newspaper world.

THE concluding section of the Britwell Court sale at Messrs. Sotheby's on Friday raised the total for the whole portion to £80,250 18s. od., of which it is estimated that about £65,000 represented Dr. Rosenbach's purchases for America.

NUMBER one of the *Schoolgirl* will be on sale on Tuesday, February 21st.

AN armed guard of the I.R.A. was posted in the Dublin offices of the *Freeman's Journal* on Sunday night to protect that paper and its staff from an anticipated attack by the Republicans. The cause of offence is said to be a political cartoon which appeared in Friday's issue of the paper. It is stated that an attempt was made to kidnap the proprietor of the *Freeman's Journal*.

THE *Monmouthshire Evening Post* ceased publication last Thursday.

THE cheap edition is cheaper to-day says a writer in the *Times*. Many bookshops and bookstalls are offering at 1s., some at 10d., and a few even at 6d., books which formerly could not be bought under half-a-crown.

THE annual meeting and dinner of the Papermakers' Association will be held in London on March 24th, and the next general conference of the Technical Section will take place on the day previous, March 23rd.

THE annual winter dinner of the Stationers' Social Society will be held on March 4th at the Hotel Cecil, 6 for 6.30. Mr. Lionel Savory, the president, will be in the chair.

TENDERS for the following adjudications will be received at the undermentioned office on the date stated:—Surveyor-General of Egypt, Giza (Mudiriya).—March 1st, 1922.—Supply of 1,632 reams of various classes of map-printing paper.

THE death is announced of Mr. James Ramsbottom, who for nearly 60 years had been connected with the firm of paper merchants, Ramsbottom, Lyons and Co., Ltd., Manchester

THE Paris editions of the *Daily Mail* and of the *New York Herald* appeared on Friday owing to a strike of their linotype operators, as single sheets of photographically reproduced typescript. On Wednesday the compositors presented a demand for increased pay, although, according to a statement by the employers, they were already receiving 43 francs more weekly than the scale demanded by the French Union of Linotypists.

LIMITED liability companies in the paper and stationery trade increased their nominal capital last year by £638,027 and printing and publishing companies by £2,618,090.

A TABLE compiled by Jordan and Sons, Ltd., shows that during the past year 134 stationery companies were registered at Somerset House with a capital of £1,669,150. Newspaper companies were 43, capital £362,600, and under the heading of publishers there were 77 registrations, the total capital being £651,700.

EXPORT of paper of all kinds, except printed paper and paper manufactures, was prohibited by the Rumanian Council of Ministers up to, it was understood, February 27th. Export of tarred paper, rags of wool, linen and hemp, and cellulose was subject to special authorisation and after Rumanian internal requirements had been met.

THE revised rates of stamp taxes payable as from January 1st under the United States Revenue Act in respect of playing cards is 8 cents per pack of not more than 54 cards.

DURING 1921 approximately 200,000 work-people in the paper, printing, etc. group of trades received net reductions in weekly wages representing a total of £54,000. In the previous year the same number of people received net increases amounting to £122,000 in weekly wages.

IN the list of goods which are now exempt from the payment of export duty in gold on entering Portugal are common printing paper (ordinary news-print); books, pamphlets and catalogues in foreign languages, stitched or in loose sheets, and atlases and maps with inscriptions in foreign languages; and type and ornaments for printing.

A WIDE-SPREAD discussion has been taking place as to whether the novel has lost its popularity. The preponderance of opinion is against that advanced by Miss Cicely Hamilton that the novel is out of favour. Instead of reading less, people are reading more and more, though tastes may alter. Therefore, print is bound to be consumed in ever-growing quantity, in spite of temporary set-backs due to cycles of depression.

THE western section of Lake Constance is frozen, and it is possible to walk on the ice from the island of Reichenau to Constance and to Hagnau. In 1880 the Bregenz editor Anton Flatz carried a press on to the middle of the lake and printed some copies of the *Gazette of Lake Constance*, now a very rare newspaper.

ON "Woes of the New M.P.," Lieut. Commander the Hon. J. M. Kenworthy, R.N., M.P., has a very racy article in the February issue of *Pearson's Magazine*.

IT is a good sign that Messrs. Strong, Hanbury and Co., Ltd., have issued their first book of specimens since the outbreak of war. The book is got up on the loose leaf principle, so that alterations and additions can be made. An equivalent weight table at the commencement will be found useful as well as the tab indexing for the different grades of papers and boards, which are very extensive and attractive.

IT is complained in Montreal that although news print, the basic material of newspapers, has dropped from \$187 to \$70 a ton within less than a year, the newspapers are still maintaining inflated war prices both in regard to the retail price of newspapers and the cost of advertising.

MESSRS. CHAS. BAKER AND SONS (PAPER-MAKERS), LTD., have been appointed, as from January 1st, sole agents for The Hartlepool Paper Mill Co., Ltd., West Hartlepool, for the whole of the United Kingdom and Ireland.

Previously they have been agents for this particular mill for the Midlands, London, and the South of England only.

HOLLINGSWORTH AND VOSE Co., paper-makers, Boston, Mass., have selected for the decoration of their 1922 almanac the Indian statue of Massasoit, "the Great Sachem of the Wampanoags," who in 1621 was the protector and preserver of the Pilgrims.

THE late Mr. John Town, of Headingley, Leeds, for many years head of Joseph Town and Sons, Ltd., papermakers, of Leeds and Keighley, a magistrate for the city, died December 3rd, left £39,511.

THE Anglo Norse Paper Agencies, Ltd., have been appointed sole agents in the United Kingdom for Aktieselskabet Holmen-Hellefos, Housund, Norway, makers of news-print.

Trade Union Matters.

THE executive committee of the Printing and Kindred Trades Federation met on Tuesday at Bristol.

APPRENTICES.—The London Master Printers Association has appointed a special committee to consider the draft apprenticeship scheme submitted by the Joint Industrial Council with a view to an entirely satisfactory scheme being adopted by both sides

THE annual general meeting of the Leeds Typographical Society will be held on Saturday at the Leeds Philosophical Hall, when the subject of the borrowing and lending of standing type between newspaper offices in the town will be brought forward for discussion.

THE quarterly report of the Leeds Typographical Society states that the printing trade is looking in vain for the much-talked-of improvement in employment which it was asserted would follow the reduction in wages. Judging by the number of men signing the unemployment book, local trade is becoming worse. During the whole of last year the branch officials had paid out no less than £6,651, this being inclusive of grants from the Association. In addition, the branch had paid out £3,143 on account of the State Unemployment Insurance.

THE T.A. HALF-YEARLY REPORT.—After a long run of prosperity, the T.A. reports a decrease in membership of 651, making a total membership of 30,583. During the half-year 135 members have died at an average age of 52.57 years. There has been a decrease of £4,888 in contributions and of £104 in entrance fees and fines. The superannuation fund levy realised £670 8s. There is an increase of £15,740 in out of work benefit; State benefits amounted to £21,000. There are decreases in superannuation benefits, £1,886; funeral payments, £252; strike benefits, £3,187. There is an increase in incapacity and special grade benefit of £41 13s. 11d. On the half-year's working there is a loss of £303 6s. 1d. The chief items of expenditure for the half-year are salaries, £2,141 19s. 9d.; delegate meeting, £3,240; printing and stationery, £1,779.

Absorbing Qualities of Paper.

An interesting comparative study made between a transfer paper absorbing ink perfectly (a) and another with a limited power (b) shows the following microscopic analysis: (a), 30 per cent. hemp rags, 45 per cent. cotton, 25 per cent. chemical fir wood; (b), 100 per cent. chemical fir wood.

The *Wochenblatt* gives the following composition for an excellent transfer paper:—Bleached cotton, 20 per cent.; sulphate poplar, 20 per cent.; soda birch, 20 per cent.; soda fir, 10 per cent.; tissue paper clippings, 10 per cent. The absorbing power is influenced by beating and composition.

The Troubles of the Trade.

Central London Printers' Discussion.

A discussion more than usually stimulating and interesting took place at the monthly meeting of the Association of Master Printers of London Central Districts on Wednesday, last week, when the subject of "Unemployment in the Printing Trade" gave opportunity for expression of views upon various matters that are causing trouble to the London printer. The president of the Association, Mr. J. D. McCara, F.C.I.S., was in the chair, and the audience included many prominent representatives of the printing trade.

Mr. Burchell's Lead.

Mr. Burchell set the ball rolling with a characteristically vigorous and outspoken address. After a few words on the subject of high wages and the trade union responsibility, Mr. Burchell went on to the question of the postal rates, and indicated the immense body of opinion that has been expressed demanding a return to the $\frac{1}{2}$ d. postal rate on printed matter, and pointed out that the present postal rates are a prolific cause of unemployment. Among the effects of the abolition of the $\frac{1}{2}$ d. stamp, he gave examples of the sending of publicity matter for posting on the Continent, the opportunities offered to Continental printers for unfair competition, and the loss of revenue to the Post Office because of the increasing practice of delivering by hand. In looking round for remedies for unemployment, he suggested the grading of wages according to ability and usefulness of the worker. He called for greater co-operation between employer and employee, and suggested that the rules of trade unionism needed overhauling; also that the unions ought to use more discretion in the admission of men to their ranks. Complaining of country competition as a handicap to the London printer, Mr. Burchell claimed that London work should be done by printers whose offices and works are in London. Mr. Burchell concluded by moving a resolution to be sent to the Premier, the Postmaster-General, the Chancellor of the Exchequer, the Chairman of the Committee of the Post Office Advisory Council, and to certain members of Parliament. The resolution, as passed unanimously later in the meeting, was as follows: "That this meeting of the Association of Master Printers of the London Central Districts, held at Stationers' Hall on Wednesday evening, February 8th, 1922, to discuss means and remedies for the decreasing of unemployment in the printing trade, do respectfully urge the Postmaster-General immediately to re-establish the halfpenny postal rate on printed matter and reduce the postal rate on post cards, the urgency being the weekly loss to labour in the printing and allied trades, a loss directly caused by the high postal charges."

Mr. Crowlesmith on Co-operation.

Mr. J. Crowlesmith (of Messrs. Hazel, Watson and Viney, Ltd.) was the next speaker and in an outspoken address laid special emphasis upon the need for fuller co-operation—including profit sharing—between employers and employed. Referring to the complaints of certain university professors and others as to the high cost of books, and a suggestion that had been made to boycott books until prices were reduced, Mr. Crowlesmith said such threats had been made before, and they left him absolutely cold. Cost was a term which had to day to be interpreted from a quite different standpoint than before the War. Before the War books and printing of all kinds were a great deal too cheap. Men were undoubtedly underpaid and master printers were not getting anything like a fair return on their capital and energy. Present costs, however, must come down, and the question that had to be faced was how that could be done in justice to printers as competent business men, and at the same time pay every grade of labour engaged in the production of printing a wage that would enable them to live in comfort and to enjoy some of the luxuries of life. That could be done, but he had no sympathy whatever with that everlasting cry that wages must come down. This, however, did not mean that he supported the present scale. Wages must synchronise to some extent with the cost of living. But they must not give either the public or the workpeople the impression that they meant to bring down wages below the level he had indicated. They must stand resolutely to the position that the value of

printing is entirely different from what it was before the War. How then could they reduce costs? There was first the employers' duty. There were printing works—in London as well as in the country—which were managed in a way which was a disgrace to the employers from the standpoint of efficiency and economy of administration. Then on the side of the workers, if costs were to be revised, "ca' canny" must be killed. Instances were given of restriction of output in the operation of machinery. Whereas about 5,500 was about an average output now obtained from a monotype perforator, they should be getting 8,000. Trade union restrictions on output must be got rid of. If they were to do this there must be a greater spirit of co-operation between masters and workers than ever before. They must take their workpeople more into their confidence and meet them not as "hands" but rather as colleagues. They must consult more and more with their workpeople. He was also an advocate of profit-sharing and of supporting legitimate unemployed in their own trade. The postal difficulty was only a passing phase; it was the broader outlook that would count in the future, and it was the ideal of brotherly co-operation that they had to work to.

Mr. T. P. Howard spoke forcibly in favour of the bonus system as an aid to increased production, and also broached the subject of a tariff on imported printing.

Mr. W. J. Boyle expressed agreement with Mr. Crowle-Smith's plea for greater co-operation. He objected to the previous speaker's suggestion of a tariff.

Mr. Oscar C. Griffith, speaking at some length, laid special stress on the need for a reduction of wages in accordance with the fall in the cost of living. He thought it was time the trade unions themselves realised their duty in this respect. In this connection he expressed regret that the position of London in competition with the provinces had been prejudiced by the action of the L.S.C. in refusing to agree the full 7s. 6d. reduction.

Mr. A. E. Goodwin being called upon to speak, indicated that the Federation of Master Printers were fully awake to the various vital points which had been touched upon. In regard to bonus schemes and profit-sharing, he pointed out that the printing industry seemed the most difficult of all trades in which to apply such schemes. Mr. Goodwin deprecated the suggestion of a tariff on imported printing, which might in the end be extended to imported paper and suggested that the quality of British printers' productions gave a sufficient protection, but indicated the efforts that were being made in connection with the Merchandise Marks Act to provide that any printed matter sent into this country should have the country of origin marked upon it when it came into the hands of the buyer.

Mr. W. Whyte referring to bonus schemes and other attempts to offer increased encouragement to the workers, remarked that the strongest objections to attempts to better the workers' conditions always came from the trade unions themselves.

Mr. C. H. Lea suggested that an important source of weakness in the trade was that employers did not make up their minds very definitely as to what was the right principle to follow, and then fight for that principle at all costs.

The meeting concluded with a vote of thanks to Mr. Burchell.

Papermaking Technology.

The Grade 1 examination in technology in papermaking under the auspices of the City and Guilds of London Institute will be held in June next. It had been decided by the Board of Education that this examination should be abolished, but owing to the representations made by the Technical Section of the Papermakers' Association, it has been reinstated. Accordingly, it is hoped that every inducement will be afforded by papermakers in the country to enable students to take the examination, and thus demonstrate to the authorities that it is advisable to continue this particular examination. The examiners, by the way, are Mr. Arthur Baker (chairman of the Technical Section) and Mr. George Lake (chemist to Messrs. Olive and Partington).

AN Advertisement is always working.

Mr. Naylor on Postal Rates.

Maiden Speech in the "House."

Mr. T. E. Naylor has not been long in making his maiden speech in the House of Commons and it was made on a subject of vital importance to the printing trade. He got his opportunity during the discussion on the Labour Party's amendment to the address last Thursday, February 9th, dealing with the question of unemployment. The member for South-East Southwark spoke for twenty minutes, without notes, and seconded the amendment moved by Mr. Arthur Hayday on behalf of the Parliamentary group. The following is part of his speech on this occasion:—"May I make one reference to what I consider to be a vital cause of part of the unemployment now existing? The Postmaster-General has been justly criticised for increasing postal rates to the extent he has done. We who represent the workmen are constantly being told that what is wanted today to improve trade is, if possible, to reduce the cost of production. There are some of us who agree and some who disagree with that advice, but we are bound to admit that the advice is economically sound. If you want to increase the demand for goods, and therefore the demand for the labour which makes those goods, it is obvious that the cheaper the goods can be made, the greater will be the demand for them. Yet what do we find? We find a Minister of the Crown is prepared to increase the postal rates and thus add to the burden on what I may call the nerve centre of the trade and commerce of this country. The right hon. gentleman, in charging an extra $\frac{1}{2}$ d. for circulars, has himself increased the cost of the production of those circulars to the extent of nearly 100 per cent. Of what use is it for us, on our part, to advise our men to do what they can to produce more when they can turn round and tell us that the Postmaster-General himself has increased the cost of production in the printing trade, so far as it affects circulars and catalogues, by 100 per cent.? The right hon. gentleman has already told us that he has done this because he has to make his department pay. Let me remind the Minister for Labour that the Postmaster-General is making his department pay at the expense of the Ministry of Labour. He has, by increasing postal rates and depressing trade put men out of employment, and the revenue that consequently goes to the Post Office is actually drawn at the expense of the Ministry of Labour. These are facts which our men know, and I suggest to the Government that they ought to harmonise the policies of the various departments in such a way that they shall not act unfairly and injuriously to the trade of the country."

The *Daily News* made the interesting comment:—"A dark, keen-visaged, bespectacled, slender man, he spoke with fluency, correctness and self-composure. Listening to him one felt that here was a man fresh from contact with the mean streets, dim recesses and suffering families of . . . Southwark, speaking with all the authority of knowledge derived from first-hand experience of the conditions of life in industrial South London."

Paper Opportunities in Turkey.

From Vienna Mr. G. Herlt writes to the *Papier Zeitung* that the Austrian paper industry promises itself a lively export business when the approaching peace is declared. Formerly Turkey was one of the principal buyers of Austrian paper and paper wares. Before the war Austria sent much news-print and cheap packing paper, in which business Sweden alone competed. Austria also sent much stationery and fine paper.

Turkey itself makes no paper; the only mill was built about thirty years ago, but never got properly to work and is now in ruins. Constantinople and Smyrna are the distributing centres. Printings are in demand as books are being more and more produced in Turkey and, of course, type and printing ink are also required. Every kind of paper is imported more or less and the richer classes like to use the very best of writing paper. Paper bags are also much in demand. All the warehouses are doing good business, and if a special paper and stationery business were started on European lines it would be successful.—M.A.

Institute of Industrial Art.

Public Conference on "Printing."

Printing is only one of the arts included in the exhibition which is being held by the British Institute of Industrial Art at the Victoria and Albert Museum, but the display of printing specimens shown is, though limited, excellent. The style of work favoured is the same as that predominant at exhibitions held by the Design and Industries Association, and the effectiveness of the principles of simplicity and fitness-for-purpose is admirably demonstrated. Much fine poster and other work shows also the big possibilities that lie ahead in the direction of a bold but simple use of colours.

At 4.30 on Friday this exhibition was the scene of an interesting public discussion on the subject of printing, when Mr. F. V. Burridge, principal of the L.C.C. Central School of Arts and Crafts, presided over an audience numbering about a hundred and fifty.

In the course of his opening address Mr. Burridge neatly characterised the purpose of the exhibition as being to show that, in its every use in every-day life, humble or luxurious, printing, if it is to be good, must be informed by art. Referring to a recent severe condemnation of some of William Morris's work he protested strongly against such criticism, saying it showed a crass determination not to understand the artist's effort. Such pieces of work as those complained of fell into their right place in an advancing movement.

Mr. J. H. Mason—who mentioned his having spent about ten years in the general printing trade, followed by about ten years in one of the great private presses, and then rather more than ten in education (he is now on the staff of the book-production section of the L.C.C. Central School of Arts and Crafts)—offered some suggestions as to how these three phases of printing could be co-ordinated with benefit to the craft. Pointing out the disadvantages under which commercial printing is carried out, speed and cheapness being essential, he stressed the service rendered by the private presses in making available to the ordinary printer meticulously designed standards of fine printing. After discussing at some length the requirements of good type faces, Mr. Mason touched on the subject of technical education for the printing trade, emphasising the creative and experimental side of this work and pointing out that students should be trained "in and by printing."

Mr. R. B. Fishenden confined himself mainly to the work of the commercial printer. Putting forth a plea for a revival of English typography, he drew attention to the large proportion of American type used in present-day advertisements. He thought that if British typefounders had not done much original work recently, the blame should attach to the advertiser, who was usually trained on American lines. The advertising man should learn that it is a mistake to make a fetish of American types. Stressing the importance of legibility of type, Mr. Fishenden suggested that the British Institute of Industrial Art in co-operation with the Department of Scientific and Industrial Research might undertake an examination into type legibility. In regard to the value of exhibitions in improving the quality of commercial printing, he thought it would be an advantage to classify exhibits according to the printing methods employed in their production. The progress of the industry demanded that the different processes should be directed on right lines.

Mr. J. W. Jones, in speaking of the difficulty of getting the most suitable boys for the printing trade, blamed the educational authorities for teaching that it was not so great a thing to make something as to write an invoice for it. He mentioned that he had known William Morris personally. Shortly before he passed away, Morris had given him a message for the printing trade. "Tell them," he said, "to keep their work simple." What a pity Morris could not take his own medicine! He thought Morris missed a great opportunity in that he had not produced some inexpensive piece of work—perhaps a pamphlet—which would be within the reach of every boy and girl in the country and would show them how beautiful a thing a page of print could be.

Mr. St. John Hornby, speaking from the standpoint of the private press, said that there was a lot of nonsense talked about the beauties of hand-setting as compared with

Situations Vacant.

A PPLICATIONS are invited for an important and Progressive APPOINTMENT on the STAFF of a large London Printing Works; candidates must have wide, practical experience of all Departments and be fully conversant with the technicalities of the various methods of Printing; good education, personality and address essential.—Write, giving detailed particulars of qualifications and age, to L. S., care Liles Advertising Offices, 4, Ludgate-circus, London, E.C.4. 13907

L ITHOGRAPHIC AND OFFSET TRADE PRINTING.—REPRESENTATIVE wanted, with sound connection amongst Publishers and other users of High-class Printing; excellent opportunity for energetic gentleman who understands the trade. Applications will be promptly dealt with in strictest confidence.—Box 13902.

Situations Wanted.

B OOKBINDING.—VELLUM GOLD FINISHER (age 26), seeks permanency; used to London house, High-class Account Work, Gold Blocking, etc.; able to take charge.—Box 13877.

B OOK-KEEPER (age 38), married, one child; knowledge Typing, Correspondence, Advertising and Press Work, etc.—D/o, Box 13878.

E NGINEER-FITTER; 31, single; some theory; good education; office experience; seeks employment, home or abroad.—Box 18643.

E LECTRICAL FITTER, young, desires charge of Motors (all kinds), Lighting, Lifts and other Electrical Gear.—S., 22, Montreal-road, Ilford. 13908

composition done on the monotype or lino-type. Not one person in a thousand could tell the difference. In regard to William Morris, he remarked that though Morris did not himself produce books at 2s., he had had an enormous influence upon two shilling books.

Mr. Douglas Cockerell, in proposing a vote of thanks to the speakers, pointed out that if a fine book is to be produced the requirements of the binder must be considered by the printer. He condemned particularly the use of fluffy, spongy paper—which would not sew and was an abomination from every point of view.

Fitness Tests for Compositors.

How, out of a group of apprentices, we are to pick those who will make successful workmen in a particular trade? This is the question set in the latest report of the Industrial Fatigue Research Board (No. 16, Three Studies in Vocational Selection, Stationery Office, 1s. 6d. net).

It is answered for the type-setting or composing industry in a manner at once ingenious and practical, says the medical correspondent of *The Times*. The writer of the report, Mr.

E NGINEER, NEWS PRESSMAN, qualified to take full charge as Manager in all departments; used to high-speed, up-to-date Rotaries, Auto-Plate Machinery, Stereotyping, Matrix and Half-Tone Production; accept position home or abroad; live man; steady; good references.—Box 13910.

G ENTLEMAN, with first-class connection amongst Wholesale Binders, Stationers and Box Makers, desires to represent Firm of good standing.—Reference, etc., upon application to Box 13895.

L ITHO: COLOUR PRINTER seeks situation; Flat-bed, Stone or Plate; wages, mutual arrangement.—Box 13906.

M INDER, well up Half-Tone Colour Process, Cartons, Labels, Com., etc.; Wharves, Two-Revs., Bate's and Summits; home or abroad.—Box 13909.

R EADER-COMPOSITOR (n.s.), all-round experience.—T., 114, Conway-road, Southgate, N.14. 13905

Machinery for Sale.

F OR SALE, FLY KNIFE CUTTER, cutting sheets from 17½ in. to 50 in.; 12 reels, standard size gear attached; pulleys with cone driving and shafting included; 32 revolutions per minute; one horse power necessary to drive; will cut one ton per day; perfect condition.—Box 18626.

H OT PRESS AND STEREO POT for sale.—Press, 24 by 18; Hot Plate, 5-ft. by 2½-ft. Cheap for cash.—"Monometer," 115, Strand, London. 13901

P HOTO-LITHOGRAPHER, used to latest methods of Reproduction, has PLANT for sale, or would entertain a Working Agreement with good-class printers.—Box 13904.

Miscellaneous.

F OR DISPOSAL, 100/200 TONS STRAW-PAPER, BROWN PAPER, for rough packing; fire salvage, now dry.—Apply Box 18645.

F OR DISPOSAL, £750, City PREMISES: lease 19½ years; ground rent £25; also small stock Wrappings and Twines, Furniture and Fixtures; telephone.—Box 18646.

L UNCO, "THE INEXPENSIVE TYPEWRITER PAPER." Six colours and White always stocked. Price 1s. 3d. per quarto ream, boxed. Advertising matter free. Trade only supplied.—Please apply for samples to W. Lunn and Co., Paper Mills Agents, 59, Carter-lane, London, E.C.4. 13863

P ORTABLE TYPEWRITER wanted; must be in good condition; state lowest price.—Box 13881.

P RESS CUTTING AGENCIES in principal British Colonies are invited to communicate to Box 13882.

W ANTED, Good Printer to give PRICE for PRINTING CHEAP NOVELS; send sample, lowest price, 208 pages.—A. Carlton, "Colehurst," Worcester. 13911

W ASTE PAPER: ITS RECOVERY AND RE-MANUFACTURE. By James Strachan. A Fund of Information; price 12s. 6d.—Stonhill and Gillis, Publishers, 58, Shoe Lane, London, E.C.4.

B. Musico, M.A., began his work by attempting to find out the qualities essential to a good compositor. He then devised a series of tests calculated to determine the presence or absence of these qualities in a man. Finally he applied his tests to a group of workpeople whose capacities were already known.

This "testing of tests" by practical experience revealed an average usefulness of about 80 per cent. That is to say, the workmen selected by the tests as good workmen were in fact the best compositors, those rejected were the poorest.

This is of great moment to employers, who frequently waste time and energy in training workers who have no aptitude or who possess positive disqualifications. For, as we now know, enthusiasm and physical health in an apprentice, while essential qualifications, are not enough. He must also be equipped with special abilities. Nor can any determination make up their absence.

In the case of the compositor good sight, visual quickness—as opposed to sight—and a retentive immediate memory for words read are all of great importance. Possessed of these he is a quick and accurate worker; in their absence he is likely to be slow and inaccurate. The tests are designed to reveal the presence or absence of these qualities.

THURSDAY, FEBRUARY 16, 1922.

New Wages Movement.

WHILST employers in the printing trade have frequently disavowed any desire to bring wages down to pre-war rates, they have a big consensus of opinion behind them in respect of the request they have now put to the trade unions for a reconsideration of wage scales in view of the reduced cost of living. The present position is that conferences are being arranged—to begin probably next week—and these must be awaited before anything can be said as to the precise terms to be proposed.

The Postal Rates.

THE general suppositions held by printers in regard to the postal estimates were confirmed by the speech of Mr. F. G. Kellaway, the Postmaster-General, on Monday evening at a dinner given by the members of the Reading Chamber of Commerce. Mr. Kellaway said there had been a heavy loss on the working of the Post Office during the first six months of the year, but the last six months would show a substantial surplus, although the year as a whole would show a deficit of two millions. The estimates which he had submitted to the Treasury for next year would show a reduction in expenditure of over nine million pounds, and he hoped to have a surplus on next year's working of more than eight million pounds. How that surplus was to be used was under consideration. He proposed to place before the Government the demands he was receiving that the estimated surplus on next year's working should be devoted to the reduction of charges and to the reintroduction of the Sunday collection of letters. What decision the Government would come to he could not say. He added that the Chancellor of the Exchequer wished to review the financial position of the country as a whole before making any announcement in regard to postal charges. Printers will note with interest the Chancellor's attitude in view of the fact that—as Mr. Kellaway stated in this same speech—"a cheap and efficient postal system is the life-blood of modern commerce." Evidently the louder and clearer the demand for cheaper postage, the less likelihood is there of the threatened sapping of that "life-blood" by a diversion of the Post Office surplus.

Trend of Paper Prices.

WITH monthly price lists coming to hand from a good many sources, we are now able to judge the trend of market price very correctly. Generally speaking, except for a slight downward tendency in the tub-sized paper section, the market is very firm and stable. The question that paper buyers are asking now is whether the time has come to invest in stocks once again. Our own view on this is that buying on the basis of a month or so ahead is a safe and sound policy. It certainly would not be wise to assume that we have reached a concrete level. Far too much depends upon the fundamental services—coal, power and transport. It can safely be taken that a few weeks must now elapse before this subject receives serious consideration at the hands of the authorities concerned. Even when reductions in costs can be achieved, a few weeks must again elapse before the incidence is effectively noticeable in manufacturing operation. On this reasoning, there is no ground for hesitation on the part of the paper buyer who wishes to cover his requirements for the next month or two.

Prices of Strawboards.

THERE has been some inquiry for strawboards recently, a sign that users' stocks are at last giving way. Prices are firm enough now, and it is but rarely that we drop across the absurd cut-throat offers which were a feature of the market some months ago. About £8 per ton is the basis quotation nowadays, and only once recently have we encountered a lower figure; but that was the case of a consignment secured by an outsider from insolvent quarters. Foreign greyboards are much in evidence at a particularly low price; but here, again, it is refreshing to find that there are English makers prepared to offer better quality at very little higher figures.

Paper Trade Wages.

FROM what we can gather the intimation from the employers' side of the paper industry, that there should be a modification of the National Agreement now in force, is meeting with disapproval by the workers. The meeting which was held in Bury on January 28th seems to presage a strong campaign against the proposal. Since then the feeling aroused among the workpeople in the paper mills is being exploited in appropriate quarters, and this was followed by a national delegate conference which met in Manchester last Saturday afternoon. Both the unions in the paper industry are joining hands in the movement.

Standardisation and Trade Customs.

MASTER printers are disappointed that papermakers and wholesale stationers have not incorporated in their revised codification of Paper Trade Customs a larger measure of standardisation, and at their last quarterly meeting the Federation of Master Printers, on the motion of Mr. Howard Hazell, passed the following resolution: "That this Federation communicate with the Papermakers' Association and the Association of Wholesale Stationers and Paper Merchants, and express their regret that these Associations did not consult the M.P. Federation before issuing the revised Paper Trade Customs, and that the Council should endeavour to arrange with these Associations to revise the Paper Trade Customs in accordance with the scheme for the standardisation of paper which has been approved by the Federation of Master Printers." Mr. Hazell explained that, apart from adopting a 500-sheet ream for certain papers, they had not adopted any of the points with regard to size, weights or numbers, and he thought they should be asked to bring their scheme into conformity with the principles the Federation had been pressing for years.

Topics of the Day.

THE detailed recommendations of the Geddes committee have been keenly studied by business men, and in the printing trade the feeling must have grown that "an axe" is badly wanted to cut down the high cost of printing work.

o-o-o

EVEN Mr. Naylor, in his maiden speech in the House of Commons, on Thursday, admitted that the cry for a reduction of the cost of production was economically sound, and agreed that if employment was to be enlarged by an increase in the demand for goods, such goods must be more cheaply produced.

o-o-o

MR. NAYLOR, however, qualified his remarks by stating that the increased postal rates had put up the cost of printing, and of circulating circulars and pamphlets, by 100 per cent., and in face of this he could not see the use of urging workmen to reduce the cost of production.

o-o-o

THERE is no doubt that dear postage is throttling the printing industry of this country to the advantage of foreign competitors. At the same time high wages have a material influence, and practically hold up developments and new enterprises. A greater output on a more economical basis is sorely needed.

o-o-o

MANY firms are producing their own circulars, which means loss of work to the printer. At the Business Efficiency Exhibition now being held at the Central Hall, Westminster, may be seen the "Roneo" Co.'s duplicating machine, also a complete office printing machine, the "Roneotype," and other appliances. These inventions find favour in many quarters, and their extended use is facilitated by the fatal cost of printing.

o-o-o

THERE has been some talk of cheaper books, but Mr. Geoffrey Williams, president of the Publishers' Association of Great Britain and Ireland, writes:—"Paper still costs about double what it did before the war. The price of binding is still more than twice what it was, while on printing there has been hardly any reduction at all, so that it is still nearly three times its pre-war cost. The cure for high prices of books is the reduction of the labour-cost per copy, for labour is the dominant factor in book production, and until this takes place the selling prices of books must remain high."

o-o-o

If trade is to be revived, there must be honest co operation between employers and employed, and some very pertinent remarks on this subject were made by Mr. W. H. Burchell and Mr. J. Crowlesmith at the monthly meeting of the Central London Association of Master Printers, held at Stationers' Hall on Wednesday of last week. It was admitted that costs had to be brought down, up-to-date methods introduced, and the killing of "ca'canny."

o-o-o

THE necessity of reducing wage costs has been frankly recognised by the workpeople in many industries, notably engineering, but, unfortunately, in the printing trade, certain fallacious arguments have been advanced against such a policy.

o-o-o

THE London Society of Compositors are standing out against any further contraction in their wages, and have turned down the request of the London Master Printers' Association for a reduction of 2s. 6d.

o-o-o

IMPORTANT conclusions as to the steps necessary to a revival of business are contained in a memorandum recently adopted by the Executive Committee of the Federation of British Industries. It is a report prepared by the Production Cost Sub-Committee of the Federation's Trade Depression Committee on "The Earnings of Labour and Costs of Production."

o-o-o

THE chief points brought out are as follows: "The greatest element in production cost is wage cost. To secure a substantial reduction in prices we must effect a substantial reduction in wage costs. This can be done either by reducing wage rates or by the workers giving a greater output. The real test must always be what

industry can bear. The only real remedy is to reduce production costs to a point which enables the manufacturer to sell at a price at which business will revive. If price reductions are to be made without impairing the standard of living, the workers must be prepared to give a higher output and, where necessary, longer hours. We realise that we are inviting the workers to make a considerable sacrifice, and the workers must be satisfied that employers are making similar sacrifices. We suggest that all employers should immediately meet workers' representatives and frankly endeavour to arrive at a fair division of the burden."

o-o-o

LECTURING on advertising to the Liverpool University Commerce Society the other day, the Hon. W. Hulme Lever, son of Lord Leverhulme, said that newspapers were the best medium. It is surprising to find how backward printers and even supplying firms are in taking advantage of advertising. Mr. Lever points out the greater the advertising of a business the greater its goodwill. Associated with the printing industry are many excellent organisations, but their objects and aims hardly see the light of day. Mr. Editor no doubt would willingly devote space to the publicity of matters of trade interest, and the advertising department of this paper would also be pleased to quote rates for advertisements.

o-o-o

IN regard to unemployment in the printing trade could not this be ameliorated in some instances by a revision of existing conditions? When we hear that piece compositors on London newspapers (night work) earn from £15 to £20 a week, it must make the distressed "out-of-work" marvel why a proportion could not come his way.

o-o-o

THE writer had brought to his notice the other day the pay-sheets of the piece hands—working 48 hours in a small printing office. Two of the men's wages totalled nearly £14. Three men on 'stab would only slightly exceed this amount, and would mean one less unemployed. Even allowing for the vagaries of human nature—in other words the loss of efficiency owing to lack of stimulus in the way of piece rates—the output of three men would surely be greater than two!

ARGUS.

Personal.

H.M. THE KING on Friday conferred the accolade of Knighthood upon Sir Meredith T. Whittaker, the well-known Scarborough master printer, Col. Joseph Reed (chairman of the Press Association) and Sir Charles Higham, whose names appeared in the list of New Year Honours.

AT the King's levee on Tuesday Sir Rowland Blades, Bt., M.P., was presented to His Majesty on being made a Baronet.

VISCOUNT BURNHAM, President of the Press Club, will preside at the House Dinner on Saturday, the 18th inst., when the principal guests will be Mr. Winston Churchill and Sir Robert Horne.

SIR FREDERICK BECKER, accompanied by Lady Becker, leaves on the 18th inst., on the "Aquitania," for New York.

MR. GEORGE HARVEY, the American Ambassador, at a banquet of the National Advertising Society at the Connaught Rooms on Monday gave some entertaining reminiscences of his early journalistic career. Speaking of his first job on a small paper, he said, "The staff was so ill-fed that it had not the energy to be disloyal. I was the staff. I was also the editor and compositor."

AMONG those who attended the fourth annual festival of the National Advertising Society and General Benefit and Benevolent Institution at the Connaught Rooms on Monday were the Lord Mayor and Lady Mayoress, Lord and Lady Burnham, Lord and Lady Riddell, Sir Frederick and Lady Bowater, Sir Frank and Lady Newnes, Mr. J. Gomer Berry, Mr. and Mrs. Walter Haddon and Mr. Edgar Fifoot.

MR. PERCY BARRINGER, president, and the Council of the Stationers' Association of the

United Kingdom are giving a dinner at the Hotel Cecil on Friday, March 3rd, at which the Lord Mayor and the Sheriffs will be present.

MR. J. A. SPENDER, political director of the *Westminster Gazette*, is reported to be retiring from that position.

SIR ROBERT BAIRD, managing proprietor of the *Belfast Telegraph*, has been appointed a commissioner of the Belfast Harbour Board.

MR. S. M. BATEMAN will be chairman and Mr. R. H. Berry vice-chairman at the annual bohemian concert of the Printers' Managers and Overseers Association on Monday at the Cannon-street Hotel.

THE annual dinner of the National Association of Wholesale Stationers and Paper Merchants took place on Thursday night at Claridge's Hotel, with Mr. Jas. W. Cooke (the president) in the chair.

MR. LIONEL SAVORY, the new president of the Stationers' Social Society, will preside at the annual winter dinner of the society, which, as already announced, will be held at the Hotel Cecil on Saturday, March 4th.

WE regret to learn that Mr. E. S. Lendrum has met with an accident to his knee, one of the small bones being fractured. He will be laid aside for a week or two.

MR. G. A. BROWN, manager of the *Rangoon Times Press*, will shortly pay a visit to this country.

MR. HERBERT MCINCH, of the reporting staff of the *Irish Times*, has been appointed a member of the Official Reporting Staff of the Northern Parliament. On the occasion of the departure from Dublin his colleagues presented him with a valuable gift as an expression of their high esteem.

MR. GEORGE D. T. TAYLOR, of Messrs. Neill and Co., printers, Edinburgh, has been presented with a gold watch by his fellow employees on completing 50 years' service as overseer of the warehouse department. The directors of the firm have presented him with a roll of notes in honour of the event.

MR. R. S. JONES gave an interesting address before the members of the Newport Rotary Club last week on "Paper, its Manufacture and Uses."

MR. PERCY IZOD has been appointed manager of the new financial publicity office opened by St. James's Advertising and Publishing Co., Ltd., at Gresham House, Old Broad-street, E.C.2.

MR. J. A. LLANAGHAN has been at Manchester appointed editor of the *Co-operative News* and allied publications. He was assistant to the late editor, Mr. W. M. Bamford.

Postal Rates Protest.

Journalists' Plea for Revision.

At the Institute of Journalists' (London District) meeting on Saturday, Mr. S. J. Sewell (hon. secretary) moved, and it was unanimously resolved: "That the present postal rates on British monthly trade papers

"(1) Confer at least 50 per cent. advantage on the foreigner who sends his papers here, we having to do the delivery free at a cost of ½d., although our publishers have to pay our Post Office 1d. for the same service, but since other countries are ignoring weight, the balance against us is much greater. (2) Tend to encourage our publishers to print and post abroad, thus saving 50 to 75 per cent. on postage and 25 to 50 per cent. on printing.

"We therefore, in the interests of British labour and commerce, request our Government: (a) To register monthly trade journals as newspapers, as is done in every other country; also to make the inland postage of all newspapers ½d. for the first two ounces, as formerly, the same rate as applies to papers sent to or from abroad; (b) To insist that foreign trade papers entering the United Kingdom be treated as our Post Office treats ours—viz, no delivery unless properly stamped; (c) To endeavour to arrange an inter-Empire rate for our trade papers similar to that which applies to Canada."

Commercial Intelligence.

DIVIDENDS AND REPORTS.

GEORGE OUTRAM.—In the report of George Outram and Co., the Glasgow newspaper proprietors, in respect of the year ended December 31st last, the profits are given at £99,100, as against £68,400 for the previous twelve months, and after deducting £20,000 for debenture reserve, £15,000 for plant renewal reserve, £10,000 for general reserve and £2,000 for staff pension fund, there remains sufficient to pay a dividend of 10 per cent.—as against 8 per cent. last year—leaving £18,900 to be carried forward, which compares with only £1,000 brought into the accounts.

NORTH OF IRELAND PAPER MILL.—Directors state that on account of the delay in arriving at a settlement respecting E.P.D. the accounts cannot finally be closed, and they have considered it advisable to postpone the annual meeting.

NEW COMPANIES.

C. H. MILNES, LTD.—Capital £12,000, in £1 shares. To take over the business of a printer, label manufacturer and bookbinder carried on at St. James' Press, Gerrard-street, Halifax, as "Charles H. Milnes." Private company. First directors: C. H. Milnes, C. S. Harrison and T. A. Francis. Registered office: 5, Gerrard-street, Halifax.

MURRAY-JOHNSON, LTD.—Capital £120, in £1 shares; wholesale and retail stationers, account book manufacturers, printers, lithographers, die sinkers, engravers, bookbinders, etc. Private company. Directors: W. A. Johnson and A. F. Johnson. Registered office: 12, Union street, Borough, S.E.1.

LONDON AND PROVINCIAL PRESS AGENCY, LTD.—Capital £1,000, in £1 shares; advertising agents and contractors, general advertisers, printers and publishers, etc. Private company. First directors: F. G. Harradence and T. Eaton. Registered office: 92, Market-street, Manchester.

BRITISH EXPORT TRADE CO., LTD.—Capital £1,000, in £1 shares; printers, newspaper and general publishers, bookbinders, booksellers, stationers, papermakers, etc. Private company. First directors are: T. Shepherd and T. H. Blenkin.

JAMES HAMILTON, LTD.—Capital £5,000, in £1 shares; printers, lithographers, engravers, etchers, die sinkers, photographers, manufacturing stationers, etc. Private company. First directors: J. Hamilton, junr.; Mary A. Hamilton, J. Hamilton, senr., and S. Hamilton. Registered office: 213, Buchanan-street, Glasgow.

COVENANT PUBLISHING CO., LTD.—Capital £10,000, in £1 shares; to take over the business carried on at 14, Fetter-lane, E.C., as the publishing department of the British-Israel-World Federation; to promote a company for carrying on the publication known as the *National Message* published by the British-Israel-World Federation. First directors: Brig.-General Coventry Williams, Lt.-Col. C. V. R. Wright, Major J. Knowles, H. Garrison and Rev. W. P. Goard.

LORD AND THOMAS, LTD.—Nominal capital £10,000, in £20 shares; advertising agents, organisers and conductors of plans for press and poster advertisement, publishers and preparers of literature and materials connected therewith, printers, stationers, engravers, electrotypers, etc.; also to act as intermediaries between the advertiser on the one hand and the publishers, printers, engravers, electrotypers, billposters and others on the other hand, etc. "Private" company. First directors: Herbert P. Cohn, Albert D. Lasker, R. H. Lee, J. W. Cofer, T. Outen and D. Earle. Registered office: Mowbray House, Norfolk-street, Strand, W.C.

LABELS, LTD.—Capital £100, in £1 shares; manufacturers of and dealers in labels of all kinds in paper, metal, celluloid and all other materials, etc. Private company. Subscribers: J. S. Mason and W. J. Knight. Registered office: 39, Victoria-street, S.W.

SHUTTLEWORTHS (MUSIC), LTD.—Capital £10,000, in £1 shares; music publishers, agents and dealers. Private company. First directors: J. Grange, R. Grange and Mrs. M. Parkinson. Registered office: 33, Darley-street, Bradford.

IMPERIALADS, LTD.—Capital £5,000, in £1 shares; advertisers, advertising agents and contractors, and journalists, printers, newspaper proprietors, publishers, etc. Private company. Subscribers: J. P. Stoddard and A. Fryers.

LISTER, EVANS AND CO., LTD.—Capital £1,000, in £1 shares; manufacturing, wholesale and general stationers, paper merchants and factors, printers, newspaper and magazine proprietors, publishers, music publishers, dealers in fancy goods and artists' sundries, etc. Private company. First directors: W. S. Lister and A. Evans. Registered office: Blue Bell Works, Hull.

ASSOCIATED EXHIBITIONS, LTD. (London)—Capital £250, in £1 shares; exhibitors of all kinds of goods, timber merchants, paper and paper bag makers, etc. Private company. Subscribers: D. Mackenzie and Ivy E. Fisher. Subscribers appoint directors.

TREVOR, LTD.—Capital £500, in £1 shares; paper and paper bag makers, etc. Private company. Subscribers: D. Jones and O. G. Daniel. Registered office: 3, Grove-place, Swansea.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

WALLASEY PRINTERS, LTD.—Particulars of £2,000 second mortgage debentures, authorised January 21st, 1921; present issue £500; charged on the company's undertaking and property, present and future, including uncalled capital, subject as to freehold premises in Belle Vue-road, Seacombe, to mortgage for £700 and £2,000 first mortgage debentures.

STAR PROCESS ENGRAVING CO., LTD. (Manchester).—Debenture dated February 1st, 1922, to secure £1,750, charged on the company's undertaking and property, including uncalled capital. Holders: Osborne-Peacock Co., Ltd., County Chambers, Cannon-street, Manchester.—

"BRIGHTON HERALD," LTD.—Satisfaction in full on January 2nd, 1922, of debenture dated January 5th, 1914, securing £245.

NATIONAL CHURCH PUBLISHING CO., LTD.—Debenture dated January 10th, 1922, to secure £1,000; charged on the company's undertaking and property, present and future, including unpaid capital. Holders: W. Jones and Co., Ltd., 34, Cable-street, Liverpool.

R. L. BEALL AND SONS (NEWCASTLE-UPON-TYNE), LTD. (printers).—Particulars of £500 debentures, authorised February 3rd, 1922; present issue £250; charged on the company's undertaking and property, present and future, including uncalled capital.

Charles Marsden and Sons.

The directors of Charles Marsden and Sons, Ltd., have called a meeting of shareholders to consider proposals that the capital of the company be increased to £800,000 by the creation of 200,000 additional ordinary shares of £1 each, ranking for dividend and in all other respects pari passu with the existing ordinary shares, and that the directors be authorised to allot such shares to such persons and on such terms as they think fit.

The company owns a controlling interest in the Irish Paper Mills Co., Ltd., the Ramsbottom Paper Mill Co., Ltd., and the Northfleet Paper Mills Co., Ltd.

Paper Contract Dispute.

Darwen Company and a Dublin Newspaper's Supplies.

The Darwen Paper Mill Co., of Darwen, Lancashire, having taken out a summons under the Courts Emergency Powers Act, asking to be relieved of a contract to supply paper to the *Dublin Express and Mail* Ltd., or to have it varied, the defendants moved, before Mr. Justice P. O. Lawrence, in the Chancery Division, on Feb. 3rd, that all proceedings be stayed pending the trial of an action in Dublin in which the defendants were claiming damages for alleged breach of contract.

It was stated by Mr. Owen Thompson, K.C., for the Dublin company, that the contract was made in 1913, and that the plaintiffs on the summons wanted relief because of the changed conditions of trade, etc., that had arisen since. They delivered the goods, but charged for part of them a price higher than that mentioned in the contract.

Mr. Jenkins, K.C., for the plaintiffs, admitted that there had been a breach of the contract, and said that the only question was the amount of the damages to be paid.

His Lordship allowed the summons to be amended by stating that the plaintiffs admitted a breach and offered a sum as damages, which had been declined. He made no order on the motion, except as to costs, and suggested that an early application should be made to fix a date for hearing the summons.

WALTER IBBOTSON, JUNR., LTD. (in Voluntary Liquidation).—A meeting of creditors was held at Altrincham last week, when a statement of affairs was submitted showing gross liabilities £30,537, against which there was expected to rank £21,775 13s. 4d. After deducting preferential creditors, £504 11s. 7d., the estimated amount available for unsecured creditors stands at £5,127 5s. 9d., leaving a deficiency of £16,648 7s. 7d. It was decided that the business be carried on under the liquidator, Mr. James E. Ramsdale, of 21, Spring-gardens, Manchester, and an advisory committee representing the creditors was appointed.

BRADSTREET, the American financial authority, says that 84 per cent. of the failures of the past year occurred among firms that did not advertise.

Robert Burch Memorial Fund.

Scheme to Purchase Unique Library.

We are glad to know that at last some definite step has been taken to acquire for the printing industry the valuable library which was accumulated by the late Mr. Robert Burch, especially as the movement seeks also to help his widow. As our readers are aware, Mr. Burch rendered valuable service to the *British and Colonial Printer and Stationer*, and his knowledge of the printing craft in its various branches was quite exceptional. Furthermore, he was ever ready to place his knowledge at the disposal of the industry, and this he did with positive enthusiasm through the columns of this journal. This literary work was apart from his conscientious direction of the commercial and advertisement sections of the *British and Colonial Printer and Stationer* and the *World's Paper Trade Review* for 34 years. Mr. Burch passed away suddenly on March 27th, 1919, and his memory is still cherished by those who had the privilege of being his colleagues.

The position which Mr. Burch occupied is well set forth in the circular which is being sent out in connection with the promotion of the Memorial Fund, and which is as follows:—

The object of this circular is to promote a movement to assist Mrs. Burch by the purchase of the unique library acquired during thirty years by the late Robert Mackay Burch, long engaged upon the staff of the *British and Colonial Printer* and author of the well-known work "Colour Printing" and other technical writings.

Although no great sum is needed for its acquirement, this library is one of the most remarkable ever got together by a bibliophile in any part of the world. There has been no parallel to it since the building up of the William Blades library. It contains no fewer than 14 "Incunabula," as all books are called which bear date before 1500 A.D., and are therefore deemed to belong to the "cunabula" or cradle of the Press. It contains also many deeply interesting old works like the abundantly illustrated folio, the "Nuremberg Chronicle." While rich in old volumes, another feature is the singularly handsome binding of the modern books, for bookbinding was a study to which Robert Burch devoted a vast amount of attention in the later years of his life. At every turn he acquired books illustrative of various kinds of binding. Indeed, these books were accumulated by him to serve as working tools for his whole-hearted labour as chronicler and commentator upon printing and kindred trade matters.

It is thought that a sum—£500 or so is suggested—might be raised by donations from the craft towards the purchase of this library. The sum of one hundred guineas, a portion of the fund of which the Institute of Printing and Kindred Trades was possessed of at its recent dissolution, will be devoted to the same object; in supplement, that is, to what may be raised by special Burch Library Purchase Donations. Surely nothing could be more fitting than that the small fund possessed by the Institute, reinforced by craft donations, should be thus utilised. The combined fund will thus secure a collection of works all selected by the collector from the point of view of the value of each component as illustrative of printing progress or printing technique.

It is perhaps peculiarly fitting that the two departures from our midst of a serviceable man and of a serviceable institution, should be thus linked together. We have lately lost the patient author, so zealous for craft excellence; and the institute, so zealous for craft fellowship. Of both it may be said that their full worth was never fully recognised while they were with us.

Robert Burch wrote on so many printing subjects that one recalls how Mr. Newton, the former Principal of the London County Council School of Engraving and Lithography and the St. Bride Foundation Printing School, one day exclaimed in his enthusiasm: "This man ought long ago to have had a University *honoris causa* degree conferred upon him for his research and his writings; or a pension." In that he expressed a feeling common to all who really knew.

Robert Burch published a valuable series of articles on early English printers, and serial articles upon the work of George Baxter; others again upon old Fleet-street and the Strand; and many critical dissertations upon projects of spelling reform. These, however, were his side excursions, for he was all the

while dealing with matters of more general printing interest.

Indeed, Robert Burch was a singularly fine specimen of the Briton—very thorough; very enthusiastic for his craft; very persistent; so remarkably accurate that his accuracy became a legend. People said he was "never wrong." It was hardly an exaggeration. Withal so modest and unassuming that quite probably many who have thought themselves well informed on craft matters hear of him for the first time through this circular.

Just so with the Institute—of which a sentence may be enough to say that by its persistent efforts to create a good atmosphere, and a good spirit in the craft, it did greatly more than has been generally recognised successfully to establish the National Printing Trades Joint Council.

Robert Burch lost his only son in the war. He leaves a widow to whom our respectful tribute is tendered. Mrs. Burch is engaged daily in a City office. It will be very pleasing if it may prove that enough is raised for the purchase of this library to secure for her such a small annuity, if she thinks well so to utilise the money, as materially to ease her pathway in life.

Had Robert Burch foreseen his death in his early fifties he possibly would have made a different expenditure of his small savings. He might well have hoped for an opportunity during the next five or ten years to recoup for the benefit of his partner in life some of the outlay he had thus made upon this library.

It is surely now our privilege, by some slight contribution for the purchase of these books, to render a great service to the youths and the younger men of our craft—a service the more valuable in view of their lost five years—and at the same time to do something in discharge of our obligation to a singularly fine fellow-worker, whose worth and value we had too slight means of justly appraising while he was with us.

The library of about two thousand books is at present housed at the St. Bride Foundation, where it can be inspected by all interested. A small committee has been formed, including Mr. MacLehose, Glasgow, president of the Federation of Master Printers of Great Britain and Ireland, Mr. Richard Austen-Leigh (Messrs. Spottiswoode, Ballantyne and Co., Ltd.), Mr. Charles J. Drummond, M.B.E., J.P., for many years chairman of the Printing School of the St. Bride Institute, Mr. Alfred F. Blades (Blades, East and Blades, Ltd., Abchurch lane, London, E.C.4), Mr. Geo. W. Jones, Gough-square, Fleet-street, E.C.4, Mr. H. C. Bolton (Lorilleux and Bolton, Ltd., Cursitor-street, London, E.C.4), late chairman of the Institute of Printing and Kindred Trades, Mr. W. H. Burchell (Caxton Press, Leather-lane, London, E.C.1), and Mr. Frank Colebrook, 146, Fleet-street, London, E.C.4. This committee desires to raise a fund which, supplemented by a portion of the fund remaining in the hands of the Printers' Institute, may be utilised for this library purchase. Whatever is raised will be handed over to Mrs. Burch as the purchase price of the library, which, instead of being dispersed, will be available to all interested for all time.

Your prompt support is earnestly sought.

Cheques should be sent to Mr. C. J. Drummond, at the St. Bride Institute, Bride-lane, London, E.C.4.

Photographic Materials for Egypt.

The Ministry of the Interior, Egypt (Personnel and Equipment Department, Supplies Offices), has invited tenders for the supply of photographic material for the year 1922, which will be received by the Director, Personnel and Equipment Department, Ministry of the Interior, Cairo, not later than noon on March 15th. The photographic material required includes apparatus and accessories, chemicals, and plates and papers.

Mr. JAMES RAMSAY, papermakers' agent, announces that as from February 1st, he takes over the London agency of Messrs. Busbridge and Co. (1919), Ltd., East Malling Mills, Kent, and has removed to their offices and warehouse at 1, Maiden-lane, Queen-street, E.C.4, on that date. From that address he will also act as the London agent for Messrs. George Wilmot, Ltd., Shoreham, Kent. Mr. Ramsay continues to represent Messrs. R. Sommerville and Co., Ltd., Creech St. Michael, Taunton, for whom he has acted as agent for many years past.

Printing Craft Development.

"Printing and Its Allied Trades" formed the subject of a paper given before a large attendance of members of Newcastle Fifty Club by Mr. G. F. Laybourne, of the well-known firm of Messrs. G. F. Laybourne and Co., Ltd., printers and stationers, Collingwood-street, Newcastle, at the Central Exchange Hotel, Newcastle. The president, Mr. Alan Robson, occupied the chair.

In the course of an interesting and informative review, Mr. Laybourne showed how the inception and development of the printing craft coincided with the growth of civilisation and the development of the arts. Introduced into England, in 1476, by William Caxton, it had always attracted to its ranks men of high ideals, with artistic and scholarly attainments. The result was that to day the industry ranked seventh in the great industries of the country, with invested capital of over £30,000,000, and employing about 500,000 persons.

The many operations performed by Caxton were now undertaken by 22 different branches of the industry. Printing from movable types was first employed for the production of books, but it was now not more than one-tenth of the volume of printing to day.

WEST AND NORTH-WEST London Master Printers' Association

"Some Overhead Charges."

The usual monthly meeting of the Association was held on the 8th inst., at Westbourne Park Institute, Porchester-road, Bayswater, W. The chair was occupied by the president, Mr. E. W. Wormald, and there was a fair attendance of members. The provision of light refreshments served previous to the business on the agenda added considerable comfort and social zest to the evening's proceedings. During the evening Mr. H. R. Danford (H. R. Danford and Sons, Ltd.) delivered a brief—though interesting—talk on "Some Overhead Charges that Enter into Costs."

After Mr. J. R. Burt, the secretary, had read the minutes of the previous meeting, which were confirmed, two new members were elected.

Mr. Danford at the outset of his address said he would treat of his subject from the point of view of the vellum binder and machine ruler, though with a little alteration in the various items he would bring before them they could quite easily be adapted to the printing section of the trade. He was convinced that there was an appalling amount of ignorance on the question of the correct allocations that should be made for overhead charges. One printer quoted 8s. 6d. for some printing he once put out and another 22s. 6d. for the same kind of work. Needless to say the man who quoted the lower price—though it was quite evident he could not have taken into consideration his overhead charges—got the job.

Mr. Danford next placed in the hands of those present a four-page leaflet containing a comprehensive list of overhead charges that enter into the cost of production of the work of the vellum binder and machine ruler. These included rent, rates and taxes; insurances; wages and salaries of management; directors' fees (if a company); overseers and others who are non-producers; postage and telephone charges; power, light and heat; stationery and office sundries; bad debts (and these are coming, if they have not already arrived); loss occasioned by strikes; lost time; interest of 10 per cent. on capital invested in the business; reserve fund for depreciation and contingencies, profits on trading, etc.

Mr. Danford next introduced an example of his system of costing for a 5 quire book consisting of $\frac{1}{2}$ basil, cloth sides, $\frac{1}{2}$ ex. quantity of leather, 1 foot at 9d., which was as follows: folding, sewing, forwarding, cutting and blind tooling, 1s.; binding, 1s.; overhead charges, 100 per cent., 2s.; leather, 9d.; cloth, 3d.; boards, 2d.; materials, 20 per cent., 3d.; cost of labour, 15 per cent., 4d.; marbling edges, 3d.; total cost, 6s.

In concluding, Mr. Danford alluded to the scandalous price-cutting that was going on. He mentioned the instance of a prominent London firm that was selling a 4-quire book at 4s. 6d., which, when the cost figures of that book had been analysed could not possibly have been produced under 5s. 2d. even to secure a very small margin of profit.

Mr. Johnson paid a tribute to the hard work Mr. Danford and his committee had put in the compilation of a list of price charges in operation by the vellum binders and machine rulers.

Mr. A. Williamson on being invited to say a few words, said the question of overhead charges had been troubling him for some time, and certain features with regard to them had very much disturbed his mind. In his opinion the system of a flat-rate percentage of 100 per cent. for overhead charges as propounded by Mr. Danford was absolutely wrong, being ineffective in its operations and inequitable in its results. He contended that overhead charges were larger on a lower wage than on a bigger one. Mr. Danford had, however, put before them some interesting points, especially that relating to the inclusion in his list of overhead charges, of interest on capital in the business.

A vote of thanks to Mr. Danford was heartily carried on the proposition of Mr. Langley, seconded by Mr. Sidders.

In regard to the report of the concert committee, Mr. Wormald said they had decided to continue the monthly meetings rather than have one central attraction in the way of a concert for the purpose of propaganda in the district.

Mr. Burt said they had received a letter from 24 Holborn, dealing with the postal

rates, in which they were advised to write to the Prime Minister and Postmaster-General explaining to them the harm being done to the trade by the extortionate postal charges.

A letter was also received from 24 Holborn asking for the appointment of a representative to a special committee for the purpose of keeping the district in touch with headquarters, Mr. Wormald and Mr. Burt being appointed as the Association's representative and deputy.

A vote of thanks to Mr. and Mrs. Jones for their kindness in presiding over the wants of the inner man, was heartily endorsed, and the meeting was then brought to a close.

Paper Contract Action.

Dynas Aktiebolaget v. Heerey and Co.

Judgment for Plaintiffs for £6,000 Damages.

In the Commercial Court of the Kings Bench Division on Thursday Feb. 2, before Mr. Justice McCardie, an action was brought by Dynas Aktiebolaget, of Waija, Sweden, against Heerey and Co., Pepper-street, Nottingham, to recover damages for an alleged breach of a contract entered into in May, 1920, by which the defendants agreed to buy from the plaintiffs 300 tons Dynas pure M.G. kraft paper, according to specifications, at £80 per ton and £78, price to include insurance and freight to Hull, and goods to be delivered in six monthly shipments of 50 tons. The defendants repudiated, and the plaintiffs claimed damages based on the difference between the contract price and the market price at the dates when the goods should have been delivered.

Mr. W. J. Disturnal, K.C., and Mr. A. M. Talbot represented the plaintiffs (instructed by Bartlett and Gregory), and Mr. Alex. Neilson, K.C., and Mr. D. B. Somervell were for the defendants (instructed by Messrs. Coward, Hawksley, Sons and Chance).

Mr. Disturnal, K.C., explained that the claim was based on non-acceptance of the goods by the defendants. The order was addressed to Powell, Lane and Co., agents for the plaintiffs, and confirmed by the plaintiffs, subject to the conditions adopted by the Norwegian and Swedish Papermakers' Association. The deliveries were to be in September and October, but by agreement the first delivery was postponed to November. The defendants repudiated about that date. It was admitted on both sides that the contract was made, but the defendants said they repudiated, and their repudiation was not accepted by the plaintiffs, and, therefore, the plaintiffs were not entitled to sue.

His Lordship: I suppose the point is, the defendants say they repudiated the contract, the plaintiffs did not accept this, and, therefore, there remains on the plaintiffs their obligations under the contract, which obligations were not carried out.

Mr. Disturnal, K.C., said if this was the agreement for the defendants he would contend that it could not avail, as there was a continuing breach by the defendants.

Mr. Neilson, K.C., for the defendants, said the position was this: His clients cancelled the contract as the result of an interview in October; the plaintiffs did not accept that repudiation, but, on the contrary, wrote back specifically on November 22nd that they would stick to the contract and would carry out all their engagements. That position was maintained up to the end and the issue of the writ. The plaintiffs made one attempted shipment under the contract, which Counsel assumed to be the shipment due in December, because the invoice was dated December 1st; but in the case of that shipment it was not the contract port, but was to Grimsby, so that this was a bad delivery.

Mr. Disturnal, K.C., said his reply to this was that there had been a continuing refusal by the defendants to take the paper.

Evidence as to Prices.

Mr. Alfred Norman Dewsnap, of the firm of Messrs. Davies and Royle, importers and mill agents, said they dealt in this kraft paper. He had seen the contract in this case and the classes of paper sold. From October to March they were booking orders for the sale of this class of paper; the prices depended on the substance of the paper. Goods of the £80 quality under the contract would have sold in October, 1920, c.i.f. Hull, at £70 10s.; in

mid-November at £63, and in December, January and February, £52, March, £43.

His Lordship: The latter is about the lowest price to which paper went?—Yes.

Witness added that in April and thereafter the price was slightly higher.

Cross-examined, witness agreed that the production of this Scandinavian paper was controlled by a "convention," who fixed prices.

Mr. Neilson suggested that about October 11th £77 was a fair price f.o.b. Gothenburg, and in November the price was about £63 or £69.

Witness said there were different prices.

Counsel: I am suggesting the "convention" prices.

Critical Time for Paper Trade.

His Lordship: It is notorious that the markets were falling at these times in extraordinary fashion. It was the critical time for the paper trade.

Mr. Neilson: I appreciate that, my lord. That was the whole difficulty. There was an entire collapse. My clients were compelled to cancel for good reasons, which, if necessary, can be told to the Court.

Re-examined, it was very difficult to effect any sale in November. They were not able to get orders here at the convention prices.

His Lordship: I suppose the position at this time was almost unparalleled?—Yes. We have never experienced such a bad time.

Case for the Defence.

Mr. Douglas Hume gave evidence for the defendants that he had control of the contract, that in October they decided that the kraft market was in a difficult way. He told Mr. Elsworth, of Powell, Lane and Co., that the contract must be cancelled. It was a positive intimation.

Witness said he was told, when the contract was entered into, that the mills' profit would be about 5 per cent. only.

Mr. Talbot: You asked that, as a kindness, you should be let off the contract?—Yes, we cancelled. Mr. Elsworth said he had not the power to cancel himself, and he would have to refer to the mill.

Witness added they knew the market was going to fall.

Mr. H. Elsworth, of Powell, Lane and Co., said Mr. Hume told him if defendants had to carry out the contract they would suffer a loss, and they would be obliged if they could get the mill to cancel.

Mr. Neilson argued that there was no accepted repudiation, the contract remained alive, and plaintiffs had to carry out their obligations under it. A refusal in advance to carry out a contract was of no effect unless the other party chose to take advantage of it. He suggested the breach was really in the sellers. There was no evidence the paper was ever manufactured, and so they could not tender; nor ask for the damages claimed.

Mr. Justice McCardie decided that the effect of the legal authorities was that where a buyer had repudiated his obligation the vendor was freed from any duty to perform the contract, whether by tendering goods, documents or otherwise. Judgment was given for the plaintiffs for £6,000 damages and costs.

A stay of execution was granted to the defendants.

FRENCH

Paper Industry "Threatened."

The first fortnight of January brought no change in the paper markets of France, where competition of imports grows keener and keener. Under the name of "news" paper of other varieties intended for other purposes is imported. Though such paper is examined by the Custom House officials, there is no means of control as to its temporary or final destination. Thus the very life of the national paper industry is threatened.—*La Papeterie.*

PAPER and paper goods imported into Russia during January to September represented 15,398 tons, or 2.6 per cent. of the total imports. For the period January-June imports under this heading were 9,242 tons, or 4.9 per cent. of the total imports.

RUSSIA'S imports during November included 4,950 tons of paper and paper goods, representing 4.4 per cent. of the total imports.

Paper Knowledge for the Paper Consumer.

Useful Hints for the Practical Printer and Stationer.

II.

The next stage will consist of an elementary study of paper manufacture. So far as the printer is concerned, there is no necessity to probe very deeply; but the stationer and printer's manager should make a fairly exhaustive study of the subject. The two best books for the printer are "Paper," published by Pitman's, and Sindall's book on Paper Technology, whilst the stationer or manager should follow these up by a thorough study of Clapperton's, Sindall's, and Steven's books on papermaking and testing.

The elementary books will give a good idea of the various processes which take place in the transition from raw material (woods, grasses, rags, etc.) to finished paper. Incidentally, the simpler tests must be closely observed and applied if possible, particularly those which denote the presence of mechanical wood, and others which relate to loading and sizing. The printer must fasten closely on the information which relates to tone, texture, absorbency, finish, surfacing, and the qualifications of paper for certain purposes. The student who aspires to become an expert in paper must carry out his studies in a much more exhaustive manner than the foregoing, and will need the assistance of chemistry knowledge; this we will ultimately deal with.

Having proceeded thus far, the printer, whether he be comp or machineman, will be sufficiently equipped to apply himself profitably to the respective branch of specialisation previously noted. Being now able to discriminate with confidence between different types of finish, absorbency, sizing efficiency, texture, etc., the application of gathered information becomes a comparatively easy matter. The compositor's effort should include a collection of impressions of suitable jobs on various types of paper, annotating them in grades of tone and colour, style, typeface, etc. His study should be directed toward the correct and relative selection of typeface to paper, effecting thereby a very high standard of typography, whether display or bookwork. With advanced paper knowledge the compositor may work out thoroughly harmonious schemes of character embodiment, making the paper in all its qualifications to fit in perfectly with the ink colour and style of type face, not omitting to impart the atmosphere of theme.

The machineman is also able now to tabulate with accuracy his daily experience with certain papers and inks, dryers, etc. As time goes on, he finds himself able to predict with full confidence the probable effect of the various factors one against another. Without loss of time and with the ultimate elimination of trouble, he is enabled to prepare his ink perfectly, whilst his presswork rises in excellence. When the paper occasions trouble through immaturity or some other cause, an acquaintance with the theory of cross and machine directions of paper, and an insight into the causes of stretch, shrinkage, cockling and creasing come in exceedingly useful. All this knowledge is gained naturally in the course of paper study outlined, supplemented by experimental tests at home. Further, his interest in and knowledge of paper is sufficient to allow him to foresee probable troubles; hence he is enabled to forestall them.

The Need of the Expert Lithographer.

The lithographer must supplement his paper studies by an elementary course of inorganic chemistry, theoretical and practical. Without this he can never hope to pose as an expert lithographer. The whole art of litho is based on chemistry, and every day brings its ink and paper troubles, many of which are chemical in nature. Therefore, the more efficient he becomes in his knowledge of chemical reaction, the better able he is to cope with his ultimate reading up and practise with inks. Once the student obtains a grasp of the nature and properties of ink, along with an insight into the constituents of different classes of paper, he is able to get quickly at the root of lithographic trouble and to correct it, even if he fails to foresee and prevent it. The great fault of modern litho-

graphers really is that they lack sufficient knowledge of art, chemistry and simple mechanics.

Summing up the lithographer on paper; he needs to specialise particularly on paper surfaces, classification of grades, natural differences in the composition of body matter or surface coating which affect the various inks, varnishes and auxiliaries, and the difference between the types of coated papers. He must also obtain a sound idea of the reasons why paper plucks, peels, curls, stretches or shrinks; why some coatings are soluble and others gritty, how they variously affect his colours or printing plates, not forgetting to study the remedies. Many hints will be gathered from the help columns in certain trade journals. These should be preserved and classified under a system of headings. From his previous study of paper, many reasons will suggest themselves; whilst, if apparently insuperable difficulties are en-

countered, the advice of the best technical instructors and trade magazines may usually be obtained gratuitously if applied for.

The Stationer and Manager.

Reverting to the stationer and manager branch of study. To become possessed of all-round knowledge, the many scores of classes for different purposes must be studied and familiar acquaintance cultivated with their uses. The only way to attain this is to accumulate makers' specimen sheets and sets, retaining them for constant reference and questioning the agents and purchasers as to their uses, whilst the various trade glossaries will be found to yield much valuable information. This study of use and suitability naturally carries the investigator direct into the problems of ideal paper for colour and bookwork, flat bed and offset lithography, process work, collotype, intaglio, etc., thus vastly improving his acquaintance with the various branches of the allied trades.

Contemporary with his investigations in this direction, the student is, of course pursuing his studies on paper manufacture. The latter must be thorough and may be profitably and interestingly helped by mill visits, attendance at lectures and exhibitions, whilst the whole subject is illuminated by obtaining illustrations and particulars of machinery from manufacturers of papermaking machines and appliances, also from paper trade journals. These should be filed away in systematic fashion under heads of processes and operations.

Paper Testing.

Much practical work in the way of paper testing may be accomplished, including tests for loading, colouring, sizing, presence of residues, detection of mechanical wood pulp, distribution and direction of fibre, strength, bulk, elongation, blotting absorbency, etc. The detail of these tests and formulæ of the necessary solutions will have been studied up in the books previously named, principally Stevens' "Paper Mill Chemist." The outlay for a small laboratory need not be expensive, and the subject forms a fascinating branch of paper study.

For the investigation of fibres and much detail of manufacture, a microscope is essential. With the use of various staining and re-acting solutions (detailed in the text books) and a few months' experience, the quantitative determination of fibre, loading, etc., may be attempted and definite data as to the true composition and nature of manufacture accumulated. The value of the microscope also for solving paper and ink troubles in the printing departments will speedily become recognised, and with it the wonders of process printing, double-tone inks, offset press and intaglio impressions will become matters of simplicity to the student.

In conclusion, we would urge upon printers and particularly the younger end, the absolute necessity to take up "paper" as a serious subject of study with a view to turning the ultimate knowledge to useful application and the uplifting of the standard of workmanship, whether it be planning productions, composing machining or lithographing.

Indian Import Tariff.

A notification by the Government of India specifies the reversed valuations which have been fixed by the Governor-General in Council for use in connection with the levying of Customs duties. Pulp of wood, rags and other papermaking materials, imported, are free, as also are trade catalogues and advertising circulars imported by packet, book or parcel post.

In respect of the importations of the following items the duty is 11 per cent. *ad valorem*:—Paper and articles made of paper and papier mache, pasteboard, and cardboard, all sorts, and stationery, including ruled or printed forms and account and manuscript books, drawing and copying books, labels, advertising circulars, sheet or card almanacs, and calendars, Christmas, Easter and other cards, including cards in booklet form; including also waste paper and old newspapers for packing except old newspapers in bales; but excluding trade catalogues and advertising circulars imported by packet, book or parcel post.

Prints, engravings and pictures, including photographs and picture post cards have an import duty of 20 per cent. *ad valorem*.

An import duty of 2½ per cent. *ad valorem* is placed against the following: Printing and lithographic material, namely, presses, type, ink, aluminium lithographic plates, brass rules, composing sticks, chases, imposing tables, and lithographic stones, stereo blocks, wood blocks, half-tone blocks, electrotype blocks, roller moulds, roller frames and stocks, roller composition, standing screw and hot presses, perforating machines, gold-blocking presses, galley presses, proof presses, arming presses, copper plate printing presses, ruling machines, ruling pen-making machines, lead and rule cutters, typecasting machines, typesetting and casting machines, rule bending machines, rule mitreing machines, bronzing machines, leads, wooden and metal quoins, shooting sticks and galleys, stereotyping apparatus, metal furniture, paper folding machines, and paging and numbering machines, and rolling presses, but excluding paper.

Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

FRANCE.

A firm of wholesale dealers in fancy goods, established in Paris, desire to be placed in touch with United Kingdom manufacturers of stationery, etc., with a view to importing either on their own account or on deposit account. (Reference No. 139.)

Printers' Managers and Overseers ASSOCIATION.

February Meeting.

A very full attendance of members which overtaxed the available accommodation marked the meeting of the P. M. and O. (Parent) Association held at the "Old Bell," Holborn, on Tuesday of last week, when the principal item on the agenda was Mr. F. V. Heywood's lecture on what he termed "Off-setography." This lecture, with the subsequent discussion, is reported elsewhere in this issue.

Mr. S. M. Bateman, the president of the Association, was in the chair.

After the reading and confirmation of the minutes of the January meeting, the president referred to the illness of Mr. E. H. Berryman, and Mr. Durston reported that he had seen Mr. Berryman a few days previously and had found him making good progress after his recent operation but expecting to return to hospital shortly for a further operation.

Mr. Bateman gave expression to the Association's hopes for Mr. Berryman's early recovery.

Three new members were elected in the usual manner, the president giving a personal welcome to two of them who were present:—Mr. R. R. Chapman (The Era Press, High-road, Leyton, E.10., manager—litho printing department); Mr. W. H. Franklin (University Press, Cambridge, overseer—machine-room: letterpress); Mr. A. E. Middleditch (Allen and Hanburys, Ltd., Bethnal Green, E.2., overseer—composing department).

The next business was to receive the report of the delegates to the special delegate meeting held at Nottingham on February 4th.

Membership Restriction.

After a few opening remarks by Mr. S. M. Bateman, the general secretary, reported that, as regards the proposed alteration to Rule 4 (regarding conditions of membership) to make plain that working managers and overseers were not eligible for election, it was soon evident that delegates had received instructions and that argumentation would not affect the voting. When the vote was taken (by show of hands) only five delegates supported the proposed alteration—3 from London and 2 from Yorkshire—15 being against. Mr. J. C. Pugh, on behalf of London, then had the unpleasant duty of demanding a poll, and this caused a good deal of outcry from provincial members. Later it was suggested the London delegates, to meet the feeling of provinces, would waive the demand for an alteration of rule, provided the ineligibility of working managers and overseers be noted on the nomination form. This, too, was strongly resisted, but when London insisted that the only alternative was the poll agreement was finally reached (on the motion of West of England) that the words "working managers and working overseers are ineligible" should be placed plainly on the nomination form. Thus from February 4th this restriction of the association's membership became a recognised thing throughout the association. The further proposal—that on the acceptance of a member the nomination form should be forwarded to the parent association—was also carried after much discussion. Mr. Whittle concluded by remarking that Mr. J. T. Wells, hon. secretary of the North Midlands centre, carried out wonderfully well the arrangements entrusted to him, and the delegates separated on the following morning much more cordially than had seemed possible at 4.30 on Saturday.

Mr. Jarvis corroborated what Mr. Whittle had said, remarking that the meeting was a successful one, and should have results very useful to the association. With regard to the words to be inserted upon the nomination form, he thought after full consideration that this was a better solution than the alteration of rule originally proposed.

Mr. Pugh gave further corroboration, stressing the very hard fight London had to put up to get the result achieved.

It was then proposed, seconded and carried unanimously that the meeting approve the action of the delegates.

Annual Bohemian Concert.

With regard to the annual bohemian concert, it was agreed to hold it on February 20th, arrangements to be made by the Lecture and Entertainments Committee.

The secretary appealed to members to assist unemployed fellow members by reporting any vacancies available.

A proposal to give £10 from the London fund towards the completion of the third pension was moved and seconded, but it was eventually agreed to postpone the grant in the belief that the pension would shortly be completed without drawing on the fund.

THE PRICE BOOK, 1922, FOR THE PRINTING AND ALLIED TRADES. By F. G. Shepard. London: King and Jarrett, Ltd., Holland-street, Blackfriars, S.E.1. Price, 5s.

To use a familiar phrase, this book fills a long-felt want in the printing and allied trades, and its appearance should be welcomed by all who desire to perfect themselves in the knowledge of what it costs to provide plant and material and the labour necessary to turn out the finished product. Other trades have had their price books; builders, timber merchants and ironmongers for many years have been catered for in this way, and greatly to the advantage of the members of these trades, but the printer has been neglected until Mr. Shepard took up the matter and compiled the volume before us. The idea has been, as the author points out, to combine in one volume the prices of the processes and materials in the order in which they are usually required, and starting with the composing room goes into minute detail as to the costs of the different classes of work that go through that department, whether executed by hand or by machine. The various rates of wages and scales are given, together with the prices of the materials used, such as type, chases, furniture, etc. The cost of presses, composing machines and other appliances are set out in a lucid manner. The letterpress machine room is dealt with in a similar style, and here prices for the various wharfedales, platens and other machines are given, as well as for gas engines, shafting and the many other items of plant that go to that department. The process section follows next, and then follow the electro and stereo sections, the inventories of which contain particulars of plant and materials and estimates for nickel plating and copper plating outfits that will be found very serviceable. Warehouse work and costs are dealt with, and considerable space is devoted to the bookbinding department, embracing almost everything that is required for that branch of the craft. The information as to capacity and prices of bookbinding machines and appliances is remarkably full, and the portion devoted to ruling machines gives many interesting and useful particulars. The lithographic, copper-plate and colotype departments are dealt with in a similarly complete manner, and the section dealing with paper and envelopes covers the ground very effectually, and also gives tables of sizes, weights and sub divisions of both printing and writing papers that are in general use. For the guidance of printers a copy of the royalties on maps and plans published by the Ordnance Survey is given, together with the conditions as to the reproduction of the same, and this information will be valuable in many cases, as printers sometimes have very vague notions as to the procedure necessary to secure permission for the reproduction of official maps, etc. The book furnishes a complete list of watermarked and named papers and their makers, and to render the information more valuable the telephone numbers of the various firms are given as well as their addresses. This section alone runs to over 160 pages. The work entailed in the production of a volume of this character must have been immense, and Mr. Shepard is to be congratulated on having accomplished it so well and so completely. It is a book that ought to be in the hands of every employing printer, as its contents are of such practical service that it will repay its cost many times over.

BOOKS FOR RUSSIA.—In the report issued recently of the Special Commission sent to Russia by the Health Committee of the League of Nations, it is stated that: "The economic blockade did not stop short at scientific books, and we were astonished to find that, with the exception of German publications which began to arrive a few months ago, there were practically no scientific periodicals and books published in either English or French in any of the University or other libraries in Russia."

Printing, Bookbinding & Kindred
TRADES OVERSEERS' ASSOCIATION.

Annual General Meeting.

The annual general meeting of the Association, held on the 7th inst. at St. Bride Institute, drew together a large gathering of the members. The chair was occupied by Mr. A. W. Hunt (president), who was supported by Mr. H. Milton (vice-president). The annual report and balance sheet, in the hands of members, bore evident testimony to a successful year's working. In it attention is drawn to the present healthy state of the Association's funds, reviewed in the light of the two preceding years, which is due to the fact that last year the Association wisely adopted the course of nearly doubling its subscriptions. During the year a net gain of nineteen members has been made, and so healthy are the various financial undertakings of the Association that the officers are quite sanguine that the future can be faced with the utmost confidence. Both the social and educational sides of the Association have been well maintained, comparing satisfactorily with former years.

Report and Balance Sheet.

After the minutes of the last annual general meeting had been read and confirmed, the President drew attention to the annual report and balance sheet, and said the success they had achieved had been brought about by the efforts of individual members. He felt that the Association was on a stronger and firmer foundation than it had ever been in its history.

Mr. A. J. Daines proposed, and Mr. Gibson seconded, that the annual report be adopted, which was carried unanimously. The balance sheet, moved by Mr. J. Walker, and seconded by Mr. A. E. Harvey, was also adopted with hearty approval.

Election of Officers.

A few items of correspondence having been dealt with, the officers for the ensuing year were next elected.

Mr. A. W. Hunt was, on the proposition of

Mr. Long, seconded by Mr. Daines, re-elected president. In returning thanks for the honour they had bestowed upon him he said he was proud of the opportunity of presiding over such a splendid body of men.

Mr. H. Milton was unanimously re-elected vice-president, as was also Mr. A. W. Sandilands treasurer.

The next post was that of general secretary, an office which Mr. Geo. A. Eden had occupied with the hearty approval of the members for a period of fourteen years.

The President, in asking for nominations for the vacant post, said H.M. Stationery Office had deprived the Association of a great friend in Mr. Eden, and he thought that their action did not redound to their wisdom.

On a ballot being taken, Mr. Arthur Cox was elected hon. general secretary.

Mr. Cox, in returning thanks, spoke of the difficulty of filling the position after so versatile a man as Mr. Eden, but he would do his utmost to follow his footsteps in the best interests of the Association.

Mr. Aves, who was not present on account of the burial of his father that day, the news of which was received by the members with deep sympathy, was re-elected financial secretary.

Mr. S. J. Wills and Mr. J. Lee were re-elected trustees, and the following were elected to the council: Messrs. T. Hill, A. C. Ware, E. W. Tuff, W. D. Bentley, G. A. Rutherford, and G. J. Hellery, the last-named gentleman being co-opted in the place of Mr. J. J. Rawlings.

Mr. G. J. Hellery next moved that Mr. Eden be re-elected as the representative of the Association on both the Board of Examiners of the Printing Industry and Stationers' Company and the Council of the new Printers' College. This was seconded by Mr. Milton, and carried.

Amendments to Rules.

An amendment to Rule 12 was proposed by Mr. E. W. Tuff, and seconded by Mr. W. T. Lingham to the effect that the funds of the Association should in future be deposited in the London Joint City and Midland Bank, Ltd. This was agreed to.

An alteration to Rule 14 specified that the auditors should be granted a fee of one guinea. This was proposed by Mr. J. Lee, seconded by Mr. R. Gardner, and carried.

Rule 18 was altered, allowing 30s. per week to unemployed members instead of £1 as formerly.

Rule 20 was altered so that the benevolent fund would benefit to the extent of one quarter of the subscriptions instead of the one-eighth. This was proposed by Mr. Eden, and seconded by Mr. J. Lee, and carried.

Before the meeting closed the President said he had been asked to move a vote of thanks to Mr. Geo. A. Eden for his past valuable services to the Association. This he did with very great pleasure. He could truthfully say that Mr. Eden, during the whole 14 years in which he had been their general secretary, had not made a single enemy.

These words were heartily endorsed by Mr. F. C. Peacock, the first president of the Association, who spoke of the great assistance given by Mr. Eden to the Association, and also made special mention of the assistance rendered occasionally by Mrs. Eden.

Mr. Eden, on rising to reply, was received with hearty applause, the members singing together "For he's a jolly good fellow." He said he had enjoyed his period of secretaryship, for he loved the Association with all his heart. His resignation was outside his own control, and in his successor, Mr. Cox, he believed the Association had chosen the right man.

A vote of thanks to the chairman, proposed by Mr. Daines and seconded by Mr. J. Fleming, closed the proceedings.

"THE SOUTH AND EAST AFRICAN YEAR BOOK AND GUIDE FOR 1922" (5s.), the 28th issue of which is just to hand, will serve as an indispensable *vade mecum* to all who have business or other dealings with that part of Africa. The guide, which is issued by the Union Castle Mail Steamship Co., Ltd., consists of nearly 1,000 pp., and contains plans and diagrams and a specially prepared and useful up-to-date atlas of 64 pp. Imports and exports are dealt with in considerable detail and the rapid growth and development of South and East African industries receives full attention. In dealing with the principal characteristics of the different towns in South Africa, mention is made of the vast extent of papyrus grass at the Umfolosi River.

Australian Notes.

Government Paper Experiments—Expense Hampers the Work—Research Committee Resigns—Local News-Print Manufacture—Pulp from Mountain Gum—The Press and British Preference—Attitude Towards Canada—Cardboard Box Trade.

(From Our Sydney Correspondent.)

QUESTIONS of paper manufacture in Australia continue to receive attention both from the Commonwealth Government and private concerns. The chief object in all the experiments undertaken is to find a practical scheme for the production of news-print from Australian materials. So far, little result has been obtained, and now there is trouble at the Perth Forestry Laboratory, since the local committee which had been responsible for research into the problem of papermaking has resigned. A certain amount of success has attended the efforts of Mr. Boase, who was conducting the experiments at the Laboratory, but more money is required, and the Federal Government has not been able to see its way clear to vote an amount which the local committee considers quite adequate. Apparently this was the cause of their resignation.

THE subject of the committee's resignation was raised in the House of Representatives by Mr. Gregory, who asked if the reason was that the Government had failed to carry out a promise made two or three years ago. Mr. Massy Greene, Minister for Trade and Customs, replied that the position was that it had been intended to carry out an investigation at the forestry laboratory, to set up machinery there to deal with the forest products, and to appoint the necessary staff. To carry out the scheme in its entirety, however, would have involved an initial outlay of £50,000 and a heavy annual outlay. The Government was not in a position at that time to find this money. He desired to acknowledge with gratitude the work already done with the small equipment and plant.

MR. GREGORY asked if a lot of the money had not been provided by Australian newspaper proprietors. Mr. Greene answered in the affirmative, adding that they desired to ascertain whether news-print could be manufactured from Australian hardwood. It has been demonstrated that this can be done, but the question of whether it can be turned out in commercial quantities has still to be decided. They proposed to continue the experiments in this direction, but that was as much as could be done that year.

BLEACHED pulp designed for the manufacture of news-print has been made at the State Timber Yards, and Mr. Lang, State Treasurer, and Mr. Gullick, the Government Printer, visited the yards in order to inspect the sample. The pulp, which appeared to be of excellent quality for the purpose, was made from mountain gum, a timber hitherto regarded as having little commercial value. There are large tracts in New South Wales.

BOTH Mr. Lang and Mr. Gullick, who has always shown a keen interest in the manufacture of paper in Australia, were impressed with the suitability of the pulp, and enthusiastic over its commercial possibilities. It is intended to send the pulp to Australian manufacturers, with a view to having it made into news-print. In this way it can be properly tested.

AN interesting attitude is taken by the Country Press Association to the preference which the Commonwealth Government has given to British news-print. In adopting a resolution approving of the preference, the Association expressed the hope that the preference will not be rendered nugatory by any concession to Canada until exhaustive inquiry had been made into the methods of the American and Canadian combine in dealing with Australian consumers during and since the war.

THE annual report of J. Fielding and Co., Ltd., Sydney, indicates that the cardboard box industry is still prosperous, although, as

the directors state, the slump in trade during the past year has had its effect on output and profits. The company was reconstructed last year, and now operates with an issued capital of 130,000 shares of £1 each, instead of one of 75,000. The net profit for the year to September last was £11,348, compared with £22,059 in the preceding twelve months, the ordinary dividend being 8 $\frac{3}{4}$ p.c., against 15 p.c. Buildings and machinery are now valued at £86,541, the corresponding figure a year before being £55,483.

Scottish Paper Trade.

(By Our Edinburgh Correspondent.)

QUIET conditions rule in the Scottish paper trade, and although rather more orders have recently come in, these are not thought to presage any immediate trade revival, but are the results of stocks getting low before stock-taking.

IN connection with the proposal by an influential group engaged in amalgamation of the principal esparto paper mills in Scotland, the preference shareholders of Messrs. William Tod, junr., and Co. (Ltd.), Springfield, Midlothian, have received from that company an offer to purchase their holdings at £8 10s. per share. Mr. W. L. Tod, the chairman of the company, in the course of the communication, says that the consideration to be given by the proposed purchasers is partly in shares of the new company and partly in cash. The preference shareholders, he says, would no doubt prefer to receive cash only. He had, therefore, approached the ordinary shareholders with the view of their agreeing to the ordinary shareholders taking a larger proportion of shares in the new company, so as to set free sufficient cash to enable an offer to be made to the preference shareholders of the company of a price for their shares considerably in excess of their present market value. That value, as evidenced by recent transfers, is under £6 per share. The price payable for the company's business will, with the concurrence as above of the ordinary shareholders, permit of a payment for every preference share transferred to nominees of the new company of a sum of £8 10s. The transaction, of course, cannot go on unless there is an affirmative response from a sufficient percentage of the shareholders, but Mr. Tod has no doubt the advantageous nature of the offer will commend itself to them.

Photo-Collographic Printing.

AN invention by Mr. M. Sperati relates to a collographic method, by which in the preparation of printing-surfaces for the photo-collographic process and to avoid the disadvantages of using glass plates, a thin transparent film base is used and coated with a layer of gelatine which can be sensitized with bichromate for use when required. The film base is given a preliminary coating containing gelatine and a celluloid solvent, the coating being spread by an emulsifying machine. A further emulsion coating of gelatine, containing a suitable antiseptic such as phenic acid, is applied, which is dried and subsequently sensitized with bichromate. After treatment in the sensitizing bath the film is dried in darkness at a temperature of 30 C. The film can be printed through the base from an ordinary negative without reversal, a reversed negative being necessary if exposure is done from the emulsified side of the base.

MUNICIPALITIES AND LIBEL.—The question whether a municipal corporation can sue for libel was recently thrashed out in the American courts. The case arose out of articles which appeared in the *Chicago Tribune*, vigorously attacking the administration of the City of Chicago, and the corporation sued for libel, claiming compensation to the extent of ten million dollars. Judgment was entered for the defendants. In view of the widespread interest aroused by the case, the *Chicago Tribune* has published, for private circulation, two interesting brochures, giving the history of the case, the judgment, and a number of press comments.

NATIONAL ASSOCIATION OF Wholesale Stationers and Paper Merchants.

Interesting Symposium on the Occasion of
the Annual Dinner at Claridge's Hotel.

The organisation of the paper trade as it affects the relations between papermakers, paper merchants and wholesale stationers, is a matter of considerable importance to the printing and allied trades, among whose raw materials paper occupies a predominant position. Interesting indications of developments in organisation have recently found a place in the discussions of representatives of the paper trade, and this was notably the case at the Wholesale Stationers' recent annual dinner.

The annual dinner of the National Association of Wholesale Stationers and Paper Merchants at Claridge's Hotel, on Thursday, February 9th, was well supported by members and guests. The latter included several prominent papermakers, and the various speeches which followed the dinner dealt with the present position of the paper trade and the problems before the organisations in the industry in a helpful manner.

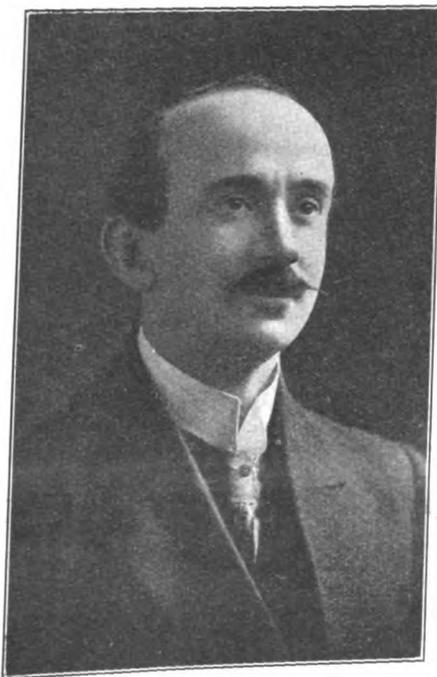

Mr. James W. Cooke (Messrs. Butt Bros. and Cooke, Ltd.), the retiring president, occupied the chair.

The dinner and the whole proceedings were of a highly successful character, the menu being in keeping with the high traditions of Claridge's Hotel. As to the subsequent proceedings, the speeches chiefly engaged the attention of those present, while Miss Helen Maris (mezzo contralto) and Mr. Archie Naish (entertainer) relieved the brief intervals.

The Ideals of the National Association.

Following the toast of "The King," Mr. J. W. Cooke submitted that of "The National Association." He desired to preserve a sense of perspective in this matter, both with regard to the wholesale stationers and the paper merchants. That was one of the most important gatherings that had ever been held in the history of the National Association. It was only two years ago since the lively Association in the South had given place to one representing all corners of Great Britain and Ireland. They had organised themselves for the common good of the paper trade and to endeavour to come to such arrangements as would be mutually advantageous, consistent with the dignity of all. The National Association stood for unity in the first place—unity of purpose. It stood also for good will, and he wished papermakers especially to mark that. In the third place it stood for co-operation, particularly in relation to service. These three things, becoming common alike to makers as well as to merchants, were going to be the salvation of the trade in the future. After remarking that the trade had grown up in a very haphazard way, the chair-man suggested that the profits made in the paper trade had not been commensurate with

the capital employed, nor with the services which they as a separate entity rendered to the trade of the country, and he maintained that this service had as much right to economic recognition, as any other section. While having regard to their own interests in the first place as wholesale stationers, they desired to co-operate and form unshakeable bonds of mutual interest with the British papermaker for the development of British industry. (Applause.) After all, Britain was dearer to their hearts than any other quarter

Photo, Lafayette.

MR. JAS. W. COOKE.

of the known globe, and they wished to encourage the right spirit between the maker and those who were the legitimate distributors of his goods. They definitely asserted that they would rather stock and put into the hands of their salesmen—and there were thousands of salesmen represented in that National Association—they would rather put into their hands British paper than the products of foreign manufacturers. (Hear, hear.) But in return for the hand of friend-

ship which they held out, wholesale stationers must know that their economic position was defined and buttressed up by agreements of mutual interest. The National Association represented in its members a large proportion of the distributing houses, whose buying power was a great asset to the British papermaker, and they invited the manufacturers to make that asset more valuable to themselves by closer co-operation and a clearer and definite recognition of the position of their members as distributors of their goods. When that had been done all houses of worth with whom they desired to do business must join the association in their own interests. Accordingly, all mills would desire to be treated equally with the pioneers of such trade organisations. Those few mills which were outside they would do their utmost by moral suasion and the power of argument to get them to come right in, so that there should be no mills left outside. The whole trade was more important than any individual member of it. The complete organisation to which he was referring was of great importance to the British papermaker, especially in view of the parlous condition of the industry at the moment. The wholesale stationers wished to assure the manufacturers of their goodwill and their desire to keep the machines running by selling the goods which were produced by British labour. (Applause.) Mr. Cooke went on to explain the advantage which the consumer derived from complete organisation, because costs were lowered and efficiency promoted, and the consumer would share the advantage.

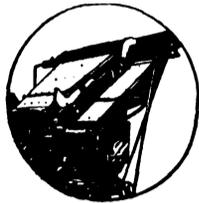

Looking to the Future.

Referring to the outlook for the future of the paper trade, Mr. Cooke observed that while he did not see any great indications of a revival, he could not help but think that the operation of economic forces, the law of supply and demand, would before long bring them some return to activity, with some hope of profit; and when that time came, the thorough organisation of their trade would retain it on a profitable basis. They were passing from an artificial to a natural condition in world affairs, as in trade, and the greatest need would be such relations between capital and labour as would replace the spirit of contention by the spirit of contentment. They required courage, goodwill, frankness, and confidence, and they would get out of a trade organisation, as out of anything, as much as they put into it.

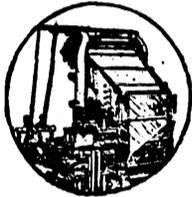

Past Year's Work.

Mr. F. M. Carson, the newly-elected president, who was cordially received upon rising

An analysis of your newspaper will reveal an astounding amount of hand display composition which should be set on Display Linotypes.

THE hand composition in your paper is so scattered that perhaps you think it does not amount to much. But if you will paste on a roll of paper all the display lines which appear in any one issue of your newspaper, you probably will be surprised to see how much type matter is still being set in your printing works in the old and expensive way.

Display Linotypes have made it possible to set 98% of any newspaper mechanically. You can calculate the saving of time, labour, and floor space you could effect by adopting all-slug composition. By adding one or more Display Linotypes to your installation of these machines, not only would your composition be quickened, but the make-up would be simplified and distribution abolished.

Ask us to analyse your newspaper for display hand-composition waste, and report to you what you can save by setting display matter as straight-matter on the Linotype.

LINOTYPE AND MACHINERY LIMITED - 9 Kingsway, London.

Milestones of Progress in Process Work.

- 1904 "The Daily Mirror" started the first Halfpenny Illustrated Daily Newspaper. PENROSE plant used in producing the blocks, and still running.
- 1909 "The Oxford Times" commenced to print half-tone blocks on a Cossar Flat Bed Web Press. PENROSE plant used in producing the blocks, and still running.
- 1912 "The Illustrated London News" commenced to regularly use the Photogravure process. PENROSE plant employed in producing the cylinders, and still running.
- 1918 "The Southend Standard," the first English newspaper to print illustrations by rotary photogravure, used PENROSE plant in producing the cylinders, and still running.
- 1919 "The Times" commenced to print its weekly edition by rotary photogravure. PENROSE plant employed in producing the cylinders, and still running.
- 1921 "The Cape Times," the first newspaper in South Africa to print illustrations by rotary photogravure. PENROSE plant used in producing the cylinders.
- 1922 "The Blackpool Times" commenced to print news and illustrations entirely by the Offset process. PENROSE plant used in producing the plates.

PENROSE'S are always at the forefront of Process Progress, and with nearly thirty years experience in supplying process plants can give their customers the best advice and service. All the leading illustrated newspapers and Engravers use PENROSE plants.

to respond to the toast, remarked that the work of the association during the past year had been both interesting and helpful. In spite of the time of trouble and trial through which they had passed, they had been able to accomplish one or two things. They had had negotiations with the railway companies, and he was glad to say they had been able to get from them certain concessions which he hoped would be to the benefit of their trade. They were in the midst of negotiations today, and he hoped they would be able to arrange, as was the case with the American and Continental trade, that the freight rates on paper should be based on the ton principle rather than that of measurement in shipping paper from this country. He need not point out the advantage which would accrue if they could calculate the rate without going through the drudgery of measuring each class of paper. Perhaps the chief piece of work they had been able to accomplish in conjunction with their friends the papermakers had been the settlement of the Paper Trade Customs, and the speaker paid a tribute to the work of the committee which had sat on this matter under the chairmanship of Mr. Holmes.

Negotiations with Papermakers.

Turning to the negotiations which had been proceeding with the Papermakers' Association, Mr. Carson said these had been taken up with the object of endeavouring to find some viewpoint from which they could visualise for the future lines along which they could work for the benefit of the industry. He was afraid that these efforts had not been quite so successful as they could have wished. They had, however, the pleasure of arriving at a settlement in one section of the trade (the fine glazed and M.G.). Here harmony seemed to prevail, and encouraged by that he thought they might look forward with some confidence that in the course of time other sections of the trade would fall into line. The president paid a tribute to the eloquence of Mr. Cooke during the negotiations, and it was not his fault that more rapid headway had not been made. Still, they had made progress. They must remember what they had to establish was some feeling of confidence between the two sides. At the present moment that feeling of confidence did exist, but not to the extent they had desired.

Foreign Competition in Paper.

The speaker referred to the restrictions enforced by the State during the past seven years, which had influenced them all in their conduct of business affairs, and went on to refer to the recent address by Capt. Nuttall who had asked them to do whatever they could, to foster the home industry. There was nothing that the wholesale stationers would desire more than to support the British paper industry. They were, however, in a difficult position, that of being forced to supply what their customers demanded. But their friend Mr. Burt, with his western commonsense, summed the thing up in Manchester when, referring to foreign competition, he said he did not believe there was any power on earth that could put an immediate and definite stop to the importation of foreign paper, but it rested with the wholesale stationers and merchants as to whether that importation should be easy or difficult. (Hear, hear.) On that point, added Mr. Carson, there were a few little difficulties to be arranged; but when they were settled he believed they would find that it was the whole-hearted desire on the part of the wholesale stationers in this country to send every atom of business they could into the home mills.

Mr. Carson went on to say that the suggestions put forward by the National Association had been honestly advanced, but he was asking himself whether they could not have been put forward with a little greater courage, and in this regard he referred to the difference between a man as an individual and as a member of a collective body. He had found when speaking to a papermaker individually that he showed the greatest courtesy and the greatest desire to forward what he hoped would eventually be in the general interests of the trade; but when they got these gentlemen together collectively they had not a word to say. Therefore, he was very much inclined to the view held by many of his colleagues in the National Association, that the time was arriving when they might try and see if they could not meet the individual rather than the papermakers as a corporate body. After all said and done, self trust was the first secret of success; and they honestly believed that what they were trying to do was the right thing. Surely, therefore,

it was their duty, if they could not arrive at a result collectively, to put the position before the individual firms.

The Future of the Trade.

With regard to the future prospects of the paper trade, the president asked what they could do to foster the industry. They were in a most peculiar position as a trade. It was very difficult to specify one thing that could improve the situation, for the reason that, although he agreed they were essential to all trades, they were not an industry *per se*. They could not do anything with their product except wrap up somebody else's goods in it and print somebody else's name on it.

Spirit of Trust and Confidence.

Mr. H. G. Spicer was responsible for the toast of "Our Guests." He remarked that there was never a time when papermakers and distributors in the wholesale trade were as close together or on such friendly terms as they were to-day. The war had taught them many things on both sides, but the great factor it had brought about was a greater spirit of trust and confidence in one another, and from that had come a realisation that each needed the other for the best and highest achievement of both. (Hear, hear.) There had been attempts to form what he might term omnibus agreements between the Association and whole groups of mills. So far they had not been achieved in the way that some people would have liked and one could not predict whether such agreements would be arrived at. Whether or no, he was fully convinced that if ever there was a time when closer co-operation between mills and wholesale stock distributors was wise or necessary, that time was now. (Hear, hear.) Whether mills and wholesale stationers were to come closer together in large groups, as in Associations, or in a smaller number of units, would remain to be seen; but that in some way or another closer co-operation was wise he personally was thoroughly convinced.

Speaking of the depressed state of trade, Mr. Spicer mentioned that wholesale stationers had had their difficulties equally with the papermakers, and he went on to urge the employment of British labour in British factories. As hindrances to a return to better trade conditions, he mentioned the postal rates, telephone charges, depreciated currency, taxation and dumping. They were all very weary, he added, but they were still hopeful for a more kindly consideration of domestic ills and a little less consideration for the ills of all the ends of the earth. They were glad to think of the great groups of mills represented in that room, and they had also the secretary of the Papermakers' Association, whose good offices were always used to tighten the strings of friendly relationship between the papermaker and the wholesale stationer. Mentioning the name of Sir Frederick Becker, Mr. Spicer offered congratulations upon his recent honour.

In conclusion, Mr. Spicer said papermakers and wholesale stationers could make many improvements in their processes and methods of business, but little would be done, in his judgment, if they hesitated to leave the old ruts through nervousness or fear of shaking old convention or custom, or if they waited either for unity of opinion or uniformity of action. The great thing, to his mind, was to make a start, and he hoped to see in the future a leadership among the papermakers that would so brace up the whole industry as to give it in the future a larger prominence and greater prosperity than it had ever known in the past. (Applause.)

Sir F. Becker and the Esparto Combine.

Sir Frederick Becker, replying first, referred to foreign competition, and was glad to hear from their president that it was not their intention to take the children's bread and throw it to the foreign dogs. He (Sir Frederick) hoped they might long continue in that view. Of course, the whole underlying principle of their business must be efficiency and service. It was the business of the papermaker to give the wholesale stationers that efficiency which was necessary for the distribution of the goods. It was necessary for them to be alive to the alterations and circumstances of demand. If he might suggest, they as manufacturers had to look to the wholesale stationers for efficiency in distribution. He was, perhaps, persuaded wrongly that there was room for improvement in that direction. He would ask them to do one thing, that was to tell the papermaker what he could safely make and put into stock. The speaker went on to lament the existence of unemployment among paper

workers, whom he described as the finest body of workmen. He appealed to the wholesale stationers to help to remove that state of things. He was satisfied there would be more money in the paper business in the future than had been taken out of it in the past.

Respective Interests.

Mr. W. L. Tod, president of the Papermakers' Association, expressed the hope that the British paper trade was now getting through its bad time, and that prosperity would return long before 1922 came to an end. The interests of the wholesale stationer and the papermaker, he pointed out, were not altogether identical, but ran on parallel lines. With a little confidence and trust and really sincere endeavour on both sides to overcome the points that separated them and to get together on points on which their interests were more or less the same, the relations between the wholesale stationer and the papermaker might become even more cordial and friendly in the future than they had been hitherto. There had always been, he thought, a great deal of mutual friendship between individuals in the trade, and he hoped that would be extended to the corporate organisations and to the whole trade.

Mr. C. R. Seddon (president of the Employers' Federation of Papermakers) said they were passing through one of the most trying periods in the history of the industry. Still the papermaker hangs on with bulldog tenacity to the hope of improvement, and the determination to carry on would, with the assistance of the wholesale stationers, see them through. They were told that the man who was too optimistic had two misty optics, but they also knew that a pessimist was a man who if he had to decide between two evils chose both. (Laughter) Why should they be either? What they had to do was to continue to try to produce the material which was used by their hosts at a price which would enable them to place orders. Papermakers wanted their assistance and patriotic support. So long as preference was given to foreign manufacture they could not expect papermakers to rise from their ashes and give the necessary paper. The quotation of the foreigner was not competition. It was simply a device by which he imposed upon the British taxpayer the onus of paying the reparation which was due from the gentlemen who were reported to have lost the war.

Capt. W. E. Nuttall hoped that that gathering meant the drawing together of all sides of their ancient and great industry. He painted a gloomy picture of the silence in many paper mills, where machines were stopped, and went on to urge that it was open to the distributor of paper to do a very great deal to encourage the sale of the British made article against that of the foreigner. In the direction of co-operation with British mills, many ways might be found. In return the British papermaker must regard the merchants as the recognised channel of distribution, and once a mill became remunerative again so that capital was available, every nerve and sinew must be strained on the papermaker's part to beat the foreigner at his own game. It could and must be done. It could be done by improved methods of production. He added a word of gratification that the agreement between his section of the trade and the wholesale stationers and paper merchants had been ratified.

Mr. H. A. D. Wathen expressed the conviction that a brighter prospect was before the trade.

Sir Herbert Morgan also acknowledged the toast in a happy and humorous speech. Incidentally he suggested that the papermakers and the paper distributors should combine to prove to the Government that the excessive postal rates were not only a deterrent to their particular industry but to British commerce as a whole.

The Golf Challenge Cup.

The chairman then presented to Mr. Dykes Spicer the cup which he had won in the golf competition, and Mr. Dykes Spicer, in response, expressed a wish that a paper trade golfing society might be formed, in which not only the wholesale stationers, but papermakers, merchants, agents, wood pulp merchants, and envelope makers, in fact, everyone connected with the trade could take part.

The chairman also presented a gold pencil-case to Mr. Parkinson, the runner-up in the competition, and Mr. Parkinson made a suitable acknowledgment.

The health of the chairman, proposed by Mr. F. Machin, closed the toast list, and the proceedings terminated not far short of midnight with the singing of Auld Lang Syne.

Trade Notes.

METAL POWDERS PROTECTION.—Further evidence was heard on Tuesday at the Board of Trade inquiry into the application of Metal Powders, Ltd., for bronze and aluminium powders to be included in the Safeguarding of Industries Act (Part II.). The Federation of Master Printers was represented and put forward evidence in the interests of users of the powders. Further evidence will be given on March 14th.

BINDERY WAGES.—At a representative meeting of the Bookbinding Section of the London Chamber of Commerce, held on Wednesday of last week, the following resolution relative to wage reductions was unanimously adopted: "That the Bookbinding Section desire to draw the earnest attention of the Federation of Master Printers and the London Master Printers' Association to the existing serious conditions prevailing in the bookbinding industry through lack of orders, which, in the opinion of the section, is due to the high cost of book production (including binding) brought about by the present excessive rates of wages. The Bookbinding Section desire to record their strong conviction that, until the cost of production is considerably reduced by a decrease in wages, they do not see any possibility of a revival of their trade. The Section therefore urge the supreme importance of steps being taken to secure an immediate adjustment of wages in accordance with the reduced cost of living."

PRINTERY FIRE.—The printing works of Messrs. White and Farrell, Hull, have been considerably damaged by fire, the top floors, where the outbreak originated being burnt out and the roof demolished. The premises were equipped with the latest printing machinery and were heavily stocked. One estimate of the damage is £15,000. The flames broke out shortly after the employees left for dinner. About 40 workpeople are thrown out of employment.

ROCHDALE master printers invited the chief branch officials of the T.A. and the Society of Bookbinders to meet them on Thursday last in a conference as to the best subjects for lectures for the remaining part of the season. The Master Printers' Association have defrayed the cost of the lectures, but have thrown them open to the employees with every encouragement to attend.

MR. W. T. FIELDING, of the Manchester College of Technology, last week gave the second of his lectures to the Rochdale Master Printers' Association on "Printing Machine Construction."

MR. J. R. RIDDELL delivered an interesting talk on "Technical Education in the Printing Industry" at the monthly meeting of the Electrotypers, Stereotypers, Managers and Overseers, on Tuesday evening. A report of the proceedings will appear in next week's issue.

An address on "Printing Ink: Its Manufacture and Uses" will be given on Friday, March 3rd, at St. Bride Institute by Mr. E. H. McLeod (chemist, Messrs. Ault and Wiborg, London), the chair to be taken at 7 p.m. by Mr. C. A. Bates (managing director, Messrs. Johnson, Riddle and Co.).

STEREOTYPERS' CONCERT.—The Auxiliary to the Printers' Pension Corporation will hold a concert on Monday next at Anderton's Hotel, Fleet-street, E.C. Mr. F. R. Garard (printer) and Mr. G. W. Sharvell (foundry) of the Amalgamated Press, are presiding, and a good programme of artistes has been arranged.

The first concert of the season of the Lithographers Auxiliary to the Printers' Pension Corporation—of which Mr. J. E. Reeve, of Messrs. Geo. Mann and Co., Ltd., is the president—will take place at the Cannon-street Hotel on the 28th inst. The chair will be taken by Mr. Harold V. Strong, and the concert, which will commence at seven o'clock, is expected to be of the usual quality of excellence provided by the promoters of this auxiliary.

POSTER CENSORSHIP.—On the ground that a minority, at any rate, of their passengers might object to it, the Underground has refused to accept for exhibition the principal poster of the film "Atlantide" showing at the Covent Garden Opera House. The poster—which shows a figure clad in a black and gold cloak parted at one side, exposing a bare leg—has been shown all over London, and was in use in Paris for six months.

"SPORTING ILLUSTRATED" is the title of a new weekly sporting paper published at 1s.

In reducing its price from 2d. to 1d., a change which came into force with its issue of Monday last, the *Westminster Gazette* announced its intention to make no change in size or the general character of its contents.

The Vellum Binders' and Machine Rulers Pension Society, in their seventy-ninth annual report and balance sheet, record a successful year's work, there having been, notwithstanding the unprecedented slump in our trade, a continued increase of membership and a substantial increase in the funds and effects of the Society, the latter for the first time in the Society's history, exceeding £3,000. The seventh-ninth annual meeting of the Society will be held at the St. Bride Institute, on March 6th, when Captain F. A. Garrett, M.C. (Messrs. R. T. Tanner and Co., Ltd.) will preside.

ANTI-CONSUMPTION POSTER.—In drawing attention recently to the health leaflets which have been issued by the Health Committee of the Joint Industrial Council we mentioned that the Committee had also a poster in preparation. This poster is now issued, and the suggestion is made that it should be posted on the wall of every room in every factory. The poster is headed "To Prevent Consumption." Indication is made of the symptoms of the disease in its initial stages, and the need for early medical attention is urged.

JUDGMENT was given in the High Court last week in the cases in which it was sought to commit Mr. Horatio Bottomley, M.P., and Mr. Reuben Bigland for contempt of Court. Mr. Bottomley, Sunday Publications, Ltd., and Odhams Press, Ltd., were each fined £100 and costs for an article entitled "The Secret History of the Bigland Case," published in the *Sunday Illustrated*. Mr. Bigland was fined £10 and costs for remarks in a leaflet published by him appealing for defence funds in the libel case brought against him by Bottomley.

MR. B. KELLEHER, who until a few months ago had been London editor of the *Freeman's Journal* for eight years, has died at his home in county Cork.

MR. S. H. GODFREY, of Exeter, suddenly expired on Monday. He was about 70 years of age and had been employed as a stereotyper for many years with Messrs. W. Townsend and Co., printers, Exeter.

MAJOR-GENERAL SIR DAVID WATSON, K.C.B., who died on Sunday, aged 51, at the age of 20 joined the staff of the *Quebec Chronicle*, of which he became general manager in 1904, and managing director two years later.

CHARLES FEARER, aged 38, of Amos-street, Liverpool, was instantly killed while engaged at the Victoria Printing Works, Victoria-street, Liverpool. He was standing on the top floor at the mouth of the lift shaft, receiving bales of paper, which were being sent up from a lorry in the street. Two bales had just reached his level and he was reaching forward to steady a weight counterbalancing the lift on one of the chains, when a link snapped, the lift fell like a stone, and Fearer, losing his poise, fell into the street, a drop of sixty feet.

The death occurred on Sunday at Cardiff of Mr. Archibald McLay, printer and wholesale paper merchant, at the age of 59. Mr. McLay had been ailing for two years. He was a native of Govan, Glasgow, and became an undergraduate at that University. He ultimately settled thirty years ago at Cardiff, taking over the printing and stationery business founded seventy years previously in Duke-street, Cardiff, by the late Mr. William Jones, and so developed it on wholesale lines that the firm of A. McLay and Co., Ltd., became well known throughout Wales.

WILLS.—Mr. Arthur Alfred Hentschel, of High Holborn, W.C., and of Eastbourne, hotel proprietor and commercial catalogue illustrator (died at the foot of Beachy Head on January 8th), £9,839; Mr. Charles Rogers Cheshire, of West Kirby, for some time connected with the advertising department of the *Journal of Commerce* (died December 27th), £579; Mr. John Sigsworth Birdsall, of Leeds, for over 30 years on the staff of the *Yorkshire Post* (died January 4th), £1,511; Colonel Celestin Charles Edward Cassal, V.D., Kensington, editor of *British Food Journal*, 1899-1914 (died December 22nd), £2,007.

JUNIOR printing students from the Camberwell School of Arts and Crafts paid a visit

the other day to the London offices of the Ludlow Type Caster, and were immensely interested in the demonstration given them of the capabilities of the Ludlow machine.

The Postmaster-General states that reductions in the prices of official telephone directories will be made as from March 1st next.

The birthday book which Lady Tree is giving as a wedding present to Princess Mary has been on view at the Oxford University Press. The volume was originally a gift to Mrs. Flaxman, and on the fly-sheet is pasted a pencil drawing of Blake by Flaxman.

UNDER the auspices of the Newcastle Print Collectors' Society an exhibition which will comprise nearly the whole of Baxter's works, will be opened on the evening of February 28th, and be continued on following days at the School of Art, Armstrong College, Newcastle.

The Cambrian Resorts Association at a meeting on Thursday made arrangements for a Press advertising campaign for the Easter holidays. It was decided to issue 15,000 new guide books at once owing to the great demand for copies experienced last year from all over the country, a demand which it was stated was due entirely to Press advertising.

The annual dinner of the journalists of Edinburgh and district was held on Saturday evening. The gathering was representative of the staffs of all the newspapers in the city. Mr. L. Leslie Stuart presided.

DURING the whole of March there will be on view at the Brook-street Art Gallery, 14, Brook-street, New Bond-street, London, W., an exhibition of sketches and other work by Stella Langdale, and oil paintings, etchings and drawings by E. Eesketh Hubbard, R.O.I., A.R.W.A. Mr. Hubbard is the founder of the Print Society, an international society of etchers and print collectors, and the editor of an authoritative work on the technique of etching and the art of print collecting.

NEW IRISH STAMPS.—The contracts for the printing of the surcharge of the Provisional Irish Government upon the English postage stamps, which will be in use until the production of the actual stamps of the Irish Free State, have been given to two Dublin printing firms—Messrs. Alexander Thom and Co. and Messrs. Dollard and Co. The first instalment of stamps so surcharged represents a value of £250,000.

In the *Figaro*, M. Louis Latzarus, the editor, announces that M. Coty, the perfume manufacturer, will enter into possession of the paper by the end of the month.

The strike of compositors in Paris has led to a resort to production of newspapers, including the *Daily Mail* and the *New York Herald*, by photographic reproduction of type-written copy—as previously done in America and in this country.

REPORTS from Cairo state that a very prominent Zaghoulouist journal has been suspended indefinitely for publishing articles likely to provoke shootings and outrages.

"PRESS FUND WEEK," organised by the Dublin District of the Newspaper Press Fund, promises to be a big success. Football matches, golf competitions, and other items will fill the programme for the week, which finishes with the race meeting at Leopardstown and the grand concert in the Round Room of the Mansion House on Saturday, April 1st.

COPENHAGEN'S Syndicalist daily, the *Arbejderbladet*, has ceased publication.

 CHANCERY LANE, LONDON, E.C.4.

The New L.M.P.A. President.

Lieut.-Colonel J. R. Truscott.

At a meeting of the Council of the London Master Printers' Association on Thursday, the council elected a new president of the association, to succeed Mr. R. A. Austen-Leigh, who has completed two very successful years in the presidency. The unanimous choice of the council fell upon a distinguished soldier-printer, Lieut.-Colonel James Ralph Truscott, of the well-known City firm of Jas. Truscott and Son, Ltd. This firm was founded about 1820 by the father of the late Sir Francis Wyatt Truscott. Sir Francis was Lord Mayor of London from 1879-1880, and his eldest son was the late James Freeman Truscott, the present colonel's father.

Born April 22nd, 1876, James Ralph Truscott was educated at Clifton College and Lausanne, and entered the firm of Jas. Truscott and Son, Ltd., in 1894, being made a director in 1902. His fellow directors at the present time are: Sir George Wyatt Truscott, Bt. (ex Lord Mayor of London), Mr. Henry D. Truscott, J.P., Lieut.-Colonel R. F. Truscott, O.B.E., M.A., Mr. Albert Bennett, and Mr. W. Tredgold.

On the outbreak of war he enlisted—in October, 1914—in the Inns of Court, and saw four and a-half years' service in France

Lieut.-Colonel J. R. Truscott.

Belgium and Germany, in the course of which he rose from private to lieut. colonel, and was mentioned in dispatches.

His war experiences were of a very varied character. The colonel had the unique experience of watching his own grave being dug by mutinous Chinese when he was endeavouring to quell a disturbance in a Chinese Labour Compound near Hazebruck. He was in command of all labour units (about 10,000 officers and men) in the original army of occupation in Cologne, and the portrait shown herewith was taken in that city in January, 1919. When in the Australian Corps in France, the colonel was for a time under Colonel Acland, who is a partner of the firm of W. H. Smith and Son.

The colonel's brother, Lieut. C Cyril A. Truscott, and his cousin, Lieut. Francis G. Truscott, who were both in the firm, were both killed in the war.

Lieut.-Colonel R. F. Truscott (another brother) is at present managing director of the *East African Standard* in Nairobi, and is looking after the firm's interests in Kenya.

Lieut.-Colonel J. R. Truscott is one of H.M. Lieutenants of the City of London, and is a Liveryman of the Stationers' and Vintners' Companies. His clubs are the Junior Carlton and the City Carlton.

At the annual meeting of the Southern District of the National Association of Wholesale Stationers Mr. Dykes Spicer (James Spicer and Sons, Ltd.) was unanimously elected president, with Mr. Harmer Dalton as vice-president. Mr. H. Holmes (Chas. Morgan and Co., Ltd.) continues in the position of hon. treasurer.

S.-E. London Printers' Rally.

Something like a record attendance marked the meeting of the Association of Master Printers of South-East London held at the Shakespeare Hotel, Powis-street, Woolwich, on Tuesday of last week. Mr. E. Bostock Smith, president, was in the chair, and between 40 and 50 master printers were present.

The proceedings opened with a short business session in which attention was given to the question of the more thorough organisation of master printers in the neighbourhood. It was agreed to hold meetings of the association in various districts during the year so as to reach all members in the wide area covered by the Association of Master Printers of South-East London. Five candidates for membership were duly elected into the association.

The gathering was favoured with a short address from Mr. R. A. Austen-Leigh, who expressed great satisfaction at seeing such a representative gathering got together from so widely spread a district. He outlined the activities and aims of the London Master Printers' Association, particularly emphasised the necessity for co-operation among master printers in these times of slackness of trade and severe competition.

Mr. George Eaton Hart spoke of his recent visit to the United States, and told of his investigations among printing establishments there. Remarking upon the enterprise of American printers and their very wide employment of machinery to displace hand work, Mr. Hart had some striking facts to put forward as to the big outputs obtained from machinery in the States as compared with the corresponding outputs in this country. The greater outputs possible from composing machines were especially stressed. American printers' extensive application of up-to-date costing methods was also emphasised, and Mr. Hart handed round for inspection some of the costing forms used in the States.

The question of increased output figured largely in a lively discussion that followed Mr. Hart's address. It was evidently the general opinion that greater output was a necessity, as it would make possible the reduction of prices, which is the great desideratum at the present time.

Master Printers in North London.

Four new members, who had been obtained through the instrumentality of Mr. Johnson of "No. 24," were elected at the February monthly meeting of the North London Master Printers' Association, viz.: H. J. Parkin, 2, Shakespeare-road, N.16, Batstone Press, 9 and 9A, Colebrook-row, N.1., Scammell and Co., 2A, St. Paul's-road, N.1., and the Victor Printing Co. (Mr. Bafico), 78, Upper-street, N.1.

A discussion arose over the grievance of a member who had lost the services of an estimating clerk after many years' service, and it was decided that a recommendation should be forwarded to headquarters suggesting that a new rule should be made to the effect that before a pivotal man employed by another member of the Association was engaged, the member engaging him should at least be under the obligation of acquainting the firm where the man was engaged.

A good deal of time was taken up by the subject of the condition of the printing trade and general slackness of work, and it was generally considered that there was a real necessity for a further reduction of wages. A resolution was agreed upon stating that, taking into consideration the reduced cost of living, a flat reduction of 12½ per cent. was the least that all employees should concede, and that this recommendation be forwarded to 24 Holborn with a request that the necessary steps should be taken to secure this as a means to increasing work generally.

The subject of competition of wholesale stationers was well taken up, and delegates were appointed to the special committee to be held by the L.M.P.A.

Mr. F. J. Collins, of Finchley, was complimented on the excellent programme prepared for the bohemian concert in connection with the Association.

Mr. T. Sellens in the absence of the president (Mr. D. A. Whitehead) occupied the chair.

W. R. C.

Printers' Managers and Overseers ASSOCIATION.

Annual Bohemian Concert.

With a full attendance and an excellent programme, the annual bohemian concert of the Printers' Managers and Overseers (Parent) Association—held at the Cannon-street Hotel on Monday evening—was a complete success.

The president of the Association, Mr. S. M. Bateman, was in the chair, being supported by the vice-president, Mr. R. H. Berry, the general secretary, Mr. E. W. Whittle, and the other officials of the Association; whilst the members of the Council performed the duties of a reception committee.

Among the visitors were Mr. Kenneth Bridges, and two representatives of the Printing, Bookbinding and Kindred Trades Overseers' Association—Mr. A. W. Hunt, president, and Mr. A. Cox, secretary.

In opening the proceedings, the chairman announced that the concert would not be interrupted by speeches, and accordingly it was possible to make the most of the excellent programme provided.

The only pensions effort made in connection with this concert was the taking of a collection at the doors. The president, in drawing attention to this collection, said there was a strong section of the members of the P. M. and O. A. who were active supporters of the Printers' Pension Corporation. They owed a deep debt of gratitude to Mr. A. E. Jarvis and his committee for their work on behalf of the third P. M. and O. A. pension. Only about £50 was left to complete it.

The artistes were under the direction of Mr. Philip Ritte, whose own tenor singing was a much applauded feature of the evening. The concert on this occasion, as when the same company has previously entertained the P. M. and O. A., evoked very hearty appreciation throughout. The well-varied programme included contributions by Miss Doris Cowan, Miss Ethel Wilford, Miss Dorothy Skurdy, Mr. Geoffrey Duprée and Mr. Will Edwards.

Towards the close of the proceedings, the vice-president proposed a hearty vote of thanks to the stewards for their services, and Mr. C. Phillips replied.

Printers' Advertisement Condemned.

Treasury Note Imitation.

A short time ago, Messrs. F. Youngman, Ltd., printers, Vicar-lane, Leeds, hit upon the idea of producing a paper wallet with what appeared at first sight to be a Treasury note protruding from one end—says the *Yorkshire Evening News*. Actually the printing on the "note" was totally unlike that which decorates the genuine note. Moreover, the "note" manufactured at the Youngman "mint" possessed the peculiarity of being a pound "note" on one side and a ten-shilling "note" on the other. Added to this is the fact that on opening the wallet one found the "notes" to be nothing more or less than an advertisement for such and such an article—or entertainment.

Messrs. Youngman were quickly bombarded with inquiries for these novel wallets and in a short time they had completed orders for firms in different parts of the country. The success of the wallets from an advertising point of view was assured.

This success, however, did not last, for, from the Public Prosecutor, Messrs. Youngman received a document to the effect that the "notes" were illegal, and must be destroyed, together with the blocks, etc., used in their manufacture. Simultaneously, some of the firms who had purchased the wallets were notified that they must at once destroy any of the "notes" remaining in their possession. Eventually a member of the Leeds Police Force visited Messrs. Youngman's establishment and witnessed the destruction of several thousands of "notes," later taking possession of a stereo plant.

The view of the police in the matter may be summarised in a sentence: "That the act of making advertisements which resemble a portion of a Treasury note is in itself an offence and might be termed a 'forgery.'"

New Miehle Vertical Press.

A new departure in cylinder presses is seen in the "Miehle Vertical" which has just been introduced by the Miehle Printing Press and Manufacturing Co. In this machine the bed on which the type rests is vertical, instead of horizontal, as is the case with most cylinder presses now in use, and it is claimed that this style of bed saves floor space, the area required for the new press being but five feet by four feet for a machine that takes a form of nineteen by twelve inches. In the general construction of the press everything has been planned to facilitate quick changing of forms and making-ready, and the press is adaptable for thin or heavy paper, the register being most accurate. The driving power required is but small, a 1½ h.p. motor being quite sufficient for running. The "Vertical" was shown for the first time at the Convention of the United Typothetæ of America, held at Toronto recently, and met with such instant success that over fifty orders were secured for early delivery. The principle of the vertical type-bed has been tried before, and at one of the printing trade exhibitions, at the Agricultural Hall, some years ago, there was a cylinder press shown by a French maker, in which the press was vertical and the cylinder travelled up and down the form. This press, if we recollect aright, afterwards was handled in this country by the then firm of W. C. Horne and Co., of London, but of late years we have heard nothing of it.

The London Ad. Club.

In the development of the psychology of publicity it has long been felt that there is a great need of closer co-operation between the efforts of that indispensable trio: the press advertising man, the publicity man and the printer. With this object in view, Sir Charles F. Higham, M.P., and Mr. P. Emanuel, of Odhams Press, Ltd., have recently addressed the London Ad Club—a Club formed for the furtherance of comradeship and publicity education. The next address to be given to the club will be on the subject of "Co-operation Between the Advertising Man and the Printer," and will be delivered by Mr. W. H. Burchell, governing director of the Caxton Press, Ltd., and hon. secretary of the Association of Master Printers of the London Central Districts, at the Prince Henry Rooms, 17, Fleet-street, E.C.4 (facing Chancery-lane), on Thursday evening next, March 2nd, at 7 o'clock. The chair will be taken by Mr. T. Gilbert Oakley, Fellow and Member of Council of the Incorporated Society of Advertisers' Consultants. Admission can be obtained on presentation of business card.

Football.

The following matches have been played and resulted as indicated:—

Printers' Football League.

On February 11—Cornwall Press, 6; Blades, 1. Falcon, 11; Fryotype, 1. Drakes, 1; Amalgamated Press, 1. Waterlows, 4; Fleetway Press, 0.

On February 18th (in the same League)—Amalgamated Press, 3; Wightman's, 0.

Printers' Charity Cup.

Semi-final (Division II.)—Cornwall Press, 7; Jayswood, 2. Sun Engraving, 1; Blades, 0. Cornwall Press and the Sun Engraving now meet in the final.

SPECIAL PREPAID ADVERTISEMENTS

The Minimum Charges for Three Lines, with an average of seven words to the line, for Advertisements under the headings given below are as follows (extra lines at proportionate rates):—

	Three Lines	s.	d.
Agencies	3	0	
Situations Wanted	1	6	
Situations Vacant	3	0	
Machinery for Sale and Wanted	3	0	
Businesses for Sale and Wanted	3	0	
Shares for Sale and Wanted	3	0	
Partnerships and Investments	3	0	

Three Insertions Charged as Two.

The following are the rates for Advertisements classified as under:—

	Per Line	s.	d.
Sales by Auction	2	0

Patents for Sale	2	0	
Legal and Financial Announcements	2	0	

Replies may be addressed to Box Numbers, Office of the "British and Colonial Printer and Stationer," 58, Shoe Lane, London, E.C.4 for which a fee of 6d. is charged to cover postage of replies.

Cheques and Post Office Orders to be crossed and made payable to STONHILL & GILLIS.

Telegrams: Stonhill, Fleet, London.
 Telephone: 8407 City.

Situations Vacant.

H.M. STATIONERY OFFICE.

AN Examination, open to Ex-service Men only, for 14 Permanent Appointments as PRINTING and BINDING CLERK will be held on May 2nd, 1922.—For full particulars apply to the Controller, H.M. Stationery Office (Establishment Division), Princes-street, London, S.W.1. 13912

LITHOGRAPHIC AND OFFSET TRADE PRINTING.—REPRESENTATIVE wanted, with sound connection amongst Publishers and other users of High-class Printing; excellent opportunity for energetic gentleman who understands the trade. Applications will be promptly dealt with in strictest confidence.—Box 13902.

Situations Wanted.

BOOKBINDING.—VELLUM GOLD FINISHER (age 26), seeks permanency; used to London house, High-class Account Work, Gold Blocking, etc.; able to take charge.—Box 13877.

BOOK-KEEPER (age 38), married, one child; knowledge Typing, Correspondence, Advertising and Press Work, etc.—D/o, Box 13878.

ENGINEER-FITTER; 31, single; some theory; good education; office experience; seeks employment, home or abroad.—Box 18643.

ELECTRICAL FITTER, young, desires charge of Motors (all kinds), Lighting, Lifts and other Electrical Gear.—S., 22, Montreal-road, Ilford. 13908

ENGINEER, NEWS PRESSMAN, qualified to take full charge as Manager in all departments; used to high-speed, up-to-date Rotaries, Auto-Plate Machinery, Stereotyping, Matrix and Half-Tone Production; accept position home or abroad; live man; steady; good references.—Box 13910.

GENTLEMAN, with first-class connection amongst Wholesale Binders, Stationers and Box Makers, desires to represent Firm of good standing.—Reference, etc., upon application to Box 13895.

LITHO: COLOUR PRINTER seeks situation; Flat-bed, Stone or Plate; wages, mutual arrangement.—Box 13906.

MINDER, well up Half-Tone Colour Process, Cartons, Labels, Com., etc.; Wharfes, Two-Revs., Bate's and Summits; home or abroad.—Box 13909.

MINDER (young) seeks perm.; all classes Cylinder Machines, Half-Tone, Colour, Commercial; wages by agreement.—Sherreard, 25, Durrington-road, London, E.4. 13916

READER-COMPOSITOR (n.s.), all-round experience.—T., 114, Conway-road, Southgate, N.14. 13905

Partnership.

COPPERPLATE ENGRAVER, having expert all-round experience and full equipment seeks PARTNERSHIP in established business (London or within 30 miles radius); small capital.—Write, Middleton, 25, Missouri-road, Clubmoor, Liverpool. 13914

Machinery for Sale.

DAWSON'S Quad Demy REVERSUS, with rotary slitter and Klimsch counter, fitted with Slogger feeder, £700.

FURNIVAL'S Quad Demy 2-REVOLUTION, with rotary slitter and Klimsch counter, fitted with Slogger feeder, £700.

DAWSON'S Quad Crown WHARFE, balanced flyers, rotary slitter, geared inkers and Klimsch counter, £250.

Quad Demy WHARFE "FINE ART" (Dawson), with rotary slitter and Klimsch counter, £325.

DISC RULER (Brissard), take sheet 24-in. by 26½-in., two-side, two-colour, £180.

DISC RULER (Brissard), take sheet 26½-in. by 33-in., two-sider, two-colour, £200.

DITTO, £200.

DITTO, with perforator, £220.

BREHMER FOLDING MACHINE, Quad Crown, full automatic feed; 2, 3 or 4-fold, practically new, £600.

BREHMER FOLDING MACHINE, Quad Crown, full automatic feed; 2, 3 or 4-fold, first-class condition, £500.

All the foregoing machines are in full working order, and may be seen running by appointment with the Factory Manager, Messrs. E. J. Arnold and Son, Ltd., Butterley-street, Hunslet-lane, Leeds.

All offered subject to immediate sale. Any reasonable offers will be considered. 13913

FOR SALE, FLY KNIFE CUTTER, cutting sheets from 17½ in. to 50 in.; 12 reels, standard size gear attached; pulleys with cone driving and shafting included; 32 revolutions per minute; one horse power necessary to drive; will cut one ton per day; perfect condition.—Box 18626.

Miscellaneous.

FOR DISPOSAL, £750, CITY PREMISES: lease 19½ years; ground rent £25; also small stock Wrappings and Twines, Furniture and Fixtures; telephone.—Box 18646.

LUNCO, "THE INEXPENSIVE TYPE WRITER PAPER." Six colours and White always stocked. Price 1s. 3d. per quarto ream, boxed. Advertising matter free. Trade only supplied.—Please apply for samples to W. Lunnon and Co., Paper Mills Agents, 59, Carter-lane, London, E.C.4. 13863

PORTABLE TYPEWRITER wanted; must be in good condition; state lowest price.—Box 13881.

PRESS CUTTING AGENCIES in principal British Colonies are invited to communicate to Box 13882.

WANTED, BLOCKS (Odd or Series), Half-Tone, Line, etc.; suitable for small Magazine.—Particulars and price, to Simpson, Largs, Ayrshire. 13915

WANTED, Good Printer to give PRICE for PRINTING CHEAP NOVELS; send sample, lowest price, 208 pages.—A. Carlton, "Colehurst," Worcester. 13911

Jubbs' on Their Metal.

THURSDAY, FEBRUARY 23, 1922.

Driving Printing Abroad.

The practice of posting abroad in order to evade the high postal charges in this country appears to be on the increase, and we judge that it means a very considerable loss of revenue to the Post Office as well as constituting a serious threat to divert British printing to the other side of the Channel. In the House of Commons last week Mr. Kellaway informed Sir H. Norman that it is estimated that the loss of revenue due to the growing custom of posting abroad printed matter for circulation in this country is slightly under £1,000 a month. This estimate is surely open to very serious question in view of the evident prevalence of the new custom, and in view also of the large sums which even a single instance of such posting may involve. An interesting further example of what is going on has come to light: Messrs. Ryder, the seed dealers, of St. Albans, have posted a small list, taken from their full catalogue, from the Continent. In a foreword to this list they state that many firms are having their printing done abroad, thereby effecting a big saving in postage. "We also might easily have done this with our full seed catalogue," they declare, "but we decided to print and post this in England, although we should have saved over £12,000 by printing and posting abroad. We felt, however, that an object lesson was needed, and we decided to publish this small list from the Continent. Before doing so we consulted several large English printing firms, and to our surprise our proposal met at once with most enthusiastic approval and support. It is a melancholy fact that many branches of the printing trade are practically at a standstill, for although traders can afford to pay for the preparation and printing of lists, catalogues and advertising matter, they cannot afford to distribute them because of the excessively high postage rates."

* * *

Inferior Account Books.

THE constant outcry against high prices of account books has led manufacturers to lower the standards of quality, a sinister aspect of the economy stunt which now pervades every

reach of business. Quotations are rarely given by the stationer nowadays without being accompanied by alternatives in the shape of much inferior qualities of paper, and more often than not it is the cheaper grade that is selected. Consequently there has been something of a run on the lower ranges of azure laid papers. To meet this need, quite a large number of new cheap makes have been put on the market, and it is almost possible to run up the scale of qualities by halfpenny stages from 4d. to 1s. 6d. per lb.

* * *

Increased Paper Imports.

THERE was a substantial increase in the imports of paper, etc., into the United Kingdom during January, representing nearly 71.1 per cent. over the figures for the corresponding month of last year. The total quantity was 688,688 cwts., as against 402,273 last year, although, contrasted with the 1,008,828 cwts. in 1920, a decrease is shown of 320,140 cwts., or 31.7 per cent. The comparative figures for the month against those of the corresponding month of last year for the principal items comprising the imports show increases in every instance. Printings and writings increased 83.4 per cent., packings and wrappings 92.4 per cent., coated papers 32 per cent., stationery 35.4 per cent., mill, leather and cardboard 13.9 per cent., strawboards 65.6 per cent. and other sorts 115.3 per cent; the largest contributor to the British market was Sweden, with 22,533 cwts., an increase compared with the 16,939 cwts. of last year, but a decrease contrasted with the 37,232 cwts. two years ago. Norway's shipments approximate to those of twelve months ago, while increased supplies have been received from Germany and Newfoundland. Regarding values, an interesting fact is that, notwithstanding a 71.1 per cent. increase in quantity, a decrease has taken place of £183,528, or 18.2 per cent., compared with a year ago. Compared with January, 1920, the value has depreciated £995,048, or 54.7 per cent.

* * *

Improvement in the Exports of British Paper.

THE shipments of British paper last month amounted to 146,915 cwts., and the fact that this is the highest figure recorded since January last may in some measure help to relieve the gloom which has enshrouded the industry for so long. Compared with January, 1921, a decline is registered of 74,552 cwts., or 33.6 per cent., and contrasted with two years ago, a decrease of only 11,504 cwts., or 7.2 per cent. Printings, which comprise the principal item on the list, and amounted to 72,925 cwts., show a big decrease (57,375 cwts.) compared with the corresponding month of last year, but a satisfactory increase (15,742 cwts.) compared with 1920. Of this class of British manufacture 51,616 cwts. were shipped to British Possessions and 21,309 cwts. to foreign countries. Australia continues to be the best market for British printings, with 28,123 cwts. to her credit. This figure, however, compares unfavourably with the 48,860 cwts. shipped last year, but marks a big improvement compared with the 2,334 cwts. for 1920. To New Zealand supplies have been well maintained, but consignments both to British South Africa and British India have been meagre. Packings and wrappings sent abroad amounted to 25,091 cwts., and constitute the only increase worthy of note. With regard to the various markets for writing paper in large sheets—with the exception of a slight increase in the case of France—consistent decreases have taken place. Of the total shipments amounting to 10,608 cwts., 8,081 cwts. were shipped to British Possessions and 2,527 cwts. to foreign countries. The total value of the exports of British paper amounted to £581,481, decreases compared with last year of £836,303, or 58.9 per cent., and with two years ago of £75,383, or 11.4 per cent.

Men and Things.

THE King's Printing House (Messrs. Eyre and Spottiswoode) has lost its venerable chief, Mr. George E. Briscoe Eyre. He passed away last Sunday in his 83rd year. He was staying, in the hope of recuperation, at a south coast town.

o—o—o

THE firm's athletic club was holding its annual supper on Saturday night. One or two there present had a fear that the illness which had recently afflicted their aged employer might even then be approaching its crisis. To be sure his record in terms of strength of all kinds bade them hope that in this supreme test, the forces of health might win. None the less, the pathos of the position was very present to their minds, shadowing what would have been their enjoyment.

o—o—o

THE King's Printing House has its own nomenclature; its Governor and its Controllers. Mr. Eyre was Governor Eyre to all the staff. There was a double fitness in this. Not only is the House famous for its especial position in relation to the Government, but it is remembered with pride that it had for its chief, and not so long ago, the learned president of the Royal Society, Dr. William Spottiswoode. Governor Eyre linked up with that tradition.

o—o—o

WHILE Governor Eyre's special interest was the printing of Bibles by his firm, I believe he kept in touch almost to the last with the manifold printing activities of his great establishments in the City and at Shacklewell-lane in north-east London.

o—o—o

It is always pleasing to see an old firm with a great past entering full force into the spirit and power of modern improvement as has so manifestly happened in particularly two great departments of this House. Under the direction of Governor Eyre's younger relative Major Crosthwaite and his associates the name and fame of the establishment should be well safeguarded and developed. I would tender for my readers warm sympathy with all to whom this death brings a conscious and close sense of loss. A just and generous employer, and one who dignified the craft, has left us the abiding helpfulness of his example.

o—o—o

I NOTE a suggestion over the initials D. R. K. This signature manifestly represents that good friend of us all, Mr. D. R. King, erstwhile of Dublin, and now, and for some time past, secretary of the Midlands Alliance of Master Printers. The suggestion is that a machine not named (but which I take to be a Multigraph) should be installed by printers and should be worked for them by somebody other than their ordinary printing staff. Mr. King's idea, I gather, is that the machine in any case has come to stay. Once his customer has installed the Multigraph in his own place, there is a real danger that he may content himself with it, even despite its limitations, and despite the fact that he may not make the best of what it could do. The printer having this machine in his place can after all offer what the customer may consider, wisely or unwisely, to be best for himself in the circumstances, and he remains in constant communication with his customer and can always offer his suggestions.

o—o—o

THE small multicolour press brought out by the Addressall firm is another which must be most seriously noted as competing with us in our customer's premises. It is made with a small vulcanite cylinder. This plan probably would not serve for larger sizes, but seems to be effective in the size put on the market. I studied it carefully at the Efficiency Exhibition at the Central Hall, Westminster. Printers' ordinary types and plates are used. Its price seemed low. Its auto feeder is a £50 extra. Clearly the printer must adopt a definite policy re these competing machines. He must not drift. If he does not pursue this competition it will pursue him. It is possible that the low prices at which the Multicolour press is said to be producing certain work do not comprehend all the factors our costing system has taught us to include. All the same, I suggest we see to it. It is better to absorb and work a new power than be injured by it.

ONE and one make ever so many more than two. I commend that observation to any dead men before whom these notes may come. I mean by dead men, men who are not alive to the importance of promoting at once a District Joint Council in their area. There are probably quite a lot of questions as to which "24 Holborn" would like to be assisted by knowing the mind of the members of District Joint Councils.

o—o—o

IF, however, District Joint Councils are very much fewer than they should be, it seems rather futile to delay decisions merely to invite opinions which, when obtained, cannot be called broadly representative. I think there is probably no more desirable matter to be accomplished at this time than the creation of a considerable number of D.J.C.'s.

o—o—o

THESE councils are severally "on their own." Like the Irish Free State, each swears good faith and not subject allegiance to the council above.

o—o—o

A printing works decides to set up a Joint Works Council. It is of its own kind; has its own programme at the start, or its own no-programme. A no-programme, implying freedom of range, is not necessarily a bad thing. Anyhow, it is not organically linked up to the District Joint Council if one exists in that region; and it is not linked up in idea to any District Joint Council that may come into being.

o—o—o

SO ALSO, the District Joint Council is not linked up at all to the National Joint Council. Its membership is not made up of delegates or representatives from the District Joint Councils.

o—o—o

THERE is some strength deriving to each body from this independence. They can exist at any rate for a time without each other. But they can exist better with each other. The hint I want to press is to consider whether you should not get well ahead in your own district with the formation of the District Joint Council. Do not hesitate to bestir personally because of not having so far taken any lead. There is nothing that gives more pleasure to the present leaders in the craft than to see other—especially younger—men coming on to take a lead.

o—o—o

I AM inclined to think that for every one man who takes himself too seriously, and brings overweening vanity to his outlook on life and into his beings and doings, there are a hundred men who do not sufficiently believe in what they are or what they can do. "A man of very ordinary parts," said old Ben Franklin, "can accomplish great things in the world if he will but form a plan and pursue it persistently." What is more, until a man gets to work he does not even know himself and what he can do.

o—o—o

WHAT fortunate people are those of us who possess the splendid publication which Messrs. George W. Jones and John Findlay McRae have produced for the house of Caslon, entitled "Two Centuries of Typefounding." The colophon from the 1785 specimen book is of extreme interest. I think I should have preferred to omit the two side ornaments at the top, while keeping those at the base, but it is quite a beautiful production. One does like this royal style in which William Caslon I., William Caslon II., and William Caslon III. are mentioned and depicted, just as we speak of Charles Whittingham I. and Charles Whittingham II.; and we really ought to speak of their reigns.

o—o—o

It was really a fine instinct which prompted this edition de luxe to be dedicated: "To the First William Caslon and to Commemorate the Bicentenary of the Chiswell-street Foundry, which he began to establish in 1720, thereby not only creating for his country a flourishing industry in which she soon became pre eminent but also, through his consummate Art in Type-Design, winning the highest admiration of all Lovers of pure and beautiful Typography, this record of Two Centuries of Typefounding is dedicated by his Successors in Art and Industry at the Foundry whose Foundations he so well and truly laid." I hope to refer to this book again. Meanwhile, for myself and for others, I tender very heartiest thanks to the House for making this most acceptable addition to our printing library.

THERE is a very striking three-colour "Les puddleurs," an ironworks scene, in the *Bulletin Officiel* for December. It is printed on Voirin presses, and is quite a good industrial picture. Coming before me to-day in my copy of this paper, it promotes the suggestion that any who can make a business or health visit to Paris should do so, for the members of the craft can be very helpful just now towards a general improvement of our Anglo-French relations. At any rate, I hope nothing in this most desirable easement and pleasement will be missed from mere lack of effort and initiative on our part, collectively or individually.

o—o—o

FRANCE may be acting waywardly, and I think is, but it is very difficult for us to place ourselves at her view-point. In any case, men of good-will in the two countries should get to know each other. By a wonderful freemasonry they do tend to recognise each other

o—o—o

A man should keep his friendships in repair. So should a nation. A slothful man, we are told, roasteth not that which he hath taken in hunting. It was a pretty hard hunt we were engaged in, and happier relationship with the French public is, at least, one of the things that was taken in this hunt. It should be roasted. If, incidentally, there was a little good tempered roasting of a more particular kind of too sensitive Frenchman, they would, I imagine, take it in very good part. The great thing is to mingle as much as possible, and I am glad this journal comes before me to remind me of this desirableness.

o—o—o

LONDON has made a pretty good response to the appeal at the recent luncheon to our craft to absorb as many as possible trained disabled soldiers and sailors. At the same time, there is much more to be done. I think not more than 50 have yet been provided for out of the 150 whom the London district is asked to absorb. Let me recall briefly the position. There are some 36,000 disabled soldiers and sailors still awaiting training preliminary to enrolment as apprentices in various industries. Of these some 400 have been allotted to the printing and allied trades throughout the United Kingdom, 150 of this number being apportioned to London. The provinces are getting ready to come in with a will at the finish, and, knowing their strength, they have been content to let London get well ahead in this matter. Will anyone reading this who can see what his opportunity is of taking an apprentice this or next year give his very best consideration to the appeal of the Ministry, and write up to 24, Holborn, stating the best that he can do?

FRANK COLEBROOK.

Germany and British Printing.

Sending us a copy of a business-boosting letter issued by a large Berlin printing establishment, the secretary of Messrs. Fry's Metal Foundry writes:—"One of our friends has sent us a printed circular letter, addressed to them by one of the large German printing works, canvassing for orders for printed matter of every kind. Your readers are doubtless aware of this insidious competition, but I offer no excuse for drawing your attention to the matter again, as it demands the serious attention of everyone connected with the trade. Undoubtedly, this and other German offers are circulating very freely among buyers of printed material. It is equally certain that wages and material (in pounds sterling) are much less in Germany than here, and that there will be a number of English buyers of printed material unable to withstand the temptation of saving considerable amounts on their printing bills by taking advantage of these factors. It is curious that one of the 'selling points' mentioned by this firm is that they have printed a very large quantity of that very paper money which has helped to degrade their currency, and so assists them in competing unfairly with British labour!"

One of the statements contained in the German firm's letter is: "Our foreign department has under the press large contracts for schoolbooks, novels, catalogues, etc. for Sweden, Denmark, Lithuania, Ukraine, Switzerland, Italy, Holland and other countries, and since the summer of 1918 we have exported over 3,000,000 copies of books in foreign languages."

Cum. Pref., 23s. 3d.; Waterlow and Sons, Def., 14¹/₂, 4 p.c. Pref., 51¹/₂; Weldon's, 28s. 6d., Pref., 16s.; Wiggins, Teape and Co. (1919), 7 p.c. Cum. Pref., 17s., 8 p.c. 1st Mt. Red. Debs., 104¹/₂.

NEW COMPANIES.

T. BEATY HART, LTD.—Capital £7,000, in £1 shares (2,000 8 per cent. cum. pref.); to take over the business of a printer carried on by T. Beaty Hart at Green-lane, Kettering. Private company. Subscribers: T. Beaty Hart and E. C. Hart.

HOLDERS PRESS, LTD.—Capital £1,000, in £1 shares; to take over the business of law and general printers, publishers, and stationers carried on as G. Holder and Sons, and to adopt an agreement with G. T. Holder, G. F. Holder and A. E. Holder. Private company. Directors: G. F. Holder and A. E. Holder. Registered office: 87 93, Lamb's Conduit-street, W.C.1.

THE "REFEREE," LTD., has been registered as a "private" company, with a capital of £10,500, in £1 shares. The objects are: To acquire the copyright of the newspaper known as the *Referee* and the goodwill of the business of printers and publishers carried on at 12, Salisbury-square, Fleet-street, E.C.4, and to adopt an agreement with Sir James McCraith. The signatories to the memorandum of association (each signing for one share) are: Sir James W. McCraith, Kt., and Robert Donald, who are also the first directors. Registered office: 12, Salisbury-square, Fleet-street, E.C.4. File number, 179,700.

PIONEER PUBLISHING CO., LTD.—Capital £5, in 1s. shares; proprietors and publishers of books, newspapers, journals, magazines and other literary works and undertakings, printers, stationers, lithographers, photographic printers, engravers, diesinkers, etc. Private company. Subscribers: E. J. Burrows and W. R. Smith. Subscribers appoint directors.

BETWYN, LTD.—Capital £100, in £1 shares; proprietors and publishers of musical compositions, educational works, etc. Private company. First directors: H. S. Penn and H. Shields. Registered office: 29, Leyland-road, Lee, S.E.12.

SALES ORGANISATIONSS, LTD.—Capital £1,000, in £1 shares; to adopt an agreement with R. C. Adams, and to carry on the business of business and sales organisers, manufacturers of, and dealers in, office equipment and requisites, printers, stationers, advertising agents, export and import merchants, etc. Private company. Subscribers: W. J. Overton and C. J. Smart. Subscribers appoint directors. Registered office: Chamber of Commerce Buildings, 95, New street, Birmingham.

CHIC NOVELTIES, LTD.—Capital £2,000, in £1 shares; to adopt an agreement with W. J. Berry and F. S. Berry, and to carry on the

business of calendar, novelty and sports goods manufacturers, aerographers and general woodworkers, etc. Private company. First directors: W. J. Berry and F. S. Berry.

STEVENSON AND CO. (PAPER MERCHANTS), LTD.—Capital £15,000 in £1 shares; to take over the business of a wholesale stationer and paper merchant, etc., carried on at 74, Church-street, Birmingham, as Stevenson and Co. Private company. First directors: Mrs. Ida E. Richardson, A. P. Stevenson and A. T. Aston.

THE ESPARTO PAPER MILLS, LTD., has been registered with a nominal capital of £10,000 in £1 shares. The objects are: To carry on the business of manufacturers of and dealers in paper and pulp of all kinds and similar substances and articles of or from paper, pulp and esparto, paper mill owners, paper, pulp, and the like, dealers in waste materials for making paper and pulp, plain and fancy box manufacturers, manufacturers of cases, tubes, bags, tickets, bobbins, frames, fancy articles, papier maché and card, straw, mill and leather boards, chemical and colour merchants, etc. The subscribers to the Memorandum of Association are a solicitor, a cashier, a private secretary and four solicitors' clerks. The number of directors is not to be less than two nor more than 15. The following (being the first three subscribers to the Memorandum of Association) are directors: E. H. Wiseman, S. A. Pierpoint and G. W. Waspe. Solicitors: J. D. Langton and Passmore, 37-41, Gracechurch-street, E.C. No notice of situation of registered office was filed at time of incorporation. (The file number is 179,661.)

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

HARRISON, JEHRING AND CO., LTD. (Publishers, etc., London).—Issue on February 9th, 1922, of £1,325 debentures, part of a series already registered.

SMITH BROS. (BIRMINGHAM), LTD. (Paper, paper bag and envelope makers, etc.).—Particulars of £4,200, debentures authorised February 3rd, 1922; whole amount issued; charged on company's undertaking and property, present and future, including unpaid calls and capital.

J. FUNNELL CHRISTIAN AND CO., LTD. (Manufacturers of fancy goods, stationers' sundries, etc., London).—Satisfaction in full on February 6th, 1922, of charge dated May 5th, 1920, securing £1,000.

J. FUNNELL CHRISTIAN AND CO., LTD. (Manufacturers of fancy goods, stationers' sundries, etc., London).—Land Registry Charge on 15-16, Edmund-place, Aldersgate-street, E.C., dated February 7th, 1922, to secure £1,000. Holder: H. B. Norton, The View, Surrey-road, Bournemouth.

BOXED STATIONERY.—The Department of Overseas Trade recently obtained from Paris, Rome, Turin and New York samples of boxed stationery purchased by the commercial official of the embassies in these cities, together with reports on the purchases. These samples have been loaned to the Employers' Federation of Envelope Makers and Manufacturing Stationers, and they are now on exhibition at their offices, 10, Salisbury-square, London, where they may be inspected by anyone interested. The display is interesting as showing what is actually on sale in the respective cities and reports attached to the exhibits indicate the state of the market and prices prevailing demanded. Mr. F. L. Armstrong, secretary of the Federation will be pleased to give visitors all the information he has on the subject,

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIP DISSOLVED.

Percy Mathison Brooks, Herbert Spencer James, and Arthur August Heyman, advertising consultants, 69, Fleet street, E.C.

THE BANKRUPTCY ACT, 1914.

RECEIVING ORDERS.

Bertie Horwood, Leighton Factory, High-street, Wellingborough, cardboard box manufacturers. February 11th.

Solomon Beer, 2, Trafalgar House, Trafalgar-street, Lower Broughton, Lancs, rag merchant. February 15th.

Foreign Paper Samples.

Some Recent Additions.

The Department of Overseas Trade—whose permanent address for the display of foreign samples is at 7-11, Old Bailey, E.C.4—has during recent months made several additions to their collection of samples of paper of foreign manufacture. By arrangement these samples can be loaned to British manufacturers, so that they may become acquainted with the particular requirements of foreign markets.

Among the samples recently received by the Department are the following:—

GERMAN.—Specimens of impregnated jam paper, selling in Sweden, for which a great demand is being made. Samples of "ocean paper" (with waxed centres), made for the requirements of the Swedish market, where it was being sold for approximately 21s. 9d. per roll measuring 1.35 metre by 50 metres, wholesale. A quantity of fancy tissue paper finding a ready sale in Norway is also on exhibition.

AUSTRIAN.—From this country are shown samples of crimped tissue, being sold in Austria, 57 centimetres by 2¹/₂ metres, at 25 crowns, which at 16,000 crowns to the £ equals 1d. per roll, ex factory. White copying tissue is also shown, weight 18 grammes, and the price per coil, ex factory, is 300 crowns, which at the rate of exchange equals 4¹/₂d. per coil.

NORWEGIAN.—Two samples are shown of Norwegian greaseproof paper, which is finding favour on the Dutch market. Both samples are quoted ex-factory prices, and are respectively (for 100 kilos.) 39.1 florins (68s. 1¹/₂d.) and 36.5 florins (63s. 7d.)

There are also shown various classes of paper required by the Swiss Federal Railway Administration, dated December, 1921, and a collection of oil paper made in Holland.

Trade in Printing Type.

EXPORTS.—During last month 18 tons (of the value of £5,887) of British printing type were exported as against 34 tons (£11,539) twelve months ago and 17 tons (£5,911) during the corresponding month of 1920.

IMPORTS.—Printing type imported into this country during last month amounted to seven tons (£1,348) against one ton last year (£357) and four tons (£1,496) in 1920.

Personal.

LORD BURNHAM, who is president of the Newspaper Press Fund, has promised to attend the first annual dinner of the North and East Ridings of Yorkshire Branch of the Fund, to be held at Hull on March 10th. The dinner will be attended by representatives of the commercial and professional life of the district.

SIR FREDERICK BECKER left last week-end for the United States, where he goes, according to the *Financial Times* "at the invitation of big banking interests to assist in the reconstruction of American-owned pulp and paper companies."

THE HON. RUPERT BECKETT, the chairman of directors of the *Yorkshire Post*, has been re-elected treasurer of the Leeds Chamber of Commerce.

AMONG the prominent City people attending the memorial service, last Thursday, to the late Sir Edward E. Cooper, Bart., were Lord Marshall, Sir Rowland Blades, Lady (Vezey) Strong, Sir William and Lady Waterlow and Mr. Deputy Sandle.

At last Thursday's meeting of the Council of the London Master Printers' Association, the Council, on the motion of Sir William Waterlow, seconded by Sir Cecil Harrison, expressed its warmest appreciation of the services rendered to the Association and the London trade by Mr. R. A. Austen-Leigh during his two years of office as president.

MR. E. G. ARNOLD, of Leeds, ex-president of the Federation of Master Printers, and Pro-Chancellor of the University of Leeds, will on Saturday evening be the chief guest at the annual dinner of the *Yorkshire Post* Cricket Club. The Hon. Rupert E. Beckett, the chairman of directors of that paper, will preside.

SIR GEORGE PAISH lectured at the University of London, South Kensington, on Monday evening, on "The Responsibilities of Journalism."

MR. THOS. RIGNALL presided at the very successful annual dinner on Saturday of the Manchester Centre of the Printers' Managers and Overseers' Association. Representatives were present from the London and other centres of the P.M. and O.A., the Manchester and Salford Association of Master Printers and the trade unions. A report is held over to next week.

MR. JAS. W. COOKE, ex-president of the National Association of Wholesale Stationers and Paper Merchants, has been re-elected president of the Northern District. In that capacity he took the chair at the recent annual dinner in Manchester.

MR. W. R. CUMMINS, printer, of Muswell Hill, is making an effort to raise £176 for the Salvation Army during Self-Denial Week. Any trade friends who would care to send along a donation are invited to do so.

MR. WALTER BIGGS, who joined the reporting staff of the *Manchester Guardian* in 1872, and this year completes fifty years in the service of the paper, was entertained to supper on Saturday night by his past and present colleagues in the reporters' room.

THE wedding took place last Thursday at Sheffield Cathedral of Mr. George Knowles, sub-editor of the *Sheffield Telegraph*, and Mrs. A. Goldthrope, of Cleckheaton, by the Rev. W. G. Moeran, senior curate.

MR. JOHN BRADSHAW, of Rishton, Blackburn, who began papermaking at the age of 10 years, and has worked in 14 different paper mills, has just celebrated his golden wedding at the age of 73. He retired some years ago.

MR. JOHN LOCKETT, paper merchant, Produce Exchange Buildings, Manchester, who commenced his career in the paper trade in the Manchester offices of Messrs. Olive and Partington, Ltd., has recently completed 21 years in business on his own account.

Trade Union Matters.

THE WAGES MOVEMENT.—Conferences between the Federation of Master Printers and the various trade unions commenced on Tuesday. There being so many unions to deal with, it has been difficult to arrange dates and the conferences will run on into next week. It may be possible in our next issue to give details of the employers' proposals. As the initial negotiations are between the employers' federation and the individual unions, the Printing and Kindred Trades Federation is not at present directly concerned.

NEWSPAPER WAGES.—We understand that the Newspaper Proprietors' Association has modified its original proposals, but is pressing with the Unions the matter of wage reductions.

PAPER WORKERS.—The Employers' Federation of Papermakers has agreed to meet representatives of the paper workers' unions to discuss the situation arising from the operatives' rejection of the employers' proposals. The latter include a two-shift week of 63 hours, and the workers characterise the terms as a "charter of bondage."

PUBLISHERS' PACKERS' STRIKE.—A strike of packers has occurred in a section of the London publishing trade, and there is a likelihood of all packers employed in London publishing houses coming out in sympathy. The strikers declare that their wages have been reduced without consideration of the fact that their conditions of service are the same as those in other branches of the printing trade. The dispute is over a question of 5s. reduction of wages and concerns the Book Trade Employers' Federation and the National Union of Printing and Paper Workers.

LINO PIECE SCALE.—A meeting of the London District Committee of the Joint Industrial Council was arranged to be held yesterday (Wednesday) to consider a complaint by the London Master Printers' Association against the London Society of Compositors, arising out of the new linotype piece scale.

"T.A." AFFAIRS.—The Executive Council of the Typographical Association have issued to the members this week a ballot paper asking ratification of several proposals adopted at the recent delegate meeting at Hastings. The principal resolution proposes an increase in the Executive Council to 22 members, on the ratio of one representative to each thousand members in a branch or district, with a maximum of three from every one area. Other proposals include a recommendation to increase the allocation to the Labour Representation Fund from 3d. to 1d. per week per member, and the grant of sums to the Manchester and Liverpool branches equal to 5s. per member of these branches. A new rule is proposed declaring that members "shall not be permitted to assist in the production of work for an unrecognised office." The Executive Council announce that, owing to the depressed state of the printing trade and the consequent abnormal expenditure on out-of-work benefit during recent months, they have, at the request of the officials concerned, withdrawn a proposal carried at the delegate meeting to increase salaries as follows:—President, £400 to £450; secretary, £500 to £550; assistant secretary, £400 to £450; treasurer, £325 to £375. "For the same reason it has been decided to suspend the proposal to appoint a deputy assistant secretary."

L.S.C. ANNUAL REPORT.—The seventy-fourth annual report of the Society states that never before has unemployment been so widespread or so persistent as during the year just ended, the last week of the year beating all records with 1,476 members taking benefit. During the year, including State benefit, £121,869 was disbursed for unemployment. In spite of the blackest year on record, the report states, the Society's position is still strong from every point of view. The income of the Society last year was £181,958 13s. 2d. compared with £72,003 in 1920; expenditure, £203,924 0s. 3d. in 1921, and £56,276 in 1920; total funds, £94,308 11s. 11d. last year, and £116,273 19s. in 1920; membership, 15,120, compared with 15,500 in 1920. The superannuation account shows a surplus of income over expenditure to the extent of £3,088, as against £2,138 in the previous year.

"NATSOPA" BALLOT STOPPED.—Three members of the National Society of Operative Printers and Assistants moved before Mr. Justice Russell in the Chancery Division on Friday to restrain the executive council from proceeding with a ballot for the election of a general secretary. Mr. Clauson, K.C., said that the three plaintiffs had nominated themselves for the post, and submitted themselves for examination, but were held to be ineligible for the discharge of the duties. Mr. George Alfred Isaacs, the present general secretary, had consented to be renominated, and he being the only candidate left would, in accordance with the rules, have had a walk-over, but there had been previous litigation between the parties, and with a view to getting a vote of confidence in themselves and Mr. Isaacs the executive decided to have a ballot, and in order to do so put down as candidates the three plaintiffs, whom they had already held to be ineligible. His lordship held that the taking of the ballot would be a gross violation of the rules, and the defendants agreeing to treat the motion as the trial of the action, he granted a perpetual injunction against them with costs.

University's Printing Proposals.

A very strong agitation is in progress in South Wales against the proposal to establish a University Press Board in connection with the University of Wales. The university is being invited to confer the following powers by statute on the Press Board:—(a) To institute a university press or to make arrangements with printers and publishers for printing, binding, sale and distribution of original work done by members of the university or of such other work as the board may deem advisable; (b) To acquire through the council and on behalf of the university such buildings, plant and equipment as may be necessary for the proper discharge of the aforementioned powers; (c) To receive and administer sums of money given by public bodies or by private donors, as well as such grants as shall be made annually by the council for the purposes of the board.

It is held that (b) is the real course of action proposed, and that this will operate very unfairly (apart from the extravagant cost of such official printing departments) to Welsh printing works which pay rates in aid of the university. The Welsh National Library, it is stated, is already in possession of its own printing plant.

Vocational Testing.

In the printing industry and elsewhere increasing attention is being paid to the need for ascertaining the suitability of applicants for apprenticeship. In this connection much interest attaches to information from Berlin of an experimental office opened there under Government auspices, at which free advice is given as to the choice of a vocation.

Six months before they leave school—says a Berlin correspondent of the *Westminster Gazette*—boys or girls fill up a form saying what line of life they want to adopt. The schoolmaster then adds notes as to their mental, and the school doctor as to their physical capabilities. The next step is a visit to the "Berufsamt," where they are subjected to various tests as to intelligence, physical fitness, and dexterity. After passing through the anthropometric laboratory the next ordeal is an interview with an official, who, with all this evidence in front of him, can now advise the applicant as to a suitable career in life.

It has been found that most children have fairly definite ideas on the subject of the line of life which they wish to follow, but that parents are usually quite ignorant how to start in any profession except their own. The office not only gives full information about apprenticeship and the amount of training or capital required in various walks of life, but it is also able to show what professions are over-crowded.

We understand that a provisional agreement has been reached as to wages in the paper box trade, one provision being that the basic rate gives the employees a higher standard than existed pre-war, and there is a sliding scale.

WEST AND NORTH-WEST London Master Printers' Association

Overhead Charges Discussed at the Monthly Lunch.

The monthly lunch of the above association was held at Pagani's, Great Portland-street, W., on the 14th inst., when the subject of overhead charges was again ventilated.

The toast of "The King" having been honoured, Mr. E. W. Wormald, in tendering "Proper Profits for Printers," expressed the association's indebtedness to Mr. A. Langley and Mr. W. J. Pollock for making the excellent arrangements for the lunch, and also to Mr. A. Williamson and Mr. H. R. Danford for their presence, both these gentlemen having expressed their willingness at the monthly meeting on the 8th inst. to speak to them again that afternoon. He said the subject of costing was one which every printer in the kingdom should place most prominently in his establishment.

Mr. Williamson said he was not going to read a paper, but only to express to them a few ideas on the subject of overhead charges which had come to him from time to time. The matter had arisen from the excellent address given by Mr. Danford at their monthly meeting, and he was pleased that gentleman was present because he would probably have something to say in opposition to him. Proceeding, Mr. Williamson said he had been considering this subject more seriously than any other, and he had come to the conclusion that it was a more important matter than was generally recognised. He was also of the opinion that it was a matter least understood connected with costing.

Dealing first with its "illusiveness," Mr. Williamson said overhead charges—unlike wages, which are paid out in bulk—are paid out in dribbles. Some are fixed charges, while other items vary considerably in amount, and are paid out in unequal proportions. Some of them go as an item of petty cash, and he suggested the necessity for a closer analysis of these items of expense.

As to its "importance," the fact that it was difficult to handle made it more important that it should be dealt with. There should be an analysis made of the general overhead petty cash items, for they have a habit of running up, and in the process of time cause leakages, and sometimes have a way of disappearing altogether without any possibility of ever checking them.

The most important and vital part, he contended, was the "application," of which there were three methods. First, he advocated the application of overhead charges by percentage figures on wages and materials used. To illustrate this he spoke of two rings, both made of the same kind of metal, one with a diamond worth £5 and the other with a diamond worth £100. If the same overhead charge was taken for both of them at an equal percentage they would see how loosely overhead as applied in that manner worked. In the second place, he dealt with the application of overhead by a percentage on labour alone. In the third place, he advocated the departmentalisation of expenses, thus lowering the percentage figure for overhead and providing the least likelihood of a leakage. Mr. Williamson here gave some figures—the result of a recent investigation—of the departmental expenses incurred on every £100. In conclusion, he drew attention to the important question of holding stock in proportion to the amount consumed, and said that firms would be wise to give some attention to what amount of material to hold against their requirements.

Mr. Danford, whose remarks were based on his address given at the meeting of the association and reported in last week's issue, said this was the first time in history that the vellum binders had made any attempt to arrive at a system whereby prices could be ascertained with any degree of accuracy. They had placed a flat rate of 100 per cent. in their list for overhead charges, and for the sake of simplicity had included in it profits on trading. He thought when they went into this matter again the latter item would have to be a separate one.

In a discussion which followed, Mr. A. Langley said he thought the system as adopted by the vellum binders had not stood the test of actual cost of production, and was based only on experience and not on actual figures from the whole factory for a period of 12 months. They would probably have to go three years before they could verify their figures. However, they had made a good start.

A member asked if the 20 per cent. on materials included waste, and Mr. Danford replied in the affirmative.

Brief contributions were made to the discussion by Messrs. S. Goss, S. Sidders, and the president.

A hearty vote of thanks was enthusiastically accorded to Mr. Williamson and Mr. Danford, on the proposition of Mr. E. W. Wormald, and the proceedings were then brought to a close.

The Stationers' Examinations, 1922.

The Stationers' Company and Printing Industry Technical Board (Stationers' Hall, E.C.4), announces that, subject to a sufficient number of candidates coming forward, the Board will arrange for examinations in the following sections of the printing industry at Stationers' Hall:—Monday, May 8th, at 6.30 p.m.—Costing, Letterpress Machine; Tuesday, May 9th, at 6.30 p.m.—Composing, Paper, Stereo and Electro, Printers' Assistants; Wednesday, May 10th, at 6.30 p.m.—Lithography, Estimating; Thursday, May 11th, at 6.30 p.m.—Binding, Reading, Order Clerks, Printing Ink.

The Technical Board awards certificates, medals and prizes on the result of the examinations, but a candidate having obtained a first-class certificate or prize is not eligible for a similar award in the same section. There are no age qualifications for examinations other than stated below. A special examination may be set for bookbinders above 21 years of age. An entrance fee of 1s. 6d. has to be paid by each candidate.

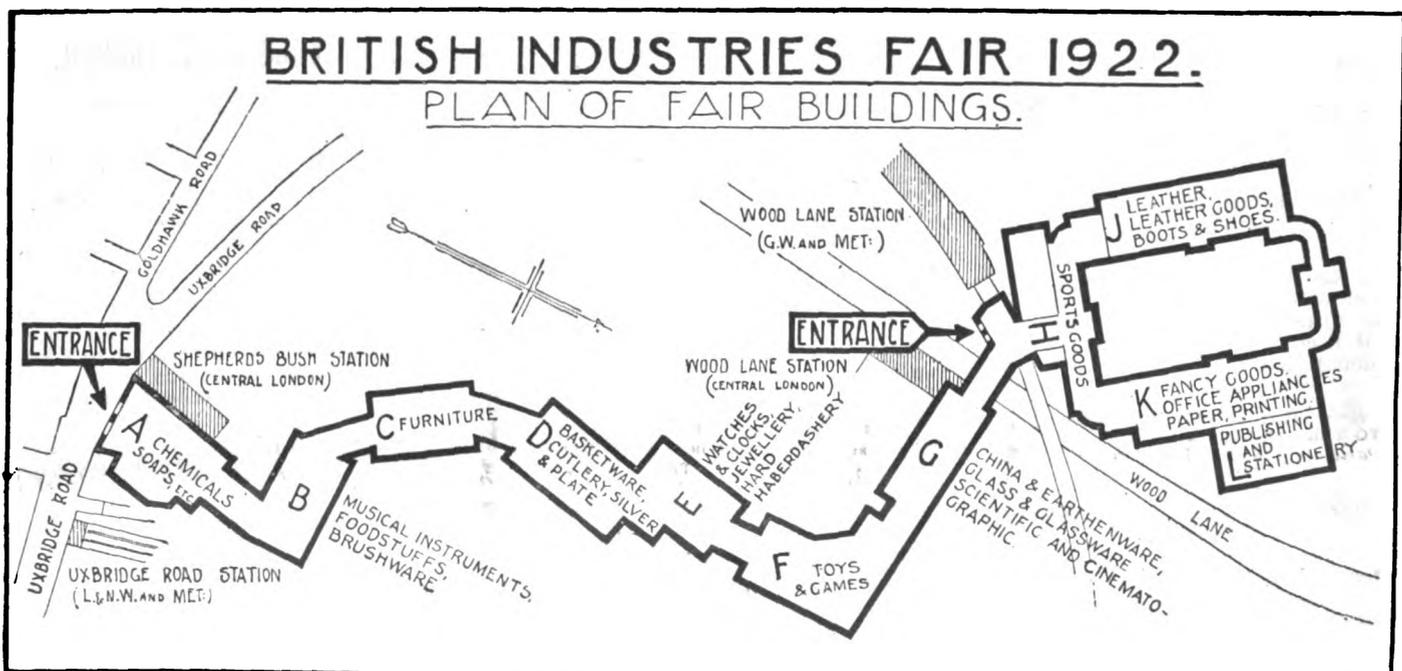

In the Composing, Machine, Lithography and Bookbinding examinations, the following conditions must be observed: Candidates must be between the ages of 17 and 21 and have regularly attended a course of instruction at a technical school. It is suggested that candidates should not present themselves for examination until they have attended at least a third year's course of instruction at a technical school. Candidates must bring with them to the examination an example of their practical work, certified by their instructor.

Applications and entrance fees must reach the Hon. Secretary at Stationers' Hall not later than March 31st, 1922.

Dutch Strawboards.

In 1921 exports of strawboard from Holland decreased owing to the situation in the markets of the world, only obtaining 72,518,400 metric tons during the first ten months, or one-half the exports during the corresponding period of 1920.

THE easiest way is down hill. You have a time until you hit bottom. It's the landing that hurts.

The British Industries Fair.

Next Monday is to see the opening of the British Industries Fair, the eighth of an unbroken series, which will be held from February 27th to March 10th. The Fair, which is organised by the Department of Overseas Trade will again, among the London (White City) exhibits have a section devoted to paper and stationery, and we gather that the showings in

which printers are interested will be of about the same extent as last year.

Latest reports from the Department of Overseas Trade state that it is probable, to judge by the letters received from abroad on the subject, that the number of overseas buyers who propose to visit the Fair will be far in excess of those who attended last year, and that the prospects for the Fair are consequently excellent.

The great railway companies have arranged to run special excursions at greatly reduced fares for the benefit of the trade buyers visit-

ing the Fair. The fare will in most cases be approximately the price of a single ticket for the double journey where passengers making use of the special excursions return on the same day. For passengers who desire to make a stay of from two to six days, the cost of a return ticket will be about one-third more than the usual single fare.

We publish herewith a plan of the London Fair, from which it will be seen that printing and allied trades' exhibits are situated close to the Wood-lane entrance to the White City.

Paper Mill Wages.

Protest Meeting in Manchester.

What is described as one of the largest meetings of paper mill workers was held in Manchester on Feb. 11th, to oppose the employers' suggested amendment of the national agreement as to wages and conditions in the paper trade. Mr. Geo. Harraway presided over the gathering, which was held at the Swan with Two Necks, Withy Grove, and representatives were present from both the National Union and the Amalgamated Society. Over 100 delegates from all parts of the kingdom, representing 30,000 members, attended.

Mr. T. G. Newland, general secretary of the National Union, dealt with the effect of the proposals with regard to wages. The employers suggested that for every 10 points fall in the index figure a 1/2d. per hour should come off. Based on a 48-hour week, this represented 2s. But there was no proposal that the 48-hour week should continue to prevail. Rather the reverse, since the employers indicated that they wanted to go back to the 63 hours for two-shift mills. With the 1/2d. per hour reduction (taking the present rate of wages, which were based on the index figure of 100 above pre-war) the male shift worker, Class I, would receive 76s. a week. The 1/2d. per hour on a 48-hour week would bring the man down to the basic figure (on pre-war conditions) of 56s. a week of 48 hours. But if this man went to 63 hours his wage would be brought to 42s. 6d. The employers made it clear that "when the agreement comes into operation it is intended that for the longer hours wages shall be so adjusted as not to increase the weekly earnings." Their proposal, said Mr. Newland, indicated that it reduced the weekly earnings, since if they worked out the hourly rates, they would find that the basic rate on 48 hours would be 1s. 2d. per hour as against 10 1/2d. for 63 hours. Dealing with the wages of juveniles, Mr. Newland pointed out that, starting with the minimum index figure at 100, the boys (14 years of age) received 15s. per week and the

girls 13s. The employers proposed with regard to the boys to take off 1/2d. per hour until they reached the age of 18. On a 48-hour week the effect would be to bring the 18-year old lad from 38s. to 26s., but if the lad went on to 63 hours it brought him to 20s. Mr. Newland described this as a ridiculous position, and went on to say that at 19 years of age the proposal was that the reduction should be 1/2d. per hour, which would mean a lowering of that lad's wages by another 4s., bringing him to 22s. for a 48-hour week or 16s. 6d. for a 63-hour week.

On the proposal of Mr. A. Pilling (Bury), seconded by Mr. Gibbons (Ford), the conference passed unanimously a resolution rejecting totally and unconditionally "the charter of bondage" embraced in the employers' proposals.

Further, the conference also endorsed the proposal of Mr. William Ross, secretary of the papermaking section of the National Union to impose a levy upon all members working full time, in order to be prepared in the event of a breakdown in negotiations with the Employers' Federation of Paper-makers.

Mr. A. Fowler, general secretary of the Amalgamated Society of Papermakers, promised the assistance of his union to oppose the masters' proposals "tooth and nail," and Mr. A. E. Holmes pledged similar support on behalf of the Printing and Kindred Trades Federation.

"We are willing to eat dirt before we will have these proposals rammed down our throats" is an expression said to characterise the utterances of the delegates.

Mr. Fowler said at every district he had visited and from every part of the country vigorous protests had reached him against the employers' proposals, and his society was equally opposed to them.

Mr. Wm. Ross strongly urged the meeting to refuse to have anything to do with the proposals submitted, and trusted they were not going to be so docile as the employers anticipated. He believed that some of the employers would break away from their federation rather than impose such harsh terms upon their workers, but earnestly hoped they would be able to arrive at a settlement on

national terms, as it was far better, if possible, to deal with wages and hours on national lines than to have to deal separately with individual employers. If negotiations failed and a fight was forced upon them, so far as he was concerned, he was going to be with the employees heart and soul, and would share equally with them whatever hardships they might have to endure.

At a meeting of 200 paper mill employees of Ratcliffe and district in Bury, the masters' terms were unanimously rejected. Mr. J. Wood presided, and addresses were given by Mr. J. Pearson, Mr. Wm. Ross, Mr. Geo. Tatham, and Mrs. Bridge.

New British Patents.

New Inventions.

Printing Labels, etc.

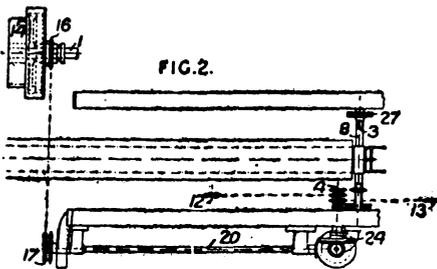

A machine for printing labels, tabs, visiting cards, etc., in two or more colours, is the invention of the Printator Ges. It is provided with two or more sets of colour feeding and distributing devices arranged side by side and a number of inking rollers carried side by side in a reciprocable frame whereby the form receives the colours in strips. As shown for two-colour printing, a frame *c*, reciprocated in guides *a* by a rod *b*, carries two pairs of

inking rollers *d, d'* and two other rollers *e, e'*. The latter roll under and receive colour from two rectangular spreading plates *t* vertically movable against the action of springs *u* and supplied with different colours from fountains *v*. When the frame *c* moves to the right the colours are transferred to two vertically adjustable horizontal plates *h, h'* whereby, on the return motion, the rollers *d, d'* are inked and subsequently ink the form *x* below which the labels, etc., are passed transversely and receive the colours in succession. The plates *h, h'* are given a step-by-step rotation at each reciprocation of the frame by pawls *l, l'* carried by a slide *m* which is moved in the direction to rotate the plates by a projection *g* on the end *f* of the frame *c* engaging a stop *r* on the slide, and is returned by a spring *n*.

Envelope Making Machines.

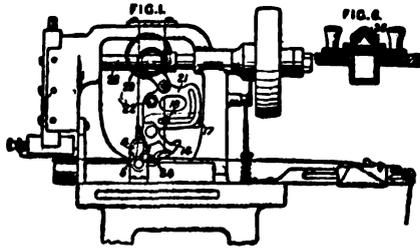

This invention, which is patented by Messrs. John Dickinson and Co. and F. G. Hawdon, relates to envelope making machines in which the finished envelopes are fed to a drying and delivering device consisting of pockets formed on the links of an endless chain. The invention consists in driving this device from the main drive of the machine, and in providing means for transferring the drive to a secondary drive, when the envelope forming mechanism, etc., is stopped, in order that the chain may be cleared of envelopes without driving the gummers, folders, etc. In the construction shown in plan in Fig. 2, the machine is driven

by a clutch pulley 14 mounted on a shaft 1 and this shaft is connected by gearing (not shown) with a ratchet wheel 27, which is mounted on and drives a shaft 3, geared with a shaft 4. This shaft 4 drives the chain shaft 8 and shafts 12, 13 of supplementary motions. The clutch pulley 14 is connected by means of sprockets 16, 17 and a shaft 20 with a second ratchet wheel 24, which is mounted on the shaft 4. The gears are so arranged that, when the pulley 14 is clutched to the shaft, the machine is driven through the wheel 27, the wheel 24 rotating at a slower speed than the shaft 4, and thus running free. When the pulley 14 is declutched, the shaft 1 ceases to rotate, and the pulley continues to drive the chain shaft 8 and the shafts 12, 13 through the ratchet wheel 24, thus allowing the chain to be cleared without driving the folders, gummers, etc.

Box-making Machines.

An invention by Messrs. J. R. Etheridge and H. Wigglesworth relates to a box-making machine of the type in which a strip of binding material is fed forward in measured lengths by a pair of feed rollers to which an intermittent rotation is imparted by an oscillating toothed sector and ratchet device, and the sector is actuated by means which

enable the length of its movement to be varied, the sector 14 is actuated by an oscillating cam plate 21 fulcrumed at 22 and operated by an eccentric 29 from the shaft 28. The plate 21 is connected to the sector by a pin 18 adjustable along a slotted arm 17 of the sector. The feed rollers 4, 5 may be serrated or roughened; the upper roller 4 has a V-shaped groove and the lower roller is correspondingly formed to fit the groove and feed the strip, which has been creased by a hollow guide 34.

Litho Plates for Egypt.

H.M. Commercial Agent for Egypt has notified the Department of Overseas Trade of a call for tenders by the Survey Department of the Ministry of Finance, Egypt, for the supply of aluminium and zinc lithographic printing plates.

The closing date for the receipt of tenders is March 20th, and it is stipulated, amongst other things, that quotations must be in Egyptian currency and inclusive of Customs Duties and free delivery into the Department Stores at Giza, Egypt.

Tenders must be submitted on the forms supplied by the Egyptian Survey Department, and the tenderer must be a person residing in

Egypt, or one having an accredited representative established in that country.

A copy of the specification, General Conditions of Contract, Tender Form, etc., have been received in the Department of Overseas Trade, 35, Old Queen-street, London, S.W.1, and will be available for consultation by United Kingdom firms interested, in Room 47, until February 28th, after which date they will be forwarded on loan in order of application to firms in the provinces who may be unable to consult the documents in London.

United Kingdom firms who desire to submit tenders and are at present unrepresented in Egypt can obtain, upon application to the Department of Overseas Trade, the names of United Kingdom merchant firms trading with Egypt, who may be willing to act for them. (Reference, D.O.T., 7326/F.E./P.N.).

Sectional View of the
"Fryotype" Pot.

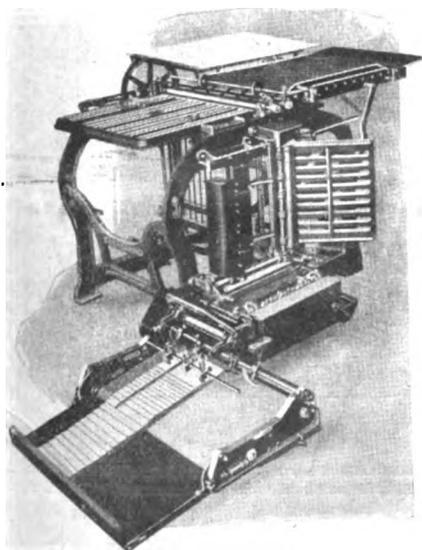

Compare the advantages - of the - "Fryotype" Melting Pot

- 1.—Lowest gas-consumption per cwt. of metal melted.
- 2.—Empties quicker than any other pot on the market.
- 3.—No radiation of heat, or unhealthy fumes from metal or gas.
- 4.—Initial cost is lower.

These are only four of the many reasons why nearly 200 "Fryotype" Melting Pots have been sold in the Printing Trade since Jan. 1921. How many competitive Pots have been sold in the same period?

Tackling Printers' Metal-Mixing Troubles.

Interesting Features of New and Improved Apparatus by the Monometer Company.

Every printer knows that, in newspaper and printing offices, bad plates are from time to time produced with sinks and indifferent faces, with the result of unsatisfactory printing. This trouble happens principally when,

in the Monometer melting furnace, which is fitted with a pot of two tons capacity, one interesting feature is the automatic heat controller. This device acts on the gas supply and is operated by tubes which are inserted

when melting soft metal alloys, as if the metal is overheated and burnt the more volatile parts of the alloy are burnt out, and the metal left is not of the required alloy. Many of the troubles of the printer are due to the fact that

Monometer Patent Temperature-Controlled Melting, Refining and Casting Furnace.

owing to the rush being on, the operators of the melting furnaces forget or have not time to mix their metal thoroughly.

To overcome this human factor there has been designed the Monometer automatic mixing device, which provides an absolutely fool-proof casting furnace. This device, and the other features of improvement in the Monometer furnace will best be understood by reference to the accompanying drawings.

into the molten metal. Its action is to close off the gas as the metal heats up, and, should fresh cold metal be inserted into the pot, the valves automatically open and allow more gas to pass until the correct temperature is regained. It is fitted with an adjustable valve, which enables any required degree of temperature to be maintained, and when once set requires no further attention. This instrument is, of course, of particular advantage

his metal has been overheated and spoilt, and this automatic device absolutely prevents this and frees the operator from worry in this direction, and allows him to concentrate his efforts on the other part of the work.

Another important point is that a valve is fitted in the bottom of the pot, and operated by a handle placed within reach of the operator. By means of this valve the metal is withdrawn from the bottom of the pot only,

TRADE **LINOTYPE** MARK

The most profitable composing machine equipment

HAVE ONLY UP-TO-DATE LINOTYPES.

It is not always a wise policy to keep a machine on the active list merely because it can do the work for which it was originally intended.

A considerable number of Linotypes in this country which have paid for themselves many times over should now be replaced by later models, if the installations are to show a maximum efficiency under modern conditions.

When ordering a modern Linotype equipment the proprietor of an old Linotype installation said: "I found that five hours of one man's time were consumed each day in making magazine changes on my thirty single-magazine Linotypes." To that waste time has to be added the unproductive hours of the operators whilst awaiting changes.

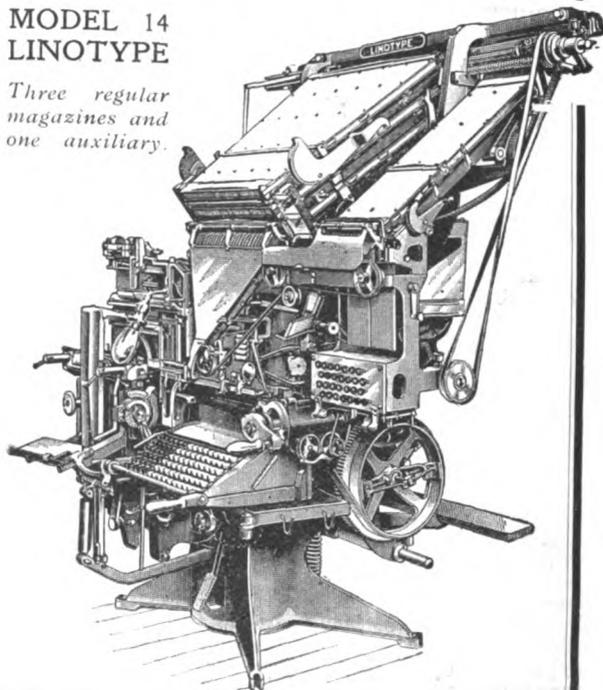

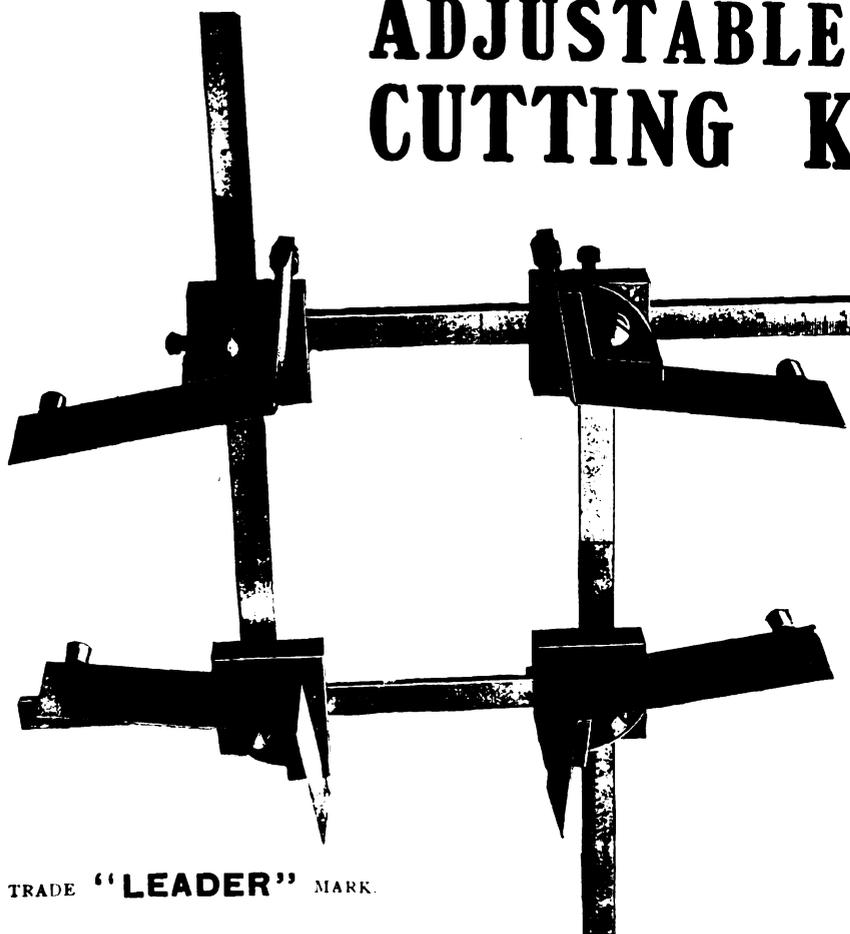

On modern Linotypes the operator can effect his own magazine change in a few seconds, and he can complete an entire change of measure, mould, knives, and magazine in less than a minute, without moving from his seat.

The modern Linotype also gives a wider range of faces, as regards size and number alike. From the one machine the printer can obtain headings as well as text matter in a variety of bodies.

Although similar in principle to the earlier models, the modern Linotype is entirely different so far as its versatility is concerned.

Trade Notes.

L.M.P.A. ANNUAL DINNER.—The London Master Printers' Association informs its members that the annual dinner of the association will be held at the Connaught Rooms, Great Queen-street, W.C., on Wednesday, March 29th, 1922, at 6.45 for 7.15. Tickets are 12s. 6d. each (exclusive of wine), and ladies are specially invited. Early application for tickets is requested in order that adequate accommodation may be provided for members and their guests.

The annual dinner and ladies' night of the S.W. London Master Printers' Association will be held on Saturday, the 18th inst., at Dean Hotel, 87, Oxford-street, W.

The annual dinner of the Cambridge and Isle of Ely Master Printers' Association will be held at the Lion Hotel, Cambridge, on the 7th inst.

LONDON Borough Councils are being invited to a conference to consider a Municipal Mutual Supplies Association "to protect ratepayers against the present inflated charges for goods required by local authorities."

The 5th concert of the season was given on Monday of last week at Anderton's Hotel by the City of London Printers' Musical Society in aid of funds of the Printers' Pension Corporation. In the absence of a chairman, Mr. Sydney Cumbers (Johnson and Cumbers, Ltd) stepped into the breach and carried out the duties of chairman. A talented list of artistes was presented and possibly those who met with most success were Mr. Courtney Mayverne, whose own humorous compositions were greatly applauded; Mr. Dion Lane (humorous sketch) and Mr. Harry Morton (concertina solos).

AMONG those who have responded to the efforts of the London Chamber of Commerce to raise a guarantee fund for the British Empire Exhibition of 1923 are the following guarantors:—Waterlow and Sons (£2,500), Liffé and Sons, William Collins and Sons (£1,000); Lanston Monotype Corporation and the Thames Paper Co. (£500 each); Charles Morgan and Co. and James Spicer and Sons (£250 each); Charles Lettis, Macniven and Cameron, George Waterston and Sons, Thomas Poulton and Sons (£103 each). About half-a-million pounds has been guaranteed.

It was stated in the House of Commons on Tuesday that the contract of £9,000 for advertisement on the back of the Census forms was given to the Houston Advertising Agency. This firm was a recognised advertising agency. The amount due under the contract had not yet been paid, and proceedings had been instituted with a view to its recovery. The advertisement referred to was the preliminary announcement of the issue of a new Sunday illustrated paper started by Mr. Bottomley.

FOLLOWING the hint of Mr. Dykes Spicer, that there should be formed a paper trade golf society, Mr. R. G. Harvey Greenham is endeavouring to push the idea forward. He is approaching the various sections of the industry accordingly. It is suggested that matches should be arranged with other organisations and possibly one or two meetings in the course of the year. It is hoped that representatives of the paper trade will come forward and help the movement.

ROMAIKE AND CURTICE, the noted press-cutting agents, have suffered the loss of one of their directors—George Maurice Curtice, also well known as a painter and sculptor.

In a recent issue of the *Mid-Sussex Times* we note an editorial announcement drawing readers' attention to the improved appearance of the paper—which is certainly a well printed production. The setting is now done on the monotype.

"THE CAUSEWAY" is a monthly magazine produced entirely by boys attending John Gulson Council School, Coventry, who are encouraged to take an interest in the typographical art. It is small 8vo in size and is set by them and worked off on a hand press, while a feature is made of linoleum-cut illustrations.

OVER £20,000 has been already subscribed to the Arthur Pearson Memorial Fund.

The death occurred on the 23rd ult., at South Shields, aged 71, of Robert Purves, stationer (late King-street, South Shields).

NEWS has been received of the death in Pittsburg, U.S.A., of Mr. John D. Pringle.

Commencing as a working collier in the North of England, Mr. Pringle ultimately became editor of the *Pittsburg Labour World*. In the interim, however, he was sporting editor of the *Pittsburg Dispatch*.

MR. FRANCIS FREDERICK GORDON, proprietor of the *Advocate of India*, Bombay, died in London on Monday. Mr. Gordon, who was born in 1866, went to India at the age of 24 on the literary staff of the *Bombay Gazette*, and four years later he bought the *Advocate of India*. He was a public spirited man, a J.P., and hon. magistrate for the Presidency of Bombay.

It has been decided to postpone the British Trade Ship for one year. Thus the vessel will not leave on her voyage until near the close of 1924.

NO SETTLEMENT has yet been made of the strike of linotype operators employed on the Paris edition of the *Daily Mail*, who came out a fortnight ago.

TO THE literature of the great London publishing houses a welcome addition is announced for the spring by the issue of "The Story of the House of Cassell."

WHILE on a shooting expedition on Hannibal Island, one of the loneliest of the lonely group of South Sea Islands, Lord Northcliffe came across the remains of a fire, and by it, under a stone, a copy of the *Saturday Evening Post* (of Philadelphia) dated December 7th, 1918. In forwarding the editorial page to the publishers, Lord Northcliffe says: "As you will see, the paper is in good condition, due as much to the quality of the material you use as to the dryness of the climate."

WE have received from the American Institute of Graphic Arts, New York, a copy of No. 1 of a broadsheet *Newsletter*, issued for the benefit of the institute's members. We note a suggestion of the holding (presumably in America) of an international graphic arts exposition on the plan of the one held in Leipzig in 1914.

ORIGIN OF QUOTATION MARKS.—Mr. Douglas C. McMurtrie, of Greenwich, Connecticut, U.S.A., is seeking information as to the origin and development of the marks of quotation. He is aware of the use of two commas or turned commas to mark citations in French books of about 1580-1590, but invites communications conveying suggestions which may aid in his research, or references to early books containing marks to indicate quotations. We should be pleased to find room in our columns for any pertinent information which readers may care to send us.

STATE-OF-TRADE DATA.—Mr. Frank Colebrook, writing in Messrs. Spicer Brothers' "Notes for Buyers" anent the need that wages be kept within the limits of what the state of trade permits, writes: "Why not make more use of the efficiency and undoubted probity of the accountants' profession? Why not offer to show to chartered accountants, representing a trade union or trade unions concerned in any particular negotiations, such books and accounts as may authenticate a statement put forward by the employers' side? Considering the frankness with which printing firms have in recent years pooled their costing methods, would it be such a surprising thing for them to carry this frankness and confidence just this step further? The accountants in question would make no disclosure of what they found in the books or accounts beyond what would be necessarily embodied or implied in their certificate."

ROYAL WEDDING CARD.—Messrs. Raphael Tuck and Sons, Ltd., have had the honour of presenting to H.R.H. Princess Mary a congratulatory wedding card which they believe to be the choicest of its kind ever designed. The front page bears a fanciful wedding-bells design painted in colour by Miss Harriett M. Bennett, the artist who designed the wedding banner which Messrs. Tuck presented to Queen Mary on Her Majesty's own wedding day. The card is encased in a white satin cover, decorated with true lovers' knots, Princess Mary's monogram entwined with orange blossoms forming the centre.

MR. LOUIS CALDER, following the death of Mr. E. F. Crowe, has been elected president of the Perkins Goodwin Co., of New York, on the 25th anniversary of his entering the service of the company.

MR. EINAR ULLMAN has from January 1st, 1922, entered the firm of J. G. Ullman and Co., Gothenburg, for many years exporters of the very well known white wood pulp boards (cylinder boards) produced by the Kohlsater Mill.

Trade Union Matters.

L.S.C. BALLOTS.—The following are the successful candidates in the annual ballots of the London Society of Compositors: Trade Committee—E. W. Franklin, C. G. West, A. Littlejohn, H. Deuvall, T. Gregory, G. Carpenter, H. Farley, T. S. Smith, A. V. Coombs, J. H. L. Owen; Operators, D. C. Luya and C. A. Bennett. London Trades Council—A. P. Payne, C. Wood, A. V. Bollen, W. F. France, S. Fox, A. W. Langford, C. E. T. Lewis, M. W. Keeble, E. E. Collett and W. J. Lane. London Printing Trades Federation—H. F. Wagden, J. Monk, A. Fox, H. Hallett and S. A. Simons. National Printing Trades Federation—T. Timberlake, E. J. Taylor, H. Deuvall and W. Pizey. Trades Union Congress—C. Cook and C. E. Mason. General Federation of Trades Unions—F. M. Collis. Joint Industrial Council (London District Committee)—F. M. Collis and J. O. Hatcher. News Committee—S. W. Newcombe, W. A. Rodford, J. Syred, E. Hoyle and C. F. Wrenn.

THE PACKERS' STRIKE.—The stoppage of work of members of the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers employed by members of the Book Trades Federation is creating difficulty in some printing and binding establishments in London. We understand that an informal conference was held at the Ministry of Labour on Monday last, but without any satisfactory result being attained.

P. B. M. R. AND P. W. GALA.—The National Union of Printing, Bookbinding, Machine Ruling and Paper Workers have arranged to hold a first annual "Grand Union Gala Day" on Saturday, July 1st next, at King's Oak Hotel and Sports Ground, High Beech.

Paper Mill Wages.

The question of wages and hours in the paper industry took an important turn last week, when a conference was held at the Midland Hotel, Manchester, between the Employers' Federation of Papermakers and representatives of the National Union of Printing and Paper Workers and the Amalgamated Society of Papermakers. Mr. C. R. Seddon occupied the chair, with Mr. G. Harraway in the vice chair.

The Printing and Kindred Trades Federation was represented by the secretary (Mr. A. E. Holmes), who was a signatory to the previous agreements.

The conference was held to discuss the revision of wages and alteration of hours as asked for by the employers. It transpired that some misunderstanding had arisen as to what was actually desired by the employers with regard to an extension of hours, and after lengthy discussion it was decided to refer the whole matter to a sub-committee, representative of both sides, for the purpose of drafting proposals to be submitted to a further conference which will be held at the earliest opportunity.

In the meantime the notice for bringing into effect any proposed alterations has been suspended until March 14th.

Paper Prices in Greece.

According to the Finnish representative, board, "news" and cigarette paper find a ready sale in Greece. Price of board, c.i.f. the Piræus, is £18 15s; "news" has fallen through competition from £21 to £17 10s. Good qualities realise £46 to £55. Consumption of cellulose is small, the production of Greek mills not exceeding 3,000 tons.

British Industries Fair, 1922.

Printing and Allied Trades Exhibits.

Although there were no signs on Monday of an overwhelming rush of buyers at the British Industries Fair, White City, the opening day nevertheless found the numerous exhibits almost completed, and making a very impressive demonstration of the enterprise of British traders. Hopes were high that when the week-end—and the Royal wedding day—had been left behind, business would begin in earnest, and these anticipations were strengthened by indications of the interest taken by foreign buyers. Among the first visitors to the Fair were buyers from Iceland, and the signature book at the Overseas Club (which has been formed at the Fair) showed that during the first few hours visitors had put in an appearance from Australia, Java, Chili, Spain, Japan, Cyprus, Czecho-Slovakia, America, and Bethlehem.

An interesting addition to this year's arrangements is that in order to facilitate business at the Fair an office has been provided where credits can be negotiated under the Government's export credit scheme. There is a staff of twelve interpreters.

Concurrently with the London section, there is also a Birmingham section of the Fair—both opening simultaneously and continuing until March 10th. It is in the London section, however, that the exhibits of special interest to the printing and allied trades are to be found, and the Divisions K and L, close to the Wood-lane entrance to the Fair, are the ones in which most of these exhibits are housed.

Conspicuous by their general absence are exhibits of working machinery, which lend so much interest to a representative exhibition of the printing trade. An exception to this rule, however, is to be found in the stall of the Canadian-American Machinery Co., Ltd., where working machinery is on view, an exhibit of special interest being this firm's "Camco" die press, which embodies new features, by virtue of which it is claimed that a saving of 75 per cent. ink and 60 per cent. wiping paper is effected, among these features being that: Surplus ink is scraped from the die and returned direct to reservoir; the paper can be fed any length from $\frac{1}{4}$ in. to full length of wiper, and feed remains constant throughout job; in the majority of cases the paper can be re-reeled and used over again; printing is done face upwards; the press is entirely controlled from the feeding position.

One of the strongest features of the printing exhibits is the large amount of fine colour printing shown, this branch of the trade being well represented by pictures for framing, pictures for use as box tops and for other trade purposes, calendars, colour-printed advertising novelties, picture postcards and numerous other lines. A most interesting novelty to be seen in this class of work is the imitation water colour pictures produced by the Nickleoid Electrotype Co., Ltd. This work is done by three and four-colour block printing upon coated or "art" paper, which is afterwards treated by a special process which removes the glaze and gives a Whatman paper finish, the colour work then having such a close resemblance to water-colour painting that even artists are deceived.

Prominent in the colour-printing section is, of course, the house of Raphael Tuck and Sons, Ltd., whose white and gold pillared stall is one of the most notable, and contains, of course, a varied selection of the greeting cards, picture post cards, calendars, etc., for which this firm is famous.

A Reduced Postage Forecast.

Now being distributed is a circular letter addressed by Sir Adolph Tuck to visitors at the Fair forecasting a reduction in picture post card postage. The following is a citation:—"Seeing that official reticence has so far prevented a definite assurance being given by the Postmaster-General that the postage on picture post cards will shortly be reduced to one penny, I take it upon myself to read between the lines of the occurrences of the last month, and to give this assurance to the trade visiting the Board of Trade Exhibition, that there is a likelihood amounting almost to a certainty of this reduction being announced on or before budget night next May. The trade will therefore do well to make their arrangements accordingly in connection with their purchases of picture post cards for the coming season. The information is not official, but as chairman of the Special Committee of the Picture Post Card

Industry, dealing with this postage question, I deem it my duty to give this advance information to the trade at the opening of the Board of Trade Exhibition, promoted by the Government itself, and not allow the opportunity to slip by to ensure the success of the picture post card section of the exhibition."

Colour printing exhibited for a very specific purpose is to be seen at the stand of Messrs. John Kidd and Co., Ltd., the capabilities of whose well-known inks are exemplified in the varied exhibits shown.

Handsome examples of bookbinding are to be seen at the impressive stands of the Oxford and Cambridge University Presses and other book producers, while there are several stands of interest to the bookbinder on the look out for materials. Among these is the exhibit of Messrs. Nickerson Brothers, who have a wide variety of leathers on view.

Paper and stationery of all kinds is to be seen in profusion.

We are able only to give a hasty introduction to the Fair this week, and hope to revert to the subject in next week's issue.

The Stationery Office.

The Geddes Report on Some Suggested Savings.

The final Geddes Report contains the following references to stationery and printing:

The Provisional Estimates for 1922/23 compare with the corresponding expenditure in 1913/14 and with the current year's Estimates as follows:—

1913/14 Audited Expenditure	... £1,059,724
1921/22 Net Estimates	... 4,119,944
19-2/23 Provisional Net Estimates	3,163,850

In addition, supplies to Liquidation Departments are estimated at £67,500 for 1921/22, £50,000 for 1922/23.

Since these figures were furnished, Revised Estimates have been put in, reducing the Net Estimated Expenditure for 1922/23 to £2,996,348 and the estimated value of supplies to Liquidation Departments to £25,000, representing a reduction in the aggregate of £192,502 per annum. The increase in this Vote represents far more than rise of prices. New items of expenditure have arisen.

We observe that in both the Administrative and Clerical and the Technical grades a large transfer from "Temporary" to "Permanent" is contemplated. We consider it would be more prudent to wait until a normal level of work is reached before adding to the numbers of Permanent Staff.

With regard to Printing, under the Representation of People Act, 1918, twice a year, of registers of electors, the Committee say: We understand that if the Supplementary lists of names which are prepared and posted publicly every half-year could be substituted as an effective supplementary register, for one of the complete registers each year, a saving of £85,000 could be effected and we suggest that the necessary steps be taken by legislation or by Order in Council to give effect to this economy.

The difficulty of the Stationery Office is to check extravagant demands effectually. A good deal is done in this direction. Further economies might be realised if the various forms and returns in all Departments were thoroughly overhauled with a view to standardisation and simplification. Having regard to the recommendations we have made in this and in earlier Reports, we think that the revised Estimates for the Stationery Office should be susceptible of a further reduction during 1922/23 of approximately £150,000 in addition to the £85,000 which might be saved in connection with printing under the Representation of the People Act.

As a result of our consideration, we are of opinion:—

That the restrictions on the activities of various Departments suggested in our Reports should lead to a further reduction in the Estimates for the Stationery Office approximating in 1922/23 to £150,000.

That a modification of the procedure under the Representation of People Act, 1918, should, whilst retaining the principle of a half-yearly register, lead to a saving in expenditure on printing of £85,000.

That the Estimate for the Department for 1922/23 should be fixed at £2,761,348, a reduction below the Provisional Estimate of £402,502, and the amount for supplies to Liquidation Departments at £25,000 instead of £50,000 shown in the Provisional Estimates, a total reduction of £427,502.

Fruits of High Postal Rates.

Big Decrease in Postings.

The Postmaster-General's "provisional estimates" of the decreased number of items passing through the post in the year 1921-22—though they are not likely to err on the side of overstatement—indicate a heavy falling off as a result of the increased postal charges. The following are the figures for the decreases as compared with 1920-21: Printed papers, 190,000,000; letters, 110,000,000; postcards, 77,000,000; newspapers, 12,000,000.

In raising the rates in 1921 the Post Office allowed for a certain falling off in traffic, but their estimate of an increased yield of £2,500,000 has fallen short by £600,000. The actual numbers of items carried in 1920-21 and the estimated numbers for 1921-22 are: Printed papers, 1,340,000,000, 1,150,000,000; letters, 3,460,000,000, 3,350,000,000; postcards, 577,000,000, 500,000,000; newspapers, 202,000,000, 190,000,000. The returns on which these figures are based do not distinguish between picture postcards and other postcards. Separate figures are not available for the numbers in November, December and January.

Mr. Kellaway states that the total number monthly of packets of circulars and other printed matter delivered in this country, inland and foreign, is about 95,000,000. From special returns which have been taken during the last few months it is found that, on an average, about 230,000 of these are circulars, etc., issued by firms of this country, but posted abroad for delivery here.

The Association of British Chambers of Commerce have written to the Prime Minister urging that, as the Postmaster-General estimates a surplus of £8,000,000 or £9,000,000 in the forthcoming financial year if trade continues as at present, the reduction in postal rates should come into operation immediately, and not be postponed until the surplus is assured. The Chancellor of the Exchequer has agreed to receive a deputation from the Association early in March.

Referring to the demand for a reduction of postal charges, Mr. F. G. Kellaway, the Postmaster-General, speaking at the Aldwych Club luncheon on Friday, said he knew the increased cost of postage was hampering business. A cheap and efficient post was the life-blood of business.

"I hope to reduce postal charges by reducing expenditure. We have reduced expenditure, and I gave a promise that as soon as a fall in costs assured a surplus on the Post Office balance-sheet the public would be given the benefit of it by a reduction in charges, and that promise was affirmed only just over a week ago by the Leader of the House of Commons."

Mr. Kellaway thought he would succeed in reducing postal charges by cutting down expenditure. He had estimated a reduced expenditure next year of £9,000,000, but he ventured to prophecy that the reduction would be nearer £10,000,000. The Geddes report recommended an expenditure of £471,000 less than his revised estimate, and every effort would be made to give effect to the recommendations of the Committee.

Lord Riddell, who proposed the health of Mr. Kellaway, said a correspondent had written the following:—

There is a young fellow named Kellaway
 In making high charges he's well away,
 With imposts immense,
 To Ghent and Coblenz
 He's driving our commerce like hell away.
 (Loud laughter.)

Durability of Rag Paper.

As a result of the exhaustive tests made by the Bureau of Standards of the United States, as to the durability of rag papers, the following report has been made: "Results of tests upon approximately 150 samples of paper stored since March, 1909, it is noticed that bonds and ledgers containing 100 per cent. rag, did not deteriorate in bursting strength as much as printing, writing and similar paper containing wood pulp. The loss in bursting strength for the first class of paper tested was about 11.9 per cent., while the bursting strength for the second class was 20.4 per cent. less than when tested 10 years ago."

Postal Reduction Delay!!!

SIR,—The procrastination which is taking place over the re-establishing of the "half-penny postal rate on printed matter," is trying the patience of industrial firms, whose publicity schemes are held in abeyance until the halfpenny stamp, as postage for one ounce of printed matter, comes again into operation. £500,000 a week is the low estimate of the amount which is being lost to labour by the abolition of this postal rate. Surely, a loss of 26 millions per annum to labour should be a sufficient reason for the Premier, the Chancellor of the Exchequer, and the Postmaster-General to have the cheap rate of postage re-established at once.

On Thursday, February 9th, Mr. T. E. Naylor, M.P., in his maiden speech, dealing with the question of unemployment, reminded the Minister for Labour that the Postmaster-General is making his Department pay at the expense of the Ministry of Labour. In fact, "robbing Peter to pay Paul," in other words, creating unemployment which has to be met by the Ministry of Labour in payment of the out-of-work doles.

With regard to the accounts for the fiscal year 1921-22, Sir J. Butcher, M.P., asked in the House, "whether the Chancellor of the Exchequer would give an undertaking that any Post Office surplus will be devoted to the reduction of postal rates." In view of the weekly loss to labour, and the continued creation of unemployment, the answer given by Sir Robert Horne was extremely unsatisfactory. His reply was: "I think it would be better to wait until we see how the finances of the year end." But waiting to the end of the fiscal year 1921-22 is to pile up a six weeks' loss to labour of £500,000 per week, namely £3,000,000. The Chancellor of the Exchequer should reduce the postal charges at once, thus vitalising trade and commerce and decreasing unemployment.

The disastrous consequences which the abolition of the "halfpenny postal rate on printed matter" has had on the printing and allied trades, and on trade and commerce generally, has been kept continually before the Premier, the Chancellor of the Exchequer, the Postmaster-General, since June 13th, 1921, the date when the high postal charges came into operation; thus plenty of time has already been given to the matter for consideration.

After eight months of protest from trade and commerce, we are now told by Mr. Kellaway, that "The question of reduction of postal charges is under the CONSIDERATION of the Government."

Yours faithfully,

W. H. BURCHELL,
 Governing Director, The Caxton Press, Ltd., Hon. Secretary, Association of Master Printers, London Central Districts.

13 and 15, Leather-lane, E.C.1.

February 24th, 1922.

Numbering Machines.

The Victory-Kidder Printing Machine Co. Ltd., Victory Works, Birkenhead, advise us since their appointment as sole European agents for the American Numbering Machine Co., Brooklyn, N.Y., they have done considerable business in the sales of various models of type-high and visible hand-numbering machines both in England and on the Continent, and have not met with a dissatisfied customer amongst thousands of users.

The machines are not the lowest priced, but they claim that these are the best value as they are durable and accurate, carrying the following guarantee: "The workmanship, steel and material of which this machine is constructed, is of the very best that can be obtained, every machine is thoroughly tested and guaranteed by us in every particular. Should any defects of any kind later develop, we will make any repairs necessary or supply a new machine free of charge."

The Victory-Kidder Co. inform us that parts are stocked by them at Birkenhead where repairs are carried out on short notice at moderate prices. Parts can be sent by return.

THURSDAY, MARCH 2, 1922.

The Wages Negotiations.

THE Labour Committee of the Federation of Master Printers has now almost completed its conferences with the various trade unions, meetings with the National Society of Operative Printers and Assistants and the National Union of Printing, Bookbinding, Machine-ruling and Paper Workers having been arranged for Thursday and Friday of this week. The date for a conference with the London Society of Compositors has not yet been fixed. A general statement explaining that the state of the industry and the fall in the cost of living warrants some further reduction in wages has been presented to all the unions who have met the employers in conference, as has also a statement put forward as a basis for discussion to fix a principle upon which wages in the industry may be stabilised in the future. The statement points out, we understand, that the fall in the cost of living from the highest point taken into account when wages were advancing, viz., 168, to the present point, 88, would entitle the employers to ask for immediate reductions varying from 22s. to 25s., but the employers make it clear that they have no desire or intention to seek to reduce wages to the pre-war level, provided that the state of the industry and the economic condition of the country will warrant higher wages being paid. Many of the unions are taking the opinions of their full executives during the forthcoming week, and have undertaken to notify the employers as to the result of their meetings.

* * *

Postage Reduction being "Considered."

THE trading community of this country is in no doubt as to the paramount necessity of a return to cheaper postage, which, as the Postmaster-General himself has termed it, is "the life-blood of modern commerce." We do not doubt that the opinion of business men is almost unanimously in line with the sentiments which are now to be seen expressed by poster stamps on letters circulating all over the country, viz., "Dear Postage Kills Trade," and "We Protest Against High Postage Rates!" The printing industry—through the Joint Industrial Council, the Federation of

Master Printers, London Master Printers' Association, and individual master printers—has made its own opinion heard in no uncertain tones, and now we hear that petitions are being prepared in many printing works by the workers themselves urging the Government to take immediate action. But the latest news is still that the Government has the matter "under consideration." It grows increasingly clear that the Postmaster-General's promises to the community and his recommendations to the Government are up against the Chancellor of the Exchequer, who evidently has his eye on the P.O. surplus. We believe the view of the country as a whole is definitely in favour of reduced postage, and we believe this view is the economically sound one. The Treasury's effort to improve its balance-sheet, leading in the end, as that must do, to decreased taxation, is an excellent thing in itself. But that excellent object must not be pursued at the expense of the "life-blood of commerce." The business community's view is that the attitude of the Treasury is the wrong attitude, and must not be allowed to prevail.

* * *

Our Own Unemployment Insurance.

THERE has been much disappointment in the printing and allied trades at the Government's shelving of the proposals whereby individual industries were to be able to contract out of the State insurance scheme and become responsible for their own unemployed. Signs are not lacking that the printing trade could advantageously make provision for the unemployed in its ranks, and efforts to do so would undoubtedly tend towards the promotion of better relations between employers and employed. Thus we are glad to note that Mr. T. J. Macnamara, the Labour Minister, announces that he contemplates the appointment of a committee to inquire into the possibility of carrying out the Geddes recommendation to "place Unemployment Insurance on the basis of insurance by industry," and he asks employers' and workers' organisations to think out the lines on which this could be done in their own industries and send him their considered views. The Minister recognises the difficulties of any change in present conditions, and points out that any scheme of unemployment insurance must be accompanied by arrangements for dealing with the registration of those out of work, for the payment of benefit to those entitled to it, and for the notification of vacancies in the industry which such person can be asked to fill. The obvious difficulties are many, and there are further difficulties which make themselves felt when one comes down to details in designing a scheme. But the printing trade has already done much thinking into this very important matter, and, we doubt not, our industry's official representatives will be able to give Mr. Macnamara some valuable facts and suggestions. We hope this may bring us a step further towards such a state of mutual responsibility as will do much towards bettering the relations between printing trade employers and employed in the future.

* * *

Brisker Board Market.

THERE is confirmation of the report of heavier requirements of strawboards and boxboards generally; but from what the box-makers tell us, it is more the result of depleted stocks than any increase in the demand for boxes. The very fact that material is being asked for is, however, a definite sign of sounder conditions of trading. The constant writing down of stock values has been throughout the last twelve months the sponsor of business misfortune and loss. With new stocks and a clean start, granted the continuance of present stability in regard to market values, there should be no insuperable obstacle to a speedy return to robust confidence in trading prospects.

London Master Printers' Association

Mr. R. A. Austen-Leigh Entertains the Staff.

On vacating the presidency of the London Master Printers' Association, Mr. R. A. Austen-Leigh last week entertained the staff of 24 Holborn to tea at Gamage's. Mrs. Austen-Leigh was unfortunately unable to act as hostess as she intended.

Following the tea, which was nicely served and which was a very enjoyable function, Mr. Austen-Leigh, from the chair, offered the guests his thanks for the assistance rendered to him during his two years of office. He described the growth of the various organisations represented by the Association during his connection with it and remarked upon the many changes that had taken place. Passing a few compliments on the L.M.P.A., as the organisation with which he had had most to do, he thanked Mr. Whyte (the secretary) for the valuable support he had always given him. The variety of information which Mr. Whyte carried in his head was extraordinary, and he (Mr. Austen-Leigh) was sure the new president (Colonel Truscott) would be pleased to have the benefit of their secretary's advice.

Mr. Whyte, in moving a vote of thanks to their hosts, spoke of the keen personal interest which Mr. Austen-Leigh took in the whole of the staff at headquarters, and that interest was very much appreciated by them. The speaker added the hope that the ex-president was leaving the London Alliance to take up the leadership of the whole of the Alliances.

Mr. A. E. Goodwin (secretary of the Federation) seconded the resolution, and remarked upon the extraordinary amount of work which Mr. R. A. Austen-Leigh had already performed both for London and for the Federation, and the latter body was also glad to have his assistance in dealing with the many problems which came before them.

The social gathering, which was enlivened by crackers, among other things, was brought to a close by the singing of Auld Lang Syne.

Personal.

VISCOUNT BIRKENHEAD, the Lord Chancellor, was entertained at luncheon on Thursday by the Lobby journalists in the Harcourt Room at the House of Commons, when the company included Lord Riddell, Mr. T. P. O'Connor, M.P., and a number of representative journalists.

LORD BURNHAM, who presided on Saturday at the annual general meeting of the Newspaper Press Fund, remarked that, like all industries, they had had a bad year, but things looked on the whole somewhat better.

SIR WILLIAM A. WATERLOW, K.B.E., J.P., has, by the unanimous vote of the inhabitants of Cornhill Ward, assembled in wardmote, been elected unopposed to succeed the late Sir Edward Cooper as Alderman of the ward.

SIR HENRY SEYMOUR KING, his nominator, said that Sir William was a great-nephew of a distinguished former Lord Mayor, Sir Sydney Waterlow, and had represented the ward on the Court of Common Council since 1914.

SIR WILLIAM, in returning thanks for his election, said he was very pleased indeed that he was to serve as alderman the ward with which his family had been intimately connected for over a century. It was impossible not to have some sentiment in such circumstances.

SIR JOHN JARVIS, BART., was last week entertained by the chairman and directors of the *Financial News* to a complimentary dinner at the Savoy Hotel, and the gathering included a very distinguished and representative selection of newspaper men.

SIR THOMAS JEFFREY has been elected to the board of the Culter Mills Paper Co., Ltd., in the room of the late Mr. J. C. Clegg.

LIEUT.-COLONEL J. R. TRUSCOTT, the new president of the London Master Printers'

Association, is spending a few weeks in the south of France.

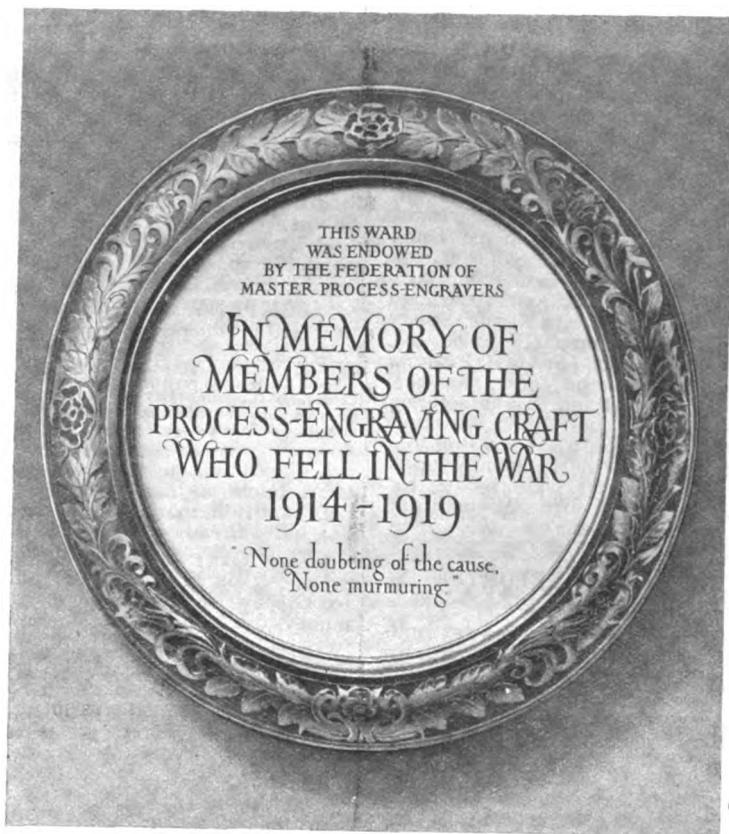

MR. R. A. AUSTEN-LEIGH is to attend the next meeting of the South-West London Master Printers' Association, to be held at the Chelsea Town Hall on Tuesday next, the 7th inst.

At a meeting of the National Committee of the Monotype Users' Association held last week, the resignation of Mr. E. G. Arnold from the presidency of the association was accepted with expressions of regret and many cordial appreciations of his services.

Process Engravers' War Memorial.

In the ward which the Federation of Master Process Engravers is endowing at the Limpsfield Convalescent Home, is to be placed the handsome war memorial shown in the accompanying illustration. The memorial is to be unveiled at the Home on Saturday, May 6th, and it is at present on view at the offices of the Federation of Master Process Engravers, to whose courtesy we are indebted for our illustration.

It was felt that a great many of the workers

War Memorial for Limpsfield Convalescent Home.

MR. F. WATERHOUSE was appointed to succeed Mr. Arnold as president of the Monotype Users' Association.

BRIGADIER-GENERAL MILDREN has, through the Amalgamated Press, presented to the new Printers' Technical School in Stamford-street, plant and machinery (roughly to the amount of £1,500) for use in the electrotyping and stereotyping branch of that institution's work.

MR. HAROLD STRONG, principal of the firm of Henderson and Spalding, was successful in securing a plate of £100 at the Lithographers' Auxiliary concert on Tuesday at the Cannon-street Hotel.

MR. JAS. MILLER, who is retiring from the presidency of the National Society of Electrotypers and Stereotypers, after occupying the position for fourteen years, is being made the recipient of a presentation and dinner at the Holborn Restaurant on the 11th inst.

MR. BRUCE, the head of the packing department of Spicer Bros., has just completed 50 years in the business. The chairman of the company (Mr. H. G. Spicer) presented him with a welcome gift in cash, and his co-workers with a portmanteau and umbrella.

SOME interesting visitors are expected to support Mr. Lionel Savory at the winter dinner of the Stationers' Social Society, on Saturday next, March 4th, at the Hotel Cecil. Among them are Mr. J. L. Geddes, Mr. Dykes Spicer, Mr. Henry Godfrey and Mr. H. Ling. Those who intend being present are requested to notify Mr. Mist immediately so that seats may be reserved.

MR. DICKSON, manager of the Fettyki, Paper Mill, Leslie, is retiring after 22 years service.

in process houses who had lost friends in the war would be pleased to have such a memorial to frame as a memento of those who had made the supreme sacrifice, and so keep before them the inspiration that comes from the remembrance of worthy deeds nobly done. The Federation has accordingly decided to prepare a photogravure representation of the memorial to be sold at 3s. 6d. per copy, the proceeds to go toward the completion of the Memorial Fund.

In order to ensure that the whole of the proceeds of the sale shall be devoted to the Memorial Fund, Mr. Edward Hunter of the Sun Engraving Co. very generously undertook to produce the illustration free of charge, an offer which was gratefully accepted and for which he was very heartily thanked.

The Late Mr. Briscoe Eyre.

An impressive memorial service to the late Mr. George E. Briscoe Eyre (whose death was referred to in our columns last week) took place at St. Bride Church, Fleet street, last Thursday. The service was attended by very many of all ranks who came together to honour the memory of one long respected and loved as a friend, as well as a principal.

Mr. Eyre represented one branch of a family long settled in Wiltshire whose connection with the printing world began with the acquisition of the Patent of King's Printer in the middle of the eighteenth century.

Besides the business of his own firm the affairs of the Stationers' Company used to occupy a good deal of Mr. Eyre's time when in London, but he was never seen to greater advantage—says a writer in the *Westminster Gazette*—than in the hospitable surroundings of his country home on the edge of the New Forest, a home the natural beauties of which he had greatly enhanced by judicious planting.

DIVIDENDS AND REPORTS.

CULTER MILLS PAPER CO., LTD.—Accounts of the Culter Mills Paper Co. for 1921 show debit balance, after taking credit for refunds in respect of excess profits duty, of £55,819. Considering exceptional conditions which have prevailed, and in view of enlargement of works evidenced by expenditure of nearly £42,000 on buildings and plant, directors recommend transference of £40,000 from reserve, reducing adverse balance to £15,819. Directors are hopeful that further refund of excess profits' duty will more than clear off this balance.

NEW COMPANIES.

IRISH LIFE, LTD.—Capital £10,000, in 7,500 preference, 1,500 "A" ordinary and 1,500 "B" ordinary shares of £1 each; proprietors and publishers of newspapers, journals, books, magazines and other literary works, etc. Private company. Subscribers: Major D. S. Matthews and J. H. McClean. First directors: Major D. S. Matthews and J. H. McClean. Registered office: 40, Lower Ormond Quay, Dublin.

J. UPCOTT GILL and SON, LTD. (printers, etc.).—Issue on January 2nd of £10 and on February 18th, 1922, of £20 debentures, parts of a series already registered.

JOHN P. GRAY AND SON, LTD. (bookbinders).—Deposit on January 26th, 1922, of deeds of 10, Green-street, Cambridge, to secure all moneys due or to become due from company to Barclays Bank.

ROBT. ROBERTS (PRINTER), LTD. (Cardiff).—Debenture dated February 9th, 1922, to secure £5,000, charged on the company's undertaking and property, present and future, including uncalled capital. Holders: Branch Nominees, Ltd.

CONTINENTAL A.B.C., LTD. (London).—Mortgage debenture dated February 14th, 1922, to secure £2,000, charged on the company's undertaking and property, present and future, including uncalled capital. Holders: R. H. Ruddock, 71, Fleet-street, E.C.

SUNDAY PUBLICATIONS, LTD.—Issue on September 1st, 1921, of £49,500 debentures, part of a series already registered (particulars filed February 16th, 1922).

KELLY'S MONTHLY TRADE REVIEW, LTD.—Particulars of £1,800 debentures, authorised January 27th, 1922; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

SEYMOUR'S (BRIGHTON), LTD. (picture dealers, printers and publishers, etc.).—Particulars of £500 debentures, authorised August 22nd, 1919; present issue £300; charged on the company's undertaking and property, present and future, including uncalled capital.

TRADE AND TRANSIT, LTD. (trade journal publishers and printers, advertising contractors, etc., Sheffield).—Particulars of £1,000 debentures, authorised February 14th, 1922; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

THROSTLE CO., LTD. (paper bag manufacturers and manufacturing stationers, etc., Walthamstow).—Particulars of £750 debentures authorised dated February 3rd, 1922; whole amount issued; charged on company's property, present and future, including uncalled capital. Satisfaction in full on February 8th, 1922, of debenture dated November 1st, 1921, securing £750 also filed.

DAVIES LAZARUS AND CO., LTD. (manufacturers of cardboard boxes, paper merchants, etc., London).—Particulars of £2,000 debentures, authorised February 13th, 1922, present issue £1,000; charged on the company's property, present and future, including uncalled capital.

The American Paper and Pulp Association is endeavouring to secure the appointment of a paper specialist in the Bureau of Foreign and Domestic Commerce, Washington.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIP DISSOLVED.

John Geddes Morrison and Robert William Field Self, advertising contractors, 34, Howley-road, Croydon.

THE BANKRUPTCY ACT, 1914.

RECEIVING ORDER.

John Bradley, 37, Queen Victoria-street, London, and 15, Bankside, Southwark, London, and residing at Whippendell House, King's Langley, Hertfordshire, Papermaker's agent and merchant. February 22nd. Public examination, May 10th, Bankruptcy-buildings, Carey-street.

Annandale and Son, Ltd.

The annual report of the directors states that after fully maintaining the mill and machinery in thorough efficiency and making provision for Corporation Profits Tax, the balance at the credit of profit and loss account as at December 31st, 1921, including £7,927 5s. 4d. brought forward from last year, amounts to £10,170 3s. 11d. This the directors propose to deal with as follows: To place to the credit of depreciation and reserve account, £2,000; to provide for the preference dividend already paid and amount accrued, £1,750; leaving to be carried forward to next year, subject to directors and auditors' fees, £6,420 3s. 11d.

Owing to the miners' strike and the depressed condition of trade during the year, the company has been unable to maintain the normal output of the works, and as the outlook is still no brighter, the directors do not consider it prudent to pay any dividend on the ordinary shares. The directors have thought it advisable to write off the sum of £22,011 19s. 9d. out of depreciation and reserve fund, this being the amount of outlay on new machinery and plant erected during these last few years.

The directors deeply regret the death of their colleague, Mr. Robert Strathern, and the loss of his valuable assistance on the board. They have appointed Mr. James Faichen, resident manager at the works, to fill the vacancy as managing director.

REDUCING PAPER STOCKS.—Some light on the state of the paper market is furnished by a paragraph in the statement Mr. Jas. Gourlay (chairman) made to the shareholders of Geo. Outram and Co. in Glasgow last week. Referring to paper stock, etc., he said: Last year the stock of paper and other materials amounted to the large sum of £92,871. During the war it was, of course, absolutely necessary to have a large stock of paper always at hand. We never knew when communications might be interrupted and the supply of pulp might be stopped for considerable periods. Therefore a large stock was held in store in Glasgow. After the war, when the Armistice came, it took a good many months to liquidate that stock, but I am glad to say that we have now got rid of it. It is now down to £14,217. That is a very great advantage, in respect that what was formerly costing something for rent, and insurance, and on which there was a considerable wastage by double and sometimes triple handling, has now gone into the investment account.

Electrotypers and Stereotypers
MANAGERS & OVERSEERS' ASSOCIATION

Mr. J. R. Riddell Initiates Discussion on Technical Training.

The usual monthly meeting of the Association was held on Tuesday of last week at St. Bride Institute, Bride lane, E.C.4, the president, Mr. A. Chadwell, occupying the chair. After the disposal of some brief routine business, Mr. J. R. Riddell, Principal of St. Bride Foundation Printing School, delivered an interesting lecture on technical education in the printing industry, being followed by a useful discussion.

The minutes of the previous meeting having been disposed of, Mr W. Warren (general secretary, National Society of Electrotypers and Stereotypers) was invited to say a few words on the forthcoming Printers' Pension election.

Mr. W. Crosby moved that a sum of £20 be voted from the funds of the Association towards Mr. G. W. Sharvell's concert in aid of the Corporation.

This was seconded by Mr. H. Filkins and agreed to.

Mr. Riddell was then called upon for his lecture. He said he was conscious of the honour they had shown in asking him to address them on what was probably, one of the driest of subjects, namely, the technical training of those engaged in the printing industry. He was sure the discussion which would follow would be just as helpful to himself as it would be to them. First he would like to assure them that he was a practical man himself, having served his seven years' apprenticeship, therefore what he had to say would be supplemented by a wide practical experience. In the near future they hoped to be setting up a department in the new technical school for their particular section of the craft, and they were keen that that department should rank with the finest in the world; as a matter of fact they had made a good start already, by a generous gift by one of the largest printing firms in London, and there was still opportunity for suppliers to be identified with the school by loaning plant.

On the question of apprenticeship, he deprecated the unreasonable limiting of the infusion of new blood into the industry, and also spoke of the industry becoming a C3 one if boys were prevented from entering it. Nevertheless it was up to them to see that they got boys of the right type. With regard to this point it was pleasing to see that the Joint Industrial Council was now considering the question of the better selection and training of those coming into the trade.

Mr. Riddell emphasised that the workshop was the proper place to train the apprentice, but the exigencies of modern business did not allow for it to be done thoroughly.

After speaking of the waste that occurred in some workshops—which was not the fault of the boy but of his training—Mr. Riddell said in his opinion it was not a wise thing for a boy to enter his father's office as an apprentice, it being both bad for the boy and the firm. The alternative to the workshop he maintained was the properly-equipped technical institute controlled and taught by practical men, where a boy's training should be supplemented to that given in the workshop. The first three months should be a probationary period to test his suitability. The next two years he should be taught the underlying principles concerning his business. With reference to these two years, it was often a wasted period for a lad and it was, too, a period when character was being formed. Speaking of the two types of boys met with in the workshop—the happy-go-lucky and the shy, nervous boy—Mr. Riddell asked them not to forget that the latter frequently made the best craftsman.

He appealed to them to give the boy some definite work to do, and not allow him to be kept running about and pushed from pillar to post in the foundry. A young apprentice was usually "no one's child," and the incompetent journeyman was the result of the inefficiently-trained apprentice, and for this incompetency the employers blamed the unions and the unions threw the blame back on the employers. It had been said that the wages paid apprentices were not sufficiently high to entice the best type of boy. He did not agree with that; he thought the real reason was that there was no guarantee that the boy would be properly trained.

Proceeding, Mr. Riddell said that the old haphazard method of training must go, and its place must be taken by the inculcation of that spirit of craftsmanship which will bring contentment and pleasure. What he meant was that craft spirit which would ennoble a man's mind, enrich his craft, and restore the ancient dignity of the printers' art.

Mr. Riddell next spoke at some length of the great strides being made in technical education in Germany and the United States and also insisted on the necessity of strict discipline among the students in the technical school.

In concluding, Mr. Riddell said the failings of technical schools in the past had been caused through the indifference of those associated with the industry, and he thought that the new technical school when it got going would rectify all past failures and would open up a new era for the advancement of technical education in the future.

Discussion.

Mr. Chadwell, in opening the discussion, said their section of the trade had been behind in the matter of technical education; he agreed entirely with the general statements made by Mr. Riddell. He recounted some of the experience of his early apprenticeship days at Spottiswoode's, and spoke with pleasure of the opportunities now in existence for boys as compared with former days.

Mr. G. W. Sbarvell spoke of his experiences in America, and said they were greatly in front of them in the matter of technical training, where every apprentice was compelled by the employer and the union to attend a technical class, and if the report regarding his progress was not satisfactory he was expelled, and if at the end of his apprenticeship he was not a fit man he was forbidden to continue in the trade. He believed there had been no man in this section of the trade who had reached to the position of general manager in an office. Compositors, machine minders, and even warehousemen had risen to that position. The reason for this was because they had in the past neglected to attain the necessary knowledge to enable them to occupy the position.

Mr. W. Warren was in absolute agreement with the views put forward by Mr. Riddell. Trade unions were now taking an interest in and recognising the advantages secured by technical education. In his judgment the responsibility for the boy's training should be borne jointly by the trade unions and the employers. Speaking of reductions in wages, he thought the majority of the employers in the country were not so much concerned about actual wages as they were about the results on the turnover of their business and balance-sheets. If as a result of technical training they could secure better craftsmanship, he was confident greater prosperity would follow, which would reflect advantageously both upon the employer and the workman. Consideration had been given to the question of the joint apprenticeship scheme by the J.I.C., and it was with especial pleasure and gratitude that he mentioned the gift which Brig-Gen. Mildren, of the Amalgamated Press, had presented of a large quantity of up-to-date plant and machinery, which was to be installed in the new technical school. He concluded by tendering his thanks to Mr. Riddell for the assistance he had rendered in attempting to improve the conditions of the apprentice.

Mr. J. Sunderland believed that every boy before he entered their business should have a general grounding in elementary science, metallurgy and applied mechanics.

Mr. A. Bell (Fry's Metal Foundry) raised the question of the advisability of office training coming into the curriculum of the foundry apprentice. He was sometimes appalled at the lack of commercial instinct possessed by many foundry overseers, and thought that if the apprentice was given six months of office training it would help him considerably.

Mr. J. Black thought there was nothing better than the technical institute for the training of the apprentice; but he could see the danger of introducing to the apprentice too much instruction outside his own department which would impair his efficiency as a craftsman, so much so that he would require to serve not seven years but seventy.

Mr. Middleton suggested that in addition to the two years in the technical school, apprentices should attend afternoon classes to keep themselves acquainted with improvements in machinery and methods.

In replying to the various points raised, Mr. Riddell expressed his thanks to Gen. Mildren and also to Messrs. Fry for their gifts of machinery.

On the proposition of Mr. Sharvell, seconded by Mr. Black, a hearty vote of thanks was accorded to Mr. Riddell, and the meeting then closed.

Messrs. Mann's Staff Dinner.

The annual dinner of the staff of George Mann and Co., Ltd., was held at the Queen's Hotel, Leeds, on the 10th ult., when, at the invitation of the Leeds staff, four of the directors were present—Mr. J. E. Reeve, Mr. Chas. Pollard, Mr. F. V. Heywood, from London, and Mr. R. B. Furnival from Manchester. A most enjoyable evening was spent. After dinner many musical turns were given, both humorous and sentimental, a number by the members of the Leeds staff.

Mr. J. E. Reeve, who is president this year of the Lithographers' Auxiliary of the Printers' Pension Corporation, took the opportunity to explain to those present the work of the Corporation, and succeeded in raising the sum of £14.

MR. HENRY J. PANTHER, who was for thirty years connected with Messrs. Chas Morgan and Co., has joined the staff of Messrs. Venables, Tyler and Co., Ltd., Queenhithe, E.C.4.

MESSRS. ROLPH, DARWEN AND PEARCE, of 76, Finsbury-pavement, E.C.2, have been appointed sole agents in the United Kingdom for the productions of the Gebr. Hoffsummer G.m.b.H., Düren. These are manufacturers of high-class banks, printings and writings, blottings, etc.

Caxton Convalescent Home, Limsfield, Surrey,

Devoted exclusively to the use of Men and Women engaged in the Printing, Bookbinding, Stationery, and Kindred Trades. Patients received from all parts of the Country.

A Subscription of Three Guineas annually by an Employer, Society or Workshop gives the right to nominate a Patient each year for a Three Weeks' residence at the Home, including rail fare.

Penny-a-week Subscriptions from employees are earnestly solicited. Annual Subscribers (minimum 4/-) through a collector or direct to the Office, are entitled to a Three Weeks' stay at the Home entirely free. Wives of men in the trade are admitted on the same subscription basis.

Paying Patients: £1 11s. 6d. per week.

Stationery and the Railway CLASSIFICATION.

Recent Alterations.

An interesting report on the negotiations which have been proceeding as to the general railway classification of stationery goods has been issued by Mr. F. L. Armstrong, secretary of the Employers' Federation of Envelope Makers and Manufacturing Stationers. As a result of a series of meetings, the first of which was convened by the Federation, the very closest co-ordination was established in the group of manufacturers producing paper or using paper as the raw material of their industries. The railway companies have now proposed, in consideration of the withdrawal of all the objections lodged to their original scheme, amended classifications which are regarded by the traders as being satisfactory.

Enclosed with the report is a statement showing the results of the conference with the railway authorities.

The paper items have been re-arranged under the following headings, the figures representing the new classification under the railway companies proposals:—Paper, in bales or bundles, e.o.h.p., 11; paper, in rolls, protected at ends, 11; paper, e.o.h.p., 17; gummed paper, 16.

The following notes have been added as a comment on these changes:—

(a) It is to be noted that Class 11 applies only to consignments of two tons and over, smaller consignments will be charged automatically at Class 12 rates.

(b) Paper packed in cases will be charged at Class 17 rates, this being a perpetuation of the existing illogical practice.

(c) Arising from the objections taken to the new classification the following ruling has been obtained from the railway companies on the subject of the packing of paper in rolls (protected at the ends), "the end of the rolls may be protected by wood, or by canvas, or wrapping paper, of sufficient strength of thickness to afford the necessary protection. The railway companies do not insist on prescribing the protecting material so long as it is adequate."

The result of the negotiations with regard to stationery items are set out as follows:—

The headings "stationery, e.o.h.p.," and "printed matter, not bound," which were respectively in the previous classes 3 and 2, have been altered to the following (the figures in parenthesis denoting the class in which the items appear under the railway companies amended proposal):—"Advertising" (16), "counter purchase checks" (16), "letterpress in sheets not fastened together" (16), "letterpress in sheets made up into pads" (16), "letterpress, stitched going to bookbinders" (16), "letterpress, e.o.h.p." (17).

For the item "books," is substituted the following two headings:—"Books in paper covers" (17), "books, e.o.h.p." (18). Fibre-board containers for re-pulping are placed in class 11.

A general note on classification states: The relationship between the existing and the new classes is said to be as follows:—Old class 1 is represented by new classes 11 (2 ton lots) 12 and 13, old class 2 is represented by new classes 14, 15 and 16, old class 3 is represented by new classes 17 and 18.

Although it is not definitely so stated, traders have been led to believe that in each case the direct equivalent of the old class is the highest of the new equivalent classes, the lower classes being intended to gather as many as possible of the existing exceptional rates, e.g., new class 18 = old class 3, while new class 17 lies between old classes 2 and 3.

Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

DENMARK.

A manufacturers' agent in Copenhagen is desirous of securing the representation for Denmark of United Kingdom publishers and manufacturers of stationery, stationers' sundries and office appliances. (Reference No. 168.)

Stereotypers' Auxiliary.

A successful bohemian concert was held on Tuesday evening at Anderton's Hotel, Fleet-street, under the auspices of the Electrotypers' and Stereotypers' Auxiliary in aid of the funds of the Printers' Pension Corporation. There was a very large attendance and the chair was occupied by Mr. F. R. Garard and Mr. G. W. Sharvell (Amalgamated Press). Among those present supporting the chairmen were Messrs. W. Bullett, W. Carlin, A. Chadwell, G. Loveland, W. S. Mackay, T. H. Middleton, R. Vincent and W. Warren.

Mr. Warren, in extending the thanks of the Auxiliary to the chairmen, said that with the two gentlemen from the Amalgamated Press the success of their combined effort was already assured. During the last two or three years the Auxiliary had been endeavouring to assist the Council of the Corporation in looking after the orphans of men of stereotypers who fell in the war. It was a moral obligation that they should see that they were properly provided for. The Auxiliary had founded four pensions and they intended founding a fifth as quickly as possible. He pleaded earnestly for their support to Mrs. Preston, Mrs. Treble and Mr. Jas. Dellagana at the forthcoming election. He thought the plate realised—£128—was a handsome one, and expressed pleasure and gratitude at the results attained by the chairmen.

Messrs. Garard and Sharvell were then accorded musical honours.

Mr. Garard, in returning thanks, said Mr. Sharvell had assisted him in making an excellent flong and his friends had co-operated in producing a fine mould, with the result that they had been successful in securing a fine plate from that mould.

Mr. Sharvell also returned thanks, and said the electrotypers hoped soon to be able to take over the responsibility from the Corporation of looking after the war orphans of their section of the trade. The cost would be met by a levy of the members, which he characterised as a "levy of honour."

The concert was of an exceptionally high order. Among those who were especially successful were the following:—Miss Alice Buckingham (mezzo); Miss Rita Le Bosse (violin); Miss Winifred Allan (soprano); Miss Mona Grey (child studies). Mr. Bernard Turner, with his saxophone, in mirth and melody, was uniquely fascinating, and others who were heard to advantage were Messrs. Fred Morris, Jack Millard, and Charles Hardy (accompanist). The concert was arranged by Mr. George J. Harrison.

Papermaking Demonstration at CARDIFF.

On the 17th ult., under the auspices of the Cardiff Typographical Society, a lecture on the process of paper manufacture was given by Mr. F. Heckford, chemist to Messrs. John Dickinson and Co., Ltd., in the Assembly Hall of the Technical College, Cardiff.

The chair was taken by Mr. R. J. Webber, director and general manager of the *Western Mail*. There was a large assembly, among those present being Mr. Armistead (director of Ely Paper Mills), Mr. Short (manager of the Educational Publishers Co.), Mr. Johns (Messrs. R. J. Johns and Co., Newport), Mr. Hunt (Messrs. Hunt and Sons, Cardiff), and Mr. H. Raggett (Messrs. John Dickinson and Co.).

The lecturer dealt briefly with the process, explained how different papers were made, referred to the esthetics and romance of papermaking, and showed a cinema film of Croxley Mills. Great interest was taken in the making of hand-made paper on the platform, the lecturer being applauded as he deftly produced a tiny sheet from a miniature vat of pulp.

The Welsh printers are practical men, and a fire of questions were put and answered, chiefly dealing with electricity and other difficulties that printers experience with paper. The lecture was described as being of great educational value to the students of the society.

A cordial vote of thanks was accorded Mr. Heckford and the chairman.

"FARMAND" reports that the demand for kraft paper and partly also for finer brands has been comparatively lively, but prices have been low. News is still in demand.

DER LITHOGRAPHISCHE MASCHINENDRUCK, von Karl Golmert. Leipzig: Verlag von Rudolph Becker. Paper wrapper; 112 pp.; 7½ in. x 5 in. Price, 15 Marks.

A copy of this well-produced brochure is sent us by the Leipzig publishers, and we find it an interesting and informative little manual of lithographic practice up to date. Its sub-title characterises the book as providing an easy introduction to lithographic printing and the author indicates in the course of his preface that his instructions are intended primarily for the benefit of those already at practical work in the craft but not possessed of sufficient technical knowledge to enable them to understand the principles upon which their work is based. The book is thus a plain, general treatise such as should be very helpful to German-reading students, while advanced workers also will probably find points of interest. The subject matter is divided into three parts. The first deals with lithographic printing in general, and goes carefully into details of the construction and care of the machine, the constituent parts, their functions and maintenance, and gives practical hints for the lithographer at his work. The second part deals with the subject of printing from zinc plates, and the third part, consisting of about eighteen pages, is devoted to a capable introduction to the important subject of offset printing.

"THE BRITISH SCHOOL OF ETCHING," being a lecture delivered to the Print Collector's Club, by Martin Hardie, R.E. London: Royal Society of Painter-Etchers. Crown quarto; 36 pp. by 12 inset illustrations; quarter cloth. Price 5s.

This volume, which is eminently creditable to both printer and publisher, bears the imprint of Messrs. Sanders, Phillips and Co., Ltd., of the Baynard Press. The design of the book, the typography, and the execution of the illustrations—etchings reproduced by the collotype process—form a good example of how the "book beautiful" should be made. The subject matter is, we judge, a useful addition to the history of etching in this country, and will appeal to those interested in the artistic side of the subject. The volume is also issued in an edition de luxe in special binding, the impression being limited to 120 copies.

Notices in Brief.

THE latest issue of *Swains' Quarterly*—dated Winter 1921—contains further excellent examples of illustrations printed from blocks produced by the famous house of John Swain and Son, Ltd. Apart from the function of showing how good such process work can be, some of the illustrations have definite suggestive value, as, for instance, one which shows a line zinco as made exactly to the artist's drawing, confronted with a zinco of the same drawing showing the effect of the insertion of "stock tints."

THE 1922 issue of the *Penrose Process Pocket Book and Diary* is, like its predecessors, a most useful little vade mecum for those concerned with process work. Some extension has this year been made of the reference data at the end of the volume.

MESSRS. BENN BROTHERS, LTD, send us a copy of the second and cheaper edition of "Is Trade Unionism Sound?" by J. H. Bunting—a general and very thought-provoking review of the present-day industrial situation; appreciative forewords are contributed by the Right Hon. J. R. Clynes, P.C., M.P., and Sir Peter Rylands. The book is published at 2s. 6d. net.

ALL interested in book plates will welcome the volume "Bookplates by Pickford Waller" just issued by the Morland Press, of Ebury-street, S.W. A brief introduction by Mr. W. G. Blaikie Murdoch precedes the many reproductions of Pickford Waller bookplates, all in the customary superior style of the Morland Press. Price, in paper wrapper, 3s. 9d.

The *Print-Collectors' Quarterly* in its February issue includes articles on "The Master LCZ," by Max Lehrs, "Collectors' Marks on Prints and Drawings," by C. F. Bell, also an article by Geo. S. Layard on Pierre Lombart's work, and one by Arthur K. Sabin on Elizabeth Adela Forbes.

Printers' Managers and Overseers ASSOCIATION.

MANCHESTER CENTRE'S ANNUAL DINNER.

There were present in the Victoria Hotel, Deansgate, Manchester, on Saturday, the 18th ult., about 90 ladies and gentlemen, the occasion calling for such a large and happy gathering being the annual dinner of the local centre of the P.M. and O.A. Mr. Thos. Rignall, the exceedingly popular president, was in the chair. Amongst others present were: Messrs. F. E. Robinson, vice-president; S. M. Bateman, London president; H. R. Caldwell, Liverpool president; L. C. Mennell, Yorkshire president; E. W. Whittle, general secretary; Jas. N. Poole, Liverpool secretary; H. O. Pattinson, Yorkshire secretary; William Johnson, president, the Manchester and Salford Association of Master Printers; J. D. French, president, and A. Bottomley, assistant secretary, Typographical Association; John Allan, chairman, and Thos. Sproat, general secretary, Amalgamated Society of Lithographic Printers of Great Britain and Ireland; W. Whittaker; Mesdames Rignall, Robinson, Whittle, Allan, Sproat, and others.

After the cloth had been removed, the president gave the toast of "The King," which was loyally honoured.

The toast of "The P.M. and O.A." was in the able hands of Mr. William Johnson, who wished success to the association. He had come willingly to the dinner because there should be goodwill between the employers and managers and overseers, as well as amongst the workers. He had also come readily from a personal point of view, as Mr. Rignall was in his employ, and both of them were daily attempting to make a living in a certain area of Manchester. And further still, it was rather unique that Mr. Rignall should be president of the local P.M. and O.A. whilst he (Mr. Johnson) was president of the local Master Printers' Association. That evening found Mr. Rignall on the bridge whilst he was pleased to be on the deck and show with the broad feeling of unity that the ship of the local printing trade could be steered through difficult channels to a safe port. Of recent years there had been formed the Joint Industrial Council, and much good work had been, and could be, done by the employers and the employed commingling together. Of course, if both sides did not enter the meetings with the spirit of goodwill, then all the phrases uttered were meaningless and of no help to the craft. There should at all times be amiability from the lowest to the highest in the trade. Both sides should strive to work shoulder to shoulder, and be sincere in their deliberations. At the present moment there was glooming on the horizon the vexed question of wages, but speaking personally, he was out to see production go up instead of wages going down, as efficient production was vital to all classes. He firmly believed that the British workman could not be beaten, and if every member would endeavour to take away everything that stopped the wheels of progress and goodwill, he was sure happier times would be enjoyed by all. He had pleasure in giving with all sincerity the toast of the evening. (Applause.)

A Surprise Presentation.

Mr. Rignall begged the company to excuse him breaking away from the programme as he had an exceptionally pleasing duty to perform. The members of the Manchester Centre desired to take by surprise their energetic and enthusiastic secretary, Mr. Frederick J. Hughes. Many present that evening were unable to fully realise the hard and conscientious work that their familiar "Wee Mac" was constantly doing. To give some idea of his persistent efforts he would say that Mr. Hughes had been in office almost from the formation of the Manchester Centre in 1904, nearly eighteen years ago, and during that period he had never missed a meeting of the Centre. It was a unique record and one that could not easily be surpassed. It showed that he had the Association at heart, and further, it proved that in anything he undertook he always gave of his best. The members of the Manchester Centre were proud of him, and therefore that evening they were presenting to him a handsome clock with chimes, which had engraved in silver on the front: "Presented to Frederick J. Hughes by the members of the P. M. and O. A. (Man-

chester and District Centre) in recognition of his long and faithful service as secretary. February 18th, 1922." He was pleased to see present that evening a silent member to whom they could apply Milton's quotation, "They also serve who only stand and wait," the lady being the wife of their secretary. In making the presentation, they had not forgotten Mrs. Wee Macgregor, because if she had not made sacrifices in permitting him to be so much away from home on Association business, he, their secretary, could not have made such a record attendance. On behalf of the members he handed the present to the secretary with a wish that both himself and Mrs. Hughes might be spared many years amongst them. The whole company sang, "For He's a Jolly Good Fellow," and then

Mr. Frederick J. Hughes, replying, said they could not expect him to say much as he was nonplussed by the unexpected and greatly appreciated present. Of what he thought most was the spontaneity of the gift, as he was unaware of any circumstance arising for such kindness being shown to him. During the past eighteen years he had received unbounded pleasure in serving his fellow members, and at all times he had found true helpers and workers amongst the officers of the Centre. It was true that his good lady had sacrificed many hours of his company, but the presentation gave her some assurance that those sacrifices had not been in vain, therefore, on her behalf and on his own behalf he sincerely thanked the members, and promised that his enthusiasm for the welfare of the Centre would continue in the future, as in the past, to at all times carry out to the best of his ability, the duties placed upon him. (Applause.)

Mr. S. M. Bateman, being the first to reply to the remarks of Mr. Johnson, thanked the President of the Masters' Association for his kind expressions, and in an informative speech, said the whole of the members appeared to be waking up, which showed a healthy sign. Meetings like those were quite different from some of the conferences that he had attended, particularly the one held recently in the city of Nottingham, when the dark clouds of criticism seemed to have no silver lining. However, when it did come all felt comfortable, and they afterwards spent a pleasant evening. The chief point established at that meeting had brought everyone into agreement, and they could say from that day onwards that they were the Association of Printers' Managers and Overseers. Some people were born great, and others had greatness thrust upon them. The first part of that saying aptly applied to Mr. Whittle, their general secretary, because he was comparatively a young member, yet he had been placed in the chief office of the Association, while friend Poole, who was the senior provincial secretary, appeared to have fallen in with the latter part of the quotation. Mention had been made of the silent work of Mrs. Hughes, and he might add that they were pleased to see so many beautiful ladies present, because they brightened the social element of the evening's enjoyment.

Mr. H. R. Caldwell echoed the remarks of Mr. Johnson, and stated that the P.M. and O.A. had striven to instil into all ranks the goodwill so necessary for the progress of the craft. The members of the P.M. and O.A. were the butt of both the employer and the employed, yet they endeavoured to act honourably to both parties, being on many occasions able to smooth difficulties that might have caused separation.

The P.M. and O.A. and the J.I.C.

Mr. L. C. Mennell said the printing trade never was so much alive as at the present time, when everyone was attempting to do the best he could to get out of the depressing circumstances prevailing around. Mr. Johnson had mentioned the Joint Industrial Council and its endeavours to promote harmony; therefore he would like to make a suggestion that managers and overseers be added in a consultative capacity, because, as at present formed the J.I.C. excluded them altogether, the inference being that the P.M. and O.A. was represented on the side of the workers. Truly, all of them were workers, yet it was the manager and overseer who guided the industry, and so were partly responsible for success or failure. They knew the temperaments of the various people under their control, and many times they avoided friction between the two extremes of the craft. Such gatherings as the one that evening assisted them in making friendships, and since he joined the Association eleven years ago he had made more staunch and firm friends in the craft than he had ever done before. He

thanked the Manchester Centre for their hospitality.

Mr. J. D. French said he had viewed the P. M. and O. A. for many years with a great deal of respect, admiration and pity. At one time it was a possibility that he might also become a member of it, seeing he had for some twenty years held a qualifying position. But circumstances so placed him that he had to be satisfied with another station in life. He was rather struck by the remarks of Mr. Caldwell when he stated that members of the Association were buffers between the employer and the employed. Sometimes they were harassed by both sides, and so long as human nature remained as it was, they would be continually members of the buffer state. His experience of managers and overseers had been such that if the employers and those under their charge would do the right thing, the managers and overseers would endeavour to do the same. Unfortunately the Association had for many years been under suspicion by all parties, but he could not say why they should be judged from that standpoint. Given a decent overseer and a decent staff, the employer was bound to make good, and therefore the overseer should have the credit of doing the best he was able to do for all concerned. Mr. Mennell was a rising man, and when he suggested that there might be a closer cohesion with the J.I.C. it was a thought worth considering. The Council was all for bringing in union both the employer and the employed, and if Mr. Johnson's confreres would provide better conditions, well, the men would endeavour to give a larger output in return. There were too many dingy workshops, and many a craftsman lost his vitality before the day was out, owing to the morbid surroundings of the printing office. He gave the employers credit for bringing forward a scheme for better conditions of employment and the better training of apprentices, which showed that they were alive to the fact that all the blame could not be laid at the door of the worker.

Mr. E. W. Whittle said the Association had one common object with other associations, and the P. M. and O. A. was always doing the best for all parties. The J.I.C. did not physically recognise the P. M. and O. A., and they did not know where the members sat at their meetings, yet their ideas were considered as they imparted information to both sides before ever they met. The manager or overseer was the butt of all parties, and if the game was played with goodwill by both sides, the manager and overseer would see it was run straight, as he was the friend of both. If the employer would give the managers or overseers the means for efficient and greater output they would assist the worker to take full advantage of such facilities.

Mr. John Allan recognised that the association had been doing good work in the past, and on many occasions had smoothed over various little differences which caused irritation to the worker. They all were out for closer co operation in the printing trade, and he thought the day was not far distant when all would be able to meet together in a more sociable spirit. The J.I.C. had done valuable work, and, as time went on, its good influence would be felt more and more.

Mr. Thos. Sproat appreciated the better feeling that was amongst them, both inside and outside the workshop, and the consideration of such points as better training of the apprentices and more healthy workshops would encourage better service. By healthy offices and good and reliable machinery the old method of rule of thumb would disappear, and all would pull together to find the silver lining that had been so long hid away from their sight.

Of course the evening could not pass without a few racy remarks from the noted secretary of the Liverpool centre, Mr. Jas. N. Poole, who seemed to have some uncanny aid which enabled him to foretell the positions of the centres competing in the next bowling competition, whilst he also extended a hearty invitation to the united gathering to be held in Liverpool in three months' time.

The souvenir programme was the gift of Messrs. Whittaker and Sons, Ltd., Marlborough Press.

Votes of thanks to Mr. E. Murphy, musical director, the artistes, and the stewards being given, the company closed one of the brightest evenings ever held in connection with the centre, by singing heartily together "Auld Lang Syne."

English Books in America.

Publishers Protest Against Proposed Tariff.

American publishers and booksellers have united through their respective trade organizations in submitting to the Finance Committee of the Senate a statement of protest against the proposals of the Fordney Tariff Bill relating to the duty on books. Their spokesman—Mr. John Macrae, of the firm of

E. P. Dutton and Co.—went so far as to say that there was no need of any protection whatever for books, says a correspondent of the *Manchester Guardian*. He could "state in confidence" that for every book imported into the United States there has resulted the manufacture of ten books or more as a consequence of this importation.

After giving the Committee detailed particulars of the methods adopted nowadays by American publishers in purchasing editions of books from English publishers, and showing the benefits derived by American producers as well as consumers from this system, Mr. Macrae made specific recommendations on behalf of the American publishers and

booksellers. They ask for the free admission of books for educational institutions, books over 20 years old, books in foreign languages (as being "almost invariably of a highly educational value,") and books in raised letters for the blind.

The duty on books printed in the English language should in no case exceed 25 per cent., or 15 per cent. if in addition to being printed in English they are also imported from England. The method of assessment should be *ad valorem*, and not according to the scheme of "American valuation" proposed by the Fordney Bill, which "is impractical and would result in unending difficulties and loss to the importers of books."

New Inventions.

Ticket Printing Machines.

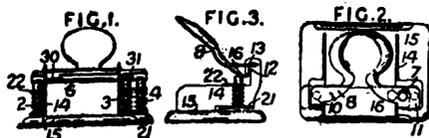

An invention that relates to ticket printing machines of the type described in Specification 155,990, has been patented by Messrs. T. H. Moffat, W. J. Gibson and C. W. Robertshaw, and comprises a single rotary type carrier for printing on both the tickets and the record strip, inking-means therefor, and means for preventing actuation unless a ticket is inserted. Duplicate type sets are provided on the carrier 7 to print on the inserted ticket below and the record strip above, being set by bevel gearing from a rotary head 25 reading against a fixed pointer 24. A lever 20 mounted on the head is employed to depress the hollow plunger 16 to compress springs 31^b between a cross

head 31 carried by the plunger and a fixed cross plate 3 so as to allow springs 30 to print the ticket. On releasing the plunger the springs 31^b print the record. The cross head 11 carries a roll 35 so as to be locked against depression by a lever 34, Fig. 2, until the latter is pushed in by an inserted ticket so as to clear the roll and to bring its upper end into position for complete removal by engagement with a surface 31^a on the cross head 31 when the latter is depressed. A counter, bell, and record strip feed are actuated from the cross head 31. A pair of inking pads 40, 41 fitted to an ink containing tube 43 are linked to a disk 44, free on the spindle 10 and actuated by a link 46 pivoted to the fixed frame. Set-screws 45, 45^a adjust the acting position of the pads.

Perforating Paper.

Mr. E. Jacobs has patented an invention relating to punching apparatus, for perforating papers prior to filing, provided with three or more punches, two of which are selectively operated, the selection is effected by making a flanged plate or lever, by which the domed handle is carried, laterally movable and providing a hole therein, the hole in

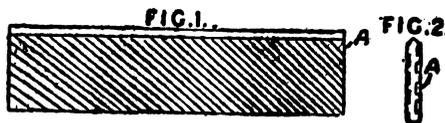

one position rendering one of the two selective punches inoperative, the other punch not being engaged when the lever is in the second position. Secured to a sheet-metal base-plate 15 are brackets 14 provided with

integral lateral wings 21, 22, between which the spring supported punches 2, 3, 4 are housed. Notches 13 formed in the upper parts of the brackets serve as pivotal points for the punch operating lever, which is formed from a sheet-metal blank 8 bent upwardly at 12 to engage the notches. Flanges 10, 11 of the blank 8 are made long enough to extend over all the punches, a hole 7 provided therein being situated over the punch 3 to render this inoperative when the lever is in the extreme right hand position, shown in full lines in Fig. 2, the punches 2, 4 then being operated. Notches 30, 31 are provided in the plate 8 to form shoulders 6 in the part 12 adapted to limit the lateral movement of the punch operating lever, upward movement of which is limited by a plate 16 carried between the brackets.

Preventing Rules from Rising.

By an invention patented by Mr. A. G. Worledge in order to prevent rules from rising in the form, they are provided with parallel grooves or serrations A which run obliquely

across each side at an approximate angle of forty-five degrees, those in the one side being inclined in the opposite direction to those in the other. Specification 12491/11 is referred to.

Transparent Paper.

Application has been made by Mr. O. Poeppel for a British patent covering transparent paper. Apparatus for melting a layer of lacquer applied to paper and thus rendering the paper transparent comprises an externally heated horizontal channel a having

its ends d, c sloping downwardly so that the heated air is retained in the horizontal part and the heat economised. The paper to be treated, such as so-called window letter envelopes, is conducted through the channel by a conveyer band b.

Double-Faced Corrugated Board.

In a patent granted to Mr. G. W. Swift, junr., the inventor proposes to avoid the warping tendency by providing a machine that will apply both facing sheets to the opposite crowns of the enclosed corrugated sheet in a single operation, practically simultaneously with the formation of the corrugated sheet, so that both facing sheets will be applied under exactly the same conditions of heat, moisture and tension, with the result that the finished product will be a perfectly flat, stiff board, without any tendency to curl or warp. To secure equality of relative strain between the two facing sheets, Mr. Swift proposes to provide for the adjustment of one of the facing sheets feed rollers tangentially to the other feed roller, thereby enabling the operator to quickly equalise the facing sheets during the operation of the machine. The two facing sheets are fed in from opposite sides of the machine and applied to the corrugated sheet in quick succession upon lines diametrically opposed by the applying roller, the finished product passing tangentially from between the two pressure rollers and extending over a horizontal drying table over which the cellular board passes while it is held perfectly flat by suitable pressure means until it is completely dried and hardened.

At the British Industries Fair.

Royal Visit and a Government Luncheon Give Added Interest to an Excellent Exhibition.

There has been an increase of interest shown and of business effected in connection with the British Industries Fair during the last week, and two outstanding events have contributed towards this happy result. On Thursday last their Majesties the King and Queen paid a visit to the Fair and made a tour of inspection lasting about a couple of hours, whilst a luncheon held under Government auspices on the same day, attracted a big gathering of distinguished people.

Their Majesties' visit was carried out in informal fashion—apart from the reception on arrival by the heads of the Department of Overseas Trade, and a halt at the Overseas Buyers' Club to receive members of both the London and Birmingham Advisory Committees—and it was not difficult for the trade visitors present to come within a few feet of the King and Queen during their prolonged and careful inspection of the extensive rows of stands which compose the Fair. These stands are estimated to make a total of three-and-a-half miles in length.

Their Majesties' Interest.

Both the King and Queen showed much interest in the Paper, Printing, Stationery and Office Appliances Section, which is the largest section of the Fair, and provides, as we have previously indicated, an impressive display of the various trades concerned. The beautiful colour printing exhibited on so many stands came in for much admiration. The stand of Messrs. Raphael Tuck and Sons, Ltd., was entered, and their Majesties spent some time in examining the productions of this firm, which has to its credit so many royal greeting cards and other publications. Appropriately, there were being distributed at the time free copies of a souvenir Tuck picture post card, "The Royal Romance," bearing portraits of H.R.H. Princess Mary and Viscount Lascelles.

The King said he had visited each year's show, and was struck at each visit with the substantial progress made. He felt sure that such exhibitions could do much to rehabilitate British trade.

The Government luncheon was presided over by Mr. Stanley Baldwin, M.P. (President of the Board of Trade), and official representatives in London of British Dominions and foreign countries were present, whilst every phase of the Fair was represented, whether by the leaders of British industrial enterprise or by buyers attending the Fair to supply the needs of home and overseas markets. Mr. Baldwin proposed the "British Industries Fair," and Mr. P. Barringer, on behalf of the London executive, and Mr. H. O. Worrall, for the Birmingham branch of the Fair, responded. Among other speakers was Baron Moncheur, the Belgian Ambassador, who commented

upon the remarkable display of British-made goods afforded to the foreign buyer, and referred to fairs generally as among the most successful methods of meeting the desire that had grown up since the war for better commercial relations between nations. Lord Riddell, Sir Adolph Tuck, and Sir Herbert Morgan were among the many distinguished guests.

Printing Trade Exhibits.

Colour printing and illustration work of all kinds is, as indicated in our last issue, a predominant feature of the section devoted to the allied trades. The organisers of the Fair claim that every known method of mechanical reproduction is represented, and certainly one has no difficulty in identifying a good many of the various reproductive processes in present-day use. Colour photogravure is to be seen, for instance, at the admirable stall of the Cardigan Press; off-set, litho and colotype are responsible for numerous striking examples; whilst lithography and multi-colour half-tone work is everywhere on view. Among the firms showing creditable illustrative work may be mentioned: Messrs. Thomas De La Rue and Co. (London), E. T. W. Dennis and Sons, Ltd. (Scarborough), Eyre and Spottiswoode, Ltd. (London), C. W. Faulkner and Co., Ltd. (London), Graphic Arts Press, Ltd. (London), Geo. H. Harrison and Son (Leeds), Hills Press, Ltd. (Sunderland), Lochend Printing Co., Ltd. (London), McDougalls Educational Co., Ltd. (Edinburgh), Vivian A. Mansell and Co. (London), A. Mason and Co. (Croydon), Roberts Bros. and Mogridge, Ltd. (Bristol), and J. Salmon (Sevenoaks).

A very creditable exhibit—chiefly in the corridor connecting different sections of the Fair—is that of the British Institute of Industrial Art, which includes the notable series of Underground posters, some fine reproductions by Eyre and Spottiswoode's fine art department, and reproductions by the Oxford Press of early printed books and drawings and ancient manuscripts produced by the colotype process and chromo lithography.

But while so many admirable examples of the printer's art are to be seen, machinery, apparatus and supplies for the printer are in many respects very little represented. The essential factor of high class inks is, as previously mentioned, emphasised at the stand of Messrs. John Kidd and Co., Ltd., and the Nickeloid Electrotyping Co., Ltd., show a few of their plates.

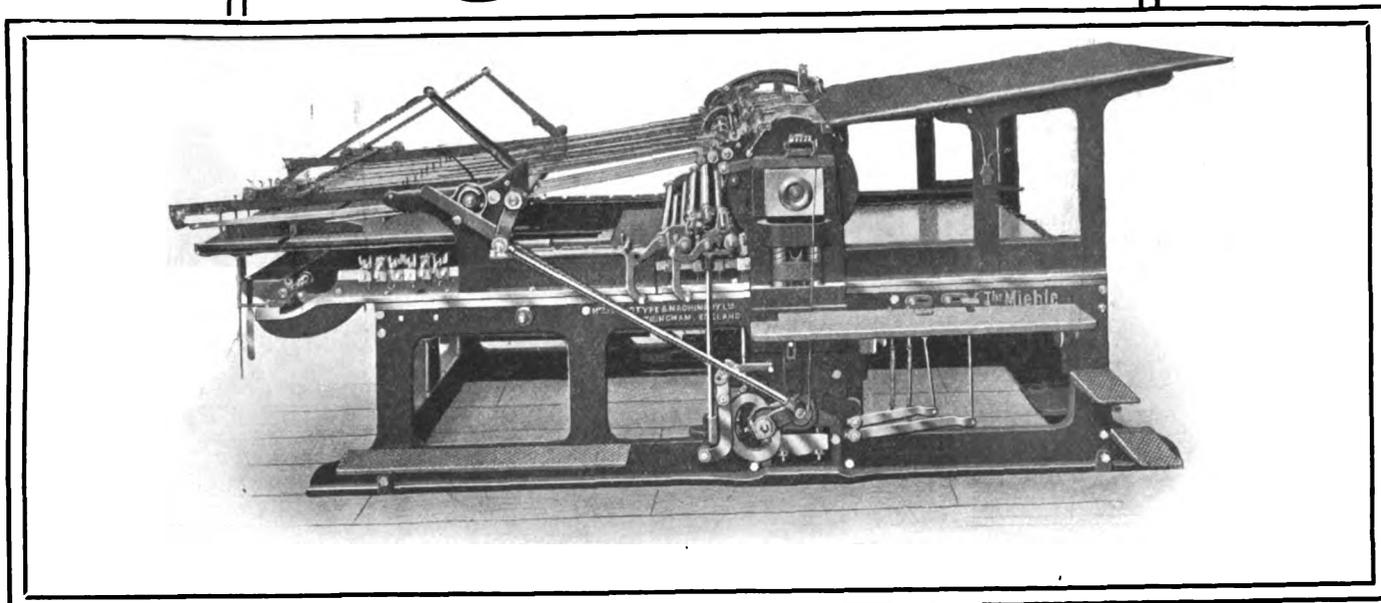

The Canadian American Machinery Co., Ltd., who have one of the very few exhibits of machinery, are showing not only the "Camco" die press, to which we drew special attention last week, but also the Cleveland Folding Machine, the latest

model of which attracts much notice from visitors to the Fair. What gives the machine a remarkably simple appearance is the elimination of all tapes, cams, knives, chains and sprockets. This also makes the adjustment of the Model "B" a very simple matter, it requiring only a few minutes to change the machine to accommodate different sizes of folds. It is claimed that the Cleveland will produce from five to twenty-five times as many folds as can be folded by hand, while the product will be absolutely uniform.

The need for cutting and creasing machines has grown enormously of recent years, and in meeting the demand Wm. Crosland, Ltd., Bank Foundry, Bredbury, near Stockport, have shown their grasp of market conditions. Their machines are of fine quality, and yet adaptable to the delicate work for which they are intended. They manufacture all machines for cardboard and fancy box-makers, papermakers, printers, stationers and bookbinders. At the White City their exhibits attracted much attention, and Stand No. L50 was one of the few where actual demonstrations could be made. There was on view a 42-in. cutting machine, a 22-in. by 30-in. cutting and creasing machine, a 42-in. bender, and one 24-in. and one 15-in. wire-stitching machine. The stoutness of the mechanism is only equalled by the ease with which it is handled and the effectiveness of the work performed.

Everything in the way of papers for printers and of stationery is to be found at Stands Nos L 47 and L 58. Messrs. James Spicer turn out an enormous range of goods, and these are exhibited with taste and effect. The extensive activities of the firm are indicated by the fact that they have provincial houses in Birmingham, Manchester, Glasgow, Leeds, Bristol, and overseas branches and warehouses at Melbourne, Sydney, Brisbane, Wellington (New Zealand), Cape Town, Durban and Johannesburg. To cater for all these centres of activity the amount of paper and stationery goods handled is enormous, and ingenuity is constantly being displayed in the production of new lines in stationery compendiums and writing pads and an entirely new range of loose-leaf books. Waxed papers of very fine quality are a feature of this exhibit, and the multiplicity of trades which find uses for these products is represented in an interesting fashion. This is another product which has been developed by Messrs. James Spicer very extensively. Attention is drawn to a new line of paper mill stationery by a model paper mill made of cardboard and driven by a water wheel. The section devoted to composite containers is also very complete, this firm having shown great enterprise in meeting the demand for cardboard

receptacles for food stuffs of every kind. The range of cards is also exhaustive.

As usual Messrs. John Dickinson and Co. are represented by a large, fully stocked, and well-arranged stand. They have a very wide range of papers and boards, envelopes, account books, manufactured stationery, and office equipment. This firm of British paper-makers is putting forward goods at remarkable values, and even their customers have been full of astonishment at the low prices at which quality goods can be placed on the market. The explanation is that John Dickinson and Co. have installed special machinery which enables them to turn out manufactured articles at low cost, especially in the way of account books. Among the "Seven Wonders of the Envelope World" which are featured on the Stand is a new one-piece window envelope, which is this country's reply to the product of foreign factories. A packet of 25 envelopes for 1½d. is another striking exhibit, while some allusion to the "Brighter London" campaign is seen in the Jazz designs which have been adopted for drawing attention to the Dickinson envelopes when displayed in the shop windows. The centre of the stand is occupied by a large case showing the Lion Brand of account books, which are an illustration of beautiful craftsmanship. Among the cover papers a feature is made of the line with a matt finish under the title of Caldecott, a new delphineum shade being also introduced. An excellent display is made of Apsley boards, while the whole of the furniture and fittings emanate from the cabinet department of Apsley Mills. At every point there is an object lesson in the uses to which the products of the factory can be put.

Various boards as produced by the Thames Paper Co. at Purfleet are seen to advantage at Stands K.102 and K.136. Boxboards are rendered in a great variety of colours and in qualities suitable for folding and rigid boxes. Fiberite packing cases are rapidly taking the place of wooden boxes because of their lightness in weight and convenience of handling, as well as their durability. The material is shown in cases of the one-piece type and with wood ends. It is a tribute to the quality of the cases that they comply with the railway classification, and are accepted by the companies at their own risk. A further advantage is that they offer a great means of publicity, since the sides can be so easily printed on. Another product of the Thames Mills which is finding favour is the S.X. wall-board, a fire-proof material passed by the L.C.C. For decorative purposes it is being largely used, and is helping to relieve the congested situation in the building industry. The stands of the firm at the Fair are constructed of S.X. wall-board, and in appearance and durability it is a great achievement.

Good class tinted writings and printings are shown by Thomas & Green. Papers are made for special purposes, while a feature of them is "fastness to light." The great range of colours is demonstrated most effectually by the rendering of a pretty rural picture (2 ft. by 3 ft. 6 in.) which is made entirely from coloured papers turned out at the Soho Mills. It is a remarkable achievement, for all the varying tints and shades of a landscape are represented by the colours which Thomas and Green have devised, having made a special study of this aspect of papermaking. There is no hand painting whatever, yet the effect is complete.

In the congested area of the East-end of London boards of various calipers, from 014 to 120 are turned out to the extent of 160 tons per week by Limehouse Mills Ltd. Such is the demand for the material that the machine has been running at full capacity for some time in spite of the trade depression. Examples of Limehouse board are on view at Stand No. K. 139. They take the form of boxes of all kinds, made up and decorated as the customer's needs and taste dictate. For confectionery, cakes, etc., the board is coming into ever-increasing service. New machinery is being installed to make container boards and to meet a market which is steadily growing.

Stationery of every description is shown by Charles Morgan and Co. at Stand No. L. 48. Two special lines are Jutland parchments and the Shoreham Mill hand-made paper, while there is also a good show of club stationery which is announced as the best notepaper in the world. The range of household stationery is very attractive, while in the "Eights" envelopes there are 40 different qualities in the one size. This firm have an exceptionally large range of clearance lines in all classes of paper, while some of the prices are without parallel in the

cheaper grades. This latter factor is due to the circumstance that the firm is shortly moving from Cannon-street to Holborn, and they are therefore offering to dispose of some of their stock at very low figures. Chas. Morgan specialise in quality rather than cheap material, although they have some very tempting offers to make with regard to price. Specialising in ledger and account book papers, the account book department has increased considerably in recent years, and excellent books for all classes of work are available, ranging from the small penny book to the most expensive ledger on the market.

Crepe and crinkled papers of infinite variety and design are made at D. Freeder & Co's works, and the specimens on view at the White City indicate the uses to which they are put in the way of decoration. Floral and plain shelf-papers are adaptable for every form of adornment.

Other Exhibits.

Apart from the firms mentioned, others made a useful display in the paper, printing, publishing, stationery and office appliances section of the Fair. Account books are a great feature, particularly at the stands of John Rissen, Ltd., Brydome, Paget and Co., Ltd., Wm. Collins, Sons and Co., Thos. de la Rue and Co., Ltd., Millington and Sons, Ltd., Geo. Pulman and Sons, Sandle Bros., John Walker and Co., etc. These firms and others, like Geo. P. Harrison and Sons, C. W. Faulkner and Co., Ltd., Chas. Goodall and Son, Ltd., and Chas. Letts and Co., are represented with advertising novelties. Boxes and cardboard are shown by Mansell, Hunt Catty and Co., Ltd., the Paper Tube and Box Co., Ltd., and others. Cards and calendars form together the largest sub-section, and wonderfully artistic results have been achieved. Mention may be made of Eyre and Spottiswoode, Ltd., Geo. Pulman and Sons, John Rissen, Wm. Ritchie and Sons, Ltd., and Valentine and Sons, Ltd. Fancy paper articles are exhibited by the British Crepe Paper Manufacturers, Chad Valley Co., Ltd., etc. Together with the great paper houses already noted, notepaper, compendiums, etc., are represented also by MacNiven and Cameron, William Sinclair and Sons (Stationers), Ltd., Andrew White and Sons, Ltd. In the paper department are also seen Corrugated Packing Materials, Co., Ltd., Oxford University Press, Pencarbon Co., Ltd., and Geo. Rowney and Co.

Among toys and games, paper and cardboard play no small part, and in this category are represented H. P. Gibson and Sons, Ltd., Fredk. Warne and Co., Henry Wolf and Co., and others. Playing cards are confined to the stands of Thomas de la Rue and Chas. Goodall.

Testing Blotting Papers.

The Bureau of Standards, Washington, in its monthly report has the following to say in regard to tests of blotting paper made by the Bureau: "An investigation of methods of testing blotting paper has been completed. The various methods now in use for testing blotting paper were studied, and it was shown that these did not give information that represented the true value of such paper for blotting purposes. Since the most satisfactory test for paper is always that which most closely approximates actual practice, including the testing methods employed in commercial work and the use of paper by the consumer, this whole study would seem to prove that an ash test with a consideration of the rag content, the remainder being chemical broad leaf fibre, is far better than any absorption test."

example in coming forward to take the chair at their concerts.

The vote of thanks was accorded musical honours, to which Mr. Strong briefly replied.

The concert was under the direction of Mr. T. Hammond, and for quality left little or nothing to be desired. Mrs. Harold Strong, who met with a warm reception, exhibited in her singing a voice of exceptional compass; Miss Peggy Cochrane, in violin and piano solos of her own composition, proved herself a real artiste; Mr. Harry Speller, in his humorous items and with his living marionette entertainment, met with his usual hearty reception, as did also Mr. Charlie Whitehill with burlesque presentations in song and patter. Miss Margery Dyer (accompanist) was quite equal to all the demands made upon her skill.

Lithographers' Auxiliary Concert.

The Grand Hall of the Cannon-street Hotel was the venue of a very successful bohemian concert held on Tuesday of last week, under the auspices of the Lithographers' Auxiliary to the Printers' Pension Corporation. The event was supported by a full attendance, and the chair was occupied by Mr. Harold V. Strong, Henderson and Spalding. Besides the new president, Mr. J. E. Reeve, there were also present, among others: Messrs. F. Hedger, A. Grout, F. R. Metcalf, C. Pollard, W. Herring, E. A. Lowe, Woodgate Stevens, and J. Mynott (hon. gen. secretary).

At the beginning of the season this Auxiliary was not only faced with the difficulty of bad times but was also without a president. Fortunately it was found possible to secure Mr. J. E. Reeve, the general manager of George Mann and Co., Ltd., to undertake this task.

During an interval in the programme, Mr. Reeve, in introducing Mr. Strong, said their

Mr. J. E. Reeve.

President of the Auxiliary.

chairman was well known amongst them, and was a worthy successor to the late Sir Vezey Strong, who was one of the pillars of the Printers' Pension Corporation. Owing to the difficulty of securing the hall this year the concert was arranged at very short notice, and there was also the further difficulty of securing a chairman. When he put the matter to Mr. Strong that gentleman, after only two minutes' consideration, stepped into the breach.

Mr. Strong, in replying, thanked Mr. Reeve, and said he felt it a great privilege to do what he could for the Printers' Pension Corporation, an institution which existed in order to be of assistance to the aged, infirm, and incapacitated members of the printing craft, and also to the widows and to the helpless orphans. Since their association was instituted they had paid into the parent Association £2,600, and had created six pensions of £400 each. The annual report of the corporation for 1920 records the deaths of ten pensioners, who, during their working lives, paid in all £97 to the corporation, and received in benefit something over £4,000; in other words, for every £9 paid by each pensioner, they received, on an average, benefit to the extent of £429. He thought that was a record achievement which made cd. for 4d. pale into insignificance.

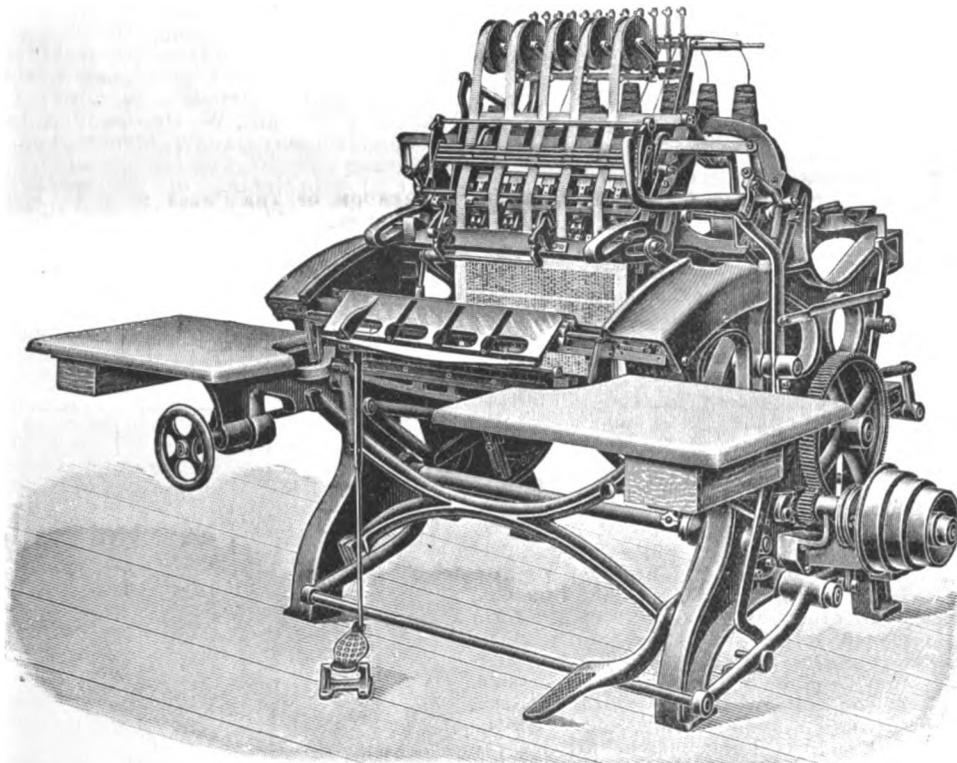

The "plate," which steadily mounted up in response to the chairman's persuasive appeals—aided by a further substantial donation from the firm of George Mann and Co., Ltd.—realised £100.

Mr. E. A. Lowe (chairman of the committee) proposed a vote of thanks to the chairman, and in making one or two personal references said he served his apprenticeship at the firm at which Mr. Strong was the principal, and he also had the privilege of sitting under the presidency of his illustrious uncle when that gentleman was the chairman of the Hospital Saturday Fund. He thought it would be a fine thing if other principals of printing concerns would emulate Mr. Strong's

Trade Notes.

POSTAL RATES.—Ironical cheers rightly greeted the Postmaster-General's assurance in the House of Commons on Tuesday that the reduction of postal charges in this country was now "under consideration." Replying to a number of questions which called attention to the practice of British firms in posting circulars in Berlin and elsewhere on the Continent, he said that the cost of the postage was not the only or principal factor, as the cost of postage in Germany was 16 to 24 times more than pre-war charges. The practice arose through depreciated foreign currencies. It is evident that there is a great tussle going on between the Post Office and the Treasury as to the use to be made of Mr. Kellaway's anticipated surplus, and public opinion should make itself heard as loudly as possible.

AMONG the week's partnerships dissolved are those between: Leonard McCardell and Stanley Edward Boyd, printers, 15, Market-street, Stoneclough, Lancs; Julia Brand and Bertram Augustus Riches, cardboard box manufacturers, 2, St. John's-lane, West Smithfield, E.C.; James Kinder and John Paul McDougall, wall-paper merchants, 25, 27, 29, and 33, Blackfriars-street, Manchester.

At the Stationers' Company's School, Haringay, a memorial was unveiled on Saturday to the old boys of the school who lost their lives in the Great War. The unveiling ceremony was performed by Mr. C. R. Rivington, D.L., Master of the Stationers' Company, who was accompanied by the Court and Livery of the Company. The Bishop of London dedicated the memorial, which was then handed over to the charge of the governing body of the school.

ARRANGEMENTS are now well in progress for the gathering of master printers at Southampton on the 17th inst.

In the House of Commons on Monday Mr. Chamberlain told Sir William Davison that there was not in existence a Cabinet Press Bureau. Members of the Government were their own publicity agents. (Laughter.)

A VERY successful lecture was given in the College of Technology, Manchester, on Friday last on "Colour and Colour Printing," by Mr. David Greenhill, of the Sun Engraving Co., Watford.

The Labour party of Bury proposes shortly to issue a Labour paper for circulation in Bury. A press committee has been formed and an editor appointed. The first number will probably be issued in a few weeks' time.

By request of the Chiswick Public Library and Museums Committee, it has been arranged that the exhibition of printed books produced at the Chiswick Press since 1810 shall remain open until the end of April. The exhibition is held at the Chiswick Public Library, Duke's-avenue, Chiswick High-road, W.4, and has been well attended. It is open from 2 to 4 and 6 to 8 p.m. daily.

In the King's Bench Division, last week, a libel action brought by Mr. Clifford Albyn Perry, who is better known as Laddie Cliff, the producer of plays, comedian and dancer, against Messrs. E. Hulton, Ltd., publishers of the *Sunday Chronicle*, and Mr. H. G. Hibbert, was settled on terms, the defendants paying a sum by way of damages and all costs, and offering an ample apology.

ELECTION POSTER CASE.—In a newspaper "poster" test action last Thursday, the *Daily Mirror* Newspaper, Ltd., was fined £100 for offences against the Representation of the People Act, 1918, and Mr. Charles Glover, an employee in their circulation department, £20 for aiding and abetting. The question was whether or not certain *Daily Mirror* posters were exhibited in the East Herts Parliamentary constituency during the recent by-election to promote and procure Admiral Sueter's return to Parliament. Counsel intimated that there would be an appeal.

MESSRS. WEISE BROTHERS, late of Singer-street, E.C., inform us that they have removed their offices to a more central and convenient position at 69, Fleet-street, E.C.4, where all correspondence should be addressed. They state that their increasing business (after 40 years in the City of London) and the fact that their works were divided into two buildings, made it imperative to move to more spacious premises at "Apollo" Works, Crystal Palace, where they are now fully equipped with the latest machinery and labour-saving devices.

THE *Daily Mirror* claims to have broken all daily newspaper records when, on Wednesday of last week, it published 3,035,571 copies of its Royal Wedding Number. In the production of this special number there were consumed 3,783 miles of paper, weighing 298 tons, 14 cwts., also 3 tons 17 cwts. of ink.

NEWSPAPER PRINTING PROGRESS.—As previously mentioned in these pages, the *Blackpool Times* at the commencement of the present year inaugurated a new era in newspaper printing by its adoption of the photo-litho offset process. It is evident from recent copies of the paper which we have that there have been further important developments of the *Blackpool Times* plant which enables this progressive newspaper to give pictures in colour. Excellent full-page portraits in colour of H.R.H. Princess Mary and Viscount Lascelles are a recent very creditable achievement. Another unique feature (not in colour) appeared in last Friday's issue, namely, a double-page picture of the royal wedding. This is claimed to be the largest illustration which has ever appeared in a British newspaper. It measures about 24 in. by 16½ in.

THE *Derbyshire Courier* has ceased publication after having been in existence 92 years.

THE first number of the *Aerial A.B.C.* has just made its appearance, the publishers being the Standard Air Press, Ltd.

"SPORTS FUN" is a new publication issued by the Amalgamated Press, Ltd., at twopence weekly.

THE *Courant* is a new Edinburgh monthly, to be devoted for the most part to local municipal topics.

THE Manchester Press Club, which this year celebrates its jubilee, is preparing a souvenir publication in honour of the event, entitled "Fifty Years of Us," detailing the various changes that have occurred in Manchester journalism during the existence of the Press Club. The book will be on sale to the general public.

A FINE copy of the "Biblia Pauperum" (Netherlandish 15th century)—one of the most notable of the early sets of woodcuts, popularly known as Block Books—is amongst the exhibits of the Captain H. B. Murray collection just opened to the public at the Victoria and Albert Museum.

NOVEL POSTERS.—A new kind of poster has appeared at certain stations of the Underground Railway. The posters are large white sheets. At the top are the words "From the Passenger," and at the foot appears "A Message to London's Underground." The rest of the sheet is blank, and is intended for the public to write their opinions and suggestions for the benefit of the Underground management.

STUDENTS gathered in large numbers at the Essex Hall last Thursday for a debate arranged by the University of London Union on "Does the Press Govern England?" After a long discussion a motion that the Press did govern England was carried by a large majority.

At the Sunday afternoon meeting of the British Legion at Portishead, the speaker was Mr. H. Slater Stone (chairman of the Bristol District of the Institute of Journalists) on "The Ideal Newspaper," which led to an interesting discussion.

MR. FREDERICK R. COULSON, journalist and poet, who has died in London, aged 57, had written under the pseudonym "Vexatus" for the *Sunday Chronicle* for over 20 years.

"THE TIMES" announces the death in London on Monday of Mr. Francis Frederick Gordon, proprietor of the *Advocate of India* newspaper, Bombay, in his 56th year. Going to India at the age of 24 on the literary staff of the *Bombay Gazette*, he four years later bought the *Advocate of India*.

DEPARTMENT OF OVERSEAS TRADE.—Mr. Baldwin (President of the Board of Trade), in answer to Mr. Lyle, in the House of Commons on Monday, said he had received a letter from the Association of British Chambers of Commerce stating that in their opinion the Department of Overseas Trade had rendered very great services, and promised to be more useful still to the industry and commerce of this country, and expressing the hope that notwithstanding the economies which they knew to be necessary, the Department would on no account be eliminated.

For an illuminated Book of Hours, probably the work of a thirteenth century East Anglian artist, £1,600 was given at Christie's.

THE death has occurred at Hampton Wick of Mr. Harry Baker, who for over 50 years had been a member of the editorial staff of the *Surrey Comet*.

THE executives of the South African labour unions have decided upon a general strike.

THE proprietor of the Venizelist newspaper *Eleutheros Typos*, M. Cavafakis has been assassinated.

ON April 1st will be started a fortnightly newspaper for circulation within the prisons of Denmark. It will be edited by a priest.

DR. WILLIAM BAINBRIDGE, of New York, has presented the Queen of Belgium with a copy of his book, "The Cancer Problem," which is the first volume to be produced by the Louvain University Press since its restoration.

FREEDOM OF THE PRESS IN U.S.A.—The printing and publishing firm of the Stewart Kidd Co., of Cincinnati, has decided—owing to legal action by the District Attorney—to discontinue the sale of such books as "Decameron" and Rabelais, and has also agreed to destroy the plates and stock on hand of the edition of "Decameron" which that firm published.

NEW YORK morning papers appeared on Wednesday of last week in eight-page form owing to a controversy in the ranks of the Pressmen's Union with regard to the wage arbitrator's award. A strike decided upon was, however, quickly obviated and normal production resumed.

GUTENBERG BIBLE ON SALE.—The Leipzig Museum of Books and Manuscripts, finding itself in financial difficulties, proposes, with the permission of the Government of Saxony, to sell the famous Gutenberg Bible in order to raise money for carrying on the museum. The Rijksmuseum of Amsterdam has offered to buy it for 10,000,000 marks (about £10,000 at the present rate of exchange).

THE American book production statistics for 1921 based on the number of books recorded by the *Publishers' Weekly* during that year show a decrease of but 93 in comparison with the figures for 1920, in fact the smallest loss since 1917. There were in fact 137 more new books published in 1921 than in 1920, but new editions decreased by 78 and 352 fewer pamphlets were recorded.

BRIDEWELL AND BROMLEY MAGAZINE.—A copy of this journal which has come into our hands shows that the Grout Engraving Co., Ltd., possesses one of the most elaborate house organs in the printing and allied trades. A notable feature, as one might expect, is a profusion of fine illustrations, these being, in the issue before us, mostly portraits of the firm's personnel. But what rouses our special interest is the extraordinarily frank way in which the accompanying biographical sketches—which are as a rule "to faults a little blind"—deal with the various members of the firm's staff. For instance in reading about one lady member we are told that the loss of religious beliefs has had a narrowing and cramping effect on her outlook. We judge that the author of these interesting sketches must be a psycho-analyst—and must also be adequately insured.

INDUSTRIAL LEAGUE AND COUNCIL.—An amalgamation has just taken place which will considerably widen the scope of the work of the Industrial League and Council, of which Lord Burnham and the Rt. Hon. G. H. Roberts, M.P., are joint presidents. Originally founded to improve industrial relations and to foster the growth of Whitley Councils, the League has done excellent work in the past few years by organising conferences and meetings between employers and employed in the industrial centres of the country. Now the educational side of the League is to be widened with the assistance of Industrial Information, which for the past two and a-half years under the supervision of Mr. Sydney Walton, C.B.E., has been working on independent lines in an endeavour to extend the knowledge of economics among the mass of the people.

A Lecture on Printing Ink.

Mr. E. H. McLeod at St. Bride.

What will probably prove to be the last St. Bride trade lecture was very characteristic of the go-head spirit of this educational centre. A large and keenly interested audience gathered in the upper hall of St. Bride Institute on Friday, when Mr. E. H. McLeod, a gentleman with a wide American and Continental experience in colour and its manufacture into printing ink, who at present holds the important position of chemist to Messrs. Ault and Wiborg, of London and New York, gave a most interesting and practical address on a subject of which he is undoubtedly a master, "Printing Ink: Its Manufacture and Uses."

Mr. C. A. Bates, managing director, Messrs. Johnson Riddle and Co., and a member of St. Bride Printing School Committee, occupied the chair, and his intimate knowledge of the subject enabled him to assist in making the lecture a memorable one in the long series of trade lectures arranged by those responsible for the conducting of St. Bride Printing School.

In introducing the lecturer, Mr. Bates stressed the need that the printer in handling his inks should know something more about them than the information supplied on the tin. He spoke in cordial appreciation of the technical lectures provided at St. Bride for the benefit of the trade.

Manufacture and Uses of Printing Inks.

Mr. McLeod in beginning his lecture referred first to the importance of ink knowledge to the printer, and, after indicating the complexities with which the subject had become invested since the early days when the printer made his own inks, he plunged straight into the technicalities of his subject. With frequent reference to diagrams, he contrived to give in not too abstruse language an able outline of the subject of the pigments, compounds, vehicles and dies which go to the making of inks for letterpress, litho and intaglio printing, going into detail as to the qualities and functions of these ingredients and their subdivisions, and thereby indicating to the printer the reasons for some of the idiosyncrasies of inks and the causes of various ink troubles which crop up from time to time. We hope to be able later to publish a digest of this lecture in article form.

The Discussion.

As was to be expected, there was an animated discussion, and many pointed questions put to the lecturer, which he answered with the remarkable frankness and lucidity by which his lecture was characterised.

The Principal, Mr. J. R. Riddell, took the opportunity to express his gratitude for the lecturer's services, and said he could prophecy for Mr. McLeod many requests to lecture on this subject throughout the United Kingdom. He further stated that many of his educational friends could not quite understand why St. Bride seemed to get the tip-top lecturers they do, many of whom were practically unknown for their abilities in this direction. Mr. Riddell explained that this was mainly due to the faculty of recognising men *who can do things* and encouraging them to forget about their natural shrinking from publicity and come and talk in a simple way to those who would be interested in what they have to say. The value of this plan was once again emphasised by the admirable lecture they had that night.

In reply to a question by Mr. Frank Colebrook respecting certain colours being less true to spectrum than others, the lecturer said there were no optically true colours that he knew of. In fact, makers had to approximate, and had been fairly successful, with the exception of blue. Peacock blue was the nearest, but was fugitive; therefore mixtures had to be used.

Mr. Colebrook asked whether the ink maker had suffered from lack of close correspondence between the colour filters used and the dyes available for ink making. The lecturer intimated that attempted co-operation had not yet been successful. At the present time manufacturers of filters used what they liked, and the ink maker used the nearest thing to true colour that he could get.

Attention having been drawn to the difficulty of getting several colours to "take" one on top of another when printed almost simultaneously, the lecturer pointed out that a later colour would take better on a previous printing if it had a "tooth," or grainy surface.

Bees-wax helped in this direction. Also the "tack" of the last colour could sometimes be increased with advantage.

The Chairman, who referred to an actual rush job of multi-colour printing produced in connection with the Royal wedding, said it was absolutely impossible, if colours were printed almost simultaneously one on top of another, to get sharp, clear colour work. The crispness of the engravers' proof could be obtained only if the printer were allowed something like the engravers' time for getting it.

In reply to a further question from Mr. Colebrook as to the reason for the usual precedence of the yellow in multi-colour work, the lecturer said that printers generally started with the yellow because opaque yellows were cheaper than transparent yellows. To start with a colour other than yellow would necessitate the use of transparent yellow, with a subsequent increase both in cost and in fugitive quality.

The following were some of the other points elicited by questioners. The "sweating" of a blue printed after the yellow and red was due to the red drying glossy so that the blue showed "creeping" or spreading, as it would if printed on glass; the remedy was to increase the cohesive or adhesive quality of the blue. The cause of copyable inks not taking on types was sometimes found in the washing of type with benzine or other cleanser repellent of water, instead of washing with water as had to be done if the type was to be water-clean; the addition of some emulsifying agent might sometimes help. The combustible tendency of bronze blue was due to the fact of this being a very strong dryer; the heat generated by chemical re-action caused the varnish to catch fire.

Loud laughter was caused by a question as to the uses of "palm oil," the lecturer remarking that he thought his company had never used it. The questioner, however, was evidently not talking metaphorically but literally, and some information was accordingly given as to the characteristics of the oil obtained from the palm tree.

On the motion of Mr. C. Harrop, seconded by Mr. Hobday, a cordial vote of thanks was passed to the lecturer, who, in briefly replying, called for a vote of thanks to the chairman, which was heartily accorded.

Stationers' Association Banquet.

The members of the Stationers' Association of the United Kingdom held their annual banquet at the Hotel Cecil, on Friday, when the guests of the evening were the Lord Mayor and the Lady Mayoress and Mr. Sheriff G. Mills McKay. Mr. Frank P. Dorizzi (chairman of the Council) presided.

Mr. Stanley Machin, proposing the toast of the Stationers' Association, said that though it was only five years old it had reached a membership of over 3,500, which showed that not only was it wanted, but that it was doing really valuable work and had secured the confidence and respect of the great trade with which it was connected.

The Chairman, in reply, referred to the present postal rates. He did not, he said, believe that the Postmaster-General when he imposed them realised that he was putting a direct tax on the stationery trade in the way that no other trade was being taxed. The time had arrived when, in the interests of all trades, and the stationery trade in particular, there should be a reduction in the postage rate.

The Lord Mayor, responding to the toast of "The Guests," proposed by Mr. Percy Barringer (who mentioned that Sir John Baddeley was a member of the Association), said that nearly 60 years ago he commenced business as a stationer, and two of his sons were carrying on the undertaking which he started.

Mr. A. G. Gronow, C.B.E., proposed the toast of "The Visitors," and responses were made by Mr. James MacLehose and Sir William Clark.

The health of two American delegates was proposed by Mr. Percy Barringer, and Mr. W. Randall, of New York, responded.

The concluding toast, "The Chairman," was proposed by Mr. G. Delgado.

The company included Mr. Percy Barringer (president of the Association) and Mrs. Barringer, Mr. Stanley Machin (president, London Chamber of Commerce), Mr. Walter Monkhouse (president, Drawing Office Materials Manufacturers' and Dealers' Association), Mr. W. Stebbing Russell (solicitor, Stationers'

Association), Mr. and Mrs. S. J. Sandle, Mr. Jas. MacLehose (president, Federation of Master Printers), Alderman H. W. Keay, J.P. (president, Associated Booksellers of Great Britain and Ireland), Mr. Jas. Gallie (president, Employers' Federation of Envelope Makers and Manufacturing Stationers), Mr. William B. Warren (chairman, Finance Committee, Stationers' Association), Mr. and Mrs. T. H. Bird and Mr. H. R. Marsh (general secretary).

The London Ad. Club.

Address by Mr. W. H. Burchell.

Under the auspices of the London Ad. Club, an address on the subject of "Greater Co-operation Between the Advertising Man and the Printer" was given at the Prince Henry's Rooms, 17, Fleet-street, E.C.4, on Thursday evening last by Mr. W. H. Burchell, governing director of the Caxton Press, Ltd., and hon. secretary of the Association of Master Printers of the London Central Districts.

The chair was taken by Mr. T. Gilbert Oakley, Fellow and member of the Council of the Incorporated Society of Advertisers' Consultants. Mr. Oakley, in his opening remarks, agreed that in the development of psychology of publicity it had long been felt that there was a greater need of closer co-operation between the efforts of that indispensable trio—the press advertising man, the publicity literature man, and the printer. The club, he said, had already had the advantage of being addressed by, and receiving the friendly advice of Sir Charles F. Higham and Mr. P. Emanuel, of Odhams Press, Ltd., and both of these gentlemen gave valuable advice to the members of the London Ad. Club on matters connected with the service of advertising, and now the members of the club had the advantage of being addressed by one of the best-known practical printers in London. He went on to stress the indebtedness of the industrial community to Mr. Burchell for his sustained efforts on behalf of cheaper postal rates.

Mr. Burchell stressed first the need for closer co-operation between the advertising man and the printer in joint efforts to get the postal rates reduced. He then went on to indicate directions in which such co-operation might result in advantageous increase of business to both parties, with benefit also to the customer. He proceeded to go into various points of technical detail in the designing and production of printed matter, suggesting the need for a closer support between advertising man and printer. We hope to deal later with Mr. Burchell's suggestions at greater length.

Mr. Charles C. Knights, of Thanet House, Strand, contributed some useful information concerning an invaluable "Lay-out and Page Chart," of which he is the inventor and patentee. Mr. Knights also explained a novel method of quickly finding divisions of various sized papers, also an accompanying method for determining the size of envelopes needed to receive the different sized dimensions.

The "Caxton" Cup.

Mr. Burchell generously promised to present a Silver Cup to the club for yearly competition. He said that essay writing, on subjects having a close bearing on the science of creating business-compelling advertisement literature, should form one of the accomplishments of the members of the London Ad. Club. To encourage this he proposed, with their approval, to present a silver cup to the Club for annual competition. The "Caxton Cup" would be an appropriate designation for the proposed trophy, the immortal name of Caxton being inseparable from the printed word.

Mr. Lawes, the secretary of the Club, in accepting Mr. Burchell's offer on behalf of the members of the London Ad. Club, said such a competitive gift would have a stimulating effect on the members.

On the proposition of Mr. Wragg, of Messrs. Gamage, Ltd., a cordial vote of thanks was passed to Mr. Burchell for the practical hints he had given to members of the club.

THE Emergency Committee of the Free Trade Union has passed a resolution protesting against the increase by the Indian Government (presumably with the assent of the Home Government, but without reference to Parliament) of the existing duties on British goods imported into India.

Packers' Strike Litigation.

Canadian Prayer Books Held Up.

In the Chancery Division, London, on Saturday, Mr. Justice Russell heard an *ex parte* application on behalf of the Cambridge University authorities, for a peremptory order on Messrs. Hazell, Watson and Viney (Ltd.), to deliver up to the Cambridge University Press cases of the recently revised edition of the Book of Common Prayer, unbound copies of that edition, and printed sheets of the Hymnal, in their possession at their Aylesbury works.

Counsel explained that the strike of members of the Paper Makers' and Packers' Union at the Cambridge University Press, had resulted in a sympathetic strike among the defendants' employees at Aylesbury. The Cambridge University Press were under contract to ship the Prayer Books to Canada, so that they could be distributed throughout that country by Easter. They must, therefore, be at Liverpool by March 7th, but the defendants' employees declined to handle them. The Synod of the Church in Canada had fixed April 4th as the date of publication in Canada, and unless the Prayer Books were in Toronto by that date they could not be distributed in time for Easter.

His Lordship said he felt unable to make a peremptory order in the absence of the defendants, but he would appoint a representative of the applicants to be the receiver of the goods at Aylesbury. "The effect of this will be," he added, "that if any of these men impede the delivery of the books to the applicants' representative they will be guilty of contempt of Court." We hear that the delivery of the books has since been effected.

Trade Union Matters.

A LITTLE trouble has broken out in the stereotyping department at the Stationery Office in Harrow. It appears that the dispute has been brought about by the Stationery Office having introduced a foundry hand at their Hare-street department at 15s. below the agreed scale. We understand that the foundry employees at Harrow have tendered notices, and that so far the negotiations with the Controller have not been effective in securing a settlement.

THE London Society of Compositors will next year reach its 75th anniversary, an occasion that cannot be allowed to pass without public notice. A few well-known members have been discussing the possibility of celebrating the Jubilee in a manner worthy of the event—says the *L.T.J.* One proposal is the establishment of a Home for consumptive members, on the lines of the one established at Colorado Springs, U.S.A., by the International Typographical Union.

"T.A." AND WAGES.—A circular letter to the Branches of the Typographical Association has been issued by the Executive Council of the Association stating the position with regard to the wages negotiations. It is explained that on January 26th the Executive Council wrote to the Employers' Federation asking that the question of re-grading of branches should be opened up immediately, but that no answer had been received to that request. On February 3rd a proposal was received from the employers asking for a conference on the wages question of a reduction of wages. To this the Typographical Association replied suggesting that the question of re-grading should take preference and be settled before the discussion of the wages. A conference, however, was arranged for February 21st, at which the Council urged the discussion of the re-grading proposals, but the employers insisted that the question of wages should be considered and settled within the limit of 35 days as arranged by the National Wages Agreement. Eventually the conference adjourned on the understanding that the employers would state their views on the re-grading question, and would also submit their proposals on wages reductions.

THE Executive Council of the Typographical Association have issued to the members a ballot paper asking for confirmation of a proposal to impose a levy of 1s. per week per member in order to place the funds of the Association in a more stable condition.

SPECIAL PREPAID ADVERTISEMENTS

The Minimum Charges for Three Lines, with an average of seven words to the line, for Advertisements under the headings given below are as follows (extra lines at proportionate rates):—

	Three Lines
	s. d.
Agencies	3 0

THURSDAY, MARCH 9, 1922.

The New Wages Negotiations.

Nothing very definite can as yet be reported as to the progress of the new wages movement in the printing trade. Conferences with most of the unions have taken place, and a conference has been arranged with the London Machine Managers' Society, and the employers' proposals have been forwarded to the London Society of Compositors. Most of the unions expect to be in a position to inform the employers' federation by March 15th what steps the executives propose taking to obtain their members' views on the proposals submitted to them. The reductions which the employers claim they are justified in asking full consideration of, are:—16s. 3d. per week from fully qualified male members and 9s. 1d. from fully qualified women workers in the Provinces, and 12s. 1d. and 13s. 1d. per week from women workers in London and 17s. 5d. per week from the male members of the N.U.P.P.W. and N.S.O.P.A. in London and the Provinces. The representatives of the trade unions in the conference dealing with women workers were asked to consider a re-adjustment of the learners' scale and alteration of the age at which full wages is paid. The employers' National Wage Basis Committee will meet not later than March 16th to consider the replies from the unions.

The Packers' Strike.

The week has seen a continuance of the dispute affecting all grades of employees of 30 of the firms which are members of the London Book Trade Employers' Federation. Over 800 workers are now out on strike against a reduction of 5s. a week. They are members of the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers, and while only book packers are directly affected, some printing and book-binding houses are already involved. An unfortunate case of sympathetic action by workers at the Aylesbury works of Messrs. Hazell, Watson and Viney is reported on another page. The Book Trade Employers' Federation state that a paragraph published this week to the effect that they have refused the intervention of the Ministry of Labour in

the present book trade strike is without foundation. On the country, they say that the employers have willingly accepted every offer of a conference which has been put forward by the Ministry of Labour, and are still willing to consider any new propositions or proposals.

Wages in the Paper Trade.

WE are glad to know that the vexed question of wages and hours in the paper trade has taken a favourable turn. At one period the position looked very grave, and there were all the evidences of forthcoming strife. When the parties concerned, however, met together in conference and the cards were duly laid upon the table, it was discovered that a number of misunderstandings had arisen, and these were very quickly removed. Thus the whole outlook was changed, and there is now every likelihood that the industry will remain undisturbed by any question of a strike or lockout. The British paper trade, of course, is in a critical condition, like most industries in the country, and if it is to avoid disaster the great essential is that there should be peace and harmony within its ranks. Good sense prevailed, however, and both sides recognise that their ultimate interests are one. Perhaps the leaders of the various unions are not to blame for the views they took. They were naturally apprehensive with regard to a reduction of wages and lengthening of hours, and as they viewed matters before the conferences of the last few weeks their attitude appeared to be quite a logical one. The chief misunderstanding apparently related to the question of hours, which has now, we understand, been placed on quite a different basis, a basis, in fact, which enables the leaders of the employees to approach the matter with more or less of an open mind. Such is one of the happy benefits of frank and open discussion.

The Value of the Trade Fair.

WHILST the British Industries Fair, of which a second report is included in this issue, is on the whole a most impressive exhibition, and will have its effect in reviving British trade, we feel nevertheless that the idea of such fairs is capable of much further development. The exhibitors at our London fair number, we believe, well under a thousand. On the other hand, the Leipzig Fair, which opened on Sunday, can boast of exhibitors to a number exceeding 13,000. It is expected that in the course of a week over 120,000 buyers will place orders which will keep German factories occupied for months. The German trade Press stresses the immense saving in the cost of commercial travelling, etc., which such fairs make possible, and represents them as a necessary means of post-war economy. Perhaps traders in this country have still something to learn in this connection.

The Paper Market.

THERE is certainly a little more life in the paper market and more optimism among the paper fraternity. Whether it is the possibility of better business or a reduction in the price of coal that is responsible, the fact remains that several makers of high-class papers have deemed it advisable to make substantial reductions in price. In one case 3d. per lb. has been knocked off a standard grade of tub-sized writing paper, while in other cases the extent of reduction reaches 2d. and 1d. per lb. It is only in keeping with what was expected of tub-sized papers, which have remained at practically three times pre-war price, while virtually all the other grades had fallen to just about twice the old figure.

OF the various commercial interests mentioned in the *Board of Trade Journal* as having increased their nominal capital during January, paper and stationery shows the least increase (£2,800).

Personal.

VISCOUNT BURNHAM and Viscount Hambleton have accepted invitations to attend the annual dinner of the London Master Printers' Association on March 29th at the Connaught Rooms.

SIR GORDON HEWART, the new Lord Chief Justice, was at one time engaged in London journalism, and was formerly editor of *India*, the organ of the Indian National Congress.

LORD RIDDELL was honoured at a dinner at the Savoy last Thursday, when, at the invitation of Sir William Berry, Bart., Lord Burnham and others expressed their appreciation of the fine work done by Lord Riddell at the Washington Conference.

ACCOMPANIED by the Lady Mayoress, the Lord Mayor (Sir John Baddeley) paid an informal visit to the British Industries Fair last week, having been invited to see the stationery section by the Stationers' Association, of which his firm are members.

SIR WILLIAM WATERLOW, as the new alderman of Cornhill Ward, will be admitted to office on the 14th inst., at Guildhall.

SIR ROWLAND BLADES, M.P., will preside at the annual meeting of the Printers' Pension Corporation, at St. Bride's Institute, on Saturday, April 1st, at 1.30.

SIR MEREDITH AND LADY WHITTAKER were entertained to a complimentary dinner at the Prince of Wales' Hotel, Scarborough, by the townspeople of the Borough to commemorate the honour of knighthood recently conferred on Sir Meredith.

SIR T. G. JONES, proprietor of the *Porthcawl News*, is offering himself for re-election to the Glamorgan County Council as an Independent candidate, and is being opposed by a Labour representative.

MR. F. O. ROBERTS, M.P., and Mr. C. W. Bowerman, M.P., attended the meeting of the Workers' Educational Association, which was held at the Central Hall, Westminster, on Saturday, to protest against the restriction on educational facilities suggested in the Geddes report.

THE National Liberal Club arranged a dinner on the 1st inst. in honour of Mr. J. A. Spender and his work for Liberalism in connection with the *Westminster Gazette*, from which he has recently severed his connection as political editor.

MR. R. A. AUSTEN-LEIGH (ex-president of the London Master Printers' Association) attended the meeting of the South-West Association at Chelsea on Tuesday night, and gave an interesting account of his two years' presidency.

MR. J. D. WISE, the president of the District Association, who was in the chair, was thanked for his valuable work during the year just closing.

AT the recent dinner of the North Staffordshire Master Printers' Association a feature of the gathering was a presentation of a handsome clock to Mr. Warwick Savage, of Burslem, who, until this year, had occupied the presidency since 1912.

MR. JAMES M. YOUNG and Mr. Walter Methven, president and secretary-treasurer respectively to the Perth Branch of the Scottish Alliance of Masters in the Printing and Kindred Trades, were honoured by the members at a complimentary dinner, at which they were the principal guests, in the Royal George Hotel on Saturday evening.

MR. YOUNG was presented with a comfortable easy chair, and Mr. Methven with a handsome writing bureau.

MR. J. R. LLEWELLYN, newspaper proprietor, has been elected unopposed to the Glamorgan County Council as one of the representatives for Barry.

MR. FRED W. SEELEY was the lecturer at Tuesday's meeting of the Printers' Managers and Overseers (Parent) Association, and gave a remarkably interesting account of "Colour Printing in America," which will be reported in next week's issue.

THE members of the Printing, Bookbinding and Kindred Trades' Overseers Association were entertained on Tuesday by an interesting lecture by its hon. solicitor, Mr. G. A. Clifford, entitled a "Famous Old Coffee House." Special emphasis, by the way, was made at the meeting that March 13th is the closing date for receiving donations towards the scheme which the special committee has in hand.

A PAST PRESIDENT of the above-mentioned Association, Mr. Jock Walker, for long a shining light in local politics, is seeking the suffrage of the inhabitants of Wood Green at its forthcoming council election.

MR. BULLOCK, the correspondent of the *Daily Mail*, has been elected president of the Foreign Press Association in New York, in succession to Mr. Bullen, of the *Daily Telegraph*.

MR. ROBERT KEIR has been appointed chairman, and Mr. P. B. M. Roberts vice-chairman, of the Council of the Newspaper Press Fund for the ensuing year.

MR. PHILIP KERR has given up his position as political editor of the *Daily Chronicle*, and is going abroad for an indefinite period.

MR. ALFRED WEST, who has retired after nearly forty-five years service on the *East Anglian Daily Times* typographical staff, was on Friday the recipient of a purse subscribed for by all members of the staff.

MR. HENRY FEATHERSTONE on Friday, February 24th, entertained a large party to dinner at a well known City restaurant in celebration of the fifth anniversary of his starting business on his own account. For over 25 years he has been associated with Fleet-street and for over 20 years he has been closely identified with the paper trade.

THE pleasant function, which was attended by numerous business, mill and personal friends, was a most enjoyable affair, and after dinner an excellent programme of music was gone through, the proceedings closing appropriately with "Auld Lang Syne."

MR. ANDREW GOURLEY, on completing 50 years of service with Messrs. R. Robinson and Co., Ltd., wholesale stationers and printers, of Newcastle, has been presented with two handsome easy chairs by the employees.

MR. A. C. WILKIE, managing director, presided over the gathering at the works, and Mr. Wm. Clarke, who celebrated his fiftieth anniversary with the firm two years ago, made the presentation to Mr. Gourley, who, having spent 44 years on the road, is one of the best known travellers in the North of England, and is the senior representative of Messrs. Robinson.

MR. GEO. M. MCKEE, general manager of the Donnacona Paper Co., has been elected president of the Canadian Pulp and Paper Association, at its annual convention.

AT the same meeting Mr. A. L. Dawe, who has retired from the position of secretary, was presented with a gold watch as a mark of esteem and appreciation of his good work for the Association.

MR. R. GILROY, J.P., was re-elected chairman of the Northern Committee of the Paper-makers' Association and vice-president of the Association for the tenth time at the last meeting of that Committee.

MR. JOHN ALMOND has returned to the Waterside Paper Mill Co., Ltd., Darwen, to take over the management.

MR MACKENZIE LIVINGSTONE, is the Independent Liberal candidate for Inverness. He is a well-known member of the London paper trade. He formerly contested Dover.

Mr. Arthur Cox.

Career of the New Secretary of the Printing, Bookbinding and Kindred Trades Overseers' Association.

After a start at the age of thirteen as errand boy at C. and E. Layton's, Mr. Cox secured a place as a warehouse lad at Pardon and Sons, a firm which handled many large magazines and price lists. At the end of three years he went to Messrs. Berryman and Sons, Blackheath-hill, where he undertook the whole of that firm's warehouse work, which included giving out and wetting down, folding, wire and thread stitching, numbering, perforating, in fact, all the operations connected with the work of a general jobbing printer. He eventually returned to the city as cutter on a power machine at Wilson's Music and General Printing Works, where he stayed for a period of fifteen years, taking an active share in all the operations of the warehouse work. A position as overseer was next offered him at Wilkinson Bros. Ship Press, Stoke Newington, which opening gave him an opportunity of becoming more intimately acquainted with stationery work. During his four years here he had the satisfaction of seeing big developments of that firm's activities, which included installation of new machinery and plant, as well as the inception of a binding department. He next transferred his services to Messrs. Gilbert and Rivington's, with whom he remained as overseer of a binding room until that firm closed its doors.

At this period of his life, largely owing to domestic circumstances, Mr. Cox, in his own words, got "fed up" with London life, and sought a complete change, and broke away from the even tenour of routine business life. The violin having been his constant companion and hobby, and he being a capable musician, he secured a position as bandmaster with some of the most important steam-ship companies. In this congenial capacity he found a stimulating incentive towards what he describes as a "fresh existence." While thus engaged he visited many places in North and South America, Africa, and the Mediterranean Ports, these experiences enabling him to gain a wider outlook of the world.

In spite of the attractions of the new life, he returned at the end of two years itinerancy to his old love, Print, entering the services of the well-known firm of Messrs. Harrison, Jehring and Co., Ltd., as overseer of the warehouse department, a position he has successfully occupied for a period of fifteen years.

Mr. Cox was elected a member of the Association in 1916, and found his place on the executive in 1920. He takes up his new duties as hon. secretary of the Association with the sincere good wishes of his fellow members, and in this respect none is more genial than the late secretary, Mr. Geo. Eden.

Paper Trade Revival.

The Worst of the Depression Over.

MR. L. G. CHATER supports the views of Sir Frederick Becker that the paper trade is now definitely showing signs of revival. Writing to the *Financial Times*, he says:—

"As regards printing and writing papers generally I can confirm, as one interested in more than one mill, that the worst of the period of depression through which the industry has been passing is undoubtedly over, as it has been possible to raise the rate of output considerably during the last few months until it is now nearing the full capacity of the mills.

"The root of our troubles, besides lack of demand, has been the sensationally rapid fall in the value of raw materials; esparto grass dropping from about £20 to £4 and the best qualities of wood pulp from £45 to £15 within a period of between 12 and 18 months. Both these materials seem to have reached a price which does not admit of any further reduction, in fact esparto is now little above its pre-war value.

"Therefore, so long as paper mills are employed to something near their full capacity and the products are marketed at a price corresponding to the current values of raw materials the situation can be regarded with confidence by those interested in the trade; many qualities of paper are absolute necessities to-day, and so long as people read and write they must remain so."

The Bookbinder.

Notes and News.

The Bookbinders' Docket.

There is still no news of the bookbinders' docket. Months and months ago a committee consisting of so many members from each side of the craft was appointed to look into this matter, and at the time it was suggested by the present writer that the appointment of such a committee was the traditional and ideal way of burying the subject—officially, that is to say. The trade is entitled to ask of that committee what are the results of its labours and investigations. If we are to judge by concrete facts there are no results, for neither through the respective organisations nor the trade Press has there been one word issued since the appointment of the committee. Meantime, how the Costing Committee of the Master Printers' Federation can lay any claim to the efficiency of a system which after ten years had failed to penetrate through all the departments of a single general printing establishment, surpasses the imagination of the man who finds his cost-finding broken down in the bindery.

Bindery Data Unobtainable.

From practical experience we have found that it is absolutely impossible to secure data of any value at all from binding department figures as they come through in the existing condition of things. Monthly totals of production reveal nothing, and six-monthly averages are incorrect. Times given on assumption vary abominably, and individual records (which are all guesswork) may be right or wrong. Money is being lost hand over fist because there is no method of analysing cost. Estimates have no relationship with ultimate facts because the facts can be so neatly hidden. To justify himself an overseer attempts to run a fair-ground with swings and roundabouts, and unfortunately in the end the customers are the swings and roundabouts. On the swings the client is plundered and he gets a ride on the roundabouts for a trifle. If the game wins out it is unhealthy and unfair, but in most

cases it does not win out at the finish, because the customer of to-day is keen on low prices and credit notes. But on the basis of put and take a department can get apparent satisfaction while the office end deals out its credit notes.

Apathy of Leaders.

That is the position in the bookbinding industry: there is no organisation and no attempt to get any—if we are to judge by the recent trend. We do not for a moment believe that the binding union is prepared to stand against the introduction of sound methods of organisation which will help to make the industry more profitable and more wholesome. We do believe that there is apathy in high quarters and a lack of appreciation of the difficulties encountered by progressive houses in conducting their business in conformity with modern principles of management and control.

Trade a Little Brisker.

There is a slight improvement in the condition of trade in the bookbinding industry. Cheaper novels are commanding a better sale and practically all the leading publishers are by now on a low level of cut price. The demand for novels will continue to increase from now onwards as the spring season approaches while the sales of educational and technical works will fall off. There is a tendency on the part of some publishers to foist on the student bulky volumes on featherweight paper at a high price. A lot of these books are being written more for sale than for education and the digestive matter has all the character, or lack of it, embodied in the featherweight paper—very little fibre but plenty of air space. Better fewer books and more in them.

Account Book Binding.

There is a better demand for stationery and account books. Some large contracts have recently been placed, and there are many offices where the binding department is even busy. In the high-class account book section

of the trade the development of mechanical methods of production, plus the growth of loose-leaf systems, is making the employment of females a serious question. Progress in the methods of binding and covering of books is infinitely slower-paced than in the making up and sewing, etc. Mainly, binding is still a hand operation, and although there are many houses keenly progressive where folding and sewing are concerned there are not many so keen on paring, back-rounding, back-making and indexing machines. And there are machines yet to be invented for edge decoration, leather cutting, burnishing, lettering and making end papers economically.

New Folding Machine.

Messrs. Smyth-Horne, Ltd., have introduced a new type of folding machine, the "Norwood Section Folding Machine," designed to meet the need of the manufacturing stationer for a small fast-running machine capable of folding single sheets or sections accurately and at a high speed.

Bookbinding Materials.

The market for bookbinding materials is practically unchanged from last month, with the exception of a slight fall in label cloths and buckrams. The long-awaited reduction in the price of bookcloths has not yet matured, and to-day's figures compared against pre-war stand at practically 200 per cent. while most other things are getting down to 100 per cent.

Gold Leaf and Protection.

The binding trade has made a good fight against the proposal of a tariff on imported gold leaf, and it is very improbable now that the application of the gold beaters will be granted. The effect of a duty on beaten leaf would simply be to give impetus to the demand for imitation gold leaf, which again is decidedly a foreign product. To-day's market price for 3½ in. by 3¼ in. foreign gold leaf is 50s., and for English 70s. per 1,000 leaves.

Bindery Items at the Fair.

A bookbinder could hardly visit the British Industries Fair without picking up many a useful point in regard to sources of supply in at any rate some of the commodities—book covering materials, papers, boards, etc.—with which the bindery has always to be provided. About paper and boards exhibits a good deal will be found elsewhere in this issue but there are a few other items which may suitably be touched on here.

Showings of Leathers.

Leathers, even of the cheaper grades, have not yet regained their pre-war place of importance among bindery supplies, and doubtless imitation leathers and other products have permanently usurped a certain portion of the field which leather formerly held. The genuine article is, however, a necessity and seems likely always to be in demand.

The showings of leather at the Fair indicate that the leather trade is making a big effort to regain lost ground, and prices and offers of plentiful supplies suggest that the bookbinder should bear in mind that the last twelve months have brought leathers much nearer to the position they held in pre-war days, great modifications having occurred in those circumstances which conspired to place leather as a book-covering material into the de-luxe class of goods.

A statement appeared recently in a trade journal to the effect that actual manufacturers of leather were not showing at the Fair. This

is certainly not the case. A name that at once leaps to mind is that of Messrs. Nicker-son Bros., of Worship-street, London, E.C., who have works at Bermondsey and are well known as tanners and manufacturers. This firm has an attractive showing of moroccos, roans, skivers, calf, basils, persians, etc., and an inspection of the many colours and varieties offered shows what admirable materials are available to the binder who aims at a high-class trade.

Messrs. East, Kinsey and East, another well-known firm of leather manufacturers whose Bermondsey works supply much fine leather for the bookbinder, have a good showing at the Fair. So has many another actual manufacturer. The firms offering leather include also: Messrs. J. Beach and Sons, Ltd. (Hack-bridge), T. N. and F. H. Briggs (Tanners), Ltd. (Leicester), Bryant and Co. (London), John S. Deed and Sons, Ltd. (London), John Dixon, Sons and Taylor (London), James Garnar and Sons (London), S. H. and W. Hart (London), E. T. Holden and Son, Ltd. (Walsall), Horsfield, Sons and Mackrell Bros., Ltd. (Leeds), Leamore Currying Co. (Walsall), W. Pearce and Co. (Northampton), W. Rickatson and Sons (London), Chas. F. Stead and Co., Ltd. (London), J. T. Underwood, Ltd. (London).

Other Book-covering Materials.

The makers of leather substitutes are also represented by several firms.

Important strides are being made with the products of the Dux Chemical Solution Co., and "Duxeen" is being used ever more extensively for the binding of books. It is a tribute to the quality of this article that the catalogue of the Fair itself is bound in Duxeen. Several tests of the waterproof and rot proof qualities of the firm's products are seen at the stand. One of the latest tests was made by the representative of Messrs. Macmillan, the publishers, in India. A Duxeen cover was nailed on a board so that it could be exposed to the ravages of white ants, but these destructive insects found Duxeen little to their taste and the Duxeen stood this exceptional test well. The material is being used extensively for tradesmen's books, maps, and other binding purposes where protection against weather conditions is essential. It has also been employed on damp walls either as a covering itself, or in order to prevent the damp coming through and spoiling delicate surface papers. The Dux Chemical Solutions Co. have been instrumental recently in saving the young coffee plants in Kenya Colony from destruction by wire worms and other insects. One planter had lost three crops and at last obtained a supply of double-textured Dux material, formed into squares, which were placed round the young plants. This effectually stopped attack by the wire worm and saved the crops. The importance of this achievement to the new colony is obvious.

Rexine, Ltd., of Hyde (near Manchester) and Newgate-street, London, show their "Rexine" brand leather cloth, which is used for book-binding as well as for upholstery and other heavier purposes. A recent quality known as "Velcal" is being recommended for book-binding uses, and has claims for consideration where a chamois-like finish is desired in cheaper quality work. It is produced in a variety of shades, and can be effectively made up. Heavier "Rexine" material is being used by banks, etc., for substantial account book binding.

Another leather substitute which is aiming at a wider entry into the bookbinding field is "Levarex," manufactured by John Smith and Co. (London, E.), Ltd. This is shown at the Fair chiefly in qualities which are too heavy and too expensive to attract the binder. Its application to bookbinding is shown, however, and lighter and cheaper qualities are promised in the near future.

Also in the imitation leather group is Crockett's leather cloth, which is shown at the Fair by the manufacturers, the Leather Cloth Co., Ltd., of Cannon-street, London.

A Gold Leaf Exhibit.

A unique little exhibit is that of Mr. G. M. Whiley, gold and silver leaf manufacturer, of Whitfield-street, London, W. At this stand the visitor can see for himself something of the process of gold leaf manufacture. He is shown the nuggets as they come from the refiners, the bar gold, the ribbons into which the metal is rolled, and then the gold leaf of decreasing thickness as beaten out from the ribbon. A girl worker is engaged at the stand in cutting the finished leaf to size and making it up into books. A patented speciality which this exhibitor is also showing is known as "Diamond Decorative Leaf." This, although its cost is only about a quarter that of the cheapest foreign gold leaf, is recommended as an efficient substitute for gold. The maker claims that as a labour-saving device, manufacturers find this leaf a realisation of at least one of their dreams, as the long, tedious process of blocking with real gold leaf is entirely eliminated. The process of blocking Diamond Leaf appears to be just a matter of placing the article in the press and brushing off. Moreover, it is claimed that there is no necessity for preparing the article to be blocked, the adhesive backing being found efficient to cope with the most difficult blocking surface, and provided the correct heat (medium to cool) is obtained, this leaf can be applied to anything without trouble, and that the backing is so effective that where gold leaf used with a preparation has failed to adhere, Diamond Leaf has given no trouble whatever.

Bookbindings Shown.

The process of bookbinding is not shown at the Fair, though on the stand of Messrs. John Dickinson and Co., Ltd., one noticed a volume in course of binding to show the substantial forwarding given to account books bound in the bindery department at Messrs. Dickinson's mills at Apsley. There are, however, bound books in profusion and in a great variety of styles. The Cambridge University Press and the Oxford University Press are outstanding with numerous volumes elaborately tooled, inlaid and gilded. The former Press is showing facsimiles of the Canadian Prayer Book—in very handsome leather, tooled and inlaid—presented to the Prince of Wales at Winnipeg during his recent visit. Other well-bound volumes range from vest-pocket prayer books up to massive pulpit bibles. Perhaps the Oxford Press has the smallest bound book on exhibition, this firm's miniature Oxford editions of individual Gospels being a triumph of high class binding on a minute scale. Beautiful work in diaries, albums, and note books is shown by Messrs. De la Rue, whilst other exhibitors in the bookbinding line are: Messrs. Birdsall and Son (Northampton), Blackie and Son, Ltd. (Glasgow), Coutts and Hillary (London), Fuller and Mead, Ltd. (London), Harrison and Sons, Ltd. (London), Hill's Press, Ltd. (Sunderland), William Johnson and Sons (London), Ltd., Chas. Knight and Co., Ltd. (London), McDougall's Educational Co., Ltd. (Edinburgh), Millington and Sons, Ltd. (London), Geo. Pulman and Sons, Ltd. (London), John Rissen, Ltd. (London), Smiths, Suitall (Ipswich), James Speller and Co. (London), James Spicer and Son, Ltd. (London), Thorburn, Bain and Co., Ltd. (London), Tollit and Harvey, Ltd. (London), Ward, Lock and Co., Ltd. (London), and Andrew Whyte and Son, Ltd. (Edinburgh).

THERE usually is a bird in the bush if you know how to beat the bush properly.

Book Bindings and Book Contents.

How often has one noticed a well-printed book, whose subject matter merited preservation, going in paper wrapper or cheap boards which promised that after a brief spell of use the volume would be ruined beyond repair! Again, too often one sees a rich and stoutly-built binding wasting itself upon some collection of ephemeral rubbish that never deserved a binding at all. The question of the nice balance that should be struck between the binding and the contents of a book occupies the pen of a writer in a recent issue of the *Liverpool Post*. After a word of reproof for those lovers of the binder's art who are "guiltless of all intermeddling with the inside of books," he goes on to remark upon binders' respect for the work of the printer, and *vice versa*. The care lavished on outside of books, he says, by Jean Grolier de Servin and his English parallel Thomas Wotton, by Nicholas Ferrar and de Thou, as by Mr. Cobden-Sanderson or, say, Mr. Douglas Cockerell, among their successors to-day, reflects a love of the worth of books within such as we should demand equally of the Hebers and "Measure" Millers and the rest of the recognised august among bibliophiles. And the learned in title-pages and colophons have seldom been unmindful of the handiwork of a Berthelet, a Clovis Eve, or a Roger Payne, and the specialists in these, again, have not usually neglected the gems of the Aldi and the Elzeviers and the rarities from Salzburg or Westminster presses. It is true, nevertheless, that "bindings" are a special cult, and, indeed, so they have been ever since there has been a book to preserve, protect, and adorn. And that means as the layman is apt to forget, ever since there was a piece of writing capable of inspiring feeling of possession and affection. The "printed book" is only the modern fashion in the book way. From it, through parchment, vellum, and papyrus, we go back to the codices and tablets of lead and clay of the ancients, and each of all of these had its appropriate cover, often reflecting the taste, good or bad, of the several owners. Of bookbinding, as in every art and craft, the material has determined the evolution, and the finest effects have always been reached through a just appreciation of that material's possibilities. Protection is the inspiring purpose of a binding, and when it comes to decoration must never be lost sight of. Proportion, carrying with it a moral sense of fitness, is no less the ruling spirit in binding a book than it is in raising a sacred fane or a skyscraper block. The gold and silver and gems of "Byzantine coatings" overstepped the modesty of the craft, bringing down on their owners the reproof of St. Jerome that while their books were covered with precious stones, Christ died naked before the gate of His temple. There are proud and excessive collectors to-day, and not across the Atlantic only, who indulge a barbaric taste by lavishing the arts of the goldsmith, the enameller, and the painter on the cover for some fairy or exiguous fancy of a Lamb or a Stevenson in manuscript. And the "printed book" also, for which was evolved the gold-tooling of the art as we know it to-day, has often occasioned the excess which was sarcastically reproached by Robert Burns, surveying a Shakespeare folio so treated, when he besought the maggots winding through its inspired pages to "respect his lordship's taste and spare the golden bindings."

Leatherboards.

The imports of leatherboards into the United Kingdom during January were as under:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
London	Germany	565	309
	Lithuania	206	140
Bristol	Germany	157	140
Hull	"	335	322
Manchester	"	20	20
	Sweden	677	499
	Norway	807	1,180
Total		2,767	2,610

PRINTED books, directories, etc., imported into Australia during July and August of 1921 amounted in value to £141,000, as against £376,000 in the corresponding two months of 1920.

Strawboard Supplies.

The countries supplying the British market with strawboards during January were as under:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
London	Netherlands	106,735	37,245
	Belgium	660	332
	Germany	1,124	367
	Czecho-Slovakia	99	49
Liverpool	Netherlands	2,025	1,165
	United States	500	900
Bristol	Netherlands	13,428	6,411
Goole	"	18,322	6,784
Hull	Germany	499	184
	Netherlands	30,260	11,152
Manchester	"	24,612	11,677
	Belgium	251	219
Newcastle	Netherlands	360	206
Plymouth	"	897	658
Southampton	"	1,421	594
Glasgow	Belgium	20	17
Grangemouth	Netherlands	2,086	1,266
	Germany	197	48
Leith	Netherlands	10,362	10,024
Belfast	"	339	206
Cork	"	170	85
Dublin	"	560	295
Total		213,925	89,744

Cardboard and Pasteboard.

The receipts at British ports of cardboard and pasteboard during January were:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
London	Netherlands	760	902
	Belgium	148	544
	Switzerland	10	22
	Germany	3,179	7,626

DIVIDENDS AND REPORTS.

RAITHBY, LAWRENCE AND CO., LTD.—The annual general meeting of the shareholders of the above-named company was held at the secretary's office on March 1st, Mr. J. C. Lawrence, chairman of the company, presiding. The directors' report, balance-sheet, and accounts, with the auditors' certificate and report for the year 1921 having been submitted to the meeting, it was agreed: That the directors' report, together with the statement of accounts, be respectively received and adopted; that a dividend be declared on the preference shares for the year 1921, for the first half year at the rate of 5 per cent. per annum, and for the second half year at the rate of 8 per cent., both less income-tax; that a dividend be declared on the ordinary shares and deferred shares for the year 1921 at the rate of 10 per cent., less income-tax. Mr. Harry Whetton, a retiring director, was re-elected a director of the company.

GALE AND POLDEN.—Accounts to October 31st show net profit of £1,537, plus £7,214 brought forward, making £8,751, from which is deducted dividend of 5 per cent. for 1920. Dividend 5 per cent. for 1921; £5,052 forward, subject to excess profits duty (if any), and corporation tax for 22 months to October 31st.

"COUNTRY LIFE."—Report of *Country Life* for 1921 states *Country Life* celebrated its 25th birthday January 7th, and notwithstanding adverse trade conditions company's business has been well maintained. *Our Homes and Gardens* is now valuable asset in company's business. Net profit for year was £21,804; transferred to reserve £1,750, to staff pension and sick fund £500. Directors recommend final dividend of 7 $\frac{1}{2}$ per cent., making 12 $\frac{1}{2}$ per cent. for year, on ordinary shares, carrying forward £7,600.

NEW COMPANIES.

FOUNDATION CO., LTD.—Capital £250,000, in £1 shares; to acquire, upon the terms of an agreement with the Foundation Co. of New York, the goodwill and rights referred to therein; to acquire, rent, build, improve, work or control works and conveniences, including roads, railways, tramways, docks, hydraulic, electric, gas, drainage, engineering and improvement works, cables, flour, grain, saw, paper, pulp and crushing mills, box-making and printing works, foundries, bakeries, newspaper and other publications, breweries, etc. Private company. Sub-

scribers: F. D. Billett and W. J. Hill. The first directors are to be nominated by the vendors and promoters. The first directors are not named. Registered office: Windsor House, Kingsway, W.C.

KELLER DORIAN (G. BAKER AND CO.), LTD.—Capital £9,000, in £1 shares (8,000 6 per cent. pref.); to take over the business of a merchant carried on by Spiro Constantine Mavroudi, at 33, Princess-street, Manchester, as "G. Baker and Co.," and to carry on the business of importers, exporters and manufacturers of and dealers in paper of all kinds, pulp, card, straw and mill board, wood pulp-board, pasteboard, boxes, cartons, bags and containers of all kinds, book cloth and book-binding materials, books, stationery, gold, composition and aluminium leaf, bronze powder, tin foil, cotton, hemp and other twines, aniline colours, chemicals, drugs, ink, glue, gum, gelatine, etc. Private company. Holder of shares No. 1 to 500 (known as "A" shares) and 501 to 1,000 (known as "B" shares) may be represented by one and two directors respectively. The managing directors are:—Spiro Constantine Mavroudi, Leon Silvin and Emil Kochanski.

LITHOPRINT, LTD.—Capital £1,500, in £1 shares; to acquire the business of a printer carried on by E. Davis, at 22, Ludgate-hill, Birmingham, and to carry on the business of stationers, printers, lithographers, stereotypers, electrotypers, photographic printers, engravers, die sinkers, envelope manufacturers, etc. Private company. First directors: R. Davis and H. H. Ollis. Registered office: 22, Ludgate-hill, Birmingham.

NORTHAMPTON INDEPENDENT, LTD.—Capital £8,000, in £1 shares; to acquire the business carried on at Northampton as the *Northampton Independent*, and to carry on the business of proprietors and publishers of newspapers. Private company. Provisional directors: A. E. Marlow, W. T. Sears, D. P. Tayler, E. Travis, W. P. Cross, J. Astbury, J. Archer and W. H. Holloway. Registered office: 8, St. Giles-street, Northampton.

REPRINTS, LTD.—Capital £1,000, in £1 shares (750 7 $\frac{1}{2}$ per cent. preference); printers, stationers, lithographers, photographers, type foundry, stereotypers, electrotypers, photographic printers, proprietors and publishers of and dealers in prints, engravings, etchings, newspapers, magazines, books, pamphlets and other literary or artistic works and undertakings, etc. Private company. Subscribers: A. E. Owen-Jones and F. E. J. Murrell.

W. C. SMITH (LONDON), LTD.—Capital £5,000, in £1 shares; manufacturers of cardboard, wood or other boxes, printers, publishers, paper merchants, stationers, etc., in the United Kingdom or elsewhere. Private company. Subscribers: W. C. Smith and E. Marshall. Registered office: 5 and 6, Mallow-street, Old-street, E.C.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

JOHN DICKINSON AND CO., LTD. (paper-makers, London).—Satisfaction to the extent of £12,950 on February 21st, 1922, of trust deeds dated July 1st, 1912, and January 15th, 1919, securing £585,000.

"GROCER'S JOURNAL," LTD. (London).—Particulars of £7,350 debentures authorised February 17th, 1922; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

HILL AND AINSWORTH, LTD. (printers, stationers, etc., Stoke-on-Trent).—Satisfaction in full on February 2nd, 1922, of debentures dated March 25th, 1911, securing £1,150.

PEERLESS PHOTO PAPER CO.—Particulars of £5,500 debentures (including £2,500 second mortgage debentures already registered), authorised by resolutions of June 3rd, 1921, and January 26th, 1922; present issue £3,180; charged on Scotsbridge Mill and the company's undertaking and property, present and future, including uncalled capital, subject to prior debentures.

SPAULDINGS, LTD. (manufacturers of compressed fibre goods, etc.).—Land Registry Charge on certain land in Whiskin-street, Clerkenwell, E.C., dated February 18th, 1922, to secure all moneys due or to become due from company to L. J. C. and M. Bank.

R. SOMMERVILLE AND CO., LTD. (paper and board manufacturers, Taunton).—Satisfaction in full on August 13th, 1921, of debentures dated April 20th, 1916, securing £10,000.

H. HOWES AND CO., LTD. (stationers, etc., London).—Satisfaction in full on November 11th, 1921, of mortgage of charge dated October 20th, 1920, securing all moneys due, not exceeding £6,000.

DAVIES LAZARUS AND CO., LTD. (manufacturers of cardboard boxes, etc., London).—Issue on February 21st, 1922, of £1,000 debentures, part of a series already registered.

STANDARD CATALOGUE CO., LTD. (London).—Satisfaction to the extent of £10,250 on December 31st, 1921, of B. S. E. debentures dated November 15th, 1920, and January 5th, 1921, securing £14,500.

International Insurance Company.

The directors of the International Insurance Co., Ltd., of No. 63, Old Broad street, E.C., wish to draw the attention of their policyholders to the fact that this company acquired in June last the business of the Caxton Insurance Co., Ltd., which specialised in printing risks.

The "Caxton" Co. has, it is understood, been revived by new interests, but will be worked quite independently of the "International," with which it has now no connection.

The capital of the "International" is £500,000 subscribed and £375,000 called up. The general manager is Mr. W. B. Coatts, who was for many years general manager of the "Caxton" and went over to the "International" when the "Caxton" business was acquired by that company.

The issue of "Chadwick and Taylor" debenture stock of Charles Marsden and Sons, Ltd., was largely over-subscribed.

The Ford Paper Works, Ltd., of Hilton, Sunderland, are about to make an issue at 95 of £150,000 in 7 $\frac{1}{2}$ per cent. first mortgage debentures.

DURING the year 1921 twenty new paper companies were formed in Germany with total capital of 97,000,000 marks, and there were 68 increases of capital representing 365,000,000 marks.

MESSRS. MARTIN AND CLARKE, wholesale paper merchants, 3, Joiners' Hall-buildings, Upper Thames-street, E.C.4, make a feature of issuing a monthly stock and price list, which comprehensively deals with various lines offered by this enterprising firm. The list for March may be had on application. It gives prominence to banks and bonds, blottings, copyings, manifolds and tissues, duplicator papers, ledger papers, printings, pulpboards, wrappings, writings, etc. The quantity in reams of each item is given, with description and in some instances the mill number, with weight and sizes and prices. It is certainly a useful publication.

Papermakers & the Railway Rates

Successful Claim for Esparto Before Advisory Committee.

Points of interest to the paper industry were raised last week before the Railway Rates Advisory Committee, which sat as a judicial tribunal at the Law Courts, where objections were raised to the new classification proposed by the railway companies for the carriage by merchandise trains of certain materials used in the manufacture of paper and for certain other goods. Sir Francis Gore-Browne, Mr. W. A. Jepson and Mr. G. C. Lockett formed the Advisory Committee.

Mr. Felix Thomas (Thomas and Green, Ltd.), who was accompanied by Mr. A. W. Foster, attended on behalf of the Papermakers' Association, and raised the objection to the proposal of the railway companies that esparto should be placed in Class 10 with hay and straw, with 2½ tons as the minimum permissible. It was held by the papermakers that esparto should be allowed to be shipped at a cheaper rate and that it was illogical to

place it in the same category as hay and straw.

Mr. Thomas referred to the greater weight of esparto per truck as compared with hay and straw and to its lower value both as compared with hay and straw and also with wood pulp, which is in a better class. The fact of esparto being received in large consignments up to 500 tons at a time and the truck load being 4 tons and over were mentioned.

Mr. Thomas put his points very clearly before the committee, who decided in his favour by ruling that esparto should be placed in Class 9 for 4 tons, Class 10 for 2 tons, and Class 12 for less than 2 tons. As practically all the esparto is sent in 4-ton lots, the meaning of the decision is that it will bear a 10 per cent. lower rate in the new classification.

An objection was also made to the classification of waste paper, and Mr. R. L. W. Spurrett and Mr. H. G. Bailey attended on behalf of the Waste Paper Merchants Association. In this case also the committee decided in favour of the applicants, and placed waste paper in Class 9.

The objection raised by Mr. Robbins on behalf of the British Paper Stock Merchants' Association in the case of rags did not succeed.

The question of magazines was also taken up, and Lord Riddell, representing periodical and magazine proprietors, asked that magazines be put in Class 16, with daily and weekly papers, rather than Class 17, as proposed. If Class 17 were adopted, he said, it would involve changes in the methods of packing at great additional expense. Magazines were usually included in mixed consignments.

The committee allowed Class 16 for magazines when covered by the definition "Papers, daily and weekly, and periodicals published at regular intervals not exceeding one month."

The chairman said that a book or a series of books issued in monthly parts would not be classed as among periodicals.

It was stated that the railway companies are receiving correspondence which indicates that many traders are under the impression that the new classification comes into force immediately. Under the Railways Act of 1921 the final new classification will operate "from a date to be appointed." It will probably be from two to three years hence.

Envelope Makers & Manufacturing STATIONERS.

Annual Meeting of the Employers' Federation.

A comprehensive review of the state of the industry represented by the Employers' Federation of Envelope Makers and Manufacturing Stationers was presented at the annual general meeting of that body which was held on Thursday last week at the offices 10, Salisbury-square, London, E.C. Mr. James Gallie (McNiven and Cameron), who was re-elected to the office of president, occupied the chair.

Annual Report.

The report of the Council referred to the unrelieved depression which had characterised the industry during the past year and observed that it was not yet certain that the industry could feel assured that the time had arrived when it might look for a revival in the demand for its products. The condition of unemployment and under-employment which has existed amongst its workpeople, lack of demand for the products of the industry in overseas markets, unwillingness to replace their stocks shown by distributors in this country are still outstanding features of the situation. In spite of the prevailing conditions the Federation had consolidated its position and it was recognised as fully representative of an organised industry.

With regard to the staff, the report mentioned the arrangement which had been come to with the Newspaper Society, by which Mr. Armstrong held jointly with the secretariat of the Federation the post of general secretary to the Newspaper Society, and in this connection the appointment of Mr. E. W. Davies, as assistant to Mr. Armstrong, was mentioned. Following on these arrangements, Mr. A. W. Foster had intimated to the Council that he thought the opportunity fitting to ask the Council to permit him to resign the advisory office in which he had served the Federation. At the same time, the offices of both organisations were removed to 10, Salisbury-square.

Rates of Wages.

Coming to the question of wage negotiations, the report observed: There has been an essential difference in the character of the negotiations which have taken place with the workpeople engaged in the industry upon rates of wage during the year just ended. For the six years from 1914 to 1920 negotiation had been continuous upon increase of wages necessitated by a continuous rise in the cost of living, although the last months of 1921 gave ominous indication, to those willing to see, of a change in conditions which would need to be met by a cheapening of the cost of production. The position was not faced until the middle of the year just ended, but on June 6th proposals were made to the Interim Industrial Reconstruction Committee by the employers' representatives for reductions in the schedule rates of wage issued by that Committee as appropriate to the operations of the industry. The path was by no means easy, but reductions came into force on the pay days in the weeks ending August 6th and August 27th, whilst it was agreed that a third reduction should be made on the pay day in the week ending January 14th, 1922. During the whole period special negotiations were proceeding for an exceptional amendment in the rates of wages of the girl workers in London, whose wages had, during the preceding five years, reached a figure out of proportion to those paid to female workers in other parts of the country. After a ballot of the people concerned, a special re-adjustment of the female workers' wages in London took place in the early days of 1922. It is a source of very great satisfaction to the Council, that in spite of the inherent difficulties of negotiation for reduction of wage, the relations between those engaged in the actual negotiations have always remained of the pleasantest character.

The meetings of the paper, printing and allied trades consultative council were then mentioned, with the remark that informal as these meetings are, and light as is the bond which a share in its deliberations imposes on any of the allied industries, it has been felt by everyone concerned that the meetings which have taken place have fully

justified the hopes expressed, and that an interchange of opinions and information between representatives of organisations whose interests touch at many points, has been helpful to all of them.

Trade Customs and Railway Rates.

On the question of paper trade customs, in the revision of which the Federation had a hand, the hope is expressed that the revised code will be found an improvement on the old one and will prove to be helpful in the maintenance of uniform practice.

Negotiations with the railway companies had resulted in substantial amendments to the original proposals for re-classification of the products of the industry. These amendments, it is observed, so far protect the interests of members that the objections originally put forward have now been withdrawn. It is recorded that the satisfactory result obtained is very largely due to the close co-ordination effected with other manufacturers' organisations in the group of industries dispatching by rail goods of similar character to those handled by the industry represented by the Federation.

On the subject of depreciation of plant and machinery the report stated that after negotiations with the Department of the

Mr. James Gallie

Chief Inspector of Taxes, an agreement was concluded for satisfactory rates of allowance in respect of depreciation of plant and machinery peculiar to members' envelope-making departments.

With regard to the outlook envelope, it is recorded with satisfaction that the Postmaster-General has made arrangements under which the restrictive conditions of the international resolution are not put into operation as between the English-speaking countries of the world. Hopes are entertained that the effect of this agreement will suffice eventually to eliminate the restriction from the regulations of all countries in the International Convention. This result, it is pointed out, was only attained after many months of effort, the main burden of which was borne by the Federation, with assistance from the American Bureau of Envelope Manufacturers, the Interim Industrial Reconstruction Committee in the industry, and the Manufacturers and Industries Branch of the Board of Trade.

Reference is then made to the co-operation of the Federation in the efforts to secure a reduction in the postal rates, and the hope is expressed that in the very near future a satisfactory reduction in the postal rates will be secured.

Mr. Gallie's Review.

The president, in moving the adoption of the report, reviewed the general position of the industry, and proceeded to investigate the prospects for the future.

In conclusion, Mr. Gallie said the times had not been easy; the difficulties were not yet surmounted; but while watching, as it had done, with anxiety, the prevailing conditions and realising the uncertainty of the future, the Council was heartened by the knowledge that their youthful Federation had, during the year under review, added to its strength in

action, to its weight in the councils of the trade, and to its stature amongst the federated industries. (Applause.)

Seconded by Mr. C. W. Kimpton, the report was carried, and the statement of accounts was adopted on the motion of Mr. T. Owen Jacobsen, seconded by Mr. W. Shaw.

Election of Officers.

The re election of Mr. Gallie as president was cordially moved by Mr. J. Leonard Spicer and seconded by Mr. Frank Appleton.

Mr. J. Leonard Spicer was appointed vice-president at the instance of Mr. Gallie and Mr. H. F. G. Wood.

Mr. T. Owen Jacobsen was re-elected treasurer on the motion of Mr. F. G. Hawdon, seconded by Mr. E. Cunningham.

Rates of Wages.

A statement was made by the secretary upon the present position in allied industries in which negotiations for reduction of wage were now in progress, following upon which the president assured the meeting that the question of the relation between the current rates of wage in the industry and the continuous fall in the cost of living was engaging the earnest attention of the Council.

Those supporting Mr. Gallie at the meeting were Messrs. J. Leonard Spicer (Jas. Spicer and Sons, Ltd.), T. Owen Jacobsen (Jacobsen, Welch and Co., Ltd.), F. Appleton (The Educational Supply Association, Ltd.), J. B. Browne (The Manchester Envelope Co.), E. Cunningham (Chas. Goodall and Sons, Ltd.), W. Collins Dickson (Wm. Collins, Sons and Co., Ltd.), R. S. Dove (Millington and Sons, Ltd.), F. G. Hawdon (John Dickinson and Co., Ltd.), C. W. Kimpton (W. H. Smith and Son), Andrew Levy (Andrew Levy and Co., Ltd.), C. M. Oliver (Alex. Cowan and Sons, Ltd.), Walter Shaw (Castell Bros., Ltd.), W. F. Sinclair (Wm. Sinclair and Sons, Ltd.), Stanley Welch (Jacobsen, Welch and Co., Ltd.), and H. F. G. Wood (Bennett and Wood, Ltd.). Apologies for nonattendance were received from Messrs. J. W. Cooke (Butt Bros. and Cooke, Ltd.), H. A. Mead (Fuller and Mead, Ltd.), and H. A. D. Wathen (Pirie, Appleton and Co., Ltd.).

Filing and Binding Papers.

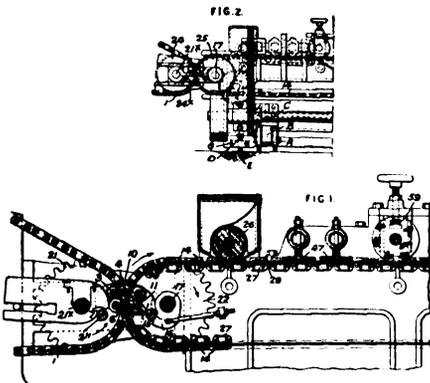

Mr. L. D. White has patented an invention under which papers are filed and bound upon staples, nails, etc., which are temporarily clamped in an upright position on the frame of the apparatus, rods forming the back of the frame having a pressure bar sliding upon them for forcing the papers down the nails, etc. As shown, a clamping bar N is held to the hollow base B by thumb screws O, and is slotted at P to receive one or more nails, etc., Q. A pressure bar D, having apertures F through which the nails can freely pass, slides upon rods C forming the back of the frame, and is guided through the frame member A by rods G, a spring I being positioned on the guide rods between the frame member A and an operating handle J joining the rods. Adjustable projections S serve to aline the

papers sideways, and projections L¹, Fig. 1, or K, Fig. 2, prevent the papers from curling up, and thus forcing the spikes forward. A removable slotted plate may be placed between the pressure bar and clamping bar to keep the spikes in alinement. The rods G and handle members J may be omitted, and the device operated by projections on the pressure bar, the spring I in this case being around the rods C. The clamping bar N may be removable with the spikes, etc., and clamped to the under side of the hollow base, or it may be in sections with the spikes between. In a modified form of apparatus, designed for use with a single spike, the latter passes into a hollow guide rod forming part of the pressure bar, the back of the frame engaging slots in the pressure bar. The papers filed may be permanently bound, for example, by bending the ends of the spikes down, by pressing washers on the ends of the spikes, or by means of threaded twine; or two sections may be inverted, and nails driven into the opposite section.

A Bronzing Attachment.

Messrs. Gamse and Bros. have patented a portable bronzing attachment for offset and other printing presses which, while supported

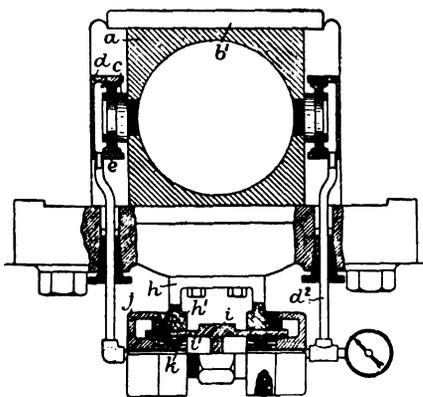

on the floor, can be adapted to be moved from one press to another, and is provided with means for coupling it to the press so that its sheet carrier is driven in unison

with the delivery of the press. The attachment comprises chains 14 carrying channelled bars 27 on which are two sheet-supporting flexible aprons 28, in the spaces between which are grippers 10, 11 carrying the sheets beneath a bronze-applying roller 26, reciprocating rubbing pads 47, and revolving and reciprocating polishing-rollers 59, whence the sheets are transferred to the grippers of delivery chains. The attachment is mounted on four rollers A, Fig. 2, on swivels B carried by brackets C, and when adjusted into line with the delivery of an offset press, a gear wheel 25 fixed to the shaft 17 of the sprockets 22 driving the chains 14, meshes with a wheel 24 on the shaft 21 x of the sprockets 21 driving the delivery chains 1 of the press, links 24 x fitting over the shafts 17, 21 x and completing the coupling. Screws D passing through lugs 9 may be provided to raise the attachment off the rollers A, plates E for the screws being fitted to the floor at appropriate places in front of a press. The sheets are transferred from the grippers of the press comprising fixed parts 6 co-operating with gripping fingers 4 on rock shafts 3 carried by the delivery chains 1 and oscillated by fixed cams 7 engaging rollers 3¹, to the grippers 10, 11 of the attachment, the parts 11 being fixed and the fingers 10 being mounted on brackets 15 oscillated by fixed cams 16, the transfer taking place in the horizontal plane joining the axes of the sprocket shafts 17, 21 x. Both sets of grippers are spring closed.

Hydraulic Cylinders for Presses.

Printing presses, under a patent by Mr. A. Terrey, are provided with hydraulically-operating means acting in opposite directions directly on the bearings of the impression cylinder for adjusting the pressure of the latter upon the printing cylinder or throwing it out of contact therewith. In the arrangement shown, the bearing-block a at each end of the impression cylinder shaft is supported for transverse movement along guides b¹ on the machine frame and is so connected by studs c to pistons e working in hydraulic cylinders d mounted upon or formed within

the frame. The cylinders d communicate by conduits d² with bores i¹ of a fluid-pressure control member i, one end of which is threaded through one of the bearing bosses h¹ on a fixed bracket h, the other end of the member i sliding through the other bearing boss. The conduits d² extend through caps j, and their extremities are provided with pistons k. By rotating the control member i by means of a spanner, or otherwise, the fluid pressure in the cylinder d on one side of the bearing a will be increased, and the pressure on the cylinder on the other side of the bearing diminished, the impression cylinder being adjusted thereby. The hydraulic pressure cylinders at each end of the impression cylinder shaft may be controlled independently or together.

THE death is announced of Mr. Edwin Reginald Morpew, manager for the St. Mary Paper Bag Co., Ottery, Devon.

Colour Printing in America.

Striking Account of Present-day Methods and Achievements of United States Colour Printers.

Some gleanings of a remarkably fruitful visit to America made by a British printer—Mr. Fred W. Seeley (Messrs. Norbury, Natzio and Co., Ltd., Manchester)—were put before the Printers Managers and Overseers' (Parent) Association at their meeting last week, and the members were much impressed with the big store of information and the numerous specimens of American colour printing which Mr. Seeley had contrived to collect in the course of a single brief visit to the United States. Mr. Seeley had decorated the walls of the room with a most interesting selection of examples, and, though he said the specimens shown were not a quarter of those he could have displayed had space permitted, they were comprehensive in scope, including large sheets in colour from some of the best American newspapers and periodicals, posters, calendars, cigar box labels, and many other lines.

After introducing his subject with some interesting remarks upon his first impressions of New York, Mr. Seeley proceeded to mention in more or less haphazard order some of the interesting things seen at the numerous printing offices visited, among the most notable being those mentioned below.

The first novelty mentioned was an ingenious plate-graining machine produced by the Planographic Equipment Co., 351, West 53rd-street, New York. This machine not only rotated the trough in the ordinary way, but also rocked the whole concern to an angle of about 20 degrees. By this method the marbles did not become flat, and it seemed a distinct improvement.

The De Vinne Press, 395, Lafayette, New York, had many features of interest, among them being the employment of a row of gas jets at the take-off end of each Miehle machine, thus solving the difficulty, much met with in America, of electricity generated in the paper.

Two-Sheet Rotary Presses.

A novelty in machine construction was shown at the Carey Printing Co. of New York. This was a "battery" of seven two-sheet rotary presses. These rotary presses had two distinct forms, two make-readies, two feeders, and two deliveries. Speed about 5,000 sheets per hour. Sizes ranged from 29 in. by 42 in. to 46 in. by 67 in. In working the machine one had the option of running one form to back up the other, two forms to work and turn, or two duplicate forms.

Mr. Seeley found that 75 per cent. of printing machines were working smaller sheets than full size, and at least 50 per cent. were working much smaller sheets than full size.

At the works of the Butterick Publishing Co.—one of the largest letterpress printing houses in the States, and specialising in vari-

ous fashion journals—were seen on one floor 18 two-colour Miehle machines, 39 in. by 54 in., each with an average output of 1,500 per hour, on runs of 500 reams; and several floors were similarly equipped. Their colour work is always done four colours in two operations, and their system is to print the black and the next most important fitting colour as the first two workings, with the red and yellow generally the last two. Their contention is that if the black and blue fit, a little misfit in the red or yellow does not show as much as the first two colours; moreover, with the yellow last it is easier to balance the picture with the correct amount of yellow—easier than if the yellow were printed first. Solid black parts have only the black and blue; the blockmaker omits the yellow and red. A full day and night is sufficient for the first two colours to dry and become ready to receive the second two. The first colour is more tacky than the second, and the third than the fourth.

Excellent cigar label work was seen in progress at the house of Heywood Strasser and Voght, 9th Avenue, New York. On one floor were five offset machines, 45 in. by 65 in., made by the Hall Printing Co., and they were running at 1,600 per hour, whilst there were groups of rotaries and flat-bed machines, none smaller than 38 in. by 50 in. The highest class of cigar band or label work is done on flat beds from stone, and sheets 44 in. by 64 in. are embossed at the rate of 800 per hour. The embossing presses are Sheridan make. The top of the platen is removable to slide out for make-ready, and the male die is of soft composition. The sheets are generally cold-rolled before embossing—it is not found that the sheets stretch.

A compound named "Mirakel," made by the Printing Ink Compound Co., of New York, was found in use by Leese Wilkinson and Co., big fashion plate printers. This was a substance to be mixed into ink, for preventing set-off. Mr. Seeley remarked that since his return from America he had used "Mirakel" very extensively, and had found it a good thing. He understood the "Mirakel" people had now an agency in Great Britain.

"Developing" on Stone Under Water.

A very interesting process seen in several lithographic houses was the "developing" of half-tone work on stone or plate under water. In most cases a screen print was put upon the plate, but the system was seen in use also where the grain of the plate or stone was used as the base. In some cases only one negative is taken of a job, and spare or full prints upon the plate are made, but in most cases there are three or four filter colour prints used. After the negative development is upon the plate (or stone) the plate is put in a bath of water of, say, $\frac{1}{4}$ -inch in depth (or in the case

of a stone a putty embankment is built round the edges so that about $\frac{1}{4}$ inch of water can be let upon the surface of the stone). The plate or stone being grained medium coarse, the artist, with the aid of scraper tools, hard eraser and other devices, rubs or scrapes away all work to be deleted, and can reduce tints where necessary. He can also add to tints with litho chalk crayons parts where tints have to be strengthened. If solids are required, the plate is washed clean, dried, and solids added, but the plate is not allowed to remain dry too long before it is talced and lightly gum etched. When dry, the plate is "developed" with bitumen wash out and a strong etch applied. It is simply amazing how quickly the artist can "develop" the plate under water. The transfer ink does not smudge as it would if one attempted to erase or reduce the tints upon a dry plate; no hard edges are produced, and perfect vignettes to tones are obtained.

Among interesting points learnt at the United States Lithographic Co., which is about the largest litho house in the States, was that this firm has been able, by a continual policy, to get their customers to standardise in the colour, quality of paper, and the size of labels and cartons, so that they have eliminated the trouble so pronounced in this country of tobacco cartons and the like varying very greatly. They are able to keep set lay-outs and set cutting forms, as well as using standard sizes and qualities of material. If customers insist upon variations they are told the greater cost and longer time for delivery. This inevitably settles the matter.

The Huebner-Bleistein Process.

In Toronto Mr. Seeley visited the Rolf, Clark, Stone Co., the first house to instal the Huebner-Bleistein process. In their application of the process he found 90 per cent. of the jobs produced in four workings, although some of the specimens given him were in as many as seven printings. Colour separated negatives are made from the original sketch. From those are made positives on grained glass, and alterations are made on these by adding crayon work or scraping or reducing tints. After the positive is completed a negative is made the correct size, and at the same time a half-tone screen is added to the negative. This negative is then placed in the exposing machine, and as many exposures made on to the stone, aluminium or zinc plate as are required. The machine ensures absolutely correct register. Everything is calculated to the thousandth of an inch, and by carefully kept charts the position of each exposure for succeeding colours is certain. The main feature is that there is no duplicate transfer, each exposure

• TRADE **LINOTYPE** MARK •

The most profitable composing machine equipment

HAVE ONLY UP-TO-DATE LINOTYPES.

It is not always a wise policy to keep a machine on the active list merely because it can do the work for which it was originally intended.

A considerable number of Linotypes in this country which have paid for themselves many times over should now be replaced by later models, if the installations are to show a maximum efficiency under modern conditions.

When ordering a modern Linotype equipment the proprietor of an old Linotype installation said: "I found that five hours of one man's time were consumed each day in making magazine changes on my thirty single-magazine Linotypes." To that waste time has to be added the unproductive hours of the operators whilst awaiting changes.

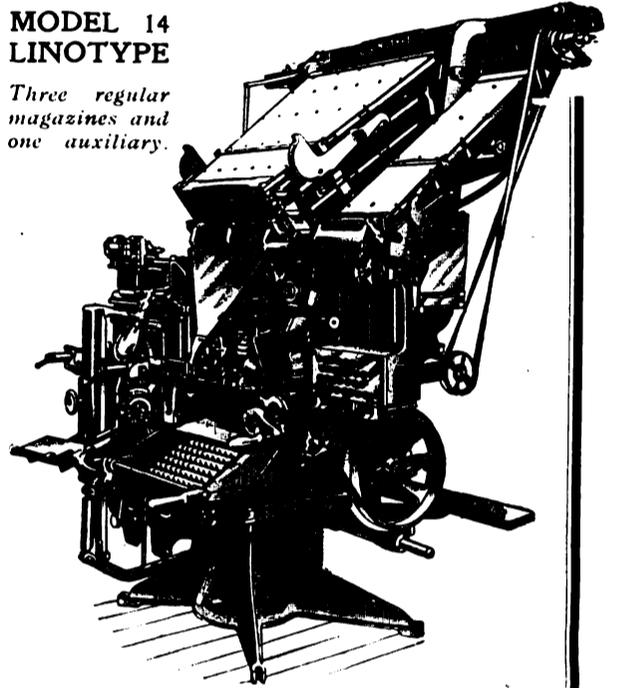

On modern Linotypes the operator can effect his own magazine change in a few seconds, and he can complete an entire change of measure, mould, knives, and magazine in less than a minute, without moving from his seat.

The modern Linotype also gives a wider range of faces, as regards size and number alike. From the one machine the printer can obtain headings as well as text matter in a variety of bodies.

Although similar in principle to the earlier models, the modern Linotype is entirely different so far as its versatility is concerned.

on the printing plate being made from the original negative. Mr. Seeley said he saw a 30 in. by 40 in. zinc plate with a subject repeated ten times, and the plate made to fit colours already printed, finished from beginning to end in rather less than one hour, a plate which in this country—by ordinary transfer process, including pulling ten transfers, sticking up, transferring, rolling up, etc.—could not have been done in less than eight hours. The cost of drawing is reduced by about 25 per cent., and as the very best results are obtained in from four to six workings, one can fairly claim a reduction of about 40 per cent. in the cost of production.

Among the points in the conduct of American printedom which Mr. Seeley thought of special interest to British printers was the extensive advertising used by printers in the States to boost the trade. There is much more success in standardising sizes and qualities of materials than in this country. Welfare work is a big feature. Machinery used is bigger and run at higher speeds than here, and workers are more ready to accommodate themselves in order that the biggest possible output may be obtained.

The Discussion.

Questions and animated discussion followed the lecture.

Among further points elicited by questions was that, in printing offices in the States, there seems to be a lack of gradation of printing machines between very large and very small sizes; thus even small houses would have perhaps two of the largest sized machines and then a number of small platens—with nothing in between. Asked as to the higher rates of output obtained in America, the lecturer suggested there was no reason why this should not be approximated here; he said his own firm had two-colour Miehles giving an output as high as 2,400 an hour and a good average output of 1,600; true, there was set-off trouble, but that would be largely obviated if power delivery were installed. Moreover, since using "Mirakel" setoff had been reduced 50 per cent. In offset printing zinc was the metal ordinarily printed from, not aluminium. American printers apparently used no other two-colour machine but the Miehle.

Mr. Maisey suggested that the subject be put up for discussion again at a later date, as the improving of British methods was a vital matter.

Mr. Jarvis, who referred with much admiration to Mr. Seeley's array of specimens, stressed the value of the Huebner-Bleistein process, which, he said, he had himself reported upon some 14 years ago, when he stated that it would revolutionise lithographic printing. He believed that as long as we remained outside that process we should never be able to produce work like the American examples. Our workmen were as good as the American, but the English employers would not spend the money required. Many hundreds of thousands of pounds had been spent to bring the process up to date. One thing that was against us was the absence here of the immense runs that are available in the States. He corroborated the lecturer's remarks about the generous hospitality shown by American printers to the British visitor. Mr. Jarvis concluded by expressing his keen interest in, and appreciation of, the lecture, and by calling for a vote of thanks to Mr. Seeley.

Mr. Whittle seconded, expressing the association's pleasure at having Mr. Seeley amongst them again, and their pride in possessing such a live member.

Mr. Gill, as an old colleague of Mr. Seeley's, associated himself with the resolution, as did also Mr. Bateman.

A brief response from Mr. Seeley brought the meeting to a close.

EDWARDS, DUNLOP AND CO. (LONDON) LTD
 —The office staff of Edwards, Dunlop and Co. (London), Ltd., recently formed themselves into a Social Club and each week a club evening is held in the club room, kindly placed at its disposal by the company. Here games and other amusements are indulged in, while every fortnight a whist drive for members and friends is held. During the winter the Club has held three very enjoyable dances at the Cannon-street Hotel, where the last dance of the series will take place on April 7th. The Club, which is a very live institution, has other activities in view and is evidence of the happy spirit of co-operation existing between the staff and the management, which has in every way assisted the Club in its work.

Recent Developments in Printing ORGANISATION.

Interesting Address by Mr. R. A. Austen-Leigh at Chelsea.

Mr. R. A. Austen-Leigh fulfilled a long-standing engagement to address the members of the S.-W. London Master Printers' Association on the 7th inst. at the Chelsea Town Hall. He was welcomed by a greater number of members attending than at any other of the monthly meetings of the association since its inception.

Mr. J. D. Wise, the president of the district association, who was in the chair, paid a warm tribute to Mr. Austen-Leigh for the work he had performed for the London Master Printers' Association. That night he introduced their ex-president as a representative of the triple alliance, Commerce, Art and Literature. They welcomed Mr. Austen-Leigh as a brother craftsman in the truest sense, as one who worked for the good of the craft. In commerce, art and literature they had a trinity, and in their late president they found that trinity in unity. Mr. Wise proposed a vote of thanks to Mr. Austen-Leigh for his devoted services to the London Alliance during his two years of presidency.

Mr. Simnett, in seconding the resolution, expressed his own personal obligations to Mr. Austen-Leigh, both for what he had done and what he was prepared to do.

The resolution was cordially carried.

A Two Years' Review.

Mr. R. A. Austen-Leigh then ran over the history of the London Master Printers' Association during the past two years. Incidentally he congratulated the association on securing a president of Colonel Truscott's attainments.

Mr. Austen-Leigh went on to say that the new constitution of the London association, which was put into operation two years ago, had worked rather well and he had heard no objection as to the method of electing the council. With regard to financing the district associations, suggestions had been made that paid secretaries might be appointed, but he thought such a course might create difficulties. Dealing with the position of London in the re-organisation of the Federation, Mr. Austen-Leigh mentioned that London contributed over £6,000 to the Federation, which was more than all the other alliances put together. Accordingly, London now had a predominating vote compared with the rest of the country. There had been a movement to get rid of the block vote, which secured that position, but only one of the London districts had expressed itself in favour of that course. He maintained that London should not give up its advantage, but if it did he hoped London would in return have power to deal with the unions by itself.

The creation of the Joint Industrial Council had aroused hopes which he thought had not quite been realised. The employers on their side claimed to have tried to see the employees' point of view, when wages were rising, but he could not say that the other side had met them quite in the same spirit now that the cost of living was declining. The meetings of the London District Committee of the J.I.C. had been successful, and the speaker mentioned the good impression which Mr. Davies, of the London Society of Compositors, had created as chairman of that committee.

During his own presidency the association had increased its staff and its members, the membership growing from 950 to about 1,100, whilst the revenue had increased from £6,000 to £13,000. With reference to the change of secretary, Mr. Austen-Leigh paid a glowing tribute to Mr. W. Whyte, who succeeded Major Birch. Mr. Whyte's appointment was certainly a satisfaction to the district associations which had had a chance of seeing his good work. Mr. Austen-Leigh also testified to the great assistance Mr. Whyte had been to him all the time he had been in office, because he had at his fingers' ends all the information which was necessary to the president in carrying out his duties.

The Wages Negotiations.

Reviewing the negotiations with regard to wages, Mr. Austen-Leigh said the salient fact in the past year had been that they had got some reduction, although not so much as they would have liked. They had not got as much

from the L.S.C., for instance, as from other London unions.

Looking to the future the ex-president stated it as his view that if the prosperity of their trade was to be revived, there must be a considerable reduction in wages. They would all, of course, like to see their workmen getting as much as possible, so long as their trade could prosper at the same time, but he did not think they could continue to receive the high wages at present being paid. The average reduction in wages for the whole of the industries in the country during 1921 was 16s. 10d. This compared with an average in the printing trade of 5s., which showed an extraordinary divergence. They could not expect the printing wages to remain so high above those prevailing in other industries. It would mean that people would refuse to buy printing more than they were obliged to, and it must be remembered that a large proportion of printing was regarded as a luxury.

In this connection Mr. Austen-Leigh mentioned the suggestion of grading wages over London on similar lines to that adopted in the country, but he thought this would be an extremely difficult matter to arrange equitably. In conclusion, Mr. Austen-Leigh expressed appreciation of the way the District Associations were working under the new constitution, and he referred to the excellent work done in the South-West by their past presidents, Mr. Mountain and Mr. Spring, as well as the present chairman—Mr. Wise.

At the close of Mr. Austen-Leigh's address, both Mr. Wise and Mr. Spring added tributes to his work in connection with the negotiation of labour matters.

Business Items.

Coming to the business part of the meeting, the president mentioned that the Benevolent Fund was to receive a percentage of L.M.P.A. subscriptions, so that in future it would have an allotted income.

Mr. Mountain was re-nominated as L.M.P.A. representative on the Westminster Employment Committee and Mr. Kent was delegated to the Brixton Committee.

The Paper Trade Customs then came up for consideration. It was agreed to recommend to the Council that reams should consist of 504 sheets instead of 500.

Objection was taken to the paragraph which stipulated "the chargeable weight shall include weight of necessary ream and reel wrappers (not bale wrappers), string and centres (excepting those of wood or metal)." The meeting decided to ask for the deletion of this paragraph altogether.

With regard to "special makings" it was agreed to ask for a reduction of the percentage in respect of one ton or less from 12½ to 7½ per cent.

Mr. Maynard also mentioned the matter of cut cards, which he said were coming in at net 50s, and the president remarked that it would assist members if they would all specify when ordering that the box should contain 52.

The following new members were elected:—Messrs. Rastall and Son, Ebury-street, and Wm. Wilton and Son, Wimbledon.

The president paid a tribute to the work of the organisers, and expressed the hope that they might be able to obtain four new members, so that the district might be entitled to another representative on the Council. At present their membership was 97.

This being the last meeting before the annual gathering, Mr. Spring proposed a vote of thanks to Mr. Wise for his very active interest in the work of the Association during the past year.

This was seconded by Mr. Trim and carried very heartily.

Mr. Wise, by way of acknowledgment, said he had never enjoyed any work so much as that which he performed as president of the Association. Printing was not only his living, but his hobby. In thanking the committee and the officials of the Association for the assistance rendered to him, he remarked that in their secretary (Mr. Cole) they had an exceptional man, whilst Mr. Kent had carefully watched over their finances.

THE FORESTER PAPER CO. (1917) LTD.—We have much pleasure in announcing that Messrs. W. H. Day and A. P. H. Moody have been duly appointed life directors of the Forester Paper Co. (1917), Ltd. We understand this will in no way interfere with the activities of these gentlemen with regard to their representation of the well-known firm of Albert E. Mallandain, Park Royal Paper Mills, Willesden, N.W., with whom they have been connected for many years past.

Trade Notes.

MR. WALTER RUNCIMAN has acquired a controlling interest in the well-known printing firm of Hudson and Kearns, Ltd. This will involve no change of policy, and Mr. R. Hulme will continue to act as managing director. Mr. Runciman has other interests in the printing trade.

It is stated that a powerful syndicate has taken over Mr. Bottomley's papers, the *Sunday Illustrated* and the *Sunday Sports Telegram*, and that they are now under entirely new control, the new arrangement dating from early in February last.

JURY LISTS.—Reduced printing of the jury lists is foreshadowed in the Lord Chancellor's Jury Bill, the text of which is just issued. It is proposed to do away with the preparation and printing of separate jury lists. As a substitute, the names of persons qualified as jurors will be indicated in the register of electors by means of a special mark.

The Leicester Master Printers' Association held their annual social last week in the Oriental Hall, Market-place.

ESTIMATED losses by fire last month were:—Printing works, Dublin, £38,000; envelope manufacturers, Upper Thames-street, London, £20,000; printing works, Hull, £10,000.

PRINTERS' APPRENTICESHIP.—The Lord Mayor of Cardiff, as chairman of the Juvenile Employment Committee, convened a conference, which was held at the City Hall on Wednesday, of representatives of the Master Printers' Association and the Typographical and Bookbinders' Societies, to consider the question of setting up an Apprenticeship Committee for the placing and training of boys in the printing and allied trades. The conference unanimously agreed that such an apprenticeship scheme should be drawn up for the city, but in view of the fact that a national scheme is now under consideration by the Joint Industrial Council it was decided to suspend action until this scheme has received final approval, which is likely to be very shortly.

HEAVY TAXATION.—Printers' views on the present burden of taxation have found expression at Leeds, whence comes the following resolution: "That the Leeds and District Master Printers' Association views with grave anxiety the present condition of trade and the large amount of unemployment; it considers that restoration of trade and reduction of unemployment is of paramount importance, and that the Government should take all possible steps to bring that about. As the heavy burden of taxation is one of the principal causes of the present depression, it suggests a reduction of the income-tax by 2s. in the £, and the abolition of the Corporation Profits Tax."

BEFORE a King's Bench Divisional Court on Monday, Mr. Patrick Hastings, K.C., appeared to show cause why a writ of attachment for alleged contempt of court should not be issued against the London Express Newspapers, Ltd., the proprietors of the *Daily Express*, and Mr. Blumenfeld, the editor, in connection with an illustration in that journal purporting to be a sketch made in court by an artist of the *Daily Express* of the eyes of Major Herbert Rowse Armstrong, in the Hay mystery case. The Lord Chief Justice said that, whatever might be thought of the taste of the picture, the Court was satisfied that it did not come within the rules laid down in the matter of contempt. It was, however, a matter calculated to give rise to the question of a motion of this kind, and therefore the rule would be discharged, but without costs.

An announcement of interest to the printing industry is the registration of a new company, Messrs. R. A. Bartlett, Ltd., with a capital of £20,000. Mr. Bartlett, the managing director of the new company, was formerly commercial director to Messrs. B. Winstone and Sons, Ltd., and altogether served the house of Winstone for 25 years. His co-director, Mr. A. E. Earl, served the same firm for many years as works manager, and altogether spent 20 years in their service. Both gentlemen have recently resigned their appointments and are now actively engaged in the new company, which has established up-to-date works at 8, Hythe-road, Willesden, N.W.10. In these premises have been installed modern plant for the manufacture of printing inks for all processes, and arrangements have been made whereby the company supply the trade with colours and materials at advantageous prices and terms.

Both Mr. Bartlett and Mr. Earl are very well known in printing trade circles, and they will receive the congratulations and best wishes of their many friends in their new undertaking.

MR. ROBERT ASHBERY TIDMAS, for 36 years country representative of Messrs. Eyre and Spottiswoode (Bible Warehouse), Ltd., Pater-noster-row, E.C., has died in London, the funeral taking place on Saturday last.

OCEAN NEWSPAPER PRINTING.—Some quick newspaper production was reported on the arrival of the "Aquitania" at Southampton last week. It was in connection with the marriage of Princess Mary, when a four-page special edition of the *Cunard Daily Bulletin*, containing a full report of the ceremony, was published within a few hours of the ceremony taking place.

BRITISH EMPIRE EXHIBITION.—A meeting of the Council of the Empire Press Union will be held on Monday next, at the offices of the Newspaper Proprietors' Association, 6, Bouverie-street, E.C., when two resolutions recently passed by the Publicity Committee of the British Empire Exhibition will be discussed. The first recommends that a Press pavilion, reading and correspondence room, and information Bureau be provided within the exhibition buildings, and that proprietors of newspapers in Great Britain and overseas be invited to support this department. The resolution also recommends that a Press Congress of the Empire be convened soon after the opening of the exhibition. The second resolution suggests that the Empire Press Union be invited to undertake the organisation of the Press Pavilion and of the Press Congress in co-operation with the executive committee of the exhibition.

The newspaper strike in Paris ended on Tuesday with the surrender of the men.

Personal.

SIR WILLIAM WATERLOW, K.B.E., was on Tuesday at Guildhall admitted as Alderman of Cornhill Ward, succeeding the late Sir Edward Cooper. He has been a Common Councillor since 1914. After the ceremony of admission the Lord Mayor and the Lady Mayoress gave a luncheon at the Mansion House to meet the new Alderman and Lady Waterlow.

LORD BURNHAM, in responding to the toast of "The Newspaper Press Fund," at a dinner given at Hull on Friday night by the Hull, East Riding, and North Riding branch of the fund, said that there never was a time when, in point of honour and ability the Press of England had reached a higher standard than the present. At the dinner £500 was raised on behalf of the fund.

SIR GEORGE SUTTON has presented a silver salver to the London Press Golfing Society for competition in the society's annual inter-office foursomes. As last year's winners, Sir Frank Newnes and Mr. Edward Hudson, representing the *Strand Magazine*, become the first holders.

MR. A. E. HOLMES, secretary of the Printing and Kindred Trades' Federation, has been elected one of the Governors of the Prince of Wales' General Hospital at Tottenham, it being felt that the addition of a Labour representative would make the board of management more thoroughly representative. Should any of our readers wish to bring forward matters relating to the Hospital, Mr. Holmes would be pleased to receive communications.

OWING to the death of Mr. G. M. Curtice, of the Press cutting firm of Romeike and Curtice, Mrs. H. Vivienne Curtice has been made one of the managing directors in place of her husband. Mr. A. Sloman has been elected to a seat on the board.

MONSIEUR MAILLET-SAINT-PRIN, the doyen of the French journalists, who was born on February 25th, 1821, says the *Paris Excelsior*, in spite of his 101 years, still provides a weekly article for a paper to which he has for many years contributed. He can see well enough to correct his proofs.

MR. FREDERICK DIXON, who recently signed as editor of the *Christian Science Monitor*, is reported to have become editor of the *International Interpreter*.

Trade Union Matters.

STEREOTYPERS' DISPUTE.—We are pleased to learn the dispute between the Stereotypers' Society and the Stationery Office has been satisfactorily settled. We understand that Mr. A. N. McConnell, Chief Conciliation Officer, London and South-Eastern Area, was successful in arranging a conference on Friday evening between the Controller and other officials of the Stationery Office and the officials of the Society, Messrs. W. C. Warren (general secretary), T. H. Middleton (assistant secretary) and I. G. Maidment (chairman of the London Branch). A satisfactory agreement was arrived at and the men's notices were accordingly withdrawn. It is pleasing to know this dispute, which might easily have spread to serious dimensions, has been settled with acceptability to both sides.

The National Society of Electrotypers and Stereotypers have reached an agreement with the N.P.A. for a reduction of 5s. per week, all other conditions having been withdrawn. We understand they have also agreed with the Trade Shop Houses to renew for a period of five years their present agreement.

"NATSOPA" AFFAIRS.—The National Society of Operative Printers and Assistants appears to be making for somewhat calmer waters after its recent stormy experience in the seas of litigation. The Governing Council at a special meeting has passed the following resolution:—"This Governing Council declares that the organisation purporting to represent London chapels, and calling itself the United Chapels, is an organisation without authority or sanction of the rules of the Society. Further, the organisation mentioned being, in the opinion of the Governing Council, engaged in conduct detrimental to the welfare and interest of the Society, the London Branch Committee be directed to give the matter immediate attention." Subsequently, Messrs. Dunn, Clark, and Tomkins, who were active members of the organisation calling itself the United Chapels, stated publicly at the Government Council that they accepted the findings set out in the resolution, and would immediately dissociate themselves from the organisation mentioned. The Executive has been informed that each of the members named has loyally carried out his promise, and has definitely withdrawn from the United Chapels, and has agreed to fulfil his duty as an officer of the Society. The Executive desires to make it clear that it will use all possible steps to assist in clearing away the difficulties and misunderstandings that are now admitted to have existed in the charges against it, and to use all possible efforts towards restoring not only peace and harmony but confidence and understanding.

A BALLOT is being taken of the "Natsopa" calling for a 50 per cent. increase upon all members paying the 1s. contribution and upon the male junior scales. Members are being asked to empower the Council to arrange with branch committees to relieve members of the payment of the increased contributions where necessitous circumstances or special conditions exist, and proved to the satisfaction of the executive. In view of the serious position of the women's section, the vast amount of short time worked, and the abnormal amount of unemployment, the Executive Council have decided that there should be no effort made to increase the women's new scale contributions at the present stage.

A CORRESPONDENT writes to *Reynold's Newspaper* advocating better provision being made for the "veterans of industry," and he hits upon a printing trade union as well fitted to take a pioneer step in this direction. "Who," he writes, "is going to make a start? Will the London Society of Compositors show a lead in this direction? They are at present doing better work than any other society in providing for their unemployed, and are in a good position to make a start in providing a living pension for their members who are over 60, and so making vacancies for the younger members."

Mr. Jas. Miller Honoured.

National Society of Electrotypers and Stereotypers give a Dinner and Presentation to their Retiring President.

Quite a unique gathering took place on Saturday in the Crown Room of the Holborn Restaurant, when a dinner was given to Mr. Jas. Miller by the members of the National Society of Electrotypers and Stereotypers on the occasion of his retirement from its presidency after a period of 12 years. Mr. H. McEntee, the new president, was in the chair, and the large gathering—numbering close upon 200 ladies and gentlemen—included several delegates of the Society from different parts of the British Isles. Those present were well representative of the various branches of the industry, and included the Right Hon. C. W. Bowerman, M.P., Mr. T. E. Naylor, M.P., Mr. A. E. Holmes, Mr. G. A. Isaacs, Mr. H. Wilson Howes (Machine Managers), Mr. R. Kneale (Litho. Artists' Society), Mr. T. G. Newland (Paper Workers' Society), Mr. W. Hebditch (late controller Messrs. Eyre and Spottiswoode), Mr. Clements, Mr. Napier, Mr. Dawson, Captain Burden, and Mr. J. B. Titchener (Trade Employers' Federation), Mr. J. R. Riddell (St. Bride Printing School), and a considerable number of the members of the Electrotypers and Stereotypers Managers' and Overseers' Association, headed by their president, Mr. A. Chadwell, Mr. W. Billett (secretary), and Mr. W. H. Longley.

Interspersed between the toasts were a number of musical items, contributed by several prominent artistes, among whom may be mentioned: Miss Rose Hayes, Miss Kisby, Miss Minnie Parrock, Miss Lilian Jones, and Miss Morrell, and Messrs. Wal Lesby, Walter F. Lanham, and Victor Lodge.

"National Society of Electrotypers and Stereotypers."

The toast of "The King" having been duly honoured, Mr. A. E. Holmes proposed the "National Society of Electrotypers and Stereotypers." Mr. Holmes said he felt it an honour in being asked to propose this toast. The members of their Society were fully aware of the progress made during Mr. Miller's presidency. He could remember very well when they had many societies and few members, and he was pleased that as a result of amalgamation they had now one efficient Society with more members, and with probably a larger percentage of the craft inside its ranks than any other society connected with the printing industry. Its effectiveness had been obtained by thorough organisation, and he ventured to say no society had done what they had during recent years in eradicating the assistant in the shop and making all its members fully qualified mechanics. He hoped the Society would continue to reflect the progress it had made during Mr. Miller's tenure of office, for he believed it had even yet an immense future before it. (Cheers.)

"Our Past President."

The toast was enthusiastically received, and was responded to by Mr. W. C. Warren, who also proposed "Our Past President." Mr. Warren, after thanking Mr. Holmes for the cordial manner in which he had referred to their Society, said in giving the toast of the evening, that of "Our Past President," he frankly confessed to have mingled feelings of regret and pleasure. He wished on behalf of the Society to thank their dear old friend, Jim Miller, for the many things he had done for the trade throughout the country. It was with a good deal of regret, both official and personal, that they were parting with him as one of the officials of the Society. Although parting officially there was some satisfaction in the fact that he was going to retain his membership in the trade, and they would still be able to enjoy his fellowship. In 1909, when Mr. Miller was first elected president, their Society had a small membership with a big name. Since then they had largely increased their membership and had reduced the name of the Society. Jim Miller took over the presidency when there was not much competition for the job. (Laughter.) That was not, of course, why he got it. The branches at that time required a man with Mr. Miller's ideals and determination to see them through. Mr. Miller took it over when they

had half the number of members, and one-third of the branches that they had to-day. At that time the Post Office was sufficient for their national funds. But things had changed. The change that had taken place in the constitution of the Society and in the general conditions of their trade throughout the country had been due to the fair and wise manner in which the deliberations of their council had been presided over by the man whom they had met together to honour that evening. (Hear, hear.) Representatives at the council meetings had been able to go away and feel that they had had fair and impartial justice meted out to them. Because of these things their branch of the trade throughout Great Britain desired to show their esteem and regard by presenting to their friend a small token of their appreciation in remembrance of the days of his presidency.

Mr. Warren then presented to Mr. Miller, on behalf of the members of the Society in England, Scotland and Wales, a beautifully executed illuminated address; a handsome

station given him that evening; and yet he could not help feeling how little able he was to give anything like a return for their most magnificent gift and token of appreciation. He was not worried about the gifts; they were of material value. What he was more concerned about was the general secretary's assurances that he would still retain the friendship of the members scattered through the United Kingdom. That to him was the greatest testimonial he could have. Credit for the success that had attended his efforts must also be given to the splendid comradeship of those who had been elected to serve with him. He asked representatives of the National Council present to take back to the members his very grateful appreciation of their recognition of his services. He also extended his thanks to Mr. Warren for the excellent assistance he had rendered to the Council, and also to the stewards for promoting such a splendid gathering in his honour. On behalf of Mrs. Miller he expressed his thanks for so kindly remembering her with such a magnificent little present. (Cheers.)

"National Printing and Kindred Trades."

In proposing this toast Mr. Middleton said the P.K.T.F. needed no introduction to them. Its undertakings and aspirations were well known to printers of this country. Dealing with one or two aspects of the work of the Federation, he spoke of the Apprentice Agreement, brought about to provide a livelihood for the men when they returned after fighting for their country, and the Betterment Scheme,

Flashlight Photograph of Part of the Company.

half-hunter gold watch with his initials engraved on the back and also bearing the following inscription: "Presented to James Miller, March 11th, 1922, in appreciation of his valuable services during twelve years as president of the National Society of Electrotypers and Stereotypers." Accompanying the watch was a gold chain, to which was attached the gold badge of the Society. To Mrs. Miller was handed a diamond pendant in gold.

Speaking of the relations which existed in their trade, Mr. Warren said he was pleased to see present a representative of the Trade Employers, a body with whom their Society was on the most friendly terms; and also several representatives of the Overseers' Association. He thought it symbolic of the good spirit that prevailed in the stereotyping trade that he should have yet another presentation sprung upon him to hand to Mr. Miller, and that from the president of the Overseers' Association, in the form of a combined umbrella and walking stick.

The toast was heartily accorded with musical honours.

Mr. Miller, in reply, said he did not know where to look for inspiration for words that would enable him to adequately express his thanks. He said he would rather suffer a tussle in a discussion, and rule everyone out of order, than try to make a speech. He could not help feeling proud at the demon-

stration given him that evening; and yet he could not help feeling how little able he was to give anything like a return for their most magnificent gift and token of appreciation. He was not worried about the gifts; they were of material value. What he was more concerned about was the general secretary's assurances that he would still retain the friendship of the members scattered through the United Kingdom. That to him was the greatest testimonial he could have. Credit for the success that had attended his efforts must also be given to the splendid comradeship of those who had been elected to serve with him. He asked representatives of the National Council present to take back to the members his very grateful appreciation of their recognition of his services. He also extended his thanks to Mr. Warren for the excellent assistance he had rendered to the Council, and also to the stewards for promoting such a splendid gathering in his honour. On behalf of Mrs. Miller he expressed his thanks for so kindly remembering her with such a magnificent little present. (Cheers.)

The toast was heartily endorsed.

Mr. C. W. Bowerman, M.P., in replying, said he appreciated Mr. Middleton's reference to his sane advice, for it was the first time in his life that he had received a testimony as to his sanity. He had dined with comps, machine-minders, bookbinders, and the N.A.T.S.O.P.A., but it was the first time he had had the privilege of dining with stereotypers. If that was a sample of the fare customarily provided for their guests, he hoped to be again favoured with an invitation. (Hear, hear.) Speaking of the Federation, he said their Society was one of the strongest in it, which was due to the fact that they were so well knit together. He thought they occupied a unique position, less as they were by a strong band of men, and being also backed up by their employers. It was not every organisation that could claim

such a good understanding existing between the two sides. The Federation after all was what the rank and file made it, and though the Federation's task was a difficult one, he thought such gatherings as the present, with its many expressions of sentiment, would go a long way in helping to inspire it. In that spirit he wished them to go forward, remembering at the same time that other societies were not so strong as their own, and perhaps were not in a position to resist so successfully as they were. Mr. Bowerman concluded by paying a tribute to the retiring president, and hoped that the fine spirit prevailing in their midst would last for many years to come. (Cheers.)

"The Visitors."

Mr. I. G. Maidment, in proposing this toast, said many of their visitors that evening connected with the industry were leaders of the trade union movement, and he considered it

Mr. Jas. Miller.

necessary that they should place every confidence in them. Though they had already two of their visitors that evening in Parliament, they hoped soon to have a third in Mr. Isaacs.

Mr. T. E. Naylor, M.P., in responding, said it was always a pleasure to dine; it was a greater pleasure to dine with your friends, and a still greater one to dine at your friends' expense. (Laughter.) Regarding Mr. Maidment's assurances to the effect that wives waited up every night for their husbands' return, Mr. Naylor thought it was right and proper that the ladies should have an opportunity once in a few years of seeing how their husbands spent their time. (Laughter.)

Captain Burden also expressed his great pleasure at the opportunity afforded him of witnessing the splendid manner in which the services of Mr. Miller had been recognised. He felt sure he was echoing the sentiments of every visitor when he said that it had been a very enjoyable evening.

Mr. G. A. Isaacs, in a brief but humorous speech, contended emphatically that he was not a visitor, but that he reckoned himself as one of the family. If he was not, then he claimed to be a lodger, and, more than that, he claimed the lodger's privileges. (Laughter.)

A memorable evening was brought to a close by the singing of "Auld Lang Syne."

Cardiff Paper and Print.

In our report of the recent lecture on paper manufacture at the Cardiff Technical College, given by Mr. F. Heckford, it should have been stated that the cinematograph film illustrating the making of paper at the Devon Valley Paper Mills, Hele, was kindly lent by Messrs. Wiggins, Teape and Co. The excellence of this film, which was taken on the occasion of the visit of the Prince of Wales, we have already mentioned; and at the Cardiff Technical College it greatly assisted the object of the lecture, which was to stimulate the interest of students attending the printing class at the Technical College.

At Mr. Heckford's lecture, by the way, refer-

G ENTLEMAN, with first-class connection amongst Wholesale Binders, Stationers and Box Makers, desires to represent Firm of good standing.—Reference, etc., upon application to Box 13895.

ence was made to Cardiff's high ambitions as a printing centre. Mr. Robert J. Webber, recently president of the South Wales Alliance of Master Printers, said "We want to make Cardiff a printing centre unequalled by any in South Wales. We have tremendous advantages in obtaining this, for not only have we the mills at our doors—(he referred to the Ely Paper Mills)—but we have also coal, so essential to the welfare of any industry." Mr. Webber pointed out that what was needed was the closer co-operation of the Cardiff Corporation, who by giving greater encouragement to the matter of technical education, particularly to the typographical section, would do much to bring about the desired end.

MAKE your own way and people will make way for you.

Sale of Printing Plant.

The plant of a small printing office at Elystan-street, Chelsea, was sold last week, Mr. Edwin W. Evans, of 150, Fleet-street, being the auctioneer. Among the lots disposed of, a double-demy "Quadrant" cylinder machine, by Powell and Son, with two sets of rollers, brought £35; a nearly new No. 12 foolscap-folio "Jardine" platen went for £40, and a 26-inch diagonal guillotine paper-cutter by the same maker for £47 10s. A No. 3 "Model" platen was knocked down at £20, and a No. 2 "Model" at £4 17s. 6d.; a wire stapling machine went for £2 12s. 6d., and a 2 h.-p. electric motor, by the British Thomson-Houston Co., for £15 10s. The type, galleys, and other material went at fair sale prices

THURSDAY, MARCH 16, 1922.

Printing Trade Wages.

THE conferences arranged by the Federation of Master Printers for the purpose of putting their proposals before the various trade unions affected, have now, we understand, all taken place, whilst the London Society of Compositors is also this week holding a meeting to consider the employers' proposals. A conference of representatives of the different unions is being called by the Printing and Kindred Trades' Federation to enable the societies to discuss together the communications which have been made. Special interest attaches to the detailed proposals—printed on another page—for the stabilising of wages in the printing trade. Of course, sliding-scale schemes have previously been brought forward in printing trade negotiations, but they have always been "turned down" by the unions. Why there should be an objection to a sliding scale as such, we do not know. Probably there is not. Industry generally seems to recognise it as a fair principle that some adjustment of wages should occur automatically in conformity with specified variations in the cost of living, and we notice that Mr. C. T. Cramp, the railway labour leader, in a speech the other day declared that the sliding scale had proved to be the railwaymen's salvation. Doubtless the crux of the problem is found in the fact that a sliding scale pre-supposes some agreed status of the worker, and the workers have feared that an agreement satisfactory to them was not within reach. The employers have, however, made it plain that they do not desire that this agreed status should be the pre-war status, and now in the new proposals for stabilising wages they boldly get down to definite figures in the matter. This opens the way for a more detailed and frank discussion than has yet taken place of the views of both sides, and it deserves the very careful consideration of the whole industry.

The Postage-Reduction Delay.

THE trading community is still being kept in suspense as to what may be expected in the way of reduction of postal rates at an early date. It seems there is still room to doubt whether Mr. Kellaway is to be allowed to

fulfil his promise that the Post Office surplus shall go to the relief of those who are paying the high postal charges. The strong opposition felt in business circles to the suggestion of diverting the expected surplus to other objects has already been made plain, and views on the subject are still being expressed. Thus, at the meeting of the council of the London Chamber of Commerce last week, a resolution, moved by Lord Blyth, was unanimously adopted and forwarded to the Chancellor of the Exchequer and to the Postmaster-General, stating the council's protest against the continuance of the present high postal charges and strongly urging the Government to give the business community the full benefit of these economies by way of reduction of postal rates from the commencement of the next financial year.

Some Reduction Likely Soon.

THERE are indications that early reductions in the postal rates on printed matter and post cards are probable. Thus at the banquet of the Incorporated Association of Retail Distributors, last week, Lord Burnham, who is a member of the Postal Commission, made a long speech on the subject of postal rates, in which he implied that relief might be expected in the near future, provided traders continued to impress its need on the Government. Moreover, Mr. Felix Blakemore, member of the Post Office Advisory Council, and president of the National Chamber of Trade, is reported to have stated in a speech at Grimsby that postal charges are to be reduced from April 1st. No confirmation or denial of this statement could be obtained at the G.P.O. The only official reply was, "Nothing about the matter can be said at present." In the absence of Mr. Blakemore, however, Mr. P. Howling, general secretary of the National Chamber of Trade, informed a Press representative that while reductions would undoubtedly occur on April 1st, their extent depended on critical negotiations at present taking place between the Treasury and the P.M.G.

Printing from Abroad.

OFFERS to do British printing on the Continent and circulars of British firms printed abroad are still being received in this country much to the chagrin of printers and paper-makers. Printers in Budapest are particularly active just now in offering to do the work at astounding prices, and one particular firm stresses the point that "wages here are manifold less than anywhere else." The offers made are of a very extraordinary character. In one case post cards in two colours and including printing, addressing and postage, are offered at 50 for 1s., whereas if posted in this country the postage alone, without taking account of the printing or any other labour involved, would be 4s. 2d. Lithographed three-colour pictorial post cards are offered at 2,000 for 60s., including advertisement on back of card, postage and so on.

That Seed Catalogue.

IT will be remembered, by the way, that when Messrs. Ryder, the seed dealers of St. Albans, recently published a small seed catalogue from abroad—as reported in our issue of February 23rd—they explained that they took this course as "an object lesson," and stated that before doing so they consulted several large English printing firms, and to their surprise their proposal met at once with "most enthusiastic approval and support." We have not ourselves found British printers enthusiastic over cases which serve to show how their trade can be taken away from them, and Mr. A. E. Holmes, of the Printing and Kindred Trades Federation, informs us that he has made inquiries as to the "approval and support" given to Messrs. Ryder's action and cannot find that any such sanction has been given from the organised printing trade, either on the side of the employers or of the trade unions.

THE Home Labour Market depends upon patronage of British Industries for the much desired revival. Every imported finished product helps to keep back the revival.

Stabilising Printing Trade Wages.

Important Proposals Put Forward by the Employers' Representatives.

In connection with the current movement for revision of wages in the printing trade, the employers' representatives are, as we have previously briefly indicated, making an effort to establish some understanding which shall cause variations in the cost of living to be reflected in wages without the need for the labour and unsettlement that are involved in frequently-recurring wages negotiations.

The statement which follows contains in detail the employers' proposals for stabilisation of wages as put to the Typographical Association. Similar statements—with the necessary variations in the basic wages—have been submitted to all the other trade unions concerned.

The following facts, says the statement, are put forward as a basis for discussion in the hope that their adoption may facilitate adjustment of wages in the printing industry, during the period in which, in common with other British industries, it endeavours to reach new normal levels in the prices of its products and its cost of production.

Estimating Wage Reduction Now Due.

The Board of Trade index figure when wages reached the highest point was 168 points; the index figure published on February 15th, 1922, was 88 points; this is a fall of 80 points.

The wages of Typographical Association members in a Grade 1 town in 1914 were 38s. 6d.; at the highest point they were 97s. 6d.: The total advances amounted to 59s.—equivalent to an advance for each point of 4.2d.

If wages were to fall at the same rate in proportion to the cost of living as they increased, it will be seen that at 4.2d. per point, the fall of 80 points amounts to 28s., towards which sum a reduction of 7s. 6d. has been agreed and put in force, showing that wages at the present day purchasing power of the sovereign are in effect 20s. 6d. per week above the equivalent of the pre-war wage.

If the financial benefits of the payment for the six statutory holidays and a week's summer holiday be taken into account—amounting, as they do, to 3s. 5d. per week—wages in a Grade 1 town are actually 23s. 11d. per week above the equivalent of the pre-war wage. This does not include the cost of the shorter working week, which must be found by the employer, and which increases the selling prices of the products of the industry. (This reduction in hours costs actually 5s. 7d. per week).

The employers have repeatedly stated that it is neither their desire nor their intention to seek reductions in wages to the level of pre-war rates, always, of course, having regard to the state of the industry and the economic conditions of the country. The employers propose to give to the workpeople an addition to their basic wage by conceding to them the value of a certain number of points, which shall be allowed as improvements of basic wage.

The index figure taken when wages attained the highest point was 168; the index figure published on February 15th, 1922, was 88—being a difference of 80 points. Allow, for example, for improvement of basic wage, the value of, say, 12 points. There remains to be considered the value of 68 points. Taking the value of these 68 points at 4.2d. per point, we get an amount of 23s. 9d., of which, after deduction already agreed on, of 7s. 6d., there is left an amount of 16s. 3d. per week, which the employers consider a justifiable reduction at the present time.

Principle of Future Wage Adjustment.

For future variations it is suggested that when a rise or fall of 6 points in the index figure takes place, the rate of wages shall be varied by 2s., taking the value of each point at 4d., i.e., the rate of wage shall be varied when the cost of living figure rises to 94 or 100, or falls to 82, 76, and so on.

It is proposed that if at any time the cost of living figure exceeds 120 or falls below 50, the operation of the scheme shall be suspended until after conference between representatives of the employers and the workpeople has decided upon the confirmation or revision of the scheme.

The following procedure is proposed for the regulation of variations in the rate of wage in accordance with the increase or decrease of the cost of living as indicated by the index figure: (1) That one month's grace shall be

given when the change in the index figure justified an alteration; (2) if during the month of grace the figure again varies upward from the point justifying an alteration no variation shall take place; (3) all alterations shall come into force on the pay day in the first week of the month next following after the index figure published about the 15th day of each month has shown an alteration to be justified.

EXAMPLE.—If the index figure on February 15th justifies an alteration it will need to be confirmed by the index figure on March 15th, and will become effective on first pay day in April.

WEST AND NORTH-WEST London Master Printers' Association

Lecture by Mr. Chas. T. Jacobi.

To printers who have an interest in their craft the name of Mr. Charles T. Jacobi, of the Chiswick Press, stands for all that is dignified and chaste in typography, and the West and North-West London Master Printers' Association was fortunate to secure him to give an address at their meeting on Wednesday, last week, at Westbourne Park.

A fair number of members attended early to dispose of routine business, to the accompaniment of very excellent light refreshments, and having done their duty by both, the members and some visitors settled down to hear from a master craftsman a paper on "Simplified Typography as applied to Commercial Printing."

Suffice it to say that from the speaker himself and by the aid of the many characteristic and beautiful specimens of work emanating from the Chiswick Press, all bearing the hallmark of choice type-setting and superb press work, the audience were entertained in a manner rare indeed in the experience of the ordinary printer whose work lies in the directions more commonplace. All at least could be sufficiently impressed by the inspiration of the examples on view to attempt, in some degree, to follow out the principles which the speaker laid down as essentials to correct production and lasting beauty in the bookmaker's art.

At the close of his address Mr. Jacobi answered many questions which gave interesting sidelights on his work, and from his brief biographical references his hearers were able to realise how long and honourable has been his association with the craft.

Mr. J. R. Burt, who again places the Association under a great obligation to him for arranging the evening, voiced the sincere thanks of the members to the speaker for his inspiring address.

Messrs. W. L. Sidders, Davis and Wise, also joined in voicing the appreciation of all present.

Members are asked specially to note that the annual meeting of the Association will be held on Wednesday, April 12th, at Westbourne Park, when they should show by their presence their interest in the work of the Association.

A.T.P.

[A full account of Mr. Jacobi's lecture will appear in next week's issue.—E.D.]

Printing Trade Football.

The following matches were played on the dates mentioned, and resulted as indicated:—

Printers' Football League.

March 4th.—Armoury 4, Oyez 2; St Clement's Press 6, Co-operative Printing Society 1.

March 11th.—St. Clement's Press 7, Britannia 1; Armoury 3, Co-operative Printing Society 1.

LORD BEAVERBROOK, addressing the Leatherhead Brotherhood, on Sunday, said the ambition of newspaper proprietors was not always directed towards the making of fortunes, but lay sometimes in the direction of acquiring power. He urged that newspapers should sound an optimistic tone in order to encourage trade and create employment.

"MAN IN THE TWILIGHT," by Ridgwell Cullum, is an American novel which has its scenes in the pulp industry.

Printers' Managers and Overseers ASSOCIATION.

PARENT ASSOCIATION.

March Monthly Meeting.

The principal item on the agenda of the meeting of the above-named Association held on Tuesday of last week at the "Old Bell," Holborn, was a lecture on "Colour Printing in America" by Mr. Fred. W. Seeley, a Manchester member of the Association, whose very informative treatment of his subject is reported elsewhere in this issue. There was a very full attendance of members, and the president, Mr. S. M. Bateman, occupied the chair.

The business part of the meeting was quickly disposed of.

Election was made, in customary formal manner, of one new member—Mr. J. R. Skinner (Burrup, Mathieson and Sprague, Ltd., overseer, composing department)—who was personally welcomed into the Association by the president.

In reply to Mr. G. H. T. Freeman, it was stated that the votes at the disposal of the P. M. and O. A. for the forthcoming Printers' Pension Election totalled just over 700. On Mr. Freeman's proposition it was agreed that these votes be equally divided amongst the Association's four candidates.

The chairman reported that Mr. E. H. Berryman was making satisfactory progress after his recent operation, and expressed the Association's good wishes for his early recovery.

The lecturer was then introduced to the meeting, Mr. Bateman reminding members that Mr. Seeley, when previously a London member, had been an extremely active and useful one, and was for many years a trustee of the Association.

389,000,000 Postings Less!

SIR,—In the mass of figures given in the recent Post Office statement it is not easy to determine how these colossal figures have been reached. The following tabulated statement will give the items:—The high postal charges are responsible for this huge falling off in the nation's correspondence.

The total falling off is

389,000,000 communications.

This total is made up in the following manner:—

Letters	...	110,000,000
Post cards	...	77,000,000
Printed matter	...	190,000,000
Newspapers	...	12,000,000

It will be noticed that the greatest falling off is in the carrying of printed matter communications, the number being 190,000,000. This printed matter, in the form of catalogues, booklets, leaflets, etc., is publicity literature, the life-blood of commerce and the backbone of the printing and allied trades. I have emphasised over and over again in the Press, to the Premier, to the Chancellor of the Exchequer, to the Postmaster-General, and to many members of Parliament that the half-penny postal rate on printed matter is the most important of all postal rates, and that it should be immediately re-established. The policy which has caused the falling off of 389,000,000 communications in the nation's correspondence is a disgrace to any Government.

Yours, etc.,

W. H. BURCHELL.

Governing Director, Caxton Press, Ltd.
Hon. Sec., Association of Master Printers of the London Central Districts.

13-15, Leather-lane, E.C.1.
March 8th, 1922.

ESTIMATES FOR GOVERNMENT STATIONERY AND PRINTING.—The total net estimate for 1922-23 for stationery and printing is £2,679,937; required on account (a provision for between four and five months' expenditure), £900,000. The total net estimate for 1921-22 (subject to transfers) was £4,187,444.

DIVIDENDS AND REPORTS.

RAPHAEL TUCK AND SONS.—Interim dividend on ordinary shares at the rate of 8 per cent., less tax, for six months ending October 31st, 1921, payable March 31st (against 10 per cent. per annum last year).

THE Yorkshire Post.—The annual meeting of the Yorkshire Conservative Newspaper Co., proprietors of the Yorkshire Post and the Yorkshire Evening Post, was held on Friday at the offices in Leeds, under the chairmanship of the Hon. Rupert Beckett. The report, which recommended a dividend of £1 15s. per share, was duly carried, and the Hon. Sir W. G. Beckett, Mr. D. B. Wilson, and Mr. A. M. Sagar-Musgrave were re-elected directors. A vote of thanks was passed to the editors, commercial manager, and staffs of the papers, and satisfaction was expressed with the results achieved, notwithstanding the general trade depression.

NEW COMPANIES.

MATTHEWS, HUNTER AND WHISH, LTD.—Capital £6,000 in £1 shares; to adopt an agreement with E. A. H. Hunter and C. W. Matthews and to carry on the business of manufacturing stationers, printers, lithographers, envelope makers, manufacturers of toys, games and fancy goods, etc. Private company. First directors: E. H. Hunter, C. W. Matthews and R. V. Whish. Registered office: 5, Grocers' Hall court, E.C.2.

L. C. P. MANUFACTURING CO., LTD.—Capital £1,000 in £1 shares; dealers in or agents for typewriting, carbon and other papers, typewriter sundries and accessories, etc. Private company. Subscribers: E. Eru and J. D. McAra. First directors: F. Poole, J. D. McAra and E. G. Watkins. Registered office: 46, Peartree-street, Central-street, E.C.1.

MONEY HICKS AND MILLS, LTD.—Capital £100 in 1s. shares; paper manufacturers and merchants, advertising contractors, tin and cardboard box makers, manufacturing stationers, etc. Private company. First directors: A. F. Money Hicks, A. A. Mills, Mrs. G. Hicks and Mrs. A. Elsworthy. Registered office: 297, Haydon's-road, Wimbledon, S.W.

McGAVIGAN, LTD.—Capital £2,000 in £1 shares; printers, publishers, lithographers, engravers, book sellers, stationers, etc. Private company. First directors: J. Lindsay McGavigan, J. E. Murphy and Mary A. Byers. Registered office: 126, Renfield-street, Glasgow.

SOUTH WALES COMMERCIAL AND PRIVATE SCHOOL CO., LTD.—Capital £4,000 in £50 shares; dealers in books, stationery, etc. Private company. First directors: H. E. Reed and D. T. Richards. Registered office: Page-field House, Page-street, Swansea.

GENEALOGICAL PUBLISHING CO., LTD.—Capital £750 in 1s. shares; to acquire the business of Genealogical Publications, Ltd., and to carry on the business of proprietors and publishers of books, newspapers, journals, magazines, periodicals and others literary works, etc. Private company. Subscribers: A. S. Prall (?) and G. D. Pegrum. Registered office: 95a, Chancery-lane, W.C.

HUTSON BROTHERS, LTD.—Capital £1,500, in £1 shares; to take over the business of printers of pictorial post cards, publishers and stationers carried on at 53a, Aldersgate-street, E.C., as Hutson Brothers, and to adopt an agreement with P. Hutson. Private company. First directors: P. Hutson, A. L. Gunn, A. G. Reynolds. Registered office, 53, Aldersgate-street, E.C.

R. A. BARTLETT, LTD.—Capital £20,000, in £1 shares (5,000 8 p.c. non-cum. pref. and 15,000 ord.); to carry on the business of printers, lithographers, makers of printing and other inks, importers of lithographic stones, makers of lithographic papers and materials, paints, colours and varnishes, importers of, and dealers in, copal, damar, congo and all kinds of gums, gum-rosins and kindred substances, beeswax, asphaltum, shellac, chemicals, etc. Private company. The permanent directors are: R. A. Bartlett and A. E. Earl. Registered office: 8, Hythe-road, Hammersmith, W.

WHITE HART PRESS, LTD.—Capital £1,000, in 800 ordinary shares of £1 each and 400 ordinary shares of 10s. each; to adopt an agreement with Hogg and Knight, Ltd., and to carry on the business of general printers, etc. Private company. First directors: W. G. Briggs and T. Hogg. Registered office: White Hart-lane and Core-lane, Tottenham, N.17.

INK PRODUCTS, LTD.—Capital £5,000, in £1 shares; to adopt an agreement with E. W. Touboul and R. Hulme, and to carry on the business of manufacturers of, and dealers in, printing ink and other products, products from the residue of a certain process of digesting wood referred to in above agreement. Private company. Subscribers: C. Osborne and J. J. Perrott. Registered office: 4, London-wall-buildings, E.C.

W. H. CROHN AND CO., LTD.—Capital £200, in £1 shares; to adopt an agreement with W. H. Crohn, L. J. Rix and H. Salter for the sale of the business of stationers carried on by them at 2, Cooper-street, Manchester, as the "Addiator Agency," and to carry on the business of stationers, dealers in office specialities and furniture, advertising devices, etc. Private company. Subscribers: W. H. Crohn, L. J. Rix, and H. Salter. Registered office: 2, Cooper-street, Manchester.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

L. UPCOTT GILL and SON, LTD.—Particulars of £10,000 debentures, authorised February 14th, 1922; present issue £10; charged on the company's undertaking and property, present and future, including uncalled capital (but excluding a certain printing machine and electrical equipment).

POPULAR PUBLICATIONS, LTD.—Debenture dated February 16th, 1922, to secure all sums due or to become due not exceeding £4,000, charged on the company's undertaking and property, present and future, including uncalled capital. Holder: C. R. Scriven, Kingscote, Kingswood, Burgh Heath.

ECLIPSE NOVELTIES, LTD.—Issue on February 20th, 1922, of £500 debentures, part of a series already registered.

MARKET SERVICE PRESS, LTD.—Five debentures dated February 18th, 1922, to secure £50 each, charged on the company's property, present and future, including uncalled capital. Holders: South London Press, Ltd., 70-74, London-road, S.E.1.

BANKRUPTCIES, etc.

THE PERFECT MANUFACTURING CO.—A sitting of the London Bankruptcy Court was held before Mr. Registrar Mellor last week for the public examination of Robert Leslie Wise and James George Marsden, who traded in partnership as the "Perfect Manufacturing Co.," wholesale manufacturing stationers, bookbinders and pattern card makers, at 10, New Union-street, E.C. The debtors filed their own petition on December 19th, 1921, and have lodged accounts showing liabilities £951, against assets £10, apart from bad debts £50. In the course of their evidence the debtors stated that in the early part of 1918, they commenced a new business as bookbinders, manufacturing stationers and printers. They continued in that way until March, 1921, when they sold the good will and plant save and except (1) the part relating to the manufacture of pattern cards and dealing in fancy leather goods, and (2) their trading name, for £450, and continued to trade under the same style until November last, when the landlord distrained and sold their stock and effects. Creditors continued to press until they petitioned the Court. They attributed the failure of the firm to depression in trade and to heavy overhead charges. The debtor Wise added that he served in H.M. Army from December, 1916, till March, 1919, and he had also been employed as a traveller, but since December, 1919, he had devoted his whole time to the partnership business. He had one separate liability of £50 for cash advanced, and no private assets. The debtor Marsden stated that prior to January, 1920, he had for 31 years been employed as departmental manager by a firm of pattern card makers and printers, and he then left them to devote the whole of his time to the partnership affairs. He owed separate debts £65, against which he had household furniture £22. The examination of both debtors was ordered to be concluded.

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIP DISSOLVED.

Henry Mullineaux and William Harding, Horwich, Lancs., printers.

THE BANKRUPTCY ACT, 1914.

RECEIVING ORDERS.

Skinner, Brierley and Co., 22, Great James-street, Bedford-row, stationers, March 10th. Public examination, May 23rd, at Bankruptcy-buildings, Carey-street.

William Edward Bruce, Union-street, Batley, paper blind manufacturer, March 10th.

In the House of Commons, on Monday, Mr. Baldwin told Mr. G. Locker-Lampson that he recently agreed that the Board of Trade Journal should accept advertisements, and with the revenue from this source he fully expected it would be self-supporting.

Printers' Handsome War Memorial.

Spottiswoode-Ballantyne Dedication Ceremony.

At the works of Messrs. Spottiswoode, Ballantyne and Co., Ltd.—1, New-street-square, London, E.C. there was unveiled on Thursday last a very beautiful mural tablet, which was, with impressive ceremony, dedicated in memory of those members of the firm's staff who made the supreme sacrifice in the Great War.

We are able to give herewith an illustration of this memorial which is of coloured alabaster, marble and glass mosaic, and the

and a number of relatives of the fallen. There were present also a large body of employees from all departments, including office staff, overseers and workpeople.

The service opened with a few short prayers, followed by the hearty singing of the hymn, "O God our help in ages past," and then Mr. E. C. Austen-Leigh, as chairman of directors, delivered a short address.

Address by Mr. E. C. Austen-Leigh.

Mr. Austen-Leigh recalled the history of the anxious weeks which immediately preceded and succeeded the entrance of this country into the War. He referred to the rally to the colours in the early days of hostilities, and intimated that the firm of Spottiswoode-Ballantyne had been nobly represented therein. All departments, he said, had

the service came to a fitting end, the silence being broken by the bugle call of the Réveillée—suggesting the thought that gratitude for the past and high resolution for the future find their best expression in alert attention to the duty of the present hour.

Caxton Convalescent Home.

The annual meeting of the Governing Board of the Caxton Convalescent Home, Limsfield, was held on Saturday afternoon last, at St. Bride Institute, E.C., Mr. C. J. Drummond, J.P., in the chair. There was a good attendance of representatives and col-

design is of the Italian Renaissance period. The names are incised and painted on three panels of white alabaster, each panel being separated from the others, and surrounded by a border of coloured glass mosaic. The lettering is Roman type based on the best examples of Italian monumental lettering, and there are 26 names, below each name being the rank and regiment of the man commemorated. The frieze inscription and the text below the tablet are incised and gilded. The carved cornice is supported by richly carved pilasters inlaid with blue mosaic. These pilasters have carved caps and rest on carved corbels, the caps and corbels being enriched by gilding. In order to show up the tablet it is mounted on slabs of Irish green (or Connemara) marble.

The memorial is erected in the clerical offices on the first floor, where on Thursday a large space was cleared for the occasion of the unveiling.

The dedication service was conducted by the Right Rev. Bishop King, D.D., secretary of the Society for the Propagation of the Gospel in Foreign Parts. Attending the ceremony as representatives of the management were: Mr. and Mrs. E. C. Austen-Leigh, Mr. R. A. Austen-Leigh, Miss Austen-Leigh, Mrs. George Spottiswoode, Miss M. Spottiswoode, Mr. R. W. Hanson, Miss M. Chenevix-Trench, Mr. and Mrs. R. S. Herries, Mr. M. E. Impy, Mr. R. Affleck and Mr. H. J. Matthews; and the visitors included Mr. T. E. Naylor, M.P.; (secretary London Society of Compositors), Mr. W. Whyte (secretary London Master Printers' Association), Mr. Frank Colebrook

participated in answering the call, and every branch of the firm. The London house had sent 248 men; the Colchester branch, 108; the Eton branch, 19—making 75 in all. Amid profound and respectful silence, he spoke not only of those who went never to return, and whom this memorial was more particularly designed to hold in memory, but also of those who, having answered the call, returned again to peaceful avocations. To all of these, the living and the dead, he expressed grateful thanks on behalf of those present. The firm proposed, he said, to place memorial tablets in each of their branches; this tablet was to be dedicated to the memory of the 26 men from New-street-square who made the supreme sacrifice. There was another soldier, not mentioned on the marble, to whom he would refer. This was Captain John Spottiswoode, whose name would ever be treasured by those connected with the company. Leaving those he loved, after having served in the South African War, where he was wounded, he again accepted the hazard of battle for his country's sake, and laid down his life in her cause.

After quoting the first three verses of "The Supreme Sacrifice," Mr. Austen-Leigh stressed the value of the memory of the heroic dead as a reminder to those who follow after.

The memorial was unveiled by Mrs. E. C. Austen-Leigh, and after the Bishop had pronounced the words of dedication—which included a recitation of the names of the fallen—a bugler sounded the "Last Post." A few further prayers followed; the Bishop pronounced an impressive benediction; and then

lectors, including the Right Hon. C. W. Bowerman, M.P., treasurer; Messrs. Herbert C. Bolton and W. Vandy, vice-presidents; Messrs E. Briscoe and J. J. Deasy, trustees; Mr. W. F. France, J.P.; and Mr. H. F. Wagdin, auditor.

The annual report showed that the total income for the year had reached £3,114 7s. 10d., an increase of £340 18s. 6d. on the previous year. Expenditure had shown a large increase, due to the extra expenses connected with the maintenance of an enlarged building, with the increase of patients, etc. This had all been met, and £308 14s. 1d. placed to reserve fund. The event of the year was the opening of the Printing Trades' War Memorial Wing, erected at a cost of over £8,000, towards which £6,000 has been subscribed, leaving a further £2,000 to be raised. The committee invite further donations towards this object.

The report and balance sheet were adopted, and Mr. C. J. Drummond was re-elected president, Mr. C. W. Bowerman treasurer, and Mr S. J. White secretary.

Vacancies on the committee of management were filled by the election of Messrs. E. Guest (St. Luke's Printing Works), H. Harrison (Foreign Office Press), and H. W. Parr (Eyre and Spottiswoode, E.C.).

The presentation of five honorary collectors' certificates to members who had collected for the Home for periods of ten years and upwards brought an interesting meeting to a close.

Vellum Binders' & Machine Rulers PENSION SOCIETY.

A good muster of members and friends assembled at the St. Bride Institute upon the occasion of the 79th annual meeting of the above-named Society, Captain F. A. Garrett, M.C. (Messrs. R. T. Tanner and Co., Ltd.), presiding.

The secretary, Mr. F. C. Peacock, after reading the notice convening the meeting, said all present would be pleased to meet Capt. Garrett, not only for his own sake, but also because he was the son of their respected hon. treasurer, Mr. Frank Garrett, who for so long had been identified with this Society.

Minutes of last annual meeting having been read and confirmed, letters of apology from Messrs. Frank Willmott, H. V. Gibbs and others regretting their inability to be present, were read; and the meeting proceeded to elect three scrutineers of the ballot for two pensioners, Messrs. F. C. Price, E. A. Wadley and E. Gadenne being selected.

Captain Garrett, upon rising to propose the adoption of the seventy-ninth annual report and balance sheet had a very cordial reception, and said it was with some trepidation that he accepted the position of chairman on that occasion, for when he looked down the list of past chairmen he was faced with the names of men who were known not only in the printing and stationery trades, but throughout the world, men who had assisted to build up and maintain the prestige and position of British trade; and it was, he thought, doing a young man like himself an honour when they invited him to follow those whose names were in most instances a household word in their trade. He was pleased to see by the report that the past year had been a successful one, both financially and in new membership, and he felt that under the guidance of their experienced secretary and executive, the progress made in the past would be continued in the future. The sound condition of their finance was mainly due to them, and he was pleased to see they were now adding a further tower of strength by obtaining Sir W. A. Waterlow, K.B.E., as their new trustee. They would have submitted to them that evening a resolution by Mr. C. Atkins on the subject of the State Old Age Pension Act and the unsatisfactory manner in which certain of its provisions affected members of societies like their own, it was not his intention, even were he able, to anticipate Mr. Atkins' resolution, but there was one feature that particularly appealed to him, and that was the difference between a State pension and a pension like their own; a recipient of a State pension was a mere cypher, known only by his number, entirely unknown to those who had its administration, but with this Society it was a case of helping some old friend and comrade, one whom in most instances they had known, perhaps worked with for many years, and no State pension could ever give that feeling of satisfaction felt by both giver and receiver in their own case. In conclusion, he trusted the Society would still continue their good work, would still find many friends to assist them financially and otherwise, and he had much pleasure in moving that the seventy-ninth annual report and balance sheet be adopted.

This, having been seconded by Mr. W. T. Higgins, was carried unanimously.

State Penalty on Thrift.

Mr. C. W. Atkins then proposed "That we call upon the friendly societies and trade unions to take at once energetic steps to amend the national Old Age Pension Act, so that recipients of same shall no longer be penalised for making additional provision for their old age, i.e., that the superannuation grant from their societies be free from assessment as income," and that copies of this resolution be sent to the General Council of the Trades Union Congress, the friendly societies, the Labour Party and the Prime Minister.

The proposer gave many instances of the hardship, entailed upon members of this and other societies, who had struggled under extremely difficult conditions, in work and out, for forty or fifty years to keep up their payments, only to find themselves penalised by the State for their thrift and self-sacrifice, and when they became 70 reduced to the same position as another who had through life made no provision, no sacrifice or effort to provide something for his time of need.

Mr. P. R. Ayes seconded the resolution, which was carried *nem. con.*

The secretary having given a report on the

completion of a special old age pension, which had been provided for the Society's members by the Printing and Allied Trades Charity Sports Association, Mr. J. F. Walker proposed and Mr. C. W. Atkins seconded, "That the pension be named the 'H. F. Parker Charity Sports Association Special Pension,'" as a slight memento of their appreciation of the indefatigable efforts of their good friend Mr. Parker to bring the same to a successful issue. This was carried with acclamation.

The meeting unanimously confirmed the appointment of Sir Wm. A. Waterlow, K.B.E., as a trustee of the Society, with their sincere thanks to him for his kindness in accepting the position.

Votes of thanks having been passed to the trustees, hon. treasurer, auditors and committee it was proposed and carried that Messrs. R. W. Pearse, sen., H. J. Mills, J. F. Walker and Thos. Hunt, retiring according to rule, be re-elected. It was also unanimously resolved that Mr. F. C. Peacock be re-elected as secretary.

The chairman here stated that the scrutineers had completed their labours and that Miss S. A. Johnson and Mr. S. T. Sharp had been elected pensioners, and that Miss J. Marr would receive the grant to unsuccessful candidates.

Mr. H. R. Danford (H. R. Danford and Sons, Ltd.), said he rose with much pleasure to propose a vote of thanks to Capt. Garrett for the genial and happy manner in which he had performed his duties as chairman that evening, he was pleased to see a young man come along and continue the good work of helping those who endeavour to help themselves. He was the more glad as it showed he was the son of a father (their worthy treasurer) who had for so long worked in the interests of this Society. Mr. T. J. Hunt (T. J. Hunt, Ltd.), having genially seconded, the vote of thanks was put to the meeting and carried with acclamation, bringing a very businesslike meeting to a close.

Readers' Pensions Committee.

The annual meeting of the Readers' Pensions Committee was held at St. Bride Institute, Bride-lane, E.C.4, on Saturday afternoon, when there was a large attendance of members. In the absence of the chairman (Mr. James Feldwick), Mr. W. H. Shortell was asked to preside during the first part of the proceedings.

The reading of minutes was followed by the election of a large number of new members.

The annual report showed that a very successful year's work had been accomplished, a record amount having been secured in aid of the funds at the dinner presided over in October by Sir Wm. Berry, Bart., enabling the executive to complete the thirteenth pension (named the W. H. Shortell pension to commemorate the work done by that gentleman during many years, first as secretary and then as treasurer), and establish the fourteenth (named the Sir Wm. Berry Pension, in recognition of the interest taken by the 1922 dinner chairman). Reference was also made in the report to the resignation, through ill health, of Mr. J. Feldwick (the chairman for many years), and a tribute paid to his devoted services to the Pensions Committee, and the executive's thanks were also accorded to Mr. W. A. Perkins for adding the chairman's work to that of the treasurer during the year.

The financial statement showed, after making provision for establishing Pensions 13 and 14, and paying £47 10s. on account of a fifteenth pension, a balance at bank and in hand of nearly £150. The total amount paid to the Printers' Pension Corporation to create pensions in the interest of readers since the committee's function was nearly £6,500.

The report and balance sheet were adopted, and a resolution passed expressing the meeting's thanks for past services, regrets for present ill health, and hopes for future improvement to Mr. James Feldwick, from whom a letter had been received expressing his sorrow at having to sever his official connection with the committee.

The following officers were elected:—President, Viscount Burnham, C.H.; chairman, Mr. W. A. Perkins; trustees, Messrs. J. Chandler and J. Randall; hon. treasurer, Mr. J. Hood; hon. secretaries, Mr. H. M. Gurr and Mr. Percy J. Greene; executive, Mr. C. G. Atherton, Mr. J. H. Bedford (hon. collector), Mr. A. C. Cook, Mr. W. Kemp, Mr. J. A. Goodall, Mr. E. A. Groves, Mr. H. C. Golding, Mr. G. J. Warne, and Mr. C. J. Tyrer.

Printing, Bookbinding & Kindred TRADES OVERSEERS' ASSOCIATION.

There was an unusually large attendance at the monthly meeting of the Association on the 7th inst. at St. Bride Institute, Bride-lane, E.C.4. The chair was occupied by the president, Mr. A. W. Hunt, and after some very brief routine business an interesting lecture was given by the Association's hon. solicitor, Mr. G. A. Clifford, entitled "A Famous Coffee House."

The minutes of the last (January) general meeting were read by the secretary, Mr. A. Cox, and confirmed.

In a letter arising out of the correspondence the Association decided that the allotment of the Printers' Pension votes it has for disposal should be left to the discretion of the executive.

The following were next elected to membership:—Messrs. W. A. Newark (binding) Wells and Co., and W. T. Wilson (warehouse) W. W. Sprague and Co. After extending a warm welcome to the two new members, the president called on Mr. G. A. Clifford for his address.

Mr. Clifford's short discourse, "A Famous Coffee House," dealt in an interesting way with the origin and present-day activities of "Lloyd's." Speaking first of the ancient coffee houses that existed in London where citizens met together to engage in political and business gossip, he explained how in the reign of Charles II. one of the keepers of these houses was prosecuted for selling a certain liquor called coffee. And how later, during the same king's reign a Bill was passed ordering all coffee houses to be demolished as being defamatory to His Majesty's Government.

After remarking that the anti-coffee ordinances soon fell into oblivion he brought his hearers to 1688, the year in which Edward Lloyd kept his coffee house in Tower-street, then one of the most important thoroughfares in London. Even at that time this famous coffee house was a notable resort of London merchants, and was one of the leading places of its kind in the city.

Mr. Clifford next spoke of Lloyd's removal of his business in 1692 to Lombard-street, and the publication of "Lloyd's News." This publication contained some very amusing accounts of the happenings of the times, and was suppressed in less than six months after its first appearance. "Lloyd's List" was next published and had for its primary object the supply of the latest information regarding the movements of vessels.

Mr. Clifford left the intervening period in the history of "Lloyd's" and brought his subject up to the present day, explaining in an interesting manner the functions of underwriters, subscribers and associates, the three classes which comprise the membership of the great corporation of the present time. In concluding, Mr. Clifford briefly described the ordinary routine of business at "Lloyd's" as carried on within its walls on the first floor of the Royal Exchange, and also made reference to the dead silence that immediately followed the ringing of a bell, in which the "Voice of the Caller" would announce the foundering or the loss of a vessel.

Several knotty points in relation to insurance were put to Mr. Clifford by Messrs. J. Fleming, R. W. Pearse and others, and a hearty vote of thanks was moved by the president to the lecturer for his address.

Before the meeting closed Mr. A. J. Daines said the arrangements for the annual dinner on Saturday, April 8th, at the Holborn Restaurant, were well in hand, and that Mr. Gilbert Chester had been asked to direct the concert items.

MANCHESTER PRINTERS.—Mr. C. E. Kerr of the Manchester College of Technology, gave an excellent lecture on Wednesday, March 8th, to the Rochdale Master Printers' Association. There was a good attendance to hear Mr. Kerr talk on "Type and Lay-Outs." By means of lantern slides and specimens he made the lecture very interesting, explaining the faults in arrangement and the ideal methods of grouping and spacing out. Under the auspices of the Printing and Kindred Trades Federation, a circular has been issued inviting the craftsmen of the town to a visit through the Manchester School of Technology on March 25th. After a tour of inspection, tea will be had at the School, after which the party will visit the works of the *Sunday Chronicle*.

Colour and Colour Printing.

Lecture by Mr. David Greenhill.

Mr. David Greenhill (manager Sun Engraving Co., Watford), visited the College of Technology, Manchester, on the 3rd inst., and delivered a lecture on "Colour and Colour Printing."

Mr. Greenhill first dealt with the theory, saying that colour was responsible to a certain extent for our mode of living, and although it was of such valuable aid to life, there were very few persons who could define colour. Speaking of light he very clearly explained how it was obtained by means of excessive vibration and its effect upon the human eye which resembled a camera in its operations. Colour having a pulling power five times that of black and white, he advocated its being more extensively used, and declared that there was a great future for those who took an interest in colour production.

Coming to the practical side in the use of three-colour so far as it affected the letterpress printer, he laid stress upon having the plates firmly mounted, the ordinary electro backing up metal being very handy because brads could be driven through the plate into the metal and the whole planed up true. For dressing and locking up the formes, wooden furniture, sidesticks and quoins should be avoided. There were various mechanical quoins on the market, one of the most popular being the Wickersham. On the blackboard he produced two diagrams showing the right and wrong positions for placing quoins for easy register purposes, the use of eight quoins, two on each of the four sides of the forme, he said, was wrong; six quoins only should be used, two on each of two opposite sides of the forme, and one quoin in the middle of each of the remaining two sides. The use of eight quoins instead of six quoins caused double labour if the operator desired to alter the position for accurate register. The lecturer recommended a fairly firm, but not too thick, interlay between the plate and the mount so as to bring up the solids; cylinders or platens should be as firm as possible; and for overlying not more than two cut-outs, one for the high lights and the other for the solids, the simple paper overlay being almost as quick as any other method; the paper to be printed upon should be perfectly flat and well matured according to the temperature of the pressroom; also, the paper should stand the use of the strongest ink possible. He emphasised bringing up the yellow plate to its highest pitch, as any details left out would deteriorate the finished production; layedges should be uniform for all the colours; true balance of colour maintained throughout the three printings, and registers secured.

The Discussion.

Mr. E. A. Bethel (president, Lancashire and Cheshire Alliance of Master Printers), when proposing a vote of thanks, said he believed Mr. Greenhill knew as much about colour as any person in London. As an employer, colour printing had always appealed to him, especially as a seller of print for the past 17 years in a city that was well known for its drab surroundings. Comparatively speaking he believed that there was less colour printing in Manchester than in any other part of the country. He advised the apprentices and students to take a keener interest in colour work, and so brighten their lives by producing something that would give joy to them for their expenditure of thought and labour.

Mr. E. Fisher, in seconding, remarked upon the feast of colour that Mr. Greenhill had been able to explain in such an intelligent manner. The colour chart that was on view demonstrated a very simple method of obtaining complementary colours. He advocated good machinery, as it was essential that the worker should have appliances that were accurate if he had to give of his best.

Mr. Stanley thought the atmospheric conditions in Manchester did not lend themselves to such high-class work as the specimens exhibited around the room. Compared with the climate in the South of England or the "dry" (this word is used advisedly) States of America and Canada, the atmosphere was against the local printer. In Manchester they had all the enthusiasm and youth, a proof of it being given that evening when about one hundred and twenty persons came to the lecture having traversed a downpour of rain. In many offices where the young craftsman was endeavouring to make good the temperature was very erratic, ranging anything from 45 to 60 degs.

or beyond, and therefore it was very trying to the youthful mind that desired to excel in its profession.

Mr. Edward McVay suggested that the young printer should make a closer study of colour, and know when to use transparent, semi-transparent or opaque pigments. Manchester did not lack enthusiasm, but he did admit that want of good organisation left much to be desired.

Mr. John Taylor (president) said it was not possible for all offices to use iron or metal mounts, but those who had tried Parker Boards had found them of service. Some pressmen wasted a lot of time in cutting out unnecessary overlays, but the two-ply overlay appeared rather harsh, unless the pressman was able to use a thin coating of rubber or blotting paper to soften the cut edges. Then in three-colour work where hand-feeding was in operation, there was the tendency to check and double-roll, which of course affected the completed print. In Continental countries there was no check on colour machines and this assisted the pressman in accurately adjusting the ink duct.

Several other speakers put forward questions and theories, and then

Mr. Greenhill replying said atmospheric troubles could be overcome as good work was being done in offices that had water nearly all around them. Temperature and humidity were very vital matters, therefore he suggested that 60 degs. temperature should, as far as possible, be maintained all through the paper and printing departments. In the States they usually overcame the atmospheric conditions by printing two colours close upon one another, and that method obviated register difficulties. It was a good thing to print the yellow separate and then run the red and blue on a two-colour machine. Of course interleaving would be necessary where this operation was carried on. Gas jets might be introduced so that the sheets could have assistance in quick drying whilst travelling from the printing cylinder. In the States the employer usually paid special attention to the plant, and he was far ahead of the average British employer in seeing that his machinery was up-to-date. As to using one firm's inks for good illustrations, it was a mere fallacy. The intelligent pressman who understood colour, could use any manufacturer's inks that were suitable, but he would not advise the uninitiated to attempt the mixing of different firms' colours, as they would be safer in using those which the block-maker recommended. WEE MAC.

Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

AUSTRALIA.

A firm of merchants and manufacturers' agents in Melbourne desire to obtain agencies of United Kingdom manufacturers of writing and printing papers and boards, fancy goods and toys, for the States of Victoria and Tasmania. (Reference No. 233.)

EGYPT.

The Department of Overseas Trade is informed by H.M. Commercial Agent for Egypt that the Central Stationery Stores Department, Ministry of Finance, Egypt, has invited tenders for the supply of cardboard portfolios as follows:—Portfolios, cardboard 28 by 37 by 7 cms., 2,000; portfolios, cardboard 70 by 70 by 7 cms., 700; portfolios, cardboard 85 by 75 by 7 cms., 300. Tenders will be received up to noon on March 25th. Sealed samples in duplicate must be submitted with tenders. Delivery of the goods is to take place within 90 days from the date of notification of the acceptance of the offer. (Reference D.O.T. 7570, F.E./P.N.)

FINLAND.

A firm of import and export merchants in Helsingfors desire to be placed in touch with United Kingdom manufacturers of paper and board calendars with a view to importing on their own account. (Reference No. 246.)

SOUTH AFRICA.

A manufacturers' representative in Cape Town is desirous of securing agencies for cotton twines (for binding and parcelling) and for envelopes. He states that he is prepared to take up sole agencies for guaranteed monthly deliveries and to give security for the amount of his purchases. He is also prepared to consider quotations for prompt shipments. (Reference No. 242.)

PRESIDING at the 39th ordinary general meeting of the Culter Mills Paper Co., Ltd., on Thursday, March 2nd, Mr. J. L. Geddes had the following hopeful announcement to make: They had cleared off all commitments in respect of 1921 or 1922, they were now working on material bought at to-day's current prices, they were fairly well off for orders, and, in fact, there was a clear way ahead of them provided orders stood up.

Stationers' Social Society.

Successful Winter Dinner.

A very enjoyable evening was spent at the Hotel Cecil on March 4th, the occasion being the thirty-fourth annual winter dinner of the Stationers' Social Society. Between 400 and 500 ladies and gentlemen attended, and the programme of entertainment provided for them was of a very high order. The officials of the Society always make a special effort when this annual event comes round, mainly because ladies are bidden to the feast, and the social character of the Society was never better demonstrated than on Saturday night. Brilliant is a word which describes the assembly without any exaggeration, and the Grand Hall formed an appropriate setting. The decoration of the lofty chamber is carried out on a very elaborate scale, and in the bright illumination radiated by the chandeliers, the gay dresses of the lady guests harmonised completely. Mr. Lionel Savory (the president), with Mrs. Savory, held a reception prior to the dinner, and the half-hour thus occupied afforded a welcome opportunity for old friends to meet and engage in conversation. It was a large gathering to crowd into the reception-room, but in the Grand Hall there was just comfortable accommodation; and so carefully had the arrangements been made that members and their friends had no difficulty in finding their places "according to plan." Indeed, from start to finish, the whole affair moved along with perfect smoothness. Every detail had been well thought out, and a delightful social evening was spent. In keeping with the artistic character of the function, the menu card, as usual, carried a dainty design which renders the card worthy of preservation as a memento of a notable occasion. The thanks of everybody are due to Mr. A. E. Mist (the secretary) for the enormous amount of work which the organisation of the dinner must have involved, and he had, of course, the whole-hearted assistance of Mr. J. W. S. Johnston (assistant secretary), and Mr. G. E. Oswick.

The musical programme which Mr. Oswick provided surpassed even the fine entertainments which he has submitted on earlier occasions. During the dinner the proceedings were enlivened by selections from Mrs. Fred Wildon's Orchestra, while subsequently a long array of capable artistes entertained the company in a very agreeable manner.

The Speeches.

The injunction to observe brevity was admirably obeyed by the various speakers whose names were associated with the toasts, of which there were but three—"The King," "Our Guests," and "The President"—quite a model toast list for such an occasion.

"Our Guests."

After the toast of "The King" had been duly honoured, the president submitted that of "Our Guests." Answering a question which had been put to him that night as to what were the objects of the Stationers' Social Society, he remarked that one of the objects was never to discuss business in any shape or form. Remarking on the intensely hospitable character of the Briton, Mr. Savory said the members of that Society looked forward from one year's end to another to those gatherings when they could entertain their friends from near and far. There were present that night ladies and gentlemen from different parts of the country and from overseas as well. They had one visitor from Australia and there were others from various quarters of the globe. While they extended to them all a very cordial welcome, they were most pleased to see so many ladies with them. The Society had been criticised recently as to why they did not admit ladies to membership. Well, he must plead guilty to being one of those who had opposed that course through thick and thin, and he should always do so. At the same time he hoped that they would continue to see their lady visitors at the various social functions which they held. Proceeding to couple the toast with the names of Mr. J. L. Geddes (Culter Mills Paper Co.) and Mr. R. H. Ling (John Dickinson and Co., Ltd.), the president remarked that by the time Mr. Geddes returned home he would have travelled something like 1,200 miles for the pleasure of attending that dinner. (Applause.) They regarded it as a great compliment that he should be with them at such great inconvenience to himself. As to Mr. Ling, he was very well known to them all and

held in great esteem. Mr. Savory remarked that he did not think the Society had ever entertained two guests quite like the two gentlemen he had mentioned. There were many members of their trade who, should he say, by the accident of birth, had come into the direction of established undertakings. Mr. Geddes and Mr. Ling, however, came into the paper trade from the bottom, and both of them now occupied positions of enormous influence. They desired to congratulate them on the success they had achieved, and upon the respect which they had earned from all who were engaged in the paper industry. (Applause.)

Burdens on the Papermaker.

Mr. Geddes, who was cordially received on rising to respond, said when he received the invitation to the dinner he wondered why he had been singled out to represent the paper-making trade. His wife, whom he consulted, suggested that as papermakers to-day were in a very difficult position, perhaps Mr. Savory wished to show his sympathy. (Laughter.) The papermaker's life to-day was not an enviable one. Apart from the difficulty of getting orders, he found his mill overweighed with abnormal charges in respect of coal, wages and other things, including enormous financial burdens for Government and local taxation, together with demands for insurances, unemployment, health and so on, from which it was not possible to escape. These things, of course, were largely the result of the late war, and they must put up with them with as good a grace as possible. But they would admit that the war had produced good things as well as evil. One good result was undoubtedly the splendid spirit of loyalty which sprang up among all classes of this great nation—a loyalty which created a power before which everything mean must give way.

The Spirit of Goodwill.

Mr. R. H. Ling also acknowledged the toast. He had been out of the social element of the trade so long, he said, that it did give him as an old veteran great pleasure to meet the younger generation, who were doing so much better than did their predecessors in their young days. He was glad to know that the present generation found there was something good in social intercourse, which promoted goodwill. (Hear, hear.) They could not bring that about by unions, but they could create it by such happy gatherings as those promoted by the Stationers' Social Society. He urged them to increase the spirit of goodwill and the social aspect of the trade because they rendered life easier and more pleasant and brought all together in a unity that could not be attained by the hard and fast rules which obtained in earlier days. Mr. Ling also wished to congratulate the Society upon their president. Under Mr. Savory's inspired leadership the Society would continue to develop and prosper. (Hear, hear.)

Tribute to the President.

Mr. F. L. Cayzer, in proposing the toast of "The President," said he had known Mr. Savory for a longer time, he thought, than any other member of the Society. His friendship and association with their president went back nearly 40 years, when he came up from the country as a thorough "Norfolk dumpling" to seek fame and fortune in London, and to enter the well-known paper house in which he served for nearly 30 years and which it was his (Mr. Cayzer's) privilege still to serve.

The toast was accorded musical honours and cheers, with additional cheers for Mrs. Savory.

Plea for the Provident Society.

The president, in acknowledging the toast, thanked his old friend Mr. Cayzer for the complimentary remarks he had made concerning him, which he hoped he deserved. There were only four people in that room who had known him longer than Mr. Cayzer had, and they were all Norfolk dumplings. Mr. Savory said he had accepted the invitation to be their president with a great deal of pleasure and pride. Remarking that he would do the best he could during his year of office, Mr. Savory called attention to the merits of the Stationers' Provident Society, which, comparatively speaking, was a wealthy institution. They had substantial funds, but for many years past they had not been able to get the younger members of the trade to join. He (Mr. Savory) had always been imbued with the necessity for thrift, and he had endeavoured to induce the young men of his acquaintance to join the society,

which any man of 25 years of age could do for a subscription of two guineas a year. Of course, the probability was that the member would never draw anything out and, of course, he hoped he would not need to do so. Should, however, a member die at an early age without having been able to make provision for his widow, the society came forward very generously. Mr. Savory gave four striking instances of annuitants who had benefited. He recommended the claims of the society to the attention of the young men in the paper trade.

Thanks and a Presentation.

Mr. Savory then expressed his thanks to Mr. Oswick for the splendid musical entertainment he had provided and to Mr. Mist and Mr. Johnson for the very satisfactory arrangements they had made for the dinner. The whole function had been admirably organised and had obviously given satisfaction to everyone. (Applause.)

Before sitting down Mr. Savory presented to Mr. P. W. Kennett the ex-president's badge.

Mr. Kennett, in acknowledging the presentation, said he regarded it as a great honour to have been their president and a still greater honour to have come in between such men as Mr. Horsburgh and Mr. Savory. Mr. Kennett described the Stationers' Social Society as the one society in the paper trade, and he went on to refer to the advantages of membership, because they were brought into contact with others in the trade, whom they thus came to know better and to appreciate more.

Stationers' & Paper Manufacturers' PROVIDENT SOCIETY.

The annual general meeting of the Stationers' and Paper Manufacturers' Provident Society was held on the 21st ult. at the offices of the society, 15, Dowgate-hill, E.C., Mr. Alfred Jones presiding, in the absence of Sir G. Rowland Blades, M.P. The committee's 82nd report was presented, which showed that the funds had been increased during the past year by £1,112 3s. 7d.

The Registrar General of Friendly Societies recently required that the value of the securities representing the general fund as on December 31st, 1920 (when the quinquennial valuation of the society's assets was made), should be stated in the accounts, and accordingly comparative figures are set out under the respective headings of cost and value for quinquennial valuation.

Under the heading general fund, securities, at cost, existing at December 31st, 1920, stood at £47,368 8s., and the quinquennial value of these at the same date was put at £34,504. The total value of the general fund stood at £48,438 9s. 6d., and the quinquennial valuation of same at £35,570 1s. 6d. Securities in the residence fund at cost amounted to £6,894 14s. 9d. for the period up to December 31st, 1920, but for valuation purposes they are put at £3,666. The total of the fund stands, at cost, at £7,019 16s. 8d., but the valuation figure is £3,791 1s. 11d.

Benefits have been granted during the past three years under the heading of annuities, residence fund, funeral allowance, temporary assistance and special grants. These amounted to £790 7s. 6d. in 1919, £834 13s. 4d. in 1920, and £1,020 18s. 2d. in 1921. During last year £602 16s. 6d. was paid in annuities, £238 6s. 8d. in respect of the residence fund, £23 for funeral allowances, £15 to temporary assistants, and £141 15s. in special grants.

In moving the adoption of the report, the chairman mentioned that there were at present 22 annuitants, two of whom had no other income than that received from the society; six annuitants were over 80 years of age, one annuitant had been an annuitant for 28 years and another for 22 years. He urged members to bring the society to the notice of young men with a view to their becoming members.

"TIMES OF CEYLON" GREEN BOOK.—The second edition of this work runs to about 1,400 pages. It contains a valuable mass of information about the island, its inhabitants, its commerce, and its institutions. Carefully classified into sections, the book has on the front cover a useful guide to the sections, which are readily found by means of alphabetical tabs. A complete index enhances the value of the volume, which is published by the Times of India Co., Ltd., "Times" Buildings, Colombo, and Blackfriars House, New Bridge-street, London, at Rs. 15 (25s.).

Jubb's Metals.

Some very interesting unsolicited testimonials have recently been received by Messrs. T. G. and J. Jubb, whose printers' metals are so well known in the trade. The purity of Jubb's metal is particularly provided for, since their factory is solely devoted to the manufacture of metal for printers, thus obviating any extraneous matter being imported.

The testimonials referred to come from widely different parts of the country. One printing firm which had had Messrs. Jubb's recasting scheme for old metal furniture introduced to them states:—"Having had all our furniture recast by you on the point system, we can speak from experience of the great boon you have conferred on the trade by such an inexpensive method of transforming old and often useless furniture into new and up-to-date material."

A second firm of artistic printers, who had sent to Messrs. Jubb about 5 cwts. of old metal which they converted into 6 and 12-point clumps and metal furniture, state that these are well and strongly made and in every way satisfactory, adding that the ample supply of spacing material has on many occasions been of great advantage and saved much valuable time. "We are well repaid for the comparatively small cost," comments this writer.

A third house of printers has informed Messrs. Jubb that stereo plates made from their first grade metal have been giving good impressions up to 270,000 copies.

Paper Barrels.

The making of paper barrels is destined to become a most important industry, said Mr. Arthur Harris, president of the Canadian Paper Box Co., Ltd., in addressing the members of the Rotary Club at Montreal. Not only was the paper barrel stronger than the wooden one, he stated, but according to experts, the wood necessary for the making of the staves is becoming scarcer each year. There is an unlimited supply of paper board, he stated, and this material became the logical solution of a condition the seriousness of which could not be exaggerated.

Mr. Harris stated that the fibre container was undoubtedly in process of displacing the wooden box for many uses. Its use had, of recent years, grown by leaps and bounds. What unquestionably had led to its general adoption as a container for commercial commodities in place of the wooden case was primarily the high cost of the latter, by reason of the growing shortage of the lumber supply. It was stated, he continued, that there was not enough non-resinous wood in America for a year's supply of boxes for the Battle Creek plants alone. The great advantage of the paper barrel, added Mr. Harris, was that it was sift proof, the shell of the barrel was built up in one solid piece, and it could not develop leaks or cracks.

The "Ad" Man and the Printer.

Suggestions for Advantageous Co-operation.

In his address to the London Ad Club, briefly reported in last week's issue, Mr. W. H. Burchell made a number of practical suggestions as to the advantages to be derived from closer co-operation between the advertising man and the printer. The following are some of the points brought out by Mr. Burchell.

The Small Trader's Advertising.

There are many small traders in London and the suburbs who would like their small shops to grow into important stores, but perhaps have not the knowledge or the gift of creating publicity literature. The size of the business does not warrant the permanent employment of a publicity expert. Such cases as these are met by suggesting to traders that their sales might be developed by the payment of a retaining fee, to an advertisement expert, who would draft the advertisement for the local papers, write form letters, get up a folder and leaflets, eventually growing these into a small catalogue for distribution to their prospective customers in their several districts. This is the nucleus of business-getting literature which is sure to develop the firm. Here is an undeveloped field for the efforts of the members of the London "Ad" Club.

Many firms adopt "snowball" advertising. It consists of having a number of single-page enclosures or perhaps two-page folders. Take a hosier who sells gloves, shirts, pants, umbrellas, etc. When the salesman has sold a pair of gloves he does not fail to enclose in the parcel an advertisement about umbrellas. If he sells an umbrella, in goes one of these enclosures about shirts. So the advertising is continually going on. The hosier, too, does not omit to include these enclosures in every letter sent out by the firm whether it be an invoice, an account, or general correspondence. It is a very effective and cheap form of advertising. Good for the publicity man who lays out the enclosures and good for the printer who produces them.

The Printer's Technical Assistance.

The sizes and shapes of the various show cards, catalogues, folders, leaflets and enclosures are often got out with little regard to economy of material. The printer being continually in touch with, and therefore conversant with, the sizes of the cards and sub-divisions of paper, is able to give advice which often saves a great deal of waste time and money on the job.

There are many firms who not only give the management of the Press advertising to the agent but they also get him to take charge of their printing and publicity literature. Several of the advertisement agents keep a competent lay-out man who sends his scheme to the printer to produce the printed page which may contain half-tone blocks, line blocks and letterpress, and have the "Ad" man and the printer come together to turn out the satisfactory sales-getting advertisement.

Co operation is necessary also in meeting the technical difficulties of the printer who has metal type to handle and has to carry out the ideas of the lay-out man. Type not being made of india-rubber, it will only submit to the rules of mathematical precision. However beautiful and fanciful the ideas of the arranger of the copy are, they have to yield to the question "Will the type selected and the space arranged for carry out the idea?" Here, then, is the need of the help of the practical printer who has spent his lifetime in casting-off copy and noting the colour and surface of paper which would give the best results. Much good writing and planning of copy must "gang agley" because of want of knowledge concerning the sizes and faces of type. Type has no moustache, but it has a "beard"; and if the size of this beard is not taken into account, calculations of the amount of space the face and beard of type will occupy often cause the defect in the "lay out." Consultation with the practical printer will avoid this.

A job is very often required in a hurry and the lay-out man, to save time, often supplies "copy" to the printer with the measurements of the blocks shown in the lay-out. The printer, to oblige in the required hurry, gets on with the letterpress, but when the blocks arrive it is often found that they have been

made larger or smaller than the space allotted for their reception in the lay-out. This causes much trouble, delay and unnecessary expense, consequent on the necessity of over-running or resetting the letterpress.

The advertising man is very often annoyed, and sometimes with reason, that changes in his lay-out have been made contrary to his instructions; but he can rest assured that it is often done in the best interests of both.

The introduction of the "point system" has had the effect of indicating the uniform depths of type, but has left the advertising man without any knowledge of the width of the unit. The advertising man sees it in imagination, but the practical printer has to see it in solid metal. Beards on type prevent the printer putting in type as closely as desired. Spacing out is often not fully allowed for.

Ignorance of the "em" measurement for indenting paragraphs according to the size of the body type used is often apparent.

Many lay-outs are made specifying numerous faces where two or three would have been sufficient to produce an effective piece of typography.

How the "Ad." Man Can Help.

Explicit written instructions should be issued with each job. An official order should also be sent to the printer at the time when the job is passed for press. If this is neglected it often leads to future annoyance and misunderstanding on both sides. When a job has to be delivered to various addresses, always see that a supply of your own labels and delivery forms are supplied to your printer for the purpose.

It is a great help to the printer if the copy submitted for correction is corrected with the recognised "printers' signs" used for the purpose. A sheet showing these printers' signs, for the information of the copy corrector, can always be obtained.

No printer has every type under the sun, and, while it may be an interesting study on the part of the publicity man to take up a type specimen book and construct an advertisement from a combination of types which he imagines would look well together, it must not be forgotten that a printer cannot be expected to possess founts of type of everybody's make, and should not be blamed if he uses his discretion to give a result as near to the indications of his client as possible.

One typefounder who also runs an advertising agency sets all his advertisements in his own type faces, and then sends round to advertising agents, to newspapers, and to the printers, insisting on the advertisement or printed matter being set in "so and so" type. Good business for the typefounder, but bad business for the printer. Other typefounders send their type books round to you, and force the printer to buy faces of type that are not at all useful to him. Of course, it is most unreasonable to expect a printer to buy type for every job he secures. He would soon find himself in "Stubbs" if he did so.

So much for the type side. Now let us get on to the stock to be used for the job. Very often the advertising man chooses very expensive material that really "puts a silk hat" on the product; but, when he receives either an estimate or the invoice for the job, he finds that he has "side slipped" his allowance of the appropriation, when if he had only co-operated with the printer, taken him into his confidence and told him the price appropriated for the job, the printer could then have set to work and given him a production as near as possible to the original article required, and at the price scheduled in the appropriation.

Blotting Paper Made in Canada.

A special report of the Canadian Pulp and Paper Association states that after extensive and thorough experimentation, blotting paper of the finest quality is now for the first time being produced in Canada, the Howard Smith Paper Mills, Ltd., of Beauharnois and Crabtree Mills, Quebec, and Cornwall, Ont., being the pioneers in this branch of the industry.

Hitherto all the blotting paper used in Canada has been imported, the imports being valued at about half a million dollars a year. The success achieved in producing blotting paper in Canada leads to the belief that not only will that country now be self-supporting, but will soon be in contest in the world's markets for this as it already is in many other grades of paper.

Export Notes and Comments.

Export Trade Optimism.

THERE are signs at last, fortunately, that the outlook for international trade is brightening, and that, in some directions at least, the many and varied obstructions and burdens which have made overseas business almost insuperably difficult are one by one beginning to give evidence of diminution. At home and in some overseas countries taxation in its many forms has made, or promises soon to make, a definite downward move, while the costs of materials and the general expenses of doing business show a substantial decline. The strenuous efforts that have been made in Europe to readjust dislocated international trade have not been without effect. Severed business connections have largely been re-established; new sources of supplies have been sought out, and foundations laid for the export of goods to new markets in cases where the old are no longer available. The result is an approach to stabilisation, which is being appreciatively noted by overseas buyers who have hitherto felt the time unripe for the carrying out of long overdue buying trips to this country and elsewhere. These overseas visitors are now making a beginning with their trade visits. Large numbers of Canadian buyers, for instance, are reported to be leaving for Europe, and this is only one indication of the inevitable revival which must follow the slow but certain rehabilitation of the European market.

The Shackles on Overseas Trade.

DESPITE a good deal of improvement in the conditions of international trading, there remain factors of very serious importance to retard the healthy flow of European post-war commerce. The collapsed Continental exchanges, for one thing, still constitute a gigantic obstacle to the growth of overseas trade. It cannot be denied that there is much force in the criticisms which leading bankers and other business men have lately been heaping upon the British Government for its failure to produce something better than the present appalling state of affairs in respect of Germany's reparations. Germany can only meet the demands made upon her by flooding the overseas markets with her exports, so that we are indirectly compelling the destruction of our own export trade. Again, by using every effort to keep out German goods from the United Kingdom, we make it impossible for Germany to resume her pre-war imports from this country. There seems to be no likelihood

that a satisfactory solution of the exchange problem should be reached until steps have been taken to put our relations with Germany upon a saner footing. Hopes now turn to the postponed international conference at Genoa, at which something at any rate should be achieved in this direction. The desiderata were well summarised recently by a leading British banker, who, speaking as a business man, not a politician, said that the conference should: Settle the amount of Germany's reparation at a figure which she ought to pay, but which she can pay; fix the method of payment so as to cause the minimum of disturbance in the foreign exchange market; induce the several Governments to balance their Budgets and cease further issue of inconvertible notes; abolish tariff walls and similar restrictions upon international trade; and establish peace.

The Price Hindrance.

THE existing chaos of the exchanges means, of course, that the competition of countries with depreciated exchanges is a formidable obstacle to British exporters. An instance of this was given to a representative of the *British and Colonial Printer and Stationer* by Mr. Girolanio Rossi, a prominent papermaker of Italy, who has just concluded a visit to this country. An Italian firm, he mentioned, desired to place an order for a guillotine cutter for boards. Inquiries as to prices showed that whereas the American quotation was 120,000 lire, the German was 12,000, or ten times less. Under these circumstances, it is not surprising that most of the Italian orders for printing machinery are going to Germany. The newspapers are also securing their paper supplies from Central Europe. Generally, however, the printing industry of Italy is quiet as regards the demand for imported goods.

British Industries Fair.

THE visit of an army of buyers estimated at 50,000—a considerable proportion of them from overseas—to the recent British Industries Fair in London is an event of importance in trade history. The overseas visitors came from countries as far apart as Iceland, Rhodesia, Palestine, West Indies, China, Morocco, Peru, Ceylon, "Mesopotamia," Czechoslovakia, and the Straits Settlements. The wide interest shown in the Fair indicated at any rate that all parts of the world are interested in British goods and are on the alert to com-

pare British qualities and prices with those of other suppliers. The improved trading conditions of to-day are reflected in the fact that the prices of goods exhibited were estimated as being on the average 33½ per cent. lower than at last year's Fair. It was plain that British manufacturers have made wonderful progress in their ability to compete with German producers, in some lines the price even being in favour of the British article, despite the exchange handicap. But what stood out very prominently was the ability of home manufacturers to produce goods to suit the most exacting buyer; the organisers of the Fair attribute the success of the exhibits to quality and, above all, novelty, not one section lacking some innovation. We believe overseas buyers must have been very favourably impressed with the demonstration British exporters were able to put forward, and even where immediate orders have not been possible, notes have doubtless been made which will result in business later on, when further recovery of the general situation makes conditions more favourable.

Printed Matter for Overseas.

WE have repeatedly drawn attention to the mistake, which has so often been made by British exporting firms, of sending to foreign readers publicity and other matter printed in English and quoting English weights, measures and money. A writer in the German *Papier Zeitung* is, we notice, rubbing in the same criticism for the benefit of his fellow-countrymen. He points out that the translator of a catalogue for foreigners should be able not only to translate literally but also to take into account the *Feinheiten und Eigentümlichkeiten*—let us say the niceties and idiosyncrasies—of the foreigner's way of expressing himself in print. This is certainly important, and from what we have seen of certain "English" publicity matter sent over here lately from Germany we think there is need that this gospel of consideration for the foreigner be preached with zeal. Not to stress the frequent failure of the translator to appreciate English idiom—with results sometimes puzzling, sometimes laughable—one notices that much of the "English" publicity matter referred to is in a type which, though certainly a Roman and sometimes quite a pleasing face, has a typically German air about it. No English printing offices use the like. Somehow it breathes a faint aroma of "Fraktur." This, probably, is one of the

"niceties and idiosyncrasies" of which our German contemporary would stress the importance. Certainly one does not in most cases wish one's advertising matter to strike the overseas buyer as having a markedly foreign flavour about it. Perhaps this is a point which the English producer of printed matter for Continental and other markets could consider with advantage.

Germany's Trade Fair.

Germany's greatest trade exhibition—the Spring Fair at Leipzig—was not this year so good an indication of the state of international trade as one might have wished. With European conditions so chaotic, the Fair could not be expected to show its normal features. The Fair is designed to foster export and import trade, but owing to Germany's depreciated currency few of the countries with sound currencies thought it worth while to send exhibits, a notable exception being the Swiss, who had a well-organised exhibition; the South African Government was the only British exhibitor. Foreign customers, too, were shy of buying.

Germany Favours Eastern Markets.

JAPANESE, Chinese, Russian and South American Governmental commercial representatives and private business men were more numerous at Leipzig than ever previously. It would seem that the home demand and the demand for German goods from Japan, China, India and South America, rather than consideration for the interests of British and North American manufacturers, account for the comparative indifference with which the German manufacturers now regard the British and United States markets. Although some 3,000 British, American and Colonial business men went over for the Fair, a great many saw little prospect of doing business. They objected that prices for several commodities were marked in dollars and pounds, while the corresponding prices in marks were calculated at a rate considerably below the actual exchange. In other lines of business manufacturers offered early delivery. Owing to shortage of supplies and other causes stocks for sale on the spot were small and snapped up at once. Those firms who had something to sell for immediate delivery, or who could guarantee delivery at a price fixed on the spot, did good business. But when it came to booking orders for future deliveries there was great reticence on the part of the German sellers. Certainly the Fair created immense interest. It brought the record number of 140,000 visitors to Leipzig. Most of the centre of the city was occupied by various manufacturers' exhibitions. With regard to the principal purchasing countries, buyers from the United States were probably the most active. They ordered very lavishly with a view to obtaining the largest possible volume of goods before their new tariff comes into operation. In many cases, however, there was a strong feeling that the orders would be either partly cancelled or, on the other hand, only partly delivered.

Germany's Big Book Exports.

THE big export trade done by German book-producers is causing alarm in France. French publishers recently issued a warning of the serious political consequences likely to follow the activity of German publishers who were flooding the foreign markets, while French firms saw their exports of books declining. They had found that in the Near East, Italy, Spain and the new States of Central Europe German books were being poured on to the market and a new public being won to a taste for German literature and German thought, while French books were in many places only to be obtained with difficulty. Two exhibitions are now being organised as the beginning of a campaign of propaganda in favour of French literature and culture abroad. One is to be held at

Florence, and the other at Stockholm. Both are to be subsidised by the French propaganda department. Eighty French publishing houses are participating in the enterprise, and over 4,000 volumes will be shown at Stockholm. The Florence exhibition will be even bigger, and will last for three months.

Industry in Australia.

INDUSTRIAL conditions in Australia are not quite peaceful. According to Mr. S. W. B. McGregor, senior British Trade Commissioner in the Commonwealth, who has issued an interim report, the most serious feature in the economic situation is the refusal of the leaders of organised labour to permit any wage reductions to meet the situation caused by the lowering of the cost of production in other countries. The result is a creeping paralysis of manufacturing industries, which, although protected by a high tariff, are subject to overseas competition. Mr. McGregor adds that the Australian people have not yet recovered from the enervating effects of the ease with which money was made by all classes during the period of artificial prosperity arising out of war and post-war conditions, but he thinks there is no reason for pessimism as to the future. "A country so richly endowed by nature cannot for long remain depressed." Australia is now Britain's second best customer, taking 6.8 per cent. of the United Kingdom's exports in the first half of 1921.

Anti-Dumping Law in Australia.

IT is reported from Melbourne that the Minister of Customs has intimated to the Chamber of Commerce that he proposes to give immediate effect to the Anti-Dumping Law. Its introduction is explained on the ground that the present tariff was not calculated to meet the competition of countries with a greatly depreciated currency. Trade with Germany will be resumed in August. According to the Minister of Customs overseas organisation had been strengthened and representatives instructed to keep his Department in close touch with sale prices, the rates of exchange, and general trading conditions in Great Britain and other countries. If Australian goods did not meet with Australian requirements, then complete effect should be given to British preference.

New Zealand Import Duty.

THE Federation of British Industries has achieved a practical result in the promotion of inter-Imperial trade by its success in inducing New Zealand to adopt the policy of levying its import duties not on the mint par value of exchange as at present, but on the actual value in the case of any country whose currency has appreciated. Briefly the rise in the relative value of the dollar to sterling reduced the proportionate amount of import duty paid by American goods to such an extent that the preference given on British goods was almost trifling. The new rule now in force, will adjust the balance.

British Goods in South Africa.

THE importance of British manufacturers having representatives abroad is particularly emphasised by a recent action of the British Manufacturers' Representatives' Association in South Africa (Incorporated). In the annual report of the Association which has just come to hand it is noted that at a meeting of members lately called to meet Mr. C. W. Francis Harrison, Hon. Commissioner of the Federation of British Industries, advantage was taken to call attention to the misleading and damaging statements that from time to time appear in the cable messages sent to the South African Press in regard to the class of goods exported to the sub-Continent by British manufacturers, and Mr. Harrison, it is added, promised to give this important matter his personal attention. The Council of the Association is of opinion that the general statements cabled out reflecting on particular

classes of British goods placed on the South African market are totally unjustified and should not be published without due and proper qualification, "the high general standard of such goods being indeed in many cases a factor that operates in favour of competitors."

S.A. Government Contracts.

ANOTHER matter which came before the Council of the Association last year has reference to Government contracts. It seems that a suggestion has been made that the Association should press the Union Government to accord some sort of preference in this connection to oversea firms which are represented in South Africa, as against those not so represented. The Council considers the suggestion excellent, but favours the principle recognised in Australia of invitations for tenders being limited absolutely to firms represented in the country. It may be of interest to our readers to know that the offices of the Association, of which Mr. G. H. J. Watt is president, are at Remington-buildings, 96, St. George's-street, Cape Town.

Stationery Prospects in the Union.

IN his report to the Transvaal Stationers' Association, Mr. J. J. Simpson indicated in rather depressing terms the sad state of the stationery market in the Union. On the occasion of the annual meeting—at which, by the way, Mr. F. W. Knightley (Government Printer, Pretoria), was elected an honorary member of the Association—he referred to the depressing period through which the industry was passing, and he urged members to keep a watchful eye on their businesses. How long the depression would continue it was difficult to forecast, but if the stationery and allied trades did not go panicky they would all emerge safely, declared Mr. Simpson. British manufacturers will be gratified to notice the happy tribute which the president paid to them in the course of his address. "On previous occasions," he observed, "has been brought forward the fair manner in which the great majority of British manufacturers have supplied the South African stationer during critical periods, and I hope that members will now realise their obligations to the Old Country and not be led away by cheap Continental prices." This a gratuitous advertisement for British goods which will be appreciated in the United Kingdom.

India and Printing Supplies.

MR. R. W. SINDALL (Sindall and Bacon), who recently visited India to investigate the possibility of establishing a pulp and paper plant for a local firm, came in contact with the printing industry at one or two points. He had the pleasure of going through the printing works of the *Times of India* in Bombay, being conducted round the whole of the works. He saw in operation a little Hoe machine which is the only rotary press, he understands, in India. This seems to show that a pretty good field exists in our Eastern Empire for British printing machinery; and the activity of the Press in that country ought to extend the market for printers' supplies. India, of course, appears to be in a ferment just now, although the disturbances are apt to be exaggerated. At all events, Mr. Sindall saw little trouble during his visit.

Indian Commercial Intelligence.

CONSIDERABLE re-organisation is likely to take place in the Commercial Intelligence Department of the Government of India. Although the main purpose of the re-organisation is to further India's oversea trade, the new arrangements will be helpful to all who are concerned with the industry of the Empire. Hitherto the Department has been represented by only one centre, that at Calcutta; but after consultation with the local governments and chambers of commerce, it has been decided to create subordin-

ate offices at Bombay, Karachi and Rangoon, with trade correspondents at other important points. Suggestions have also been received from responsible quarters that development of inter-provincial trade should be entrusted to this Department, which would thus serve as a clearing house for trade enquiries and information forwarded by Provincial Directors of Industries. The scheme of re-organisation goes even further than is here indicated. On the face of it, it looks as if more work would be created for printers, or, at all events, better facilities provided for obtaining information that will lead to developing the activities of the craft.

Factory Legislation in India.

IMPORTANT changes are made in legislation governing factories in India, and it is presumed that printers, wholesale stationers and papermakers will be concerned in the alterations. Hitherto the Indian Factory Act has applied only to factories using mechanical power and employing at least 50 persons. Considerable modifications are made by the Indian Factories Amendment Act of 1922. The new Act applies to all factories using mechanical power and employing 20 persons or more, and contains authority for its extension to factories employing only 10 persons and to those which do not use mechanical power. Hours of labour for adult workers are reduced from 72 to 60 a week, with a maximum of 12 hours in any one day, while for children the maximum is fixed at six hours per day. The legal minimum period of rest for refreshment is increased from half-an-hour to an hour. Subject to special exemptions (in which cases compensatory rest time must be allowed), Sunday work in factories is forbidden. The minimum age for juvenile employment is raised from nine to 12 as from next July, subject to exception in the cases of children legally employed before the Act comes into force.

Eastern Market Better.

BETTER reports are forthcoming of the state of the Eastern markets, and any improvement in this direction will have a beneficial effect on the home market. When things were at their worst, goods which had been shipped out under contract were not accepted and the ports became congested with a variety of consignments, of which paper formed a not inconsiderable amount. These stocks have now been cleared off to a great extent, and the flow of orders has again commenced. This is a very welcome turn of affairs, and, together with other favourable signs, creates hope for trade revival in our foreign markets.

Trade with Japan.

THERE is a marked tendency to favour British goods in Japan, and the Federation of British Industries has rendered excellent service in arranging a special display of the manufactures of the United Kingdom at the International Peace Exhibition held this month at Tokyo. Both the United States and Germany are making a strong bid for trade with Japan.

German Competition in Palestine.

OWING to their cheapness the goods of Germany, Austria and Czecho-Slovakia are finding favour in Palestine. Buyers, on account of their financial position, respond to the more favourable terms offered by German representatives as compared with those of British firms. The superiority of British manufactures is generally recognised, but in the absence of attractive business terms there is a fear of the British manufacturer being ousted from Palestine.

Competition in British Malaya.

THE United States has been improving its business connections with British Malaya. Goods consigned from that quarter range

from motor cars to milk. A good market exists for paper and stationery, and in these lines imports from the United States increased from £102,400 in 1919 to £158,900. American methods of securing orders are very seductive, and their goods have generally an attractive appearance. On the part of British exporters more enterprise might well be exhibited. They are bound to meet with severe competition from the manufacturers and merchants of other countries, and only good service, the right article, and reasonable prices will help to clear the way for the products of the United Kingdom.

Modern Methods in Bermuda.

A RECENT account of a printing office in Bermuda illustrates the effect which new apparatus has upon the consumer of print. To begin with the printing office, the following description of the composing room is interesting: "A cylinder press was in evidence in the room, a half dozen or so frames of type, a couple of jobbers, a table or two, a proof press and, in a little wired-off cage-like compartment in one corner of the place, an inevitable linotype. Fully a dozen black men and women and boys and girls (some of the children seemed less than ten years of age) were employed about the type frames and at folding printed matter at the tables as we entered, and a Manhattan man was presiding at the keyboard of the lino." The character of the work being turned out is instructive. For the most part it was statistical and tabulated reports for the Government. The printer gave a vivid report of the enthusiastic way in which the local populace had greeted the showing of borders and other ornamental material. The more ornate matter is proving very popular with buyers of printing in the Archipelago, and enough orders for that sort of printing and for the more conservative kind are on file in that little printery to keep the wheels going round for many days yet to come. Wages are fairly good, and the cost of living is not so very high. The lino operator earned fourteen pounds a week.

Book Fair in Florence.

AT the beginning of May an International Book Fair is to be opened in Florence and will remain open throughout the summer. Organised by the Italian Book Publishers' Association, with the co-operation of the Leonardo Foundation for Italian Culture, the object is set forth as "the promotion among the nations of a mutual and direct knowledge of their respective productions in books; to show foreigners Italy's activity in typography and editorship; to facilitate international book commerce, now hampered by the rate of exchange and by the slowness and cost of transport as well as by the exchange of translations; to restore, by the direct comparisons resulting from a fair, a definite national character to the art of printing and to book decoration; and to honour the book in every way as the most powerful and rapid vehicle of culture and of humanity, as the surest bond between past and present and the most durable testimony of our civilisation for the future." The Fair is under the patronage of King Victor Emanuel, and the names of a large number of the distinguished literary men of Italy, the heads of the leading publishing houses, the Ministers for Foreign Affairs, Industry and Commerce, Education and other departments, and various other prominent personages are included in the several committees. Among the exhibits are sections devoted to showing the technical progress made in machinery and the many different graphic processes allied with the production and decoration of books. British traders are expected to be conspicuously absent, though German and French exhibits will be prominent, whilst Holland has formed a sub-committee of its own; Sweden is taking part, and Austria and other European countries in varying degrees; and Yale and some of the large university presses of the United

States of America are contributing. All necessary information may be obtained from the British-Italian Commercial Association, 12, Nicholas-lane, London, E.C.4.

Printing at Brussels Fair.

THE printing and allied trades usually occupy a prominent place at the Brussels Fair. April 3rd to 19th inclusive is the date of the third exhibition, organised by the Municipality of the Belgian capital. Two sections are set apart for the exhibitors of the graphic arts and kindred industries. Thus Group 20 is devoted to paper and cardboard and the raw materials employed in their manufacture. Printing, material and accessories for printing form the principal section in Group 21 (books and office requisites). Another important sub division is book-selling of all kinds. The proximity of Brussels to this country renders it an easy matter to take advantage of the opportunities furnished by the Fair. British printers, however, together with the publishers, have not yet returned to their pre-war enterprise by which they advertised their wares abroad. To what extent they are patronising the Brussels Fair we cannot say; but we fear the tendency of aloofness which is observable elsewhere will also be apparent in Belgium. True, present conditions created by the exchanges and other difficulties, place the British printer at a disadvantage. But if he is unable to go to the extent of displaying his art abroad, perhaps he will show sufficient interest to visit the fairs and pick up a few hints which will help him in meeting foreign competition.

Brazilian Centenary Exhibition.

FROM September 7th to December 31st, 1922, will be held the Brazilian Centenary Exhibition, organised by the Brazilian Government in connection with the celebration of the Centenary of Brazilian Independence. Invitations to participate have been accepted by most of the leading Powers, and our chief competitors in the Brazilian market are making great efforts to further their interests by taking full advantage of the opportunity which the Exhibition offers for trade propaganda and advertisement. The United States of America have voted a million dollars for official participation; while the Belgian Government, in addition to a National Pavilion, intend to build an exhibiting hall with an area of 70,000 square feet; and there is every indication that other countries intend to be very strongly represented. It would seem that this is an opportunity that should not be passed over by British traders as the Brazilian people are strongly predisposed in favour of British firms and British goods, the reputation of both standing even higher than before by reason of the contrast with the quality of the goods and the methods of other nations who took advantage of the war to exploit the Brazilian market. Full particulars regarding rates for space, etc., can be obtained from the Department of Overseas Trade.

Boston Graphic Arts Exposition.

BOOMED in truly American fashion, the Second Educational Graphic Arts Exposition to be held at Boston, Mass., from August 20th to September 2nd, 1922, promises to be a very informative demonstration of America's capabilities in printing and in the production of printers' supplies of all kinds. The organisers state that an intensive campaign is planned to arouse all employing printers in the United States, Canada and Great Britain to the importance of attending the Second Educational Graphic Arts Exposition at Boston. The exhibition is conducted by the Boston Club of Printing House Craftsmen, in connection with the Third Annual Convention of the International Association of Printing House Craftsmen. The address to which communications are invited is Boston Graphic Arts Exposition, Inc., 10, High-street, Boston, Mass.

Paper & Print—Export Figures.

The Year opens quietly, but as more enquiries are current the outlook is encouraging, and enterprising British Manufacturers are making a strong bid for increased Overseas' Trade.

The opening months of the year do not show any spirited movement in the export trade in connection with paper and print. There is, however, promise of developments, as inquiries are more freely circulated, and with improved conditions in India, South Africa, and the Far East there is every reason to believe trade will greatly expand. The official statistics we present under the above heading show that British exporters have greatly reduced values, thus making a strong bid for business in face of foreign competition. Many adverse factors, particularly in regard to rates of exchange, have to be faced, but our manufacturers are grappling with the situation in a most enterprising spirit, and, with the growth of more stable conditions, we may confidently look to a great expansion in overseas trade.

Boards.

The figures relating to the exports of boards—which comprise millboard, strawboard, and cardboard—for the first two months of the present year are by no means satisfactory. The total quantity amounts to 12,235 cwts., against shipments of 20,202 cwts. in January-February last year, a decrease of 39.7 per cent. The value of the exports of boards during January-February of this year amounts to £30,318, and last year to £71,111.

Boxes and Cartons.

The British manufacturer during recent years has shown considerable enterprise in installing the most improved plant for the production of almost every class of containers. The extension of this trade has also led to the establishment of engineering works in this country to supply special machinery formerly imported from the United States. Unfortunately trade depression has been severely felt by makers of boxes and cartons, and this is reflected in the export trade, which, during January-February last, comprised only 3,239 cwts., as compared with 4,066 cwts. for the corresponding two months of last year, the respective values being £19,399 and £33,254.

Coated Papers.

In coated papers the export demand has been well maintained. During January-February of this year the shipments comprised 15,107 cwts. of hangings and 4,277 cwts. of other sorts, valued respectively £95,890 and £39,286. During the corresponding period of last year 15,980 cwts. of hangings were exported of the value of £131,733, and 5,132 cwts. of other sorts valued at £67,542.

Packings and Wrappings.

The exports of packings and wrappings during January-February last amounted to 41,663 cwts., a considerable improvement compared with the corresponding period of last year, when the shipments were 23,057 cwts. Notwithstanding the increase in quantity, the value, amounting to £48,707, shows a drop of £44,400 as compared with the first two months of last year. The shipments of British packings and wrappings, however, are becoming quite an important item in the export list.

Paper Bags.

During January and February British paper bags were consigned to Colonial and foreign markets to the extent of 3,195 cwts. (£12,368), contrasted with 4,433 cwts. (£23,186) during the corresponding two months of last year.

Playing Cards.

The export trade in playing cards shows a substantial improvement. In January and February last playing cards were exported to the extent of 315 cwts. (of the value of £6,575), compared with 259 cwts. (of the value of £6,289) during January-February, 1921.

Printed Books.

The depression prevailing in the printing industry at home is reflected by the lessened export trade in printed books. The quantity shipped during January and February, 1921, amounted to 65,134 cwts., whereas in the two months of this year, only 34,450 cwts., were exported. The respective values were £714,312 and £420,201.

Printing Paper.

An important export item falling under the heading of paper and boards is that of printing paper, which represents 48.5 per cent. of the total. During the first two months of the year shipments to British possessions amounted to 91,041 cwts. and to foreign countries 38,325 cwts., a total of 129,276 cwts., a decrease of 67,868 cwts., as compared with January-February of last year. The value for the first two months of this year amounts to £274,047 and for last year £913,115.

Australia maintains her position as the best market for British printings, 564 cwts. having been despatched to that country during January and February, although compared with the corresponding period of last year there is a decline of 17,938 cwts. Values: £84,812 (1921) and £300,744 (1922).

India, during January-February of the present year, took British printings to the extent of 13,877 cwts. (of the value of £31,070), compared with 27,943 cwts. (£125,188) during the corresponding period of last year.

New Zealand imported printings from Great Britain during the two months of this year 13,609 cwts. (£20,422), as against 17,236 cwts. (£73,519) in the two months of 1921.

The demands from South Africa during the two months' period have proved distinctly discouraging, her shipments having dropped from 26,112 cwts. (£125,754) last year to 8,303 (£22,348) this year.

Shipments to Canada, Ceylon and the Straits Settlements have also decreased during the past two months.

Printing Type.

The export of British printing type during January-February amounted in quantity to 36 tons (of the value of £11,416), 60 tons (£21,853) last year, and 51 tons (£13,180) in 1920.

Stationery.

A slightly better export business has been done during the last two months in supplying the overseas' markets with envelopes (not including boxed stationery). For instance, these were shipped to the extent of 5,425 cwts., as against 5,151 cwts. in January-February, 1921. In spite of an increased quantity supplied, a big reduction has taken place in value, viz., £31,684, against £60,172.

Other sorts (including account, note and exercise books, etc.), were shipped during January-February to the extent of 20,047 cwts., of the value of £283,157, as against 28,980 cwts., of the value of £427,474, for the corresponding period of last year.

Tissues.

The two months' shipments of tissues this year totalled 1,846 cwts., of the value of £21,240, compared with 2,203 cwts. (£36,650), last year.

Writing Paper in Large Sheets.

The demand for writings has fallen off this year (January-February) to a little over 38 per cent. compared with last year. Comparative figures: 21,654 cwts. (of the value of £86,853), as against 35,268 cwts. (£243,831). Australia (though with a reduced demand) was the largest buyer, that country taking 7,662 cwts. of British writings this year, compared with 10,259 cwts. last year. British India came next, with 4,209 cwts., against 5,435 cwts. last year, followed by New Zealand, with 1,535 cwts. during the present year, compared with 4,751 cwts. in January-February, 1921.

CANADA'S imports of "paper and other wood products" last year amounted to \$38,239,672, comparing with \$58,716,334 in the previous year. Under this heading the imports from the United Kingdom were \$2,752,714 in 1921 and \$2,851,633 in 1920.

In the House of Commons, Mr. Baldwin has informed Mr. G. Terrell that Part II. of the Safeguarding of Industries Act, which dealt with the collapsed exchanges and dumping, had been brought into operation, but no orders had yet been made.

Imported Bronze Powders.

Application Opposed by Master Printers.

The Board of Trade Committee, presided over by Dr. J. H. Clapham, sitting in London, concluded the hearing of evidence with reference to the application of the Metal Powders, Ltd., supported by Radiant Products Ltd., and Aluminium Corporation, Ltd., manufacturers of bronze and aluminium powders, that these products should be included in the schedule under Part II. of the Safeguarding of Industries Act. The application was opposed by the Bronze Powders group of the London Chamber of Commerce, who were represented by Mr. Mackenzie Wood, M.P.

Mr. Samuel H. Sharp, director of S. H. Sharp and Sons, Leeds, textile printers, said that English manufacturers could not produce the coloured bronze powders required for the firm's special process of textile printing.

Mr. John Davies, of J. Davies and Allin, Basinghall-street, London, said that the order of merit in which he placed the products of the various countries was Germany, America, Canada, Great Britain, and Japan.

Mr. A. E. Goodwin, secretary of the Federation of Master Printers, speaking on behalf of consumers in the printing trade, made it plain that the Federation was opposed to the application.

Mr. S. J. Hann, director of Griffiths Bros. and Co., Ltd., said that the prices of German bronze powders to-day were about double the pre-war rate, so that it was obvious that the German makers could afford to supply at very much lower prices than they were quoting at present. Mr. Mackenzie Wood, M.P., submitted that it had been clearly established that the price of these powders during the time that the mark was supposed to have collapsed had been stable in that country. If that were so, the fact destroyed the applicants' case that German manufacturers undersold by reason of the depreciated exchange.

Mr. R. S. Cripps, for the applicants, contended that the British industry, though a small one, was efficient, and there was undoubtedly unemployment in it. The quality of the British products was now equal to the German. Importers were held to the German makers by special discounts and preferential terms. It was an effective method of capturing the market.

The decision of the Committee will be reported to the Board of Trade.

"THE MASTER PRINTERS' ANNUAL AND TYPOGRAPHICAL YEAR BOOK, 1922." Edited by R. A. Austen-Leigh and Gerald T. Meynell. London: Spottiswoode, Ballantyne and Co., Ltd. Demy 8vo.

The 1922 edition of this work is the third of the series, and its form is now firmly established. So good has the plan proved to be that there is no alteration, while the only new feature is a chapter written by Mr. Bernard Newdigate dealing with private presses of today. This is an interesting addition, however, and gives greater completeness to the annual. As to the information in the work, it has, of course, been brought up to date, and in view of the period of change through which the printing industry has been passing, this task has been a very considerable one. The arrangement of the work into definite sections such as "Alliances," "Agreements," "Kindred Associations," etc., renders reference easy, while there is also the assistance afforded by a complete index. A little rearrangement has been made in the Directory of Kindred Associations, the organisations of the various groups of overseers being added here instead of being placed among the trade unions. Not only is the Year Book a guide to the craft in this country, but the "Foreign Section" provides useful information concerning the organisations overseas. The volume is embellished with full-page portraits of the president of the Master Printers' Federation (Mr. James MacLehose) and of the secretary (Mr. A. E. Goodwin). The new Annual runs to 468 pages, some 20 more than the preceding issue, which indicates the extra work involved in revising the contents.

Trade Notes.

THE Right Hon. F. G. Kellaway, M.P., Postmaster-General, gave an address on "Post Office Problems" at the Constitutional Club. He was unable to promise immediate reduction in postal charges which he admitted had been urged upon him by business men throughout the country, but—in connection with the estimated surplus of over £9,000,000 on next year's Post Office commercial account—recalled the Government's pledge that Post Office users were entitled to get the benefit of any reduction in costs and of the surplus that might result therefrom.

A RESOLUTION protesting against the high postage charges and suggesting a return to pre-war rates was passed by Bristol business men on Saturday.

TO MEET the masters of the Livery Guilds of the City of London, the Lord Mayor and the Lady Mayoress gave a banquet at the Mansion House on Wednesday of last week, when there was a large attendance of gentlemen representative of the Livery institutions of the City and other distinguished guests, many of whom were accompanied by ladies.

PUBLISHING TRADE DISPUTE.—Despite earnest efforts on behalf of the printing trade—on the side both of the employers and the printing trade unions—to assist in the finding of some basis of settlement of the dispute in the publishing trade, the position remains serious. In the House of Commons on Tuesday Mr. Erskine asked whether the Minister of Labour was aware that there was a dispute between the Paper Workers' Union and Messrs. Simpkin, Marshall, Hamilton, Kent, Ltd., with the result that about 600 customers of the firm were precluded from obtaining supplies, and that many of them were ex service men dependent for their livelihood on the supplies. Dr. Macnamara replied that he had only just received notice of the question and would like to make further inquiries before answering it.

AT Northampton Bankruptcy Court on Tuesday, Bertie Horwood, cardboard box manufacturer, of Wellingtonborough, whose estate showed a deficiency of £2,022, said in 1919 he borrowed £450, on which he had paid £417 interest.

AMONG the week's announced dissolutions of partnerships is that between Alfred Willday, John Ernest Willday, and Herbert Taylor, printers, 55, Welford-road, Leicester; also those between Mary Frances Bond and the Universal Advertising Co. (1908), Ltd., advertising contractors, 49, Port street, Manchester; and Gladwin Mason Williams, Howard William Hyde, and William Kempston Stretch, advertising agents, 108, Long-acre, W.C.

UNEMPLOYMENT INSURANCE.—The special committee dealing with the unemployment problem appointed by the Joint Industrial Council, held a meeting last week, and decided to write to the Ministry of Labour for certain particulars, so that they might be in a position to put forward proposals to the J.I.C. in April.

CO-OPERATIVE ADVERTISING.—In view of recent proposals that printers should unite in the use of publicity directed towards the popularising of printing in general, it is interesting to learn that the Federation of Master Process Engravers is turning its attention to the same subject, and it has been suggested that printers and engravers should join forces in an advertising campaign.

BRITISH INDUSTRIES FAIR.—Replying to a question in the House of Commons on Monday, Sir P. Lloyd Greame said the cost of the British Industries Fair at Shepherd's Bush was £35,000, which was covered by the payments made by exhibitors. Taking into consideration the present trade position, his Department regarded the exhibition as a great success. The visitors numbered 49,000, and a considerable volume of business was transacted.

STATE PRINTING.—At the last Executive Committee meeting of the Federation of British Industries, Mr. A. E. Goodwin, on behalf of the printing trade, drew the attention of the Executive to the continued existence of the State printing works at Harrow, and asked that the Federation should protest against this example of Government competition with private enterprise in an industry where competition among ordinary firms was already very keen. It was agreed that a letter

should be sent to the Chancellor of the Exchequer supporting the views set forth by the printing trade.

FOOTBALL COUPONS.—Robert Newton, printer, of Stratford, was fined £10 at West Ham last week for printing ready-money football betting coupons. He pleaded that such printing was done by big firms, and that it misled the small printer. At Stratford, Frederick W. Manning, printer, of Ilford, was summoned on three informations for a similar offence, and was fined 10s. on each information with 3 guineas cost. For the defence it was urged that the man who gave the order for the coupons had pointed out that a similar announcement to that contained in the coupons had been published in a newspaper. Mr. Knight, who prosecuted, said proceedings had been instituted in regard to this.

THE second concert of the season in connection with Lithographers' Auxiliary to the Printers' Pension Corporation will take place at the Cannon-street Hotel to-morrow (Friday) evening, commencing at 7 p.m. The chairman, Mr. J. E. Reeve, is seeking to secure a record plate at this concert, and the fine array of artists who are to appear should considerably help him in his task.

DURING last week there was arranged a useful exhibition by the Design and Industries Association at Beechcroft Settlement, Birkenhead. The exhibits served to show what an enormous amount of art there is in everyday life, and specimens of letterpress, notepaper headings, advertisements, signs, etc., were displayed.

AT an Islington inquest on Friday it was stated that the deceased, widow of a master printer, who was found dead in a room full of gas, had been depressed because she could not pay her rates. A verdict of "Suicide whilst of unsound mind" was returned.

FOUND guilty at the Manchester Quarter Sessions last week of receiving a parcel of six raincoats which had been stolen from Exchange Station, Edward Hanson (31), compositor, was described by the police as a man who had given himself up to a life of crime for several years.

A PAPER "CUT."—Mr. Shortt states in the Parliamentary Debates that a reduction from six and a half inches to six inches in the width of the electoral registers, in the cases where it has not already been done, was estimated to effect a net saving of £6,000 a year.

A STRONG side of the London Press Golfing Society beat a side representing the paper trade at Addington on Tuesday of last week in a match by singles and foursomes by 10 points to 2.

THE result of the recent Typographical Association ballot on the amended constitution of the Executive Council as recommended at the Hastings Conference has been announced and is a confirmation by a large majority of votes.

INSTITUTE OF JOURNALISTS.—The thirty-seventh annual meeting of the North-Eastern District of the Institute of Journalists (Incorporated) was held at Newcastle on Saturday, when the chair was occupied by Mr. D. Polson, chairman of the district. The hon. secretary, Mr. Thos. Greene, presented the report of the committee, which recorded a year of useful activity. The financial statement of the hon. treasurer, Mr. P. J. Dorrian, was of a satisfactory character. The following officers of the district were unanimously re-elected: Chairman, Mr. D. Polson; vice-chairmen, Mr. A. E. Johnstone and Mr. F. W. Betty; hon. secretary, Mr. Thos. Greene; hon. treasurer, Mr. P. J. Dorrian; hon. legal adviser, Mr. Thomas Lambert, Gateshead; hon. auditor, Mr. David Jamieson; joint press secretaries, Mr. Alfred Thomas and Mr. Thos. S. Fenwick; representative to the National Council, Mr. Greene.

AT last week's luncheon of the Edinburgh Rotary Club, at which Mr. T. M. Sleight presided, an address on "The Making of a Newspaper" was given by Mr. Edgar W. Smith, the head of the mechanical departments of the *Scotsman* and *Evening Dispatch*. Mr. Smith mentioned that in the department with which he was associated there were ten different trades, an indication of the complicated processes involved in producing a newspaper. He did not know if they ever stopped to think what a wonderful thing a daily newspaper was.

THE *Yorkshire Post* printers' chapel on Saturday evening held their annual whist

drive and dance at Leeds. There were about 200 present, and a most enjoyable evening was spent.

THE members of the *Daily News* and *Star Overseers' Guild* held their bi-annual dinner at the Boulogne Restaurant, Soho, on Saturday evening, Mr. E. Stewart occupying the chair.

MR. JOHN WALTER BLUNDEN, for over 50 years connected with the firm of Messrs. J. Warner and Co., law stationers, who died December 12th, left £4,174.

MR. EDWARD JOHN GOODMAN, the well-known journalist, novelist, and dramatist, left £1,156. One of the oldest members of the *Savage Club*, he was for nearly 40 years on the staff of the *Daily Telegraph*.

ESTABLISHED 18 years ago, the *Pioneer*, a weekly Labour newspaper, has suspended publication at Woolwich.

A BIG whip-round is taking place in the Labour movement with a view to extending the support given by trades unions to the *Daily Herald*.

MANCHESTER Co-operative Party has decided to run a monthly newspaper in the Moss Side (Manchester) Division. The Party now has monthly newspapers established at North Tottenham, South East Ham, Kettering, King's Norton, Sparkbrook, Stockport and Sheffield. The combined circulations total a quarter of a million.

MESSRS. KENNETH, BROWN, BAKER, BAKER, solicitors, of Lennox House, Norfolk-street, Strand, W.C.2, announce that on instructions from Mr. J. Conway Davies, with regard to statement referring to him in the *Daily Sketch* and the *Evening Standard* they have issued a writ against the London Publishing Co. and Messrs. E. Hulton and Co., Ltd., claiming damages for libel.

FIVE NEWSPAPER'S CENTENARY.—The *Fife Herald and Journal* last week published its centenary number, and to commemorate the notable occasion the journal was enlarged to admit of a history of the progress of the paper being given. Illustrations lend additional interest to the story. The *Fife Herald* was founded by Robert Tullis at Cupar in 1822, and in 1879 came into the hands of the Innes family, descendants of whom continue successfully its publication, as well as that of several sister publications, from their well-equipped and up-to-date printing offices.

POSTER COMPETITION.—With a view to obtaining a higher standard of excellence in railway poster advertising, the Great Western Railway Co. announce a competition, open to all, in which the artistic and inventive capability of the competitors will have full scope. Designs are invited for posters in colours which will bring forcibly before the public the outstanding claims of the Cornish Riviera, Devon and West Wales as health and holiday resorts. Three prizes are offered, viz., first 100 guineas, second 75 guineas, and third 50 guineas, and the designs will be considered and selected from the standpoint of their combined artistic and advertising value. The judges will be Sir Kenneth Anderson, Mr. Harold Stabler, and Mr. C. H. Collins Baker.

IN an interview the Portuguese Premier stated that further credit from England was anticipated, but he refused to disclose the terms.

THE news that credit of £3,000,000 has been opened by the British Government to Portugal against goods, payable in five years' time in 20 per cent. instalments, is enthusiastically received in Portugal as a first step towards the improvement of Portugal's economic condition.

INCLUDED in the large programme of sporting events to be decided in Dublin during the week beginning March 27th, for the benefit of the Newspaper Press Fund, is a series of open golf competitions.

THE weekly *Ladies' Field* will appear in April as a monthly publication, at its present price of 1s.

WE note with pleasure a paragraph in the latest issue of the German weekly printing journal, *Die Buchdrucker Woche* (Zimmerstrasse 6, Berlin, SW68), making appreciative reference to the *British and Colonial Printer and Stationer*. In mentioning our recent increase of size, the editor of our German contemporary remarks that the *British and Colonial Printer and Stationer* is distinguished by the comprehensiveness of its contents and by its up-to-date news, and can be recommended to all who understand English.

The Claims of Simplified Typography.

Mr. Chas. T. Jacobi Discusses
 Changing Styles in Typesetting.

It is now generally admitted that the last half-century has seen big strides towards better printing in this country, and Mr. Chas. T. Jacobi, whose name is so well known on account of his long and honourable association with the Chiswick Press, is one of the few printers who can rest assured of an indisputable place, in the history of the period, among the pioneers of purer and more beautiful typography.

When Mr. Jacobi paid a visit, as briefly reported in last week's issue, to the Association of Master Printers of West and North-West London, he was able to enhance the interest of his lecture by including among the very interesting printing examples exhibited some samples of jobbing work showing the application in that direction of some of the principles of simplified printing which have guided the production of so much admirable book-work.

Mr. Jacobi began by drawing attention to the prevailing fashions in display of some 20 to 30 years ago, and he pointed out that the main characteristic was the employment of a great variety of types, mostly of bad design and, in the words of the Psalmist, "fearfully and wonderfully made." "But this is not all," he continued, "for you will observe that much labour was unnecessarily also employed in twisted and other rule-work, together with panels and inappropriate decoration, which was meaningless, and certainly detracted from the general appearance of the finished article. All this involved great trouble and expense in production, and also, I consider, needless cost in the purchase of unsuitable materials, which must eventually have been scrapped. Apart from any matter of taste, on which point I am sure nowadays we are all agreed, the consumers had largely to pay for this kind of work, and at the same time it could hardly have been remunerative to the printer. If we love and are interested in our craft, we can honestly say that the old methods were an instance of 'love's labour lost,' when we compare present day results obtained with fewer and better designs of types and less so called 'decorative' effects.

"I may venture to make some claim for this change of fashion during the past 30 years or so, and also the work of some of the printing classes held in London have helped very largely in this reform. I recollect that Mr. Amery, the teacher at the Aldenham Institute in St. Pancras, caught on the idea of this more simple style of display, and when he was appointed to the Camberwell L.C.C. School of Arts and Crafts, he carried there the traditions of the old Aldenham Institute, which has unfortunately been closed down. I vouch for this because I was a member of the Printing School Committees of both places for some years, and acted in an advisory capacity. Again the work of the L.C.C. Central School of Arts and Crafts demonstrates, under Mr. Mason, the many advantages of this more simple kind of work.

Some Principles of Design.

"My own theories on the subject may be summed up in the several articles or contributions I have made from time to time, and I trust I may be pardoned for quoting from these. For instance I have said: for many years it has been my aim to employ lettering of the most simple forms, and generally to use as few sizes as possible in any one piece of work. In putting new work of any kind in hand it is my usual practice in the absence of definite instructions to consider the size of the 'job' or book to be printed, to indicate the series of type faces to be employed, and also to suggest generally the 'lay-out' or design. This is particularly imperative with regard to books, when the nature and use of the work is to be taken into account. An appropriate fount must be selected of a suitable size, and the precise area of the type page must be determined. Margin is an important factor in the structure of the page, or rather of the two open or facing pages of the book, for it is essential to keep a proper balance or proportion between the printed matter and that of the surrounding margin of white paper. And this is not all, for the position of the print on the paper must be

carefully adjusted in order to obtain any approximation to what may be considered typographically an ideal book. Roughly, the print should occupy half the total area of the paper, but if any difference it should be more of margin and less of printed matter. For an *édition de luxe*, margin may be increased anywhere up to two thirds, leaving one-third for print. The interlinear spacing of the printed page is another and important feature to be studied in designing a book. An excess of white space between the lines is to be avoided, because it gives a weak or diluted appearance to the page. A large fount of type with the lines set fairly close together is more legible than a small one with wide spaces between the lines, besides which the whole effect of the page in larger type is more pleasing to the eye. Displayed matter, as a general rule, looks best if set out in panels or inverted cone shapes, rather than arranged in many broken lines of unequal length and in various sizes of type. In order to maintain consistency, one character or series of type face should be employed in any separate piece of work. Decoration should, as far as possible, be confined to that which will harmonise with the letterpress, or the type may perhaps be selected to suit the decoration. Ornament should only be used to decorate or fill what would otherwise be a blank space. Emphasis or 'colour' is to be obtained by rubricating certain lines; but care must be taken to use this sparingly, and where it is possible to pay some attention to its distribution on the page. Red ink is usually more effective than any other colour, and it is equally good under any conditions of light.

"You all observe from this that it is advisable, nay absolutely necessary, for all orders to be thought out before putting in hand. It is not every compositor, although he may be a good hand in many respects, that is capable of designing a piece of work, but if given a lead he will probably turn out a good job. This shows how necessary it is for some one to give, or make, some 'lay-out' at the start. Frequently, for a small job, a few verbal instructions are all that is necessary.

Good and Bad Lettering.

"Much however may be learned by the individual compositor if he will study all nice bits of printing that come his way. In the first place he should discriminate between the good and bad forms of lettering, and this not only applies to the compositor, but to his employer when adding to his plant. It is a well-known fact that to design a new alphabet is an exceedingly difficult task, for one is apt to stray into certain extravagances or eccentricities directly any attempt is made to depart from the conventional shape of the letter, and it is in this respect that some typefounders have failed. I have given all credit to our American cousins for being ahead of us with printing appliances, for in machinery we have certainly lagged behind them, but in matters of purely typographical design some proportion of their types—especially those of a commercial or jobbing character—were formerly but caricatures of the original and accepted forms of the alphabet. But in recent years we are indebted to them for many really good letterings, especially in book founts. The late Theodore L. De Vinne was largely responsible for the cultivation of a better taste in this direction, and I would also mention the work of Mr. Uppdike, Mr. Bruce Rogers, Mr. Goudy and a few others as helping in this good work. For the best models we must go back centuries, and it is only in the manufacture of type we can hope for improvement. The best capitals are more or less an adaptation from the inscription on the Trajan column in Rome cut in the very early part of the Christian era. Nothing done since has exceeded them for beauty. Again, taking the design of ordinary lower-case letters, most good founts of recent times have been modelled on the lines of those used by some of the very early printers—to mention one, Nicolas Jensen, who flourished in the fifteenth century.

"As a printer I have always argued that the more I see of the old forms of the alphabet the more I am convinced that if the designers of modern type faces were to make a greater

study of these old examples of letterings, and also if our present-day printers were more thoroughly to grasp the general principles which influenced the writing of the early manuscript books, and also the first printed volumes, we should, I feel sure, more nearly approach what we may consider the ideal. These sentiments, I think you will agree with me, apply not only to books but to all other kinds of printing, even if of mere commercial necessity. Personally, I have favoured the Caslon old face series for much of my work, and these founts, as you may know, are of eighteenth century origin. In recent years these have been in much demand for the simple character of work I am advocating. Such has been the demand that it has recently been specially cut for the Monotype, and the series so far is a fairly good rendering of the original characters. Caslon designed and cut many fresh founts of type during his lifetime, and his first great success was that of a complete fount of Arabic characters, which was cut in 1720. This was followed a little later by the first of the old-faced roman series now under consideration. Many of these founts were cut by his own hand, and subsequently he was assisted by his eldest son, also named William, and distinguished from his father by being designated Caslon II. The whole range of the series was completed about the year 1760. These type faces were generally in use until the end of the eighteenth century, and to some extent in the early part of the nineteenth, when for some inexplicable reason they went out of fashion, and much less beautiful types came into vogue for some years. Caslon's punches and matrices lay dormant until the year 1843, when the late Charles Whittingham, nephew of the founder of the Chiswick Press, recognising the excellence of the design of these discarded old-faced founts, induced the Caslon of that date to 'dig out' the matrices of the Great Primer size and specially to cast for him a sufficient quantity of that particular fount for the printing of 'Lady Willoughby's Diary,' a small quarto volume which was published by Messrs. Longmans and Co. in 1844. This was a great success, and the beauty of the type was at once recognised. These founts were practically modelled on those used by some of the early printers, but more consistent in design; and with improved appliances for casting, certainly turned out more regular and uniform as regards alignment, which, without sacrificing any details of design, all added to the general appearance of the printed page. Prior to William Caslon cutting this series, I remind you that the bulk of the type faces employed by English printers were imported from the Continent, mostly from the low countries.

Few Faces of Type Necessary.

"In the album of work I am showing containing various jobs, title pages and a few pamphlet or book pages, all executed during the past twenty years or so under my own superintendence, it is noticeable that the use of types in most cases is limited to one series, and the total number of different series employed may be counted on the fingers. Variety is to be obtained by spacing or whitening out, and also by a diversity in the arrangement of the complete design or lay-out of the work. Another point sometimes to bear in mind, is not to use too many sizes. This is not always possible, but it does simplify the general appearance of the job. If decoration is to be employed, let it be in harmony with your type, and never sacrifice or upset the balance of your work in order to squeeze into it some design which may not be suitable.

"Usually so-called artistic printing is a misnomer, and I dislike the term as usually applied. It only needs a reference to any reputable dictionary to find the proper definition of the root word 'art.' It is defined as a means to accomplish a desired end, or method of doing well some special work—that is, the systematic application of knowledge or skill in order to create the beautiful. In turn, beauty has been described as consisting of those qualities which are pleasing to the eye and mind, and is therefore synonymous with the elegant, the charming and the graceful.

Opportunities of Study.

"We have had several interesting exhibitions recently in which printing has been made a feature, all of which have been worth visiting, so that one may observe the work of the different exhibitors, and thus profit by the experience of others. One was at the Victoria and Albert Museum, and another was held lately by the Design and Industries Association in Queen's-square, Bloomsbury. Still another is yet running at the White City.

Shepherd's Bush. A most needful step in the right direction is to collect as far as possible the best examples of printing, which are to be often had for the trouble of collecting, and to note the different treatments. There are several firms doing really good work, but it would be invidious on my part to name them. A persistent study will enable one to discriminate between good and bad, or to put it in another way, to distinguish the wheat from the chaff.

"Another matter of importance is that of keeping up to date by the perusal of our trade literature. Many books have been written on technical subjects in connection with our craft, and if one wishes to keep up to date, the various trade journals, of which we have a good few, must also be studied. We shall then learn much that will be of value to us in 'the trivial round, the common task,' of our daily life. Still another suggestion I have is to take stock, as it were, of the many fine books which booksellers display in their windows.

"You will understand that I am not advocating any hard-and-fast method of display for all printing—for each job must be considered on its own merits. What I do emphasise is that each separate order should be dealt with according to its particular class, and be so arranged that it is consistent in style throughout. Legibility is the main point to be aimed at. Practically there is no limit in designing, for it is possible to take any piece of work and treat it in many different ways. I have in mind an experiment I made years ago in dealing with the title page for one of my own technical books. I was enabled to suggest some ten or more layouts for the same page, and yet each was in a totally different form and shape. Rubrication, too, adds to the variety, as will be observed. This demonstrates the fact that there is unlimited scope for the exercise of constructive powers. This is a faculty that may be cultivated by most people who are really keen on the subject, although we must admit, with more or less success. I have already suggested certain avenues of study which will be found helpful to those desirous of acquiring further knowledge and experience.

The Training of Apprentices.

"A suggestion I have for the future betterment of our craft in this matter of simplified typography is to make it a condition as far as possible that our apprentices should attend a technical class. They would derive great benefit from such attendance, because we all more or less specialise in some particular class of work, and the student if he is really keen will learn things other than those dealt with in his own workshop.

"Mr. Riddell, the principal of St. Bride Printing School, is doing some good work in promoting the facilities afforded by those classes, which has removed some of the prejudices formerly held by many as regards their restricted or limited resources in teaching. Many of the difficulties have now been remedied and even the future employer is catered for in some of the courses laid down. This certainly is a step in the right direction and no master printer need have any scruples in sending his son or sons to such an institution with the ultimate view of taking part in the management of his business."

New Typesetting Machine.

Finnish Inventor's Claims.

Past experience makes the printer wary of accepting at their face value the claims of inventors with regard to machinery for the mechanical setting of type. The subject is, however, a fascinating one and of great commercial importance, so that one learns with much interest of the appearance of yet another new typesetting machine. The inventor is Mr. O. W. Pusino, a Finnish engineer, who has been demonstrating his invention before printers and newspaper proprietors in Helsingfors. Mr. Pusino calls his machine the "Gnom" typesetter, and claims that, on grounds of initial and running costs, labour saving, and effectiveness, the machine should revolutionise printing conditions.

In the course of his description of the machine, the inventor states that the "Gnom" typesetter can be used for setting any kind of type. Type letters, he explains, are provided at the base with a lengthwise cut of one millimetre in breadth, and are inserted in magazines in the machine. These magazines are open in the two lighter models, and enclosed in the heavier model. They are provided with rules, on which the type letters lie astride. A keyboard, exactly similar to that of an ordinary typewriter, and requiring no heavier pressure, is used. The key on being depressed by a light touch sends the particular letter sliding along the rule by its own weight to the next vacant place in the line being set. This result is achieved by inclining all the rules down to a horizontal bracket holding the typed line. A lever similar to that on most modern typewriters fixes the length of line desired.

Each line is automatically clamped into a solid whole before it slides into the receiving slot. The cut in the base of the type letter does not in any way affect the result, as it becomes automatically filled in by the type rule in which it falls into place, and with which it is clamped into a firm entity.

Corrections are made much easier than in ordinary machine setting by the fact that the line in which the error occurs need not be reset; it is simply loosened, and the required letter substituted for the faulty one.

The whole process is a purely automatic one, dependent, like a typewriter, on leverage alone, and not on extraneous power such as electricity.

The Three "Gnom" Models.

The "Gnom" has been produced in three models. Model 1, for commercial and business offices, is a light machine for producing pseudo-typewritten circulars. This is done by means of a duplicating roller inserted into the "Gnom," and receiving the impression direct. The roll can then be removed and used in an ordinary duplicator, giving the appearance of a type-written page.

Model 2, for private and business printing, is also a light machine, with hand press attachment, for use in offices for printing circulars, cards, catalogues, leaflets, etc.

Model 3, for newspaper and book printing, is a solidly-built machine, with magazines of sufficient type-holding capacity for eight hours' constant working. This means a provision of 64,000 type letters per shift, with a

maximum of 6,000 for the letters in chief use. These largest magazines have each eight rules, about 120 centimetres long; as one of these is exhausted the next one slips into place by means of a light lever at the side of the keyboard.

The recharging of the magazines is a simple affair; the whole machine can be re-provisioned by one man in fifteen minutes.

For Models 1 and 2 typefounding attachments are provided. For Model 3 the use of a large separate typefounding machine for mass production will be found advisable. One such machine to each three or four "Gnom" typesetters will amply suffice.

Some Practical Tests.

A series of experiments has demonstrated the saving of time effected in, say, a newspaper composing room by the use of the "Gnom." A well-known mechanical typesetter, served by skilled compositors, gave an average of 7,000 letters per hour. A "Gnom," served by a typist with a speed of three to four letters per second, and with no composing room experience, gave a gross result of 10,000 letters per hour. These experiments showed, it is claimed, that the superiority of the "Gnom" over the ordinary lino works out at a little over 37 per cent.

This, says the inventor, is by no means the only or even the principal advantage. There is a considerable saving of electric power; in fact, none is required at all, unless for typefounding, where gas is in fairly general use. The necessity for skilled labour is greatly reduced. Any typist can work the "Gnom" without special training.

Minor advantages are the elimination of the nerve wrecking noise of machinery which makes present composing rooms so trying, and the fact that the work of setting itself is rendered less strenuous by the greater lightness and softness of touch demanded by the typewriter keyboard adopted in the "Gnom."

The initial cost of the "Gnom" will be small as compared with other composing machines, and as the machine is remarkably simple in construction, the keeping up costs will also be a great deal less.

The Newspaper Press Fund.

The announcement that Lord Leverhulme is to preside at the 59th annual dinner of the Newspaper Press Fund on April 27th draws attention to an organisation of which the outside world knows but little. It was to help the journalist who has fallen on evil days, and the widow and children he may leave behind him unprovided for, that the Newspaper Press Fund was founded in 1864, and for nearly 60 years it has done splendid work in relieving sickness and want among the journalistic profession. Last year, owing to the general depression, the claims were exceptionally heavy and the Fund distributed in grants and pensions the record sum of over £10,000.

The regular income of the Fund, from members' subscriptions and interest on investments, covers less than half this sum, and if it is to meet the calls upon it, to say nothing of extending its beneficent operations, a large amount of money has to be found from outside sources every year. Cheques should be made payable to The Secretary, Newspaper Press Fund, 11, Garrick-street, W.C.2.

SOUTH-WEST London Master Printers' Association

The Annual Dinner.

The fourth annual dinner and ladies' night of the Association was held on Saturday at Pritchard's Restaurant, Oxford-street, W., Mr. John D. Wise (president) occupying the chair. The genial greetings extended by the president and his fellow officers to those who participated were successful in imbuing the gathering with a spirit of camaraderie which continued throughout the whole of the proceedings. Credit for the success of the evening is also due to the dinner committee, which left nothing to be desired, either in the completeness of the musical arrangements or in the excellent fare provided. Among the principal visitors were Mr. J. A. Drewett, J.P. (president, Thames Valley Association), Mr. W. Whyte (secretary, L.M.P.A.), and Mr. A. Williamson (secretary, Federation Cost and Charges Committee). The company also included Messrs. A. Spring (past president), E. Trim, R. B. Simnett, E. Mountain, E. G. Cole

Mr. John D. Wise.

(vice-president), F. E. Tacey, E. J. and J. S. Pezg, W. G. Mead and F. H. Cole (hon. secretary).

Sandwiched between the toasts were a number of musical items, each one of which was very capably rendered. Mr. and Mrs. W. G. T. Long opened in praiseworthy fashion with a pianoforte duet; Mr. Harry Tubb, baritone, was well applauded and secured several encores; Miss Doris Poore, in recitals grave and gay, met with a warm approval; Miss Elsie Pelling, L.R.A.M. (soprano), sang her songs in fine style and was very appreciatively received, and Mr. Gordon Marsh, in mirthful moments, successfully undertook the role of the humorist, and quite justified the hearty reception which accompanied his performances.

Following the toast of "His Majesty the King," Mr. A. B. Simnett proposed that of

"The Ladies."

Mr. Simnett said one did not often have the privilege of addressing an assembly of ladies, and expressed the keen pleasure they all felt at their presence. The times were somewhat difficult, and he jocularly appealed to them for that reason to exercise a little forbearance towards their husbands.

Mr. A. Spring, in replying on behalf of the ladies, said he rose as a very nervous representative of that sex. He asked those present to try and imagine that he was what he was not, a lady. "Her husband" (said Mr. Spring) told him that their Association was called a typographical association, and after changing the word typographical into topographical he humorously dilated on the talents and virtues possessed by the president and the various offices of the Association. They (the ladies) had enjoyed themselves immensely, and they hoped to be invited to their dinner again next year.

"The Visitors."

Mr. E. Trim, offering this toast said at previous functions they had been honoured by the presence of distinguished guests, but he ventured to think that that evening none was more distinguished than Mr. Whyte, a man who had done so much in the interests of their Association. Mr. Trim also eulogised the efforts of Mr. Williamson in the same direction. It was with great pleasure that he proposed the toast and coupled with it the name of the latter gentleman.

Mr. A. Williamson, in responding, said he realised the honour conferred upon him in being asked to respond to the toast. He greatly appreciated their hospitality, and was certain he was echoing the thoughts of all the visitors present. He told a story of a Welsh woman who supplied a boarder at the end of the week with a bill which ran: Six eggs at 4d. each, 2s.; wear and tear of hen, 6d. (Laughter.) The previous evening he had the pleasure of addressing an audience of employees in the printing industry, and spoke to them of the wear and tear of machinery. At the close of the lecture a member of the audience remarked that he had said a great deal about the wear and tear of machinery, but was there any provision in the costing system for the wear and tear of the employee? That, thought Mr. Williamson, could be left to the individual kind-heartedness of the employer. After complimenting Mr. Wise on the excellent production of the dinner menu, which was printed by his firm, he said he noticed that they had a "Wise" man at the head of their Association. They also had a (dewy) "Mead," a "Spring," plenty of "Cole," a "Pegg," which he hoped was not a square one in a round hole, and a "Trim." (Laughter.) With names like these he thought there was no chance for any other Association in the Federation. He concluded by conveying to them from the Sheffield and Yorkshire Alliances congratulations and wishes for a successful evening.

"The Association."

Mr. W. Whyte, in proposing the "South-West London Master Printers' Association," said he was in at the birth of the Association, and as a matter of fact the Association was nearly in at the death of him, for he was down with influenza at the time. When at Scarborough, last year, on holiday, he had occasion to write to Mr. Wise, for he heard from 24, Holborn, that the South-West had "broken out" again. Since that time they had been on the best of terms. He would say (in the absence of representatives of other district associations) that the South-West had rendered most help to 24, Holborn, during the past twelve months (Laughter.) The Association had been well served by Mr. T. J. Mountain and Mr. A. Spring. In Mr. Wise they had the right man for the job. The finances were in the capable hands of Mr. R. Kent, whom he felt pretty certain, if he had not come from the north of the Tweed, must have studied under a Scotsman. (Laughter.) He spoke of the keen interest and self-sacrificing efforts of the late secretary, Mr. Mold and his successor, Mr. F. H. Cole, and concluded by referring appreciatively to the enthusiasm displayed by the South-West Association in the well being of the craft not only in their own district but throughout the whole of London.

Mr. E. G. Cole, in replying, said such a meeting as the present was unthinkable six years ago, and it was largely due to the efforts of Mr. Whyte and a few of the leading master printers in South-West London that they were able to meet round the festive board that evening. The Association existed among other things to promote a better understanding among master printers. They respected each other's work, and that was why they were able to meet together in such a friendly spirit.

"The President."

Mr. Young, in proposing "The President," said he thought the council had not exercised much sagacity in asking him to propose this important toast, although the reason why they had done so was probably because the "Young" always have reverence for the "Wise." Mr. Wise was not only their president, but he was also a representative of the Council of the L.M.P.A., and more than that, the remarks which he sometimes made there were attended to with the greatest attention. That in itself was a compliment because that body, though it was democratically elected, was composed of giants in the printing trade. He was sure that Mr. Wise before long would convince the L.M.P.A. that the South-West District was a very important organisation.

The toast was heartily accorded, with musical honours.

Mr. J. D. Wise, in replying, said he remembered Mr. Young's printing office when Battersea was not more than a rural village, when it had its market gardens, its meadows and orchards. The presidency of that Association, he thought, was one of honour, dignity and service. The ideals of men often run in triplets. There were faith, hope and charity. They also have honour, dignity and service. He felt deeply grateful to them that he had done some service during the past twelve months, if he had not he would consider himself the most miserable man in that room. He confessed to have done no great things but to have tried to do little things faithfully. Referring to Mr. Whyte's reference to Scarborough he said the Federation to-day were acting upon the spirit of their Association's original recommendation, i.e., the grading of wages, by which the skilled man would get a larger increase than the unskilled or the semi-skilled. They should remember that the craft did not belong to the employers only. The craft belonged to all who were engaged in it. He concluded by thanking them sincerely for the way they had honoured the toast.

"The Dinner Committee."

This toast was given by Mr. F. E. Tacey and was briefly replied to by Mr. R. Kent.

A very enjoyable evening terminated by the singing of "Auld Lang Syne."

A Poster Censorship?

A lively discussion has arisen in the Press on modern posters, their design, and display. A wide cleavage of opinion is apparent in the discussion. There are those who contend that posters in any case are hideous, and that to paste them on to walls and hoardings is, without exception, detrimental to the public weal and happiness. This party would not tolerate the ideal poster, were it eventually evolved. There is a second group who think that most posters are bad, that a few are passably good, and that one or two have some artistic merit, and, therefore, may be displayed with advantage to the public good. The third group think that, on the whole, the posters shown in this country are works displaying considerable merit, and that at any rate they are far in advance of those exhibited on the walls of foreign cities, the latter being for the most part crude, hideous, and bizarre.

A plea for a censor of advertising is made by Mr. Chas. T. Jacobi, of the Chiswick Press, S.E., who writes:—"Although a printer, I am, to use a commonplace term, 'up against' my own craft in saying that I personally dislike some forms of advertising. But we must allow that they are a necessary evil, and the wisest plan would be to limit their scope as much as possible. In fact, I suggest for consideration whether it might be a good thing to appoint a censor, as in the case of plays or films, in order to control not only the character or design of all advertisements, but also their placement. Certainly some improvement has been effected in recent years in the general appearance of all advertising matter, and especially that of poster work."

British Paper Machines' Triumph.

Record Output and Efficiency of Walmsley Installations.

The three mammoth British papermaking machines installed at the Abitibi Power and Paper Co.'s mill at Iroquois Falls, Ontario, are establishing world's records, and the credit is due not alone to the skill of the mill operators, but to the builders of the machines, Messrs. Charles Walmsley and Co., Ltd., Bury. The British firm erected three paper machines for the Abitibi Co. No. 1 machine has a wire 202 inches wide, and Nos. 6 and 7 machines are the two widest machines in the world, installed last year by the makers, each having a wire 232 inches wide.

In a recent issue of the *Broke Hustler*, the weekly organ of the Iroquois staff, references were made to the remarkable output and efficiency achieved by these machines. In the February 7th issue of the paper, it is stated that the tonnage turned out by No. 7 machine was 473 68 tons during the week, this machine heading the list with an average efficiency for the week of 97.0 per cent.

This is a remarkable run, and shows what these big machines can do. It is gratifying to know that the products of British papermaking engineers stand foremost in the world.

Papermaking in India.

Notes on Mr. R. W. Sindall's Recent Visit.

Mr. R. W. Sindall (Messrs. Sindall and Bacon) has just returned from a two months' visit to India, a country which he first visited in 1906, when he undertook an official mission to report on the manufacture of paper from bamboo. His recent visit was on behalf of a native firm, who were pushing forward inquiries as to the possibility of starting a paper and pulp business in the district of Bombay. Apart from the particular purpose of his visit, Mr. Sindall had altogether an exceedingly interesting time in the Eastern Empire. He arrived in Calcutta about the same time as the Prince of Wales, and spent Christmas week in that city, where he saw the Prince of Wales several times. Many very brilliant scenes were witnessed in Calcutta, of which only personal view can give an adequate idea.

Paper Duties.

When Mr. Sindall arrived in the Empire, he found an interesting controversy proceeding as to whether a duty should be imposed upon imported paper. Mr. Barbour, the manager in Calcutta for the Titagur Paper Mills, had written an article in an Indian paper on the general condition of the trade in the country, and suggested that unless the Government imposed an increased duty on imported paper, local mills would be unable to survive. The amount of duty suggested was 30 per cent., with special arrangements for a rebate on the import duty on raw materials and cheaper railway facilities for the local paper trade. In the course of an article which Mr. Sindall wrote for the *Times of India*, he pointed out that the paper used in India amounted to 80,000 tons a year, of which only 25,000 to 30,000 was manufactured in the country. Naturally, the newspaper people in India were up in arms about the proposed duty, for the reason that the paper mills in the Empire are unable to make news-print at the price of the imported article. In fact, if it were not that the Government arranges to take a certain amount of the output of the local mills, they could not be profitably carried on.

The fact that for years past over 50,000 tons of paper have been imported annually has led to the production of many schemes for the erection of paper mills to supplement the output of the present mills at Titagur, Kanjinara, Bengal, Lucknow and other places. An interesting feature of recent promotions is the fact that native people are concerned in them, although the ideas they have as to the cost of establishing a paper mill appear to require correction. Prospectuses have been issued and the investing public invited to subscribe the capital asked for, but so far all such attempts have failed to secure the desired object. One of the latest schemes is that of the Assam Paper Mills Co., with an authorised capital of two lakhs of rupees. They estimated that the capital outlay for the erection of a factory capable of producing 5,000 tons of paper per year would be £70,000 for plant and machinery and £14,000 for buildings and land.

A very different estimate, however, is put forward by Mr. Sindall in his contribution to the *Times of India*, in the course of which he says a paper mill having an output of 100 tons cannot be erected and put into operation with less than 40 to 50 lakhs of rupees. Such a schedule is not complete when showing only the cost of machinery. There are equally necessary items such as cost of buildings, erection, staff accommodation, transport of material from Europe to the mill site, promotion, expenses, working capital, etc. Money must be found for about 8 to 9 months' supply of grass, labour and working expenses before any cash is realised on the paper produced.

Mr. Sindall goes on to say that it is a common fallacy to suppose in India a paper mill can be equipped with cheap labour. It is more true to say that the cost per ton of paper under this heading is not less than the charges in Europe. Supervision and skilled attention must be in the hands of Europeans, and where ten European labourers are sufficient 20 or 30 Indian coolies are required. Some of the schemes published recently show a lamentable want of care in the preparation of a schedule of the items that go to make up the capital required.

Local Conditions.

In connection with the recent visit to India Mr. Sindall was instructed by a native firm to

make a thorough report and gather all information as to the possibility of establishing the paper industry in Bombay Presidency. In this connection, he informed our representative that the Government of Bombay had appointed a Director of industries who was anxious to promote local enterprises. In India the whole of the forest products belong to the Government, and after permission has been obtained taxes are imposed for whatever material is cut. Certain conditions apply with regard to the use of water, because while there is plenty of water for several months of the year during the monsoon period, in dry weather the water in the rivers shrinks to almost nothing. For instance, in the river with which Mr. Sindall was concerned the water is 40 ft. deep in the wet period and only 2 ft. 6 ins. in dry weather.

With regard to the quantity of water used in the manufacture of paper, Mr. Sindall points out that few promoters realise the enormous volume of water that is essential for papermaking. It is estimated that for high-class writings no less than 70 to 80 thousand gallons of water per ton of paper are needed, for medium qualities of printing from grasses 40 to 60 thousand gallons; for news made from wood pulp 8 to 10 thousand gallons. Hence for a mill making, roughly, 100 tons of paper from grasses probably 5 or 6 million gallons of water, clean, free from sand, mud, and suspended matter will be needed.

The cost of the fuel is likewise an important item in cost of production. The quantity of coal used for a ton of paper will be say 3 to 5 tons according to circumstances. Apart from the weight of raw material the quantity of fuel and chemicals used per week for a mill of the output mentioned, say 100 tons, will aggregate 480 to 500 tons inclusive railway charges for transport which escapes the attention of a superficial observer.

Raw Material Available.

In the article already referred to, Mr. Sindall has an interesting paragraph under the heading of cheap raw material. That, he says, seems to be regarded as an all sufficient reason for plunging into an intricate and expensive manufacturing process, and he proceeds to say that the only logical order of inquiry commences with the query—Is the material suitable for papermaking? Fortunately, the value of the material can be determined by accurate trials in a laboratory properly equipped with suitable appliances, making a sheet of paper and ascertaining how many pounds of material must be employed for making one pound of paper. The investigation of a complete scheme then takes the following form:—

Is the material available in sufficient quantity? asks Mr. Sindall, who goes on to say: In the case of a mill with an output of 100 tons of paper a week, the quantity of grass available must be 250 to 300 tons a week. This may mean a large area of forest land, and at once raises the question of cost of collection, baling, delivery to convenient places for transport, and other little items connected with the handling of large quantities of raw material which are apt to escape attention. It is quite safe to assume that the carefully calculated cost of grass delivered to the proposed site must be increased by 50 per cent. In this connection the accessibility of the sources of supply and the distance from the mill are matters of vital importance.

For the purposes of his report Mr. Sindall went right up into the jungle area, where his clients propose to obtain their grass, and he inspected the river from which the water would be obtained and the site, making, in fact, a thorough investigation of all the considerations entering into the scheme, and upon this he has made an exhaustive report.

In connection with the papermaking developments which are taking place in India, it is interesting to learn that Mr. Helstrom, representing Messrs. Boving and Co., Ltd., is at present in India for the purpose of answering any inquiries that may be made under this heading.

Bamboo.

It was not Mr. Sindall's purpose on this occasion to investigate any further the subject of bamboo. He states that a firm has started making bamboo by the sulphite process, the resulting pulp being described as good. There was, however, trouble with the digesters, but this matter is being adjusted, and the manufacture of pulp from bamboo placed on a proper basis.

Mr. Sindall also intimated that the Titagur Paper Mills have started manufacturing bleach and caustic soda by the electrolytic process, but it is too early yet to say whether

this is being run economically or not, since the process has only been in operation a few months.

Government's Experimental Factory.

An interesting note on the experimental paper mill which the Government is establishing is furnished by Mr. Sindall, who, in the course of his tour paid a visit to Dehra Dun and called upon Mr. Wm. Raitt and Mr. Pearson (director of the Forest Research Institute). He arrived there just in time to see some of the experimental plant being delivered from Messrs. James Bertram and Sons of Edinburgh. He saw two of the digesters being hauled into position by bullocks. The party was on its way to the ground where the foundations were being dug for the new experimental house, in which the suitability of Indian fibres for papermaking is to be tested on a large scale with a machine capable of producing finished paper 30 in. wide.

Mr. Raitt, we are informed, seemed very pleased with all the work that was going forward and he hoped to have an experimental factory in operation within a year and a half from the time of Mr. Sindall's visit. It is conceivable that one advantage of making the research plant sufficiently large to produce a sheet that can be used commercially is that it will help to cut down some of the costs of the experimental work.

Hand-made Paper.

The British hand-made paper industry is naturally very jealous of its unique position, and when an American book of poems was recently purported to have been printed on hand-made paper investigation proved that the book was printed on deckle d'aigle paper, which is the water-mark of a well-known firm of manufacturers of machine-made paper in the United States. The attention of the publishers of this book of poems, which bore the title of "Second April," was at once drawn to the fact. Writing on behalf of the hand-made paper industry of this country, Mr. A. W. Foster pointed out to the publishers that the distinction between the hand-made and the machine-made paper was one which was perfectly well recognised, and, accordingly, if, as appeared to be the case, the publishers described as hand made paper that which was made by a machine process, a misrepresentation of a very serious nature was being committed. In reply to this protest an interesting acknowledgment of the unique position occupied by the British hand-made industry is made, and at the same time the publishers point out quite frankly that a mistake had been made in referring to deckle d'aigle paper as hand-made. This mistake, it was added, was due entirely to carelessness and had been corrected in the second edition of the work. "As you are probably aware," the letter proceeds, "there is no such thing as genuine hand-made paper made in America. On the other hand, I understand that deckle d'aigle paper is finished in the same manner as hand-made paper, which accounts for the error in description that quite often occurs. I understand that such errors have also occurred in England and other countries where genuine hand made paper is made." This frank statement of the position by an American publisher will be welcomed by hand-made papermakers in this country, and it is a distinct gain to have had the position so definitely recognised.

Papyri at the British Museum.

There has been opened at the British Museum a special exhibition of Greek and Latin papyri presented at various dates by the Egypt Exploration Society. This body (formerly the Egypt Exploration Fund) is celebrating the twenty-fifth anniversary of the foundation of its Græco-Roman Branch; and it is in honour of the anniversary that the Museum has arranged its exhibition. A guide book to the exhibition, with introduction, detailed descriptions of the papyri shown, a preface by Sir Frederick Kenyon and one photographic facsimile, has been published by the society. The exhibition, which will be found in the MSS. Saloon, Case A, includes many interesting papyri of various kinds, selected to illustrate the wide range of papyrological discovery.

GERMANY'S Wholesale Paper Business.

The Situation Explained.

Herr Alexander Flinsch, the president of the German Paper Wholesalers' Association, contributes to a special issue of the *Papier Zeitung* an article explanatory of the difficulties under which the German paper business is carried on. He says:—

As a vanquished people we must learn submission, but the higher the previous political and economic situation was, the harder it is to learn submission. We have become reconciled to the loss of the war. We will submit to bear the loads heaped on us inasmuch as they can be borne. We will not, however, put up with the reproach made to the German business man regarding his moral qualities and with the mistrust which has been implanted into the hearts of the buyers toward the honesty of German business policy. The German business man is doing his utmost to return to pre-war methods on which his commercial renown was grounded, or in other words, to see that the buyers get the goods ordered under the conditions of the contract. Our customers can—and that is not their fault—often not understand why we are not always able to live up to our earnest intentions.

The oversea customer who has bought goods from us and returns home in the belief that he will receive the goods at once, perhaps instead receives a cable during the period of strong fluctuation of our exchange to the effect that the goods cannot be delivered or that there will be an increase in price. He is unable to understand this, and still this cable is due to considerations which in no wise touch the seriousness and integrity of the German business man. The reasons for this are to be found in the effects of the war and the revolution (exchange fluctuations and rationing of export) and then again in the endless obstacles over which the German exporter has no control.

The present situation may be explained in brief as follows: The unprecedented lack of water during the summer and the fall considerably diminished the water power, so that a great scarcity of groundwood and cellulose ensued which was bound to render the paper more expensive, and that further there was a great dearth of cars and coal, that further a large amount of paper could not be manufactured on account of the strike in a number of Saxon paper factories which lasted over a month, so that there is now a shortage of paper on the market. The situation is indeed so unpleasant that it may be justly said that at present the domestic demand can only be met in part. The bureau supervising the distribution of paper cannot be blamed for restricting the paper exports, as they are well aware of the conditions prevailing at home. It is gratifying, however, to note that the people who bought German paper before the war seem to understand this to a certain degree at least. On the other hand, a large number of our new customers fail to appreciate the fact that a sword is hanging over the German business man in the form of sudden political and economic interference on the part of the Allies, and that he does not in consequence enjoy the liberty he ought to have. It is accordingly not due to a low state of the moral standard, if pre-war business methods are not yet adhered to, but, on the contrary, to the great pressure brought on Germany in the form of the obligations imposed on us by the so-called Peace Treaty and by the uncertainty as to what may still be exacted from us.

Foreign Paper in Belgium.

Considerable amounts of American typewriter paper are imported into Belgium, says a U.S. commerce report. American writing paper in boxes is not, however, frequently seen in the local market and is largely replaced by French and English products. Retail prices for typewriter paper run from 12.59 francs for a box of 500 sheets for light copying papers to 25 and 30 francs for the same quantity of first sheets of good grade. Prices on boxed correspondence papers vary from 10 to 30 francs in packages of 50 envelopes and folders, with coloured papers, particularly grey, blue and green shades, much used. Envelopes with coloured linings are preferred.

The New Spanish Customs Tariff.

Important Concessions to British Products and Manufactures.

The new Spanish Customs Tariff, promulgated in Madrid on February 13th, and operative as from February 16th, is published as a supplement to the *Board of Trade Journal*. Class VII., paper and manufactures, (tariff Nos. 1021 to 1101) is as follows:—

GOODS.	Duties.	
	1st Tariff Pes. c.	2nd Tariff. Pes. c.
GROUP I.—RAW MATERIALS.		
Wood pulp:		
Mechanical (59) 100 kilogs. G	3 00	1 00
Chemical (cellulose) (59) 100 kilogs. G	0 30	0 10
Cuttings of paper, cardboard, rope, twine, etc.; waste paper, and fibrous material in fragments 100 kilogs. G	0 25	0 10
Old rags of vegetable fibres for making paper pulp (60) 100 kilogs. G	0 30	0 10
GROUP II.—PAPER UNMANUFACTURED (en rama) (61).		
Endless paper for writing, printing, or wrapping, not cut, white or coloured, smooth or "verjurado," glazed or not (61 and 63):		
Weighing up to 20 grammes inclusive per square metre 100 kilogs.	150 00	60 00
Of the natural colour of the pulp, not bleached or glazed, weighing less than 20 grammes per square metre, and paper for wrapping fruit 100 kilogs.	108 00	36 00
Weighing 21 grammes or more, and containing more than 40 per cent. of mechanical wood pulp (62), (64) 100 kilogs.	60 00	20 00
Containing more than 10 and less than 40 per cent. of mechanical wood (62)		
100 kilogs	75 00	25 00
Containing less than 10 per cent. of mechanical wood pulp, or containing no mechanical wood pulp 100 kilogs.	113 00	45 00
Paper of any weight or colour with transparent water marks (62 and 63) 100 kilogs. G	163 00	65 00
Other unmanufactured paper not specified in the Tariff 100 kilogs. G	165 00	66 00
GROUP III.—MANUFACTURES OF PAPER (65).		
Paper:		
White or coloured, cut, of any weight 100 kilogs.	210 00	70 00
Sized with gelatine or so-called linen paper or deckle edge paper (papel de barba) made by hand or machine, and sized after manufacture (67)... 100 kilogs.	225 00	75 00
Made with the Diana or like apparatus, the pulp containing special fibres or fancy colouring 100 kilogs.	125 00	50 00
Parchmented 100 kilogs.	135 00	54 00
Paraffined 100 kilogs.	195 00	65 00
With designs dry stamped, or imitations of edgings or lace (66) 100 kilogs.	3 00	0 90
Simply tarred 100 kilogs.	200 00	40 00
Tarred and reinforced on the inside or outside with thin fabric of cotton, jute or similar textiles 100 kilogs.	180 00	60 00
Not tarred, reinforced with fabrics of any kind 100 kilogs.	205 00	75 00
Parchment, or paper prepared from cellulose acted on by sulphuric acid and afterwards washed with basic products, crystal and glass-like (vitron) paper 100 kilogs.	163 00	65 00
120 00	40 00	0 00
Emery paper 100 kilogs.	150 00	50 00
Coated on one or both sides with a mineral material, dull or polished 100 kilogs.	100 00	40 00
Covered with thin sheet (hojuela) of wood 100 kilogs.	800 00	60 00
Covered with a sheet (lamina) of metal or with metal powder, or by galvanic processes 100 kilogs.	180 00	60 00
Paper treated with ferroproussiate or gallate of iron 100 kilogs.	3 75	1 25
Carbon paper and other papers for copying 100 kilogs.	12 00	4 00
Paper and cardboard albumenised or coated with any substance whatever for photography:		
Sensitised 100 kilogs.	6 50	2 00
Not sensitised 100 kilogs.	2 65	0 65
Wall-paper in rolls		
Printed on a natural background 100 kilogs.	180 00	60 00
Printed on a dull or shiny background 100 kilogs.	360 00	120 00
Embossed with gold, silver, wool, crystal and similar materials ... 100 kilogs.	450 00	150 00
Paper cut up, cut out into flowers, crimped in the shape of lanterns, lamp shades and other similar manufactures 100 kilogs.	4 00	1 20
4 00	1 30	0 00
Spun paper 100 kilogs.	5 00	1 50
Paper fabrics in the piece 100 kilogs.	2 25	0 75
Paper woven into sacks 100 kilogs.	500 00	175 00
Other manufactures with a basis of paper yarn or woven paper fabrics, not included in other Tariff Nos. 100 kilogs.	4 00	1 50
Cigarette paper:		
In tubes or cut into leaves for books 100 kilogs.	8 00	2 25
In packets (librillos) 100 kilogs.	500 00	150 00
Music paper 100 kilogs.	3 00	1 00
Cut paper:		
In strips less than 18 mm. in width 100 kilogs.	2 40	0 80
In rolls, from 18 to 300 mm. in width 100 kilogs.	300 00	100 00
Paper bags, with or without inscriptions 100 kilogs.	125 00	50 00
Paperboard (cartulina) (68):		
Without working or stucco:		
Of a size equal to or greater than 50 by 65 cm, 100 kilogs.	163 00	65 00
Of a smaller size; and that of hand-made linen paper 100 kilogs.	160 00	80 00
Stuccoed, goffered or not 100 kilogs.	200 00	100 00
Moulded into articles of any kind 100 kilogs.		
GROUP IV.—PAPER STATIONERY (69).		
Envelopes:		
Without crests, in boxes or packets, containing more than 200 100 kilogs.	400 00	133 00
With crests, and those without crests when imported in boxes containing less than 200 100 kilogs.	600 00	200 00
Cases and boxes of writing paper, with or without envelopes, ruled or not, put up for retail sale, with the covers printed or not:		
Without crest 100 kilogs.	405 00	135 00
With crest 100 kilogs.	630 00	210 00
Account books, letter copying books, registers, copy books, counterfoil books; photograph albums, stamp albums and the like, plain, ruled or printed, and paper ruled in pencil or ink (squared) (70) 100 kilogs.	360 00	120 00
GROUP V.—PRODUCTS OF THE GRAPHIC ARTS ON PAPER OR CARDBOARD.		
Separate labels cut out, or printed in large sheets without cutting out; commercial printed matter; invoices and cheques (71):		
Produced by typographic or lithographic processes:		
In one colour 100 kilogs.	540 00	180 00
In various colours 100 kilogs.	600 00	200 00
Produced by heliographic processes or processes other than typographic or lithographic or with inscriptions of leaf metal 100 kilogs.	500 00	200 00
Post cards and photographs 100 kilogs.	9 00	3 00
Pictures or prints, bound or on separate sheets of paper, of paperboard, of cardboard, or of papers stuck on cardboard:—		
Produced by typographic or lithographic process:		
In one colour 100 kilogs.	9 00	3 00
In various colours 100 kilogs.	10 00	3 50
Produced by heliographic processes or processes other than lithographic or typographic, or with inscriptions of leaf metal 100 kilogs.	8 00	3 00
Maps of all kinds 100 kilogs.	6 00	1 25
Music, engraved or printed by any process whatsoever 100 kilogs.	5 00	2 00

NEW SPANISH CUSTOMS TARIFF.

The New Spanish Tariff.

Goods.	Duties.	
	1st Tariff. Pes. c.	2nd Tariff. Pes. c.
Books, booklets, periodicals and other similar printed matter, whether bound or not: In the Spanish language:— Coming from and published in Spanish-speaking countries (70, 72 and 73) ... 100 kilogs.	0 25	0 10
Coming from and published in other countries (70, 72 and 73) ... 100 kilogs.	400 00	200 00
In foreign languages (70 and 73) ... 100 kilogs.	0 25	0 10
Liturgies in Latin ... 100 kilogs.	400 00	200 00
Manufactures of paper not specified ... 100 kilogs.	700 00	350 00
GROUP VI.—CARDBOARD AND CARDBOARD WARES.		
Cardboard:— Not worked nor coated, in sheets of a size equal to or greater than 70 × 100 cm. ... 100 kilogs.	165 00	33 00
Of a smaller size ... 100 kilogs.	165 00	35 00
Stamped out by a single stroke of the press ... 100 kilogs.	210 00	70 00
Covered with paper on one or both sides:— In sheets of 70 × 100 cm. or more ... 100 kilogs.	100 00	50 00
In smaller sheets ... 100 kilogs.	120 00	60 00
Suitable for coverings and roofing (tejadós), covered or impregnated with asphalt, tar, or similar materials ... 100 kilogs.	66 00	22 00
Strengthened, hardened, water-proofed by impregnating or coating of resinous products, gums or varnishes ... 100 kilogs.	120 00	40 00
Polished or burnished (drapers' board) ... 100 kilogs.	100 00	66 00
Stuccoed with mineral substances or covered with sheets of metal or wood ... 100 kilogs.	125 00	50 00
Cut out or bent, prepared for folding into boxes, with or without clamps ... 100 kilogs.	125 00	50 00
Cardboard boxes (75):— Lined with fine or common paper, or without lining, and without gilt edge ... 100 kilogs.	195 00	65 00
Lined, with gilt edging, covered with paper, printed and with designs or ornaments of any kind ... 100 kilogs.	300 00	100 00
Lined or with parts made of any textile fabric ... 100 kilogs.	600 00	200 00
Manufactures of cardboard and papier mache not specified ... 100 kilogs.	600 00	200 00
CLASS V., GROUP 1.—MACHINERY.		
Machinery for printing and lithography, for composing type and for bookbinding and other machinery used in the graphic arts, weighing:— Up to 100 kilogs. inclusive ... 100 kilogs. G	100 00	40 00
More than 100 and up to 1,000 kilogs. inclusive ... 100 kilogs. G	105 00	35 00
More than 1,000 kilogs. ... 100 kilogs. G	90 00	30 00
Detached parts for the above machines ... 100 kilogs. G	120 00	40 00
Machinery for making endless paper up to 50 metric tons in weight and detached parts of papermaking machinery ... 100 kilogs. G	150 00	50 00
Machinery for making endless paper, more than 50 metric tons in weight ... 100 kilogs. G	30 00	10 00

(59) This number only applies to paper pulp perforated in such a manner that it can be used for no other purpose than the manufacture of paper or pasteboard. When the pulp is not perforated, the Customs will cut the sheets, at the expense of the importer, so that it may not be utilised for any other purpose. Pulp not perforated is dutiable as common pasteboard.

Mechanical wood pulp is distinguished from the chemical pulp (cellulose) in that the pouring of a drop of fluoroglucine on the pulp will produce a red colouring in the mechanical, but not in the chemical pulp.

(60) The number applies only to rags for use exclusively for the manufacture of paper. Importers must prove that the said materials have been used for the manufacture of paper, by means of a certificate from the local Authorities, and must give a bond to pay the difference between the corresponding duties, which bond will be cancelled by the Customs Administration on receipt of the certificate.

(61) Unmanufactured paper ("papel en rama") means paper which has not undergone special manipulation since its manufacture, made in one operation ("de modo continuo"), without the addition of fibres or colouring by means of special apparatus.

(62) The presence of mechanical wood pulp can be detected by means of a drop of nitric acid, which will not have any effect if the paper does not contain mechanical wood pulp. To determine the proportion of mechanical pulp, fluoroglucine is to be used. This produces a red colouring, which is darker the more mechanical pulp there is in the paper; the approximate quantity can be determined by comparison with the standard specimen, an error of 10 per cent. in 60 per cent. being allowed.

Imports of paper may be accompanied by a certificate from the maker stating the percentage of mechanical pulp, but this is without prejudice to the investigation to be made by the Customs authorities to ascertain the existence and proportion of mechanical pulp, in the manner prescribed above.

(63) All paper, whose dimensions are more than 21 by 20 cms. in the case of paper in sheets, or whose width is more than 30 cms. in the case of paper in rolls or on bobbins, is classed as unmanufactured paper, not cut.

(64) Paper destined for undertaking printing periodicals or reviews shall pay the duties specified by Royal Decrees of March 28th and July 15th, 1921, provided the conditions and formalities prescribed therein are complied with.

(65) Paper which during or after its manufacture has been subjected to processes which change its form or exterior aspect is considered as manufactured paper.

(66) Dry-stamped designs are distinguished from watermarks because the lines of the former are more defined; the latter are found to be slightly stumped (difaminadas).

(67) In order to distinguish these papers, it is sufficient to scrape the surface, ink being absorbed by the pulp, owing to the lack of size.

(68) By paperboard ("cartulina") is understood the product obtained by sticking together two or more sheets of paper; uncut paper in reams, the weight of which exceeds 200 grammes per square metre, is also considered as paperboard.

(69) Articles obtained by varying the shape of the paper, ruled or bound and packed specially for retail sale, are included under this heading.

(70) The bindings shall be dutiable separately, according to kind.

(71) Relief work is considered as letterpress, and bronzed articles as articles of two colours.

(72) The authors or publishers of works in Spanish, printed abroad, are the only persons who may, on payment of duty, introduce the same into Spain fifteen days after a bibliographic notice has been published in the "Gaceta" by the Ministry of Public Works (Fomento). This notice, once published, is sufficient to authorise subsequent importations, except in the cases of distinct editions or of copies which do not accord in some detail with the notice published, a new authorisation being necessary in such cases. Periodicals printed abroad in the Spanish language do not require previous authorisation for their introduction into Spain.

(73) Mixed dictionaries of Spanish and any other foreign language, and books in Latin are considered as being in the Spanish language.

Loose sheets which refer to or are destined for works of foreign (non-Spanish) authors which are printed in Spain shall pay duty under Tariff No. 1085. Import of such sheets may only take place through the Custom-houses of Barcelona, Bilbao, Valencia, Irun and Port-Bou, and the name of the consignee (who must be a printer or publisher) must be declared.

(74) The product obtained during the course of manufacture by superimposing sheets of paper in wet state, without any adherent other than pressure, is considered as cardboard. The minimum weight per square metre is 350 grammes; that of less weight being dutiable as paperboard ("cartulina").

(75) Boxes of cardboard, lined with paper, which are imported as packing for handkerchiefs, shirt-fronts, buttons, piece goods, and other similar articles, are free of duty, in accordance with Disposition Y.

G.—Duty is leviable on the gross weight.

The new Import Tariff, like previous tariffs, contains two columns of duties, the "First" or higher tariff and the "Second" or lower tariff. In virtue of an exchange of notes between the Spanish and British Governments of 1894, products and manufactures of the United Kingdom are entitled to the application of the "Second" tariff rates on importation into Spain, together with any reductions of those rates which may be granted by Spain, by Treaty, to other European States, with the exception only of such special tariff concessions as Spain may accord in favour of goods of Portuguese origin. Products and manufactures of other parts of the British Empire are entitled to similar treatment on importation into Spain, with the exception only of the Commonwealth of Australia, which has withdrawn from the Arrangement of 1894.

Items other than those in the paper groups include logs for making pulp for paper, tariffs for which at 1,000 kilogs. G., are 5 pes. and 1 pes. respectively. Esparto, unworked, G., is subject to duties of 6 pes. and 2 pes.

Printing items in various classes include the following (the figures referring to the first and second tariffs respectively): Plates or sheets of copper and its alloys engraved or made into stereotypes for printing or lithography bear rates of 12 pes. and 4 pes. per kilog.; bronze type for printing, already made up, per 100 kilogs, 300 pes. and 100 pes.; type and accessories for printing, of alloys of lead and antimony, per 100 kilogs, 210 pes. and 70 pes.; inks for printing and lithography, per 100 kilogs, G., 100 pes. and 40 pes.

It is reported that negotiations are now proceeding between the English and Spanish Governments for the conclusion of a new commercial treaty between the two countries. The existing Spanish tariff, which came into effect on February 16th, is gravely prejudicial to British trade interests, marking as it does not only an increase on the pre war duties but being even higher than the provisional tariff which was substituted in May, 1921.

UNITED STATES
Imports and Exports of Paper, etc.

The total values of the imports of paper and manufactures of paper (including printed matter) into the United States, and exports therefrom, during the undermentioned periods were:—

	IMPORTS.	EXPORTS.
Dec., 1921	\$7,039,290	\$3,166,153
" 1920	9,913,954	10,637,293
Jan.-Dec., 1921	92,462,472	49,494,822
" 1920	84,686,852	89,072,289

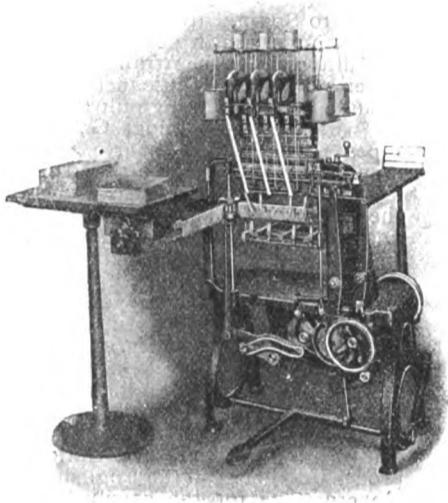

The principal items shown in the official returns are as under:—

SMYTH - H

Dealers in Special Labour-Saving Machines for

Smyth Imp. No. 3 Sewer.

For Sewing Letterpress Books, etc.
Only Rotary Sewer on the World's Market.

Smyth No. 8 Book Sewing Machine.

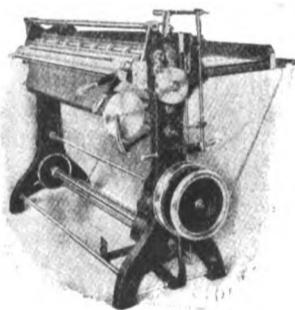

For Sewing Letterpress Books, etc.
Small and Large Size.

Smyth No. 4 Book Sewer.

For Sewing Stationery and Letterpress Books.

Most general all-round Sewing Machine on the World's Market.

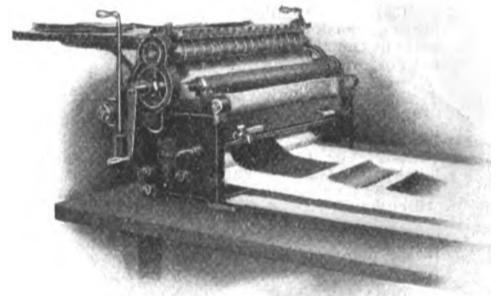

Smyth Cloth Cutting Machine.

For Cutting Cloth Rolls into rectangular covers, delivery flat.

**Over
4,000 Smyth
Book Sewing
Machines Sold.**

Smyth Sheet Gluing Machine.

For Pasting and Gluing Papers and Cloth delivery automatically wet side uppermost on to the band.

We represent the Sole Sale of

The Smyth Mfg. Co.'s Book Sewing, Case-making, Casing-in & Trimming Machines.

The Seybold Co.'s Dayton Automatic Guillotines and 3-Knife Book and Magazine Trimmers.

The Chambers Bros. Co.'s Quadruple Book Folding Machines and "King" Continuous Feeder.

The Marresford End Paper & Plate Pasting Machine.

The American Assembling Machine Co.'s Juengst Gathering, Auto Covering and Wireless Binding Machines.

The Brackett Stripping & Binding Machines.

The Anderson Rapid Jobbing Folders.

The Murray Improved Section Bundler.

The Murray Case Bending Machine.

1-3, Baldwin's Place, Gray

Telephone: HOLBORN 2215.

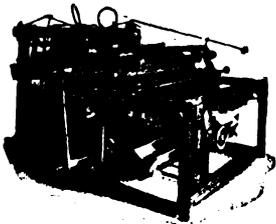

SMYTHORNE, LTD.

Specialists for the Bookbinding, Printing and Allied Trades.

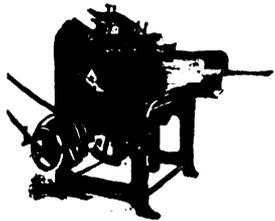

Juengst Section Gathering, Wire Stitching and Covering Machine.

The only Machine that will Gather, Jog, Stitch and Cover Books, etc. All while in continuous motion.

Chambers' 687C Quadruple Book Folding Machine.

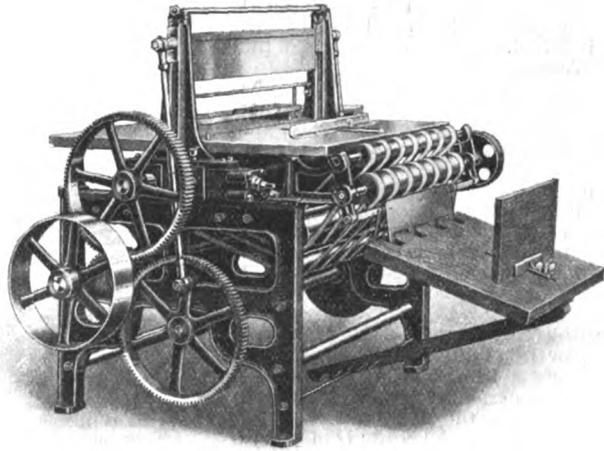

Producing either 4 16-page or 2 32-page sections from one 64-page sheet.

Marresford End Paper and Plate Pasting Machine.

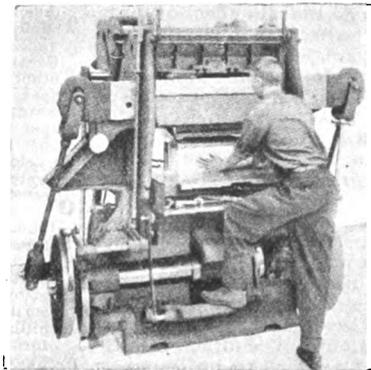

For Pasting End Papers on to end sections.

All our Machines are installed everywhere on an open trial basis and the Engineering Companies manufacturing the different Machines have in most cases specialized for nearly 40 years in the designing and building of these Labour-Saving Machines with wonderful results. Their great popularity is proved by the enormous number in use and the continual repeat orders being received.

Norwood Improved Section Folding Machine

For Manufacturing Stationers, etc.
Fold one sheet up to 24.
From Notepaper up to largest size Book Ledger.

Seybold New 3-Knife Book, Magazine, and Pamphlet Trimming Machine.

Inn Road, London, E.C.1.

Telegrams: "SMYTHORNE, LONDON."

FOREIGN

Manufacturers and Income-Tax.

Important House of Lords Decision.

The House of Lords recently gave an important decision regarding the liability of non-resident traders to income-tax, declaring that they were not so liable. In dismissing the appeal in the case of Greenwood v. F. L. Smith and Co., the House upheld the decision of the Court of Appeal affirming a decision of Mr. Justice Rowlatt which reversed a decision of the Commissioners for the General Purposes of the Income-Tax Acts for the Division of St. Margaret and St. John, Middlesex.

The subject is one of great importance to the pulp and paper industry, especially to those foreign firms which have agents or representatives in this country. The question of taxing foreign manufacturers through their agents here was discussed in June, 1920, by the British Wood Pulp Association, at the instance of Mr. L. P. Andrews, the president, who described dealings with the Surveyor of Taxes which had involved him in considerable legal expenses. A serious view of the situation was taken by the members of the Association, but as the London Chamber of Commerce had the matter in hand, it was decided to adopt a watching attitude. Now the decision of the House of Lords on appeal has come in support of the view taken by Mr. Andrews, Mr. Nicol, and other members of the Wood Pulp Association.

How serious the matter was may be gathered from the fact that in the case before the House of Lords on Monday, the respondents were assessed to income-tax on the profits derived from dealings in machinery with purchasers in the United Kingdom in the sum of £5,000 for each of five financial years. The Dutch firm in question had an office in Westminster, which it rented as sub-tenants, and it employed an engineer to look after installations, etc., of machinery in this country.

The questions arising on the appeal were—(1) Whether in the circumstances the respondents, who were a Danish firm residing and carrying on business in Copenhagen, "exercised trade within the United Kingdom" within the meaning of Schedule D of the Income Tax Act, 1853; and (2) whether the profits in question on the appeal were chargeable to income tax under subsection 2 of section 31 of the Finance (No. 2) Act, 1915, as profits arising, directly or indirectly, to a non-resident person through or from a branch factorship, agency, or management.

Giving judgment last week Lord Buckmaster said he had no doubt that according to the decision of that House in Grainger v. Gough (1896) there was no material before the Commissioners on which they could properly find that the respondents exercised a trade within the United Kingdom. There remained the further point arising on the construction of section 31 (2) of the Finance (No. 2) Act, 1915. It was contended that the effect of that sub-section was to alter the operation of Schedule D, and to render the respondents liable to be assessed for income tax, even though on the facts they had not exercised any trade here. He was unable to accede to that argument. It was important to remember that there was a rule which the Courts still obeyed that where it was desired by the Legislature to impose a new burden on the subject it was necessary that that should be stated in plain terms. If a section was ambiguous and the Crown sought a construction which would introduce a new subject of taxation the Court would not assent to that view. Sub-section 2 was at best a provision of an extremely doubtful character. The general charging power was to be found in the Schedules, and if Parliament desired to alter that machinery it should have done so in clearer language than was to be found in this sub-section. The appeal should be dismissed.

A TELEGRAM from Santiago de Chile says that Senator Tocornal, Minister of the Interior, whose age is 73, has challenged Senator Elidoro Yanez, owner of the newspaper *La Nacion*, to a duel on account of political allegations in an article.

New Zealand's New Paper Tariff.

Preferential Rates for British Products.

A new Customs Tariff for New Zealand was finally passed by the Dominion Legislature on December 13th, 1921. The complete Schedule of Customs duties as now operative, together with the text of the more important Sections of the new Act establishing the Tariff, was published as a supplement to the *Board of Trade Journal*. These Sections relate, *inter alia*, to "dumping duties," and special duties on goods produced in countries having depreciated currencies. The Dominion Tariff now contains for the first time (in addition to the General and Preferential Tariffs) an Intermediate Tariff which may be applied by Order in Council either in whole or in part, to goods the produce or manufacture of any country, whether part of the British Dominions or not. This Tariff has not as yet been applied to goods imported into the Dominion from any country. Class IX. covers paper and stationery and is as follows (with the exception of the last four items, which are from other classes:—

	British Preferential Tariff.	Intermediate Tariff.	General Tariff.
Paper pulp, for manufacture of paper	Free.	Free.	Free.
Paper, unprinted—viz., true vegetable parchment, glazed transparent greaseproof paper, and greaseproof imitation parchment paper of such qualities as may be approved by the Minister	•	10 p.c. ad val.	10 p.c. ad val.*
Waxed paper, printed or unprinted	•	•	•
Paper lace, embossed, and similar material, suitable for use in manufacture of cardboard boxes	•	Free.	Free.
Bleached sulphite or similar paper, declared for use in the manufacture of twine or imitation wickerware	•	•	•
Printing paper and writing paper, in rolls not less than 10 in wide, wholly or partly carbon-coated on one side, declared for use in the manufacture of counter-check books	•	•	•
Paper declared for use in the manufacture of cartridges (not including paper for wrapping cartridges or other goods)	•	•	•
Carpet-felt paper, and paper-felt, n.e.i.	•	10 p.c. ad val.	20 p.c. ad val.
Paperhangings*	•	•	•
Filter-paper and filter-papers; filter-pulp	•	Free.	Free.
Emery-paper, emery cloth and glass-paper, cut into shapes, in rolls or in sheets	•	5 p.c. ad val.	10 p.c. ad val.
Monotype-paper, in rolls, suitable for use with monotype machines	•	•	•
Paper of qualities approved by the Minister, entered and declared to be for the use of orchardists in wrapping fruit	5s. per cwt. or 20 p.c. ad val., whichever rate returns the higher duty††	7s. 6d. per cwt. or 30 p.c. ad val., whichever rate returns the higher duty††	8s. 9d. per cwt. or 35 p.c. ad val., whichever rate returns the higher duty††
Wrapping-paper, all kinds, glazed, mill-glazed, or unglazed, including browns, caps, casings, sulphites, sugars and all other bag papers, candle carton paper, tissues and tinfoil paper, not printed, n.e.i., viz.— In sheets not less than 20 in. by 15½ in. or the equivalent, or in rolls not less than 10 in. wide	5s. per cwt. or 20 p.c. ad val., whichever rate returns the higher duty	7s. 6d. per cwt. or 30 p.c. ad val., whichever rate returns the higher duty	8s. 9d. per cwt. or 35 p.c. ad val., whichever rate returns the higher duty
In sheets less than 20 in. by 15½ in. or the equivalent, or in rolls less than 10 in. wide	25 p.c. ad val.	35 p.c. ad val.	40 p.c. ad val.
Paper, n.e.i., including carbon paper and similar copying papers, and gummed paper, n.e.i., in sheets not less than 20 in. by 15½ in. or the equivalent, or in rolls not less than 10 in. wide	Free.	20 •	20 •
Paper, n.e.i., including carbon paper and similar copying papers, and gummed paper, n.e.i., in sheets of less than 20 in. by 15½ in. or the equivalent, or in rolls less than 10 in. wide	20 p.c. ad val.	30 •	35 •
Paper and paper wrappers, printed, lithographed or ruled, n.e.i.	25 •	37½ •	45 •
Cardboard, pasteboard, wood pulp board, corrugated board, millboard and fibre board, of size not less than 20 in. by 25 in. or the equivalent, and weighing not less than 2 oz. per sheet of 20 in. by 25 in. or the equivalent; strawboard of size not less than 20 in. by 25 in. or the equivalent, and weighing not less than 3 oz. per sheet of 20 in. by 25 in. or the equivalent; cloth-lined board, of size not less than 20 in. by 25 in. or the equivalent	Free.	Free.	Free.
Celluloid, plain, in sheets, n.e.i.	•	•	•
Cardboard, pasteboard, wood pulp board, corrugated board, millboard, fibre board, strawboard, and cloth-lined board, n.e.i.	20 p.c. ad val.	30 p.c. ad val.	35 p.c. ad val.
Cardboard boxes, and paper boxes, complete; paper and cardboard, cut or shaped, for wrappers, boxes, or other receptacles, n.e.i.	25 •	37½ •	45 •
Articles made of cardboard, papier-mache, or similar material viz.: Flower-pots, table and household utensils, n.e.i.	20 •	30 •	35 •
Cream-mugs, honey-jars, and similar receptacles, printed or otherwise	Free.	Free.	Free.
Paper seed-pockets, printed or lithographed to illustrate the nature of the goods to be packed therein	•	10 p.c. ad val.	20 p.c. ad val.
Paper bags, all kinds, n.e.i.	25 p.c. ad val.	35 •	40 •
Paper bags, printed or lithographed, n.e.i.	30 •	40 •	45 •
Envelopes, plain, n.e.i.	25 •	35 •	40 •
Envelopes, printed, lithographed, or embossed, n.e.i.	30 •	40 •	45 •
Directories of New Zealand, or of any part thereof; covers for directories	25 •	35 •	40 •
Albums, all kinds	20 •	30 •	35 •
Stationery, and paper, manufactured—viz., account books, scribbling-books, letter-books, copying letter-books, counter-books, guard books, copy-books with headlines on each page, drawing books, sketch-books, diaries, birthday-books, scribbling, and letter blocks; book-covers; book-markers; billhead, invoice, and statement forms, cheque, and draft forms; tags; labels, all kinds; printed window-tickets; blotting-pads; Christmas, New Year, birthday, Easter, and other booklets and cards, n.e.i.; printed, lithographed, ruled, or embossed stationery, n.e.i.	25 •	37½ •	45 •
Stationery, n.e.i.; cards, printers' menu, programme, calendar, Christmas, and similar, of cardboard, celluloid, or similar material, edged, or having embossed or printed thereon such words as "Menu," "Calendar," "Christmas Greetings," but otherwise unprinted, and suited to be completed in New Zealand	20 p.c. ad val.	30 p.c. ad val.	35 p.c. ad val.

* Suspended duty, which may be brought into operation by Order in Council.
 † This duty to remain in suspension until it can be shown to the satisfaction of the Department of Agriculture that paper for wrapping fruit, of quality equal to the best imported paper can be sold in New Zealand at reasonable prices and in sufficient quantity. A reasonable price shall be deemed to be a price not exceeding the current domestic value of paper of good quality for orchardists' use, plus freight, insurance, and all charges landed in New Zealand when imported from either British Dominions, Europe, or America, as the Department of Agriculture may elect, and plus not more than ten per centum.

NEW ZEALAND'S NEW PAPER TARIFF.

Empire Pulp Resources.

Is It Wasteful to Use Wood?

An interesting discussion took place before the Royal Society of Arts recently on a paper read by Mr. Wm. Turnbull, Timber Commissioner for the Government of British Columbia, who gave an interesting description of the timbers of that area and the uses to which they are put. Referring to the pulp and paper industry, he said this was still in its infancy, but was a very healthy sturdy youngster.

Proceeding, Mr. Turnbull said: We have four pulp and two paper plants, and production has grown from practically nothing in 1912 to an output of 136,832 tons of news-print; 9,792 tons of wrapping; 5,300 tons of sulphite, and 9,000 tons of sulphate pulp in 1920. With abundant water power, supply of 180 billion feet of timber saw-log size of species suitable for pulp, large stands of young growth working day and night from spring to fall to attain pulping size, and splendid harbour facilities, this industry is capable of enormous development. Five new pulp companies are preparing to start operating, and more will follow. Pulp stands in Eastern Canada and the Eastern States are being rapidly depleted, and the attention of the manufacturer and the capitalist is turning to the west. We are naturally optimistic in British Columbia, and we have ample grounds for our optimism.

A Serious Question.

The discussion elicited some criticism as to the cutting of timber for pulping purposes. Lieut.-Colonel Sir David Prain was very sorry to hear Mr. Turnbull boasting about the increase in the output of pulp, of which British Columbia seemed so proud. He would like to ask the author what was done with that pulp and also what it was made of. He thought the time was coming when the various communities interested in the matter would have to forbid pulp being made from the timber of any tree that was of the slightest use for any other purpose. The bulk of the pulp used was employed for an ephemeral purpose, for making paper for tradesmen's circulars and for daily newspapers and such things. The question of the disposal of pulp was a most serious one, and he thought that Governments which had the interests of the communities they governed at heart would have to take steps to say what might and what might not be used in the way of timber to produce pulp that was to be employed for ephemeral purposes.

Mr. Byron Brenan did not quite agree with Sir David Prain in deploring the use of timber for making pulp. After all, the paper on which the proofs of the author's paper were printed might be made of British Columbian pulp, and he was sure nobody would say that that paper had been used for a subject of ephemeral interest.

Replying to the criticism of Sir David Prain, Mr. Turnbull remarked that, strictly speaking, whenever timber was used for any commercial purpose it must be used for an ephemeral purpose. In the United States pulp was used for making the most beautiful furniture, basket chairs that closely imitated the Japanese wicker chairs, and twine, sacking and even clothing. He did not see any difference between using soft wood for such purposes and using it for street paving blocks. From an æsthetic standpoint it was a shame to cut down a single tree from the hills of British Columbia, but from the commercial point of view he could not see any difference between pulping it and sawing it into lumber or using it for any other commercial purpose.

On this subject Mr. G. M. Ryan, late India Forest Department, writes to the *Journal of the Society of Arts*:—If there are grasses and shrubs already growing wild within the Empire and whose production can be increased by cultivation (as for instance, in India and Burma, which all who have studied the subject must admit) sufficient for the Empire's requirements, the use of valuable coniferous woods for this purpose, is to be deplored. The trees that are being cut up and so manufactured not only in British Columbia, but in Newfoundland (where the paper-making industry from soft wood is even larger) have taken over a century to grow, whereas grasses (excluding bamboos) and shrubs are producible in a year or two or three at the most.

The late Mr. James Edward Bennett, of Sutton, Surrey, managing director of Cockayne and Co., Ltd., printers, left £17,961.

AMERICAN MAGAZINE POSTAGE.—Being officially informed that as a result of the Madrid Postal Convention of last year the postal rate on American magazines to Great Britain would be reduced from one-half a cent (American) an ounce to one quarter of a cent., beginning January 1st, 1922, most of the American magazine publishers reduced their subscription rates in Great Britain. However, when the cheaper postage rate was taken advantage of, the British Post Office affixed "Postage due" stamps, bringing the total postage up to the old rate. This natur-

ally caused embarrassment to the American publishers, whose subscription charges naturally included the postage. They have now made inquiries here and have been informed by the Post Office that the American Post Office misinterpreted that particular clause of the Madrid Convention. The British Post Office has offered to accept American magazines here at the lower rate without affixing "Postage due" stamps for a brief limited period until the American publishers had had time to readjust the rates.

Australian Notes.

Commonwealth Board Mills—The Year's Profits — Pulp-making Experiments—Western Australian Laboratory to Continue — Labour Daily Levy Dispute — Newspaper Developments — Big Consumption of News-Print — Supplies from America — A Book Postal Puzzle — Postage Alterations — New Company — Question of Partnership — Post Card Problem.

(From Our Sydney Correspondent.)

THE annual report of the Commonwealth Board Mills reflects the condition of the industry during the past year. A dividend of 8 per cent. per annum has been declared on the cumulative preference shares, amounting for £1,316. For the rest the board has decided, "in view of the general position of industries at present," to retain in hand a remainder of £6,376, which is being transferred to profit and loss.

ON its activities during the twelve months to August 31st last, the company cleared £6,190, whereas the profit shown in the 1920 balance sheet was £8,727, after providing £1,688 for depreciation, and making customary appropriations. For that year holders of ordinary shares received 10 per cent. Paid-up capital has been increased from £63,020 to £79,445.

IN its report, the board expresses the opinion that the trade of the Commonwealth will suffice for the full absorption of the mills which have been completed in Australia, given normal development. The company's machinery and plant are valued in its books

at £93,560, as compared with £82,027 a year earlier, and stocks are shown at £37,420, a against £28,050.

THE Western Australian Forest Products Laboratory is to continue its activities on a semi-commercial basis. These activities embrace experiments with Australian hard woods for the production of paper pulp. It is thought probable that in five or six months' time definite information may be obtained on this question.

AN interesting case has been heard in the Law Courts arising out of the 10s. levy made by the A.W.U. towards Labour Daily Papers, Ltd. Application was made to quash an order made against a member of the union in respect of the levy. Included in the grounds upon which the quashing order was applied for was one attacking the power of the union to impose a levy and recover it by virtue of the union's registration under the Commonwealth Conciliation and Arbitration Act. The Court, however, ultimately gave a decision against the union upon the interpretation of its own rules.

MR. M'GILL, for the appellant, said that the complainant in the case heard before the police magistrate at Bundaberg disclosed that the complaint had been laid by George Martens, an officer of the A.W.U., duly authorised in that behalf, against Frederick Moore, who had failed to pay the Labour Daily Papers, Ltd., a levy fee of 10s. for an adult male member within 21 days after the levy had been duly declared to be payable by the general secretary of the union, as provided by clause 17 of the constitution of the union, such levy being a due other than a contribution, contrary to the constitution and rules of the said organisation and Act in such case made and provided. Moore was fined 10s., the levy fee, and costs, in default levy and distress, and in default seven days' imprisonment. Mr. M'Gill

asked that the order be quashed on several grounds.

AFTER considerable argument the quashing order was made absolute, as requested.

SOME interesting figures have been published lately concerning the size and growth of Australian newspapers. During a period of 13 weeks the Sydney Sun used 1,583 tons of news-print in serving its customers, and in order to give some idea of what this quantity of paper represents various similes have been employed: Thousands of rolls of paper treated as a ribbon yielded, when unrolled and laid on end, 37,221 miles of paper. In other words, the ribbon would have circled the earth and still have left 12,000 miles of paper to flutter from The Sun office in the sky covering a twentieth of the distance which separates the earth from the moon. To put it another way, in considerably less than two years the ribbon of news-print upon which The Sun is printed reaches from the earth to the moon.

THE annual general meeting of the Herald and Weekly Times, Ltd., held in Melbourne, discloses a satisfactory condition of affairs. The Herald is being re-modelled, and the other publications of the company, including the Weekly Times and the boy's paper, Pals, are being developed.

IT was announced at the meeting that the general manager (Mr. A. G. Wise) had gone to Canada and the United States with the object of perfecting arrangements in connection with the supply of paper and new machinery.

THE report of S. Bennett, Ltd. (Evening News) for the year ended October 31st, 1921, shows a profit of £22,414 comparing with £28,785 in the previous year. With £442 brought forward there was available £22,856, which is dealt with in various ways, including a dividend of 8 per cent. Among the principal items on the assets side is the figure of £112,989 for plant, machinery, freehold property, newspaper establishment, etc., and £36,927 stocks. A proposal is on foot to introduce new capital into the business.

UNDER the amended postal regulations which will be issued shortly a definition will be given of what constitutes a book for purposes of the Postal Act. It is intended to provide for a wider definition of a book than previously existed under the regulations, and to avoid the confusion which was caused by the officials of the department giving various interpretations of what was a book. The book post rate is 1d. per 8 oz. and the printed matter rate is 1d. per 2 oz. A committee of postal officials will be appointed in Melbourne to consider all applications for registration of books, and publications not registered will be charged for as printed matter. It is hoped that by this means the confusion previously caused in the trade will be eliminated.

FOLLOWING the Madrid postal convention, the postage rates have been re-arranged and in accordance with the decisions of the Convention the ounce standard has been established in the Commonwealth. With slight exceptions the rates within the British Empire will be unchanged. The exceptions are:—Commercial papers, for every 2 oz., 1½d., with a minimum of 3d. Articles impressed for the use of the blind, for every 10 oz., 1d.

GRAHAM BROTHERS, LTD., has been registered with a capital of £40,000, in £1 shares. Objects: To acquire as a going concern the business of Graham Bros., Ltd.; to carry on the business of paper merchants, stationers, printers, etc. First directors, Robert Fortesque Graham and James Roland Nairne Graham. Registered office, Sydney.

THE attention of the authorities has been strongly directed to the sale of certain post cards and drastic action has been proposed for those people who offend in this connection. The chief secretary at Melbourne has undertaken to place the matter before his colleagues.

MR. JOSEPH BELL, for many years a director of Barlow and Jones, Ltd., spinners and manufacturers, Manchester, left £69,778, with net personalty £59,076. The testator gives £100 to J. Cummings Walter, editor of the Manchester City News, "for great help in the prolonged trouble over the removal of the Manchester Royal Infirmary from Piccadilly to the new site in Oxford-road."

Lloyd Memorial (Caxton) Seaside HOME.

The annual meeting of the governors and subscribers of the Lloyd Memorial (Caxton) Seaside Home, Deal, was held at the St. Bride Foundation Institute on Saturday. Lord Hambleden, in opening the meeting, said that the accounts showed a substantial surplus of income over expenditure of £494 7s. 8d. The expenses of £6,700 16s. 1½d. included £283 6s. 3d. expended in the opening of the new home for women, and £999 4s. 1d. for sanatoria benefits. One thousand six hundred and ninety-seven persons had been admitted during the year. The number of weekly subscribers from the printing and allied trades had enormously increased. Although £8,976 was available for the new wing, over £4,000 would still be required. Contribution will be gladly received by the Secretary, 80, Blackfriars-road, S.E.1.

The "Winkler" Sheet Feeder.

In the "Winkler" pneumatic sheet feeder for flat-bed printing machines of all kinds—according to particulars sent us by the selling agents, Messrs. W. J. Light and Co., Ltd., of 127, Fenchurch street, London, E.C.3—the separation of the sheets is a matter which has been treated with special care in designing this feeder. By using a rotary pump the time for separating the top sheet from the pile, in contradistinction to other systems having cylinder pumps, can be considerably lengthened. As a consequence this separation, even at highest speeds, always takes place sufficiently slowly and consequently with great exactness. At the moment the suction rod sinks on the pile the top sheets are loosened by the air-blast and they are blown up towards the suction nozzles, which simultaneously take hold of the top sheet. By thus blowing up the top sheets towards the suction nozzles the advantage is obtained that these nozzles need not touch the paper pile when seizing the top sheet. As soon as the suction nozzles have taken hold of the top sheet the air-blast is cut off. The second sheet, sometimes adhering to the top one, is completely separated by a tilting movement of the nozzles, and it then has sufficient time to fall back whilst the suction nozzles slowly rise.

In regard to the hand feed, it is claimed that the maximum time for adjusting the feeder for this purpose is not more than five minutes. When beginning or interrupting the work, it is not necessary, as in other systems, to feed the first sheet by hand, as, by simply turning the hand-wheel on the eccentric shaft, the first sheet is led towards the lay-on marks, whereupon the machine is put into operation.

Mr. BALDWIN stated in the House of Commons on Monday that the question of bringing into operation Part II. of the Safeguarding of Industries Act, in regard to industries where the reports of committees had been received, was still under consideration. He hoped, however, to be able to state, before Easter, what action the Government proposed.

SPECIAL PREPAID ADVERTISEMENTS

The Minimum Charges for Three Lines, with an average of seven words to the line, for Advertisements under the headings given below are as follows (extra lines at proportionate rates):—

THURSDAY, MARCH 23, 1922.

The Wages Negotiations.

EFFORTS are being made to expedite settlement of the question of wages revision. Representatives of the London Society of Compositors were to meet representatives of the Employers' Federation yesterday, so that the whole of the unions have now conferred with the employers. A special meeting of the council of the Federation of Master Printers is being called for Wednesday next, whilst in the meantime master printers' associations are meeting all over the country. The London Master Printers' Association is holding a special general meeting in London on Monday next. On Tuesday there was held a meeting of representatives of the executives of all the trade unions concerned in the present negotiations with a view to considering the position. The general attitude of the meeting was, we hear, one of opposition to any decrease in wages, and a long discussion took place as to whether or not it was possible for all the unions to make common cause in the present negotiations. It was stated by one or two speakers that their societies would prefer to conduct separate negotiations with the employers, but those unions that were in favour of a united movement expressed the desire that the Printing and Kindred Trades' Federation should assist them in arranging a general conference between themselves and the Employers' Federation.

The Postal-Rates Position.

PRINTERS are still kept waiting for some definite pronouncement as to postage reduction, though they have now every reason to hope that a decrease in at any rate the charges on printed matter and post cards is not far off. In view of the reported conflict of views between the Chancellor of the Exchequer and the Postmaster-General, much interest attaches to the fact that the Chancellor of the Exchequer on Friday received at the Treasury a deputation organised by the Association of British Chambers of Commerce on the question of postal rates and facilities. Sir Arthur Shirley Benn, M.P., president of the Association of British Chambers of Commerce, introduced the deputation, and speeches were made not only by representatives of commerce in general but also by the Right Hon. C. W. Bowerman, M.P.; Mr. James L. MacLehose, M.A., LL.D. (president

of the Federation of Master Printers), and Mr. Lindley Jones (Weekly Newspaper Proprietors' Association). The proceedings, which were private, lasted about an hour, and when the deputation left they were of opinion that the reply of Sir Robert Horne was fairly satisfactory, though non-committal. We learn that the views of the printing trade were very ably voiced by Mr. Bowerman and Mr. MacLehose, and when the Chancellor inquired as to what reductions were regarded as most pressing, the deputation was emphatic in giving precedence to the postal rates on printed matter and post cards.

Paper Prices.

MERCHANTS are offering clearance lines at remarkably low figures. The monthly organs of some of the leading houses contain attractive bargains every issue. Among recent offers we have seen fine printings at 3d., writings at 3½d., bonds at 4½d. and so forth. These low prices are in vogue as a result of the determination to wipe out all but new standard stock. In some cases removal of premises provides the merchant with an opportunity to cut losses and reduce stock in order to save cartage and permit a fresh start to be made with post-war stock at the present level of price. It seems to be taken for granted in the trade that we are actually on a stable level now. Certainly, there is a more confident tone in buying quarters and less hesitation about purchasing for stock.

Gummed Paper, etc.

GUMMED papers, coated stock and flints have fallen again recently, and to-day's prices are not much more than twice pre-war. There is not much demand for this class of stock, however, for the chromo-lithographic trade is as dead as a door nail. Lancashire and Yorkshire represent doubtless the big chromo-stock consuming area and agents in that quarter are having an abnormally bad time.

Trade with the East.

IT is becoming a general opinion that business is slightly better, and there are not wanting those who claim quite confidently that so far as their own business is concerned the corner has been rounded. The most encouraging bit of information we have heard this week was the statement of a merchant that things were moving in the Eastern trade. It is of fundamental importance to the paper and print trade of this country that our normal trading relationship with India, China and the East generally should be resumed at the earliest moment. The trouble in India has hit our trade more than is generally appreciated; and as for the Lancashire textile industry and its associated interests, it is safe to say that the loss of Eastern connections has been responsible mainly for the widespread unemployment. When the key export trade is dead, shipping, insurance and all the commercial routine connected with exporting are dead and the home demand for paper and print falls to zero. A revival in shipping would mean everything to our paper mills and printing offices.

Paper Imports Fluctuate.

THE receipts of paper and cardboard at British ports last month amounted in quantity to 408,793 cwts. This figure for the month of February alone represents a decline of 63,779 cwts., or 13.6 per cent., compared with February last year; but for the two months' period (January-February), when 1,097,481 cwts. were imported, an increase is shown of 222,636 cwts., or 25.4 per cent. During January-February packings and wrappings represented 31.7 per cent. of the total quantity received, printings and writings 27.6 per cent., strawboards 24.3 per cent., millboards 7.7 per cent., other sorts 6.6 per cent., coated papers 1.2 per cent. and stationery .6 per cent. Packings and wrappings, the largest item on the list, amounted

to 348,839 cwts., and show an excess over the corresponding period of last year of 156,420 cwts. There is an increase in the imports of printings (302,923 cwts.) over last year of 54,815 cwts. Referring to the countries which increased their consignments of printings, it is seen that 48,452 cwts. were imported this year from Norway as against 32,192 cwts. last year; Germany's figure stands at 23,397 cwts., against 18,476 cwts. Newfoundland sent us 10,280 cwts. during the last two months, while for the corresponding two months of 1921 no receipts whatever are put to her credit. With regard to the countries supplying the British market with packings and wrappings, a consistent increase is shown in each of the seven countries mentioned. Supplies from Norway amounted to 79,775 cwts. against 31,541 cwts. last year, while the shipments from Germany increased from 43,822 cwts. last year to 68,351 cwts. during January-February of the present year. With reference to coated papers, the only feature of note is the increased supplies which have been received from Germany, viz., 5,056 cwts. compared with 2,929 cwts. last year. The total value of the imports for the two months' period is £1,413,859, a drop of £656,474, or 31.7 per cent. compared with last year, and a decrease of £2,086,488, or 59.6 per cent. from the corresponding figure of 1920.

Declines in British Paper Exports— Wrappings Improve.

SHIPMENTS of British paper and cardboard, which in January revealed an appreciable improvement, show for the month of February a distinct falling off. Thus, last month there were only 119,201 cwts. exported, a decrease of 11,669 cwts., or 8.9 per cent. compared with the corresponding month of last year. Contrasted with February, 1920, however, a slight increase in quantity is recorded of 3,940 cwts., or 3.4 per cent. During the two months, January-February, 266,116 cwts. were shipped abroad, a decrease compared with last year of 86,221 cwts., or 24.4 per cent., and compared with January-February, 1920, a lessened decline is shown of 7,564 cwts., or 2.7 per cent. During the two months of the present year the shipments of printings, comprising by far the largest item on the list, amounted to 129,276 cwts. (representing 48.5 per cent. of the total), show a decline compared with the corresponding two months of last year of 67,868 cwts. Of this class of merchandise 91,041 cwts. were shipped to British Possessions and 38,325 cwts. to foreign countries. Packings and wrappings, on the other hand, show a very satisfactory increase, viz., 41,663 cwts., during January-February of the present year as against 23,057 cwts. in the corresponding period of last year.

Our Overseas Paper Markets.

The best market for British printings during the two months was Australia, to which country 50,564 cwts. were dispatched, although there is a noticeable falling off compared with the 68,502 cwts. last year. An improvement is shown in the case of France, which took 9,587 cwts. this year as against 4,019 cwts. during January-February, 1921. The decline which has recently been exhibited in the shipments to British South Africa is again accentuated. For instance, last year this Colony took 26,112 cwts. of printings, whereas for the current two months only 8,303 cwts. were dispatched. As regards writing paper in large sheets Australia (though with a lessened demand) was the biggest buyer, that country receiving our products to the extent of 7,662 cwts., as against 10,259 cwts. during January-February last year. A rather sinister outlook is foreshadowed by the steady decrease which, compared with last year, has taken place in the requirements of every one of the British Colonies. The value of the British exports for the two months' period was £1,003,041, a decline compared with last year of £1,215,528, or 54.7 per cent., and compared with January-February, 1920, a decrease of £1,999,612, or 16.5 per cent.

Personal.

VISCOUNT BURNHAM, at the luncheon given in his honour by the Foreign Press Association, last Thursday, drew a picture of London as the centre of the gigantic web of news services which enmeshes the globe, and asked for a realisation of the responsibilities which that position involved.

THE gathering at the Café Royal was presided over by Mr. J. de Marsillac, *Le Journal* (president, Foreign Press Association in London), and included many of the most distinguished representatives of overseas journalism.

LORD LEVERHULME, who is taking the chair at the 59th dinner of the Newspaper Press Fund at the Hotel Victoria, Northumberland-avenue, on Thursday, April 27th, will be supported by a large and influential company, including Viscount Burnham, Lord Marshall, Lord Riddell, Sir Edward Hulton, Sir Wm. E. Berry, and Mr. Robert H. Ruddock.

We understand that Lord Leverhulme has set up a very extensive organisation which is likely to bring about excellent results for the fund.

MR. AUGUSTINE BIRRELL and Major-General Swinton were the guests of the Press Club at the last house dinner of the season on Saturday. Responding to the toast of the guests, Mr. Birrell dealt with the responsibilities of the profession. They were the guardians of character, honour, and also of the English language. Major-General Swinton, "Eye Witness" of the early days of the war, also replied.

LORD DOVERDALE, in spite of his weight of years, continues to take a personal interest, not only in the paper industry, but in his native district of Heap Bridge, Bury. Recently he motored over from Glossop to attend an old folk's party in the United Methodist School, Heap Bridge.

MR. LEONARD TOD, president of the Paper-makers' Association, will be well supported on the occasion of the annual dinner on Friday next, March 24. Papermakers are coming from all parts of the country.

VISCOUNT BURNHAM has signified his intention to be present, and others who have accepted invitations are Mr. Lewis Evans (the only hon. member of the Association), Mr. C. F. Cross, F.R.S., Mr. F. M. Carson (president of the National Association of Wholesale Stationers), Mr. James Gallie (president of the Employers' Federation of Envelope Makers and Manufacturing Stationers), Mr. Jas. MacLehose (president of the Federation of Master Printers), and Mr. W. Monkhouse (president of the Drawing Office Material Manufacturers' and Dealers' Association).

MR. STANLEY WELCH (Messrs. Jacobsen, Welch and Co.), has been re-elected chairman of the Northern District of the Employers' Federation of Envelope Makers and Manufacturing Stationers. Mr. Welch has just been returned without opposition to the Cheshire County Council.

MR. WELLER KENT, of the South Eastern Circuit, who has just become a King's Counsel, was for many years on the parliamentary staff of *The Times*.

SIR PHILIP GIBBS, who has been editor of the *Review of Reviews* since January of last year, relinquishes that position with the current issue in favour of the new proprietor, Mr. Daniel O'Connor. Mr. O'Connor is the fourth editor of the *Review of Reviews* since the death of Mr. W. T. Stead in 1912.

MR. SIDNEY C. TAYLOR, a director of the company owning the *Essex Weekly News*, the *Southend Observer*, and the *Barking and East Ham Advertiser*, has been appointed managing director of the concern in succession to the late Mr. G. W. Taylor.

MR. J. R. LLEWELLYN, newspaper proprietor, Barry, has been re-elected unopposed to the Cardiff Board of Guardians.

A TOTAL of 139 years' service is the record of four members of the staff of Messrs. R. Ackrill, Ltd., who have recently retired on pension, showing an average of 34 years each. The four men are: Mr. Harry Wescoe, 48 years; Mr. Harry Garrett, 33 years; Mr. Fred Walker, 30 years; Mr. Robt. Watson, 28 years.

MR. E. HESKETH HUBBARD, landscape painter and etcher, has been asked to organise the British section of the International Print Exhibition to be held in New York during the summer.

THE Russian Soviet Government has rejected the British Foreign Secretary's claim for compensation on behalf of Mrs. Stan Harding. It may be recalled that Mrs. Harding proceeded to Russia as the representative of the *New York World* in June, 1920, with the permission and assistance of the Soviet Government, but on her arrival at Moscow she was arrested on the ground that she was an agent of the British secret service, and was kept in solitary confinement for several weeks under conditions of great squalor and privation.

MR. W. C. POWERS has returned to London after several weeks' trip to Canada and the United States.

MR. M. RELPH, of Messrs. M. Relph, Ltd., recently celebrated his 60th birthday, and at an informal gathering of his staff, Mr. Relph was presented with a gold pencil case, a most highly prized gift, as it not only signified a special event, but accentuated the very happy relations that have always existed at 212, Upper Thames-street, E.C. 4.

MR. NORMAN E. WAINWRIGHT, of Montreal, will shortly take charge of an office in London to be opened in the interests of the Provincial Paper Mills, Ltd., and the Howard Smith Paper Mills, Ltd., of Canada. The object is to cater for the export trade and to deal with orders from the firm's customers who have their buying offices in London. It is also expected to find a market in the United Kingdom for certain grades of Canadian paper.

Master Printers at Southport.

During the week-end Southport received a visit from the members and their ladies of the Lancashire and Cheshire Master Printers' Alliance, the guests being received by the president of the Alliance, Mr. H. A. Bethell (Manchester) and Mrs. Bethell. On Friday evening the executive committee were entertained to dinner by the president (Mr. W. M. Schofield) and council of the Liverpool Association, and agreeable social and sports functions enlivened the week-end.

On Saturday afternoon an important business meeting of the members of the Alliance was held, at which vital questions affecting the future welfare of the industry were discussed. Addresses were given by the president, Mr. J. C. Coppock (vice president of the Federation), Mr. A. E. Goodwin (secretary of the Federation), and Mr. W. M. Johnson (president of the Manchester and Salford Association).

The Alliance dinner, on Saturday evening, was attended by over 100. Mr. C. O. Vicary (Liverpool) proposed the toast of the "National Federation of Master Printers," and in reply Mr. J. C. Coppock (Warrington), vice-president of the National Federation, said they must not forget that the question of the advance or reduction of wages was not by any means the only thing with which the Federation deals. It was a great organisation for the benefit of their craft, and enabled them to carry on their business in a proper manner. The president of the Federation had had frequent interviews with ministers of the Government and officers of the Crown for the benefit of the industry. They had advanced so far that in some cases the Government and municipal authorities had asked their advice on the drawing up of their printing schedules. This showed a great advance in the stability and credit of the Federation; it proved that their officials had obtained the confidence of important officials in this country, and they could not have obtained this unless they had done the work they set out to do.

It's better to lose smilingly than to win whinily.

HANOVER PRESS, LTD.—Particulars of £2,500 debentures authorised March 7th, 1922, whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

SUNDAY PUBLICATIONS, LTD.—Charge on certain machinery and plant in 93 and 94, Long-lane, W.C., rented from Odhams Press, Ltd., dated February 23rd, 1922, to secure all moneys due or to become due from company to Charles Marsden and Sons, Ltd., 32, Holly-street, Sheffield.

ANGLO-CANADIAN WAX PAPER CO., LTD.—Debenture, charged on deeds and documents of Cassiobury Mills, Watford, tenancy agreement of 5, Tudor-street, E.C., and the company's undertaking and property, present and future, including uncalled capital, dated March 3rd, 1922, to secure all moneys due or to become due from company to Lloyds Bank, but not exceeding the aggregate of the book debts of the company (minus 10 per cent.) and the stock in trade (minus 33½ per cent.).

BANKRUPTCIES, etc.

Re WM. ED. TUCKER (trading as Tucker Bros.), stationer, 14, Arthur-street, E.C.—This debtor attended before Mr. Registrar Mellor at the London Bankruptcy Court for public examination upon accounts showing unsecured debts £1,205, fully secured debts £5,160 (securities valued at £10,160), a preferential creditor for £12 12s., assets valued at £5,024, and an estimated surplus of £3,807 in assets over liabilities. Questioned by Mr. Walter Boyle, official receiver, the debtor stated that in or about 1872 he and a partner commenced business as "Tucker, Johnson and Co.," lithographers and colour printers, at 18, Worship-street, E.C., but he (debtor) retired from that business in 1875, receiving between £2,000 and £3,000. He then removed to Worcester and carried on a similar business there as "Tucker and Co." until 1895, when he sold it to a company registered as "W. E. Tucker and Co., Ltd.," of which concern he acted as managing director until it went into liquidation in December, 1900. He was during the next twenty years employed as representative by firms of lithographers and printers, but in August, 1920, he started at 14, Arthur-street, E.C., as a stationer, under the style of "Tucker Bros.," and traded there until the proceedings were instituted by a creditor last December. Witness attributed his failure to liability on joint promissory notes and guarantees for cash advanced to his brother, who was bankrupt in the Windsor Court. He did not admit insolvency, and in fact there should be a considerable surplus in the estate after all debts had been discharged. The examination was concluded.

RE THOS. WALTER CALVERT, publisher, 3, Pleydell-court, Fleet-street, E.C.—This debtor failed last January with liabilities £1,401 and no available assets. He attended at the London Bankruptcy Court, before Mr. Registrar Hope, last week, for public examination, and stated that for many years before 1908 he was editor of various trade papers. Then with £200 capital he commenced to publish *Mine Host*, but in April, 1910, he transferred the copyright to another person. In October, 1914, witness

took over *Mine Host* and carried it on for a year at a heavy loss, with the result that publication then ceased, but in October, 1918, he restarted the paper. Witness sold the copyright in August, 1919, to a company. He (debtor) acted as director and editor until last August. The failure was attributed to losses in connection with *Mine Host* through high cost of production, and to liability accepted for another person without any consideration. The examination was concluded.

The Imperial Paper Mills, Ltd.

After providing for depreciation of buildings and plant, and writing down stocks to current market value, the accounts at August 31st, 1921, show a net loss of £97,793 8s. 6d. The directors, in their report, state that this loss is almost entirely due to the very heavy depreciation in the value of the necessary stocks of pulp and papermaking materials. Such depreciation is world-wide and unprecedented in its extent. Contributory causes have been the prolonged and disastrous coal strike and the losses arising from depreciated currencies. The mills, with their magnificent equipment of modern fast-running papermaking machines, are being maintained at the highest possible standard of efficiency. The directors are confident that, with the large output of the mills, all of which is finding a ready market, the ensuing year will show satisfactory results. The sinking fund is now in operation, and on January 31st, 1922, an amount of £54,000 of the 7½ per cent. 15-year first mortgage debenture stock was redeemed.

Olive and Partington, Ltd.

The report for 1921 states that, including provision for taxation, the company had a trading loss of £43,277. A balance of £7,050 was brought forward and £19,450 received in interest and transfer fees. The 5 per cent. preference dividend took £10,000, and the directors' remuneration £500. The final result, therefore, is that a debit balance of £27,277 is carried forward. This, of course, will cause no uneasiness, as the company has a reserve fund of £210,765, and its investments in debentures, shares and loans amounts to £300,079.

Mr. F. W. Skelton.

Considerable sensation has been created in London by the alleged disappearance of Mr. Frederick Wm. Skelton, of Links-road, Tooting, and a partner in the firm of Messrs. F. W. Skelton and Co., paper agents, Temple Chambers, E.C., with warehouses at Cowcross-street and Brixton. Complaints to the police and investigation of the books show, it is alleged, liabilities to the extent of £15,000. The police have a warrant for his arrest on charges of alleged fraud.

According to press reports, Mr. Skelton borrowed considerable sums from some City friends on the strength of a romantic story of a huge fortune coming to him from a newly found grandmother who was dying.

Mr. Skelton, it is alleged, vanished from his home on February 1st, when most of the bills on which loans were raised fell due. A few days before, Mr. Skelton is said to have arrived at his office wearing a black tie and a deep mourning band on his hat, and announced the death of his grandmother with a legacy to himself of £40,000. It is further stated that he promised to meet his obligations promptly and invited several of his friends to arrange for holidays at his new home at Eton.

PAPER AND PRINTING TRADE PUBLICATIONS.

- STONHILL AND GILLIS, 58, Shoe-lane, London. Publishers of the *British and Colonial Printer and Stationer* and the *World's Paper Trade Review*.

The up-to-date Colonial printer is naturally anxious to have information as to the latest improvements in machinery, new processes, and all labour and time-saving devices. He is also very desirous of having a knowledge of paper prices and trade movements generally. There is a fund of information in the weekly issues of the *British and Colonial Printer and Stationer*, which appeals to printers, stationers, box makers, envelope makers, bookbinders, etc. Why not have the journal regularly delivered to your office or works? It is a good investment at a low price—13s. for one year (subscription 8s. 8d., plus 4s. 4d. postage). Send the publishers a remittance at once.

In the Colonies quite a number of movements are on foot to build pulp and paper mills. Who are the makers of special machinery? What is the selling price of wood pulp and other papermaking materials? What are the conditions of the world's pulp and paper markets? All this information, and much more, will be found in the *World's Paper Trade Review*. Interviews with leading men associated with the industry are published, latest inventions described and illustrated, new processes dealt with; in fact, its pages

PAPER AND PRINTING TRADE PUBLICATIONS.

teem with practical information and commercial intelligence relating to paper, pulp, paper stock, engineering and the allied trades. Order the *Review*, which is published weekly, for a year, and send a remittance of 32s. 6d. to cover cost (subscription 26s., plus postage 6s. 6d.).

Compare the advantages
 - of the -
"Fryotype" Melting Pot

- 1.—Lowest gas-consumption per cwt. of metal melted.
- 2.—Empties quicker than any other pot on the market.
- 3.—No radiation of heat, or unhealthy fumes from metal or gas.
- 4.—Initial cost is lower.

These are only four of the many reasons why nearly 200 "Fryotype" Melting Pots have been sold in the Printing Trade since Jan. 1921. How many competitive Pots have been sold in the same period?

TRADE LINOTYPE MARK

The most profitable composing machine equipment

HAVE ONLY UP-TO-DATE LINOTYPES.

It is not always a wise policy to keep a machine on the active list merely because it can do the work for which it was originally intended.

A considerable number of Linotypes in this country which have paid for themselves many times over should now be replaced by later models, if the installations are to show a maximum efficiency under modern conditions.

When ordering a modern Linotype equipment the proprietor of an old Linotype installation said: "I found that five hours of one man's time were consumed each day in making magazine changes on my thirty single-magazine Linotypes." To that waste time has to be added the unproductive hours of the operators whilst awaiting changes.

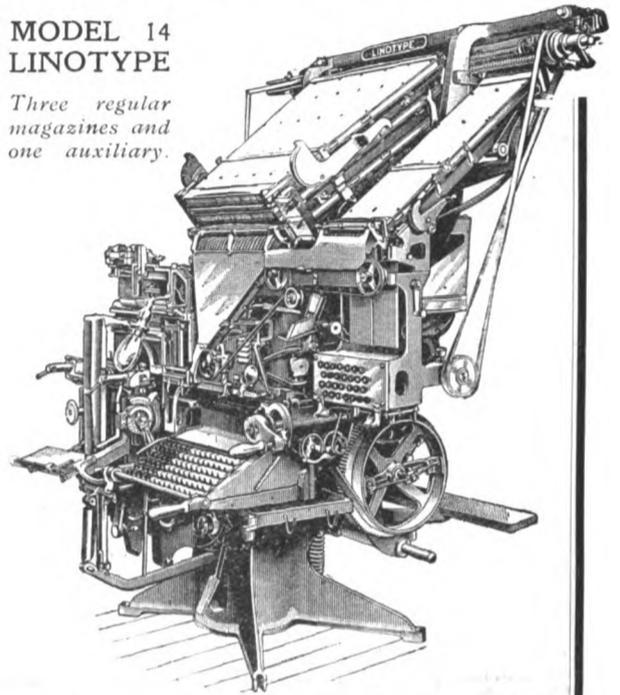

On modern Linotypes the operator can effect his own magazine change in a few seconds, and he can complete an entire change of measure, mould, knives, and magazine in less than a minute, without moving from his seat.

The modern Linotype also gives a wider range of faces, as regards size and number alike. From the one machine the printer can obtain headings as well as text matter in a variety of bodies.

Although similar in principle to the earlier models, the modern Linotype is entirely different so far as its versatility is concerned.

In REELS or REAMS.

Society had progressed by leaps and bounds. (Hear, hear.) This was largely due to the personality of their secretary. It was impossible to make him any different (laughter) —they did not want to make him different (cheers.) He wished to mention also Mrs. Hill, who deserved all the praise they could give her. Neither could he forget his colleagues on the committee, who were men and women with brains and hearts, and made the P.M.A. a human thing. The Association had a soul, and was run on the principle of co-operation, of partnership, and it provided triumphant vindication of the voluntary principle. (Applause.)

Mr. T. E. Naylor, M.P.

Mr. Naylor, in proposing the toast of "Kindred Associations," referred to the many institutions in the printing trade kindred in nature to the P.M.A., mentioning the Printers' Pension Corporation, the "Natsopa" Memorial Home, the Caxton Convalescent Home at Limsfield, the Lloyd Memorial Home and the Paper Workers' Home at Carshalton. In coupling Mr. Joseph Mortimer's name with the toast, Mr. Naylor remarked that Mr. Mortimer was an old colleague of his in the workshop, as they were compositors together many years ago. He was proud to see Mr. Mortimer occupying such an important position to-day. Under his secretaryship the Printers' Pension Corporation had become much more popular and much more prosperous. The "Natsopa" Memorial Home was the outcome of Mr. George Isaacs' own initiative, after he had visited America and seen what American printers could do. He congratulated George, the "youthful optimist," upon the splendid monument he had erected as the outcome, in the first place, of his practically unaided efforts.

Mr. Joseph Mortimer, O.B.E.

Mr. Mortimer, after congratulating Mr. Naylor upon his recent entry into Parliament, remarked that Mr. Naylor's own efforts had brought to the Printers' Pension Corporation close on £5,000. (Applause.) The Corporation had many friends in the trade who devoted practically all their time to advancing the cause of printers' pensions. His friends in the stereotyping and lithographic branches of the trade were doing a wonderful work. The Corporation was spending no less than £32,000 a year. They were supporting 2,000 helpless and helpless young. Mr. O'Connor, the Father O'Flynn of the P.M.A., had acted very generously, and as an admirable sportsman, in not confining his energies to the M.P.A., but also initiating a pension in connection with the Corporation. The printing industry was unique in the amount of effort expended in the alleviation of distress. He calculated that £70,000 or £80,000 a year was spent in this work. No other industry in the country could say the like. There was nothing but fraternal feeling between himself and Mr. O'Connor, who would, he hoped, be long at the helm of the institution with which he was connected, and he hoped the P.M.A. would continue to succeed as it was now succeeding.

Mr. George Isaacs, J.P.

Mr. Isaacs responded in a boisterous speech in which he introduced laughable recollections of several of his friends present. With regard to the P.M.A., he joked about the lightness of his job as treasurer, and in wishing continued success to the Association, said he hoped his burden as treasurer would become about ten times heavier than it was to-day.

Mr. A. E. Holmes.

The toast of "The Visitors" was ably proposed by Mr. A. E. Holmes, secretary of the national Printing and Kindred Trades Federation, who laughably recalled the time when he first met the P.M.A. secretary, when they were "both out of print," and were sojourning in Poppin's-court. Since that time they had both met and had endeavoured to help the trade from various aspects. Coupled with the toast was Mr. W. Hill, who, in a short speech, expressed the thanks of the visitors and their appreciation for the welcome accorded them.

Mr. J. E. Simcocks proposed the toast of "The Chairman," and referred to the time when as a lad he first met Mr. Bowerman, who was then working at the trade, but found time even then to help in the charity side. Mr. Bowerman suitably replied.

Mr. A. Chadwell, president of the Electrotypers' Pension Fund, then proposed the toast of "The Stewards," and especially emphasised the pains they had taken to make all

present exceedingly comfortable. Mr. Simcocks, as senior steward, returned thanks.

The company showed very hearty appreciation of the concert items provided under the direction of Mr. George Lewis, consisting of songs and stories by Miss Florence Meredith (who also acted as accompanist), soprano songs by Miss Effie Weston, baritone songs by Mr. Frank Falkus, and humorous songs and stories by Mr. Harry Hearne and Mr. Fred Wilson.

SOUTH-EAST

London Master Printers' Association

Annual Meeting of the Association.

The seventh annual general meeting of the Association of Master Printers of S.E. London brought an excellent muster of members to the Bridge House Hotel, London Bridge, on Tuesday of last week, when the principal items on the agenda were the annual report and the election of officers. There were present a number of visitors, among these being Councillor C. H. Ward and Mr. W. Farley (E. and N.-E.), Messrs. J. D. Wise and F. H. Cole (S.-W.), and Mr. J. R. Burt (W and N.-W.) Mr. E. B. Smith occupied the chair.

The reading of the minutes of the last meeting raised a short discussion on the question of the prices charged for printing produced in a Boys' Home in the Woolwich area, and certain action was decided upon in the direction of the maintenance of fair prices.

Election of new members took place in the usual form.

The secretary, Mr. F. Mason, was able to report a year's activities showing many satisfactory features, the Association's membership having been increased and much useful work accomplished. Referring to the fact that Mr. E. B. Smith, the president, and Mr. H. N. Prentice, hon. treasurer, had intimated their desire to retire from their respective offices, Mr. Mason acknowledged the Association's indebtedness to both these gentlemen.

The secretary's report was unanimously adopted.

The treasurer's report showed a substantial balance on the right side, but Mr. Prentice went on to strike a rather pessimistic note, forecasting a deficit for the coming year, and asking to be relieved of the office of treasurer.

The secretary pointed out, however, that in future more money would be received from headquarters than they had received in the past.

The treasurer's report was then adopted unanimously.

Election of Officers.

The election of officers was the next business, and this was expeditiously transacted.

As president, to succeed Mr. Smith, Mr. J. R. Brigenshaw was elected without an alternative nomination. Mr. G. Poulton, in proposing him, referred to the years of very valuable work accomplished by Mr. Brigenshaw both on behalf of the South Eastern district and of the Parent Association. Mr. Smith corroborated Mr. Poulton's remarks, adding that Mr. Brigenshaw had been one of the best workers in the South-East right from the start of the Association.

Mr. Brigenshaw, responding, expressed the opinion that the South-Eastern district contained more non-federated union houses than any other district, and he felt that the Association should endeavour to get more consideration paid to these houses, particularly in regard to negotiations between the Parent Association and the trade unions.

In referring to the Association's vice-presidents, the chairman expressed the Association's regret at the death of Mr. Winkley, and testified to his strenuous work on behalf of the Association.

Mr. E. B. Smith, the retiring president, was elected a vice-president, and the meeting re-elected the existing vice-presidents, Messrs. C. A. Bates, W. A. Clowes and W. H. Truslove.

Mr. C. A. Bates, in returning thanks on behalf of the vice-presidents, took the opportunity to refer to the serious position reached in the present wages negotiations. He urged members to attend the special general meeting on the following Monday, intimating that he thought drastic action should then be taken, as it was essential that wages should come down in accordance with the fall in the cost of living, the cost of the printer's produc-

being now too often beyond the reach of the would-be purchaser.

As hon. secretary, Mr. F. Mason was unanimously elected to a further period of office, Mr. Brigenshaw expressing the Association's appreciation of the admirable work for the Association done by Mr. Mason during the past year.

In proceeding to the election of a treasurer, the chairman put it to Mr. Prentice that he might reconsider his decision to resign the office.

Mr. Prentice, however, re-affirmed his desire to be relieved of treasurer's duties. He remarked that he had been treasurer for five years and thought that some younger man should now relieve him of this work. He had been 66 years in the trade, but, although he had now to take things easy, his interest in the trade had not diminished.

Mr. Norman was unanimously elected to succeed Mr. Prentice as treasurer.

To the committee two new members were elected, namely Messrs. J. Griffiths and H. R. Grubb, it being agreed to re-elect the existing members, Messrs. Dingle, Hedger, Dawe, Lyons, Neves, Wright, Poulton, Carley, Northam and Starkie.

The Association's representatives on the L.M.P.A. Council had been Messrs. G. Poulton, J. R. Brigenshaw and F. Mason. The secretary said that increased membership now entitled them to a fourth representative.

Mr. Smith and Mr. Bates were in turn nominated, but both expressed inability to accept election.

It was eventually agreed to re-elect the three standing representatives and to elect Mr. F. Hedger as the fourth.

The Price-Cutting Problem.

The meeting being thrown open for "general business," Mr. Grubb asked what the Association was doing in the way of educating printers generally on the subject of fair prices, and a short discussion ensued. The chairman pointed out the difficulty of taking action against price-cutters. Mr. Prentice testified to the value of the Federation Costing System, and thought that what was wanted was costing propaganda among non-federated printers. Mr. Poulton said that the big printers were the worst offenders in price-cutting; he wanted to know what headquarters was going to do for them in the matter. This brought Mr. Whyte (L.M.P.A. secretary) to his feet with a vigorous retort that both the L.M.P.A. and the Federation had issued jobbing price lists with a view to stabilising fair prices, but that they got less thanks than criticism for their trouble. Some printers said the list prices were far too high, some that they were far too low, and others that it was impossible to fix prices that would suit all sizes of plants, etc.

The chairman suggested that a small committee should get together so that precise data as to local prices could be collected before their forthcoming meeting at Croydon, when the subject could be considered further.

The transaction of business having been concluded, the meeting resolved itself into a social gathering, the proceedings being enlivened by humorous songs at the piano by Miss Winifred Vaughan, songs at the piano and at the harp by Miss Aurddolen Williams, and selections from original repertoire by Mr. Wilson Martell.

Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

Trade Notes.

WORKPEOPLE ELECT DIRECTOR.—An election is in progress at Messrs. Hulton and Co., Ltd., Withy-grove, Manchester, for a director. He is to be elected from among the work-people themselves, and to be elected by them.

COMP'S LUCK.—A linotype operator won £3,000 on the Grand National race in connection with the Liverpool Cotton Association Grand National Sweepstake. The lucky man works on a Liverpool newspaper. The winner of the first prize of well over £4,000 in the Liverpool Newsroom Sweep was Charles Mitchell, a dairyman.

On Friday evening last a serious fire broke out in the printing establishment of Mr. John Adams, 39-41, King-street, Belfast.

The hundredth pension election of the Printers' Pension Corporation was held on Saturday at the Connaught Rooms, Mr. T. Thompson presiding. Upwards of 3,000 subscribers were present. The result of the polling was given subject to a scrutiny to be announced at the annual general meeting at St. Bride Institute.

PRINTED MATTER TO BE DELAYED.—In the second report of the Post Office Departmental Whitley Council, the official side of the Council stated that they have agreed, as an experimental measure at large offices, that circulars and other matter posted at the "printed paper" rate, shall be dealt with only in the daytime. If such printed matter be posted in the evening it will not be despatched until the following morning.

In connection with the fifty-ninth annual festival of the Newspaper Press Fund a particularly attractive performance has been arranged to take place at the London Hippodrome on Sunday evening, April 23rd. Sir Oswald Stoll, Mr. R. H. Gillespie, Mr. Charles Gulliver, Mr. Walter Payne, and Mr. Albert Voyce have combined to direct the entertainment, which will be supported by leading artists.

MRS. WALLER, the wife of a printer, of 134, Kingsland-road, Shoreditch, sought the assistance of Mr. Wilberforce, at Old-street, on Friday, in tracing her daughter. She stated that the missing girl was 18 years of age, and was named Mary George, being a child by a former marriage. She was about 5 ft. in height, fair, and had brown eyes.

PRINTERS' TRIP TO DEAL.—On Saturday, April 15th, a special train will leave Victoria at 9.5 a.m. Return fare for the day trip, 12s.; to return Easter Monday, 16s.; children under 12, half fares. The Lloyd Memorial Seaside Home Committee will open their Annex for Women on this occasion, and members of the craft will be heartily welcomed. Further information may be had of the secretary, Mr. H. F. Parker, 80, Blackfriars-road, S.E. Tele: Hop 4399.

DERBY J.I.C.—The Derby District Committee of the Joint Industrial Council for the printing trade was one of the first (if not actually the first) to be formed in this country. At the committee's annual meeting held last week, General Bemrose presided over a fairly good attendance. The annual report, the adoption of which was moved by the chairman, stated that the work done by the Committee, although by no means traversing the whole ground it set out to cover, was no little achievement. Such varied subjects as unemployment insurance, apprentice training, a model indenture, costing organisation, old age pensions, non-union labour and price-cutting had been discussed.

SUCCESSFUL PENSIONS CONCERT.—A concert in aid of the funds of the City of London Printers' Musical Society, an auxiliary to the Printers' Pension Corporation, was held at Anderson's Hotel on Monday of last week. The chair was occupied by the president, Capt. E. A. H. Walker (Messrs. Usher-Walker, Ltd.), who was supported by Mr. and Mrs. Edmund Walker, Mr. J. Mortimer, O.B.E., and many other well-known representatives of the printing trade. There was a large audience and a capital programme was presented. The plate collection amounted to £103 5s., which Capt. Walker (following the example of his father) doubled, thus handing over a cheque to the Auxiliary of £206 10s. Mr. W. Watts, J.P. (chairman of the Executive Committee) proposed a vote of thanks to the president, which was very heartily accorded.

At least one incunabulum and other early printed books were catalogued for sale yesterday by Messrs. Hodgson and Co., Chancery-lane.

At Sotheby's, on Monday, a first edition copy of Stevenson's "The Graver and the Pen," dated 1882, was sold for £62. The book was the property of Mr. G. A. Crerar, of Kingussie, who assisted in the printing of it.

The question of whether one can legally print banknotes for his own entertainment was involved in the trial at the Old Bailey last Thursday of James Urquhart, aged 44, clerk, on charges of forging and uttering a 10s. note. Prosecuting counsel said that at prisoner's address were found a large number of implements and papers for the manufacture of counterfeit Treasury notes. Urquhart said he made the notes because he was "a bit of an artist." They were for his own amusement, and were crude imitations. He was sentenced to six months in the second division.

ADS. ON STAMPS.—Speaking at a meeting of members of the 1920 Club last Thursday, the Postmaster-General made the important announcement that they were inviting tenders for advertisements in post offices, and had decided to print advertisements on the back of postage stamps. Although the work of obtaining advertisements and fixing the terms is to be delegated to contractors, the notices will have to be approved by the Postmaster-General. It is understood that all classes of advertisements except those dealing with alcoholic liquors, will be accepted for approval. The advertisements will be printed on stamps of four denominations only—namely, 2d., 1½d., 1d., and ½d. The printing will be done on the reverse side of the stamps before the gum is spread on them. It will be carried out in old style capitals, and the ink, which will be carefully prepared and of a guaranteed harmless character, will be of the same colour as the stamp. The printing will not exceed three or four lines at most, and in some cases will probably consist of one or two words only.

TWO FATAL accidents took place in the paper, printing, etc., group of trades during February. One fatal case of lead-poisoning occurring in printing.

The death has occurred, at the age of 65, of Mr. Tom Alfred Marshall, who joined the advertisement staff of *The Times* in 1873, where he served until his retirement in the early part of 1921.

MR. ARCHIBALD SINCLAIR, a well-known sporting journalist, who for 25 years was on the staff of the *Referee*, died on Friday morning in King's College Hospital, after a long illness.

A GRANITE CROSS has been erected by public and private subscription over the grave at Newport (Isle of Wight) Cemetery of the late Mr. Thomas Lee, first editor of the *Isle of Wight County Press*, with which he was connected for over thirty years.

MR. ERNEST ALFRED VIZETELLY, the author and journalist, died on Sunday at Hampstead, after a long illness. He had an hereditary connection with the press. His forefathers had for generations been printers and stationers in London. His uncle Frank was a well known artist war correspondent, and his father, Henry, was a journalist and publisher. He had to assist his father from a very early age in obtaining news and pictures for the *Illustrated London News*, and thus had a thorough practical training in journalism.

NEW ESTIMATING FORM.—The Costing Committee of the Federation of Master Printers has published a new estimating form which they say is the result of a careful examination of a number of estimating forms from many offices. It is designed to meet the requirements of at least 50 per cent. of the printing offices in this country, and with a view to minimising the possibilities of error. In its proof stage it has been in constant use for about six months and has proved invaluable as a reminder of the many details that go into a printer's estimate. As an indication of the wide appreciation of efforts of the Costing Committee to improve the machining for correct costing and estimating it needs only to be stated that well over half-a-million forms have been sold during the past three years. No printer can produce these forms so cheaply, and as each supply runs out corrections and improvements are made as necessity arises, thus ensuring the most up-to-date particulars being adopted.

The proprietors of the *Daily Telegraph* announces that on Monday, April 10th, the price of the *Daily Telegraph* will be reduced from 2d. to 1½d.

ON the eve of the boat race, Friday, March 31st, the first number of the latest illustrated sports paper, the *Sports Pictorial*, will make its appearance.

NEW LABOUR MAGAZINE.—The General Council of the Trades Union Congress and the National Executive of the Labour Party, states the *Labour News*, contemplate the publication of a monthly magazine, dealing fully with the industrial and political sides of the Labour movement. The first number is due to appear on May Day.

WHEN further evidence was heard at Bow-street on Thursday on the two new charges against Mr. Horatio Bottomley, M.P., of having converted £100,000 and £15,000 belonging to the Victory Bond Club to his own use, detailed evidence was given as to the sale of £70,000 worth of bonds for the purchase of the *National News* and the *Sunday Evening Telegram*. The hearing is adjourned till April 6th.

The Council of the Empire Press Union, at a meeting presided over by Mr. Robert Donald, and attended by many representatives of newspapers at home and overseas, has unanimously adopted a resolution—proposed by Mr. F. H. Brown (the *Times of India*), seconded by Mr. T. S. Townend (the *Melbourne Argus*)—urging the Government to carry out or support a scheme for establishing an Imperial wireless chain throughout the Empire.

HOUSE JOURNALS.—In the offices of the Industrial Welfare Society are displayed complete files of 150 of "firms' newspapers," and it is estimated that there are now more than 200 firms publishing their own magazines in this country. With the object that the editors of these magazines shall pool their experience and solve their common difficulties, the Industrial Welfare Society is now arranging the second of a series of annual conferences, to be held in the Society's offices at 51, Palace-street, Westminster, on Friday, April 28th.

The samples of foreign stationery which have been collected by the Department of Overseas Trade and which were on exhibition at the offices of the Employers' Federation of Envelope Makers and Manufacturing Stationers, have been transferred to the Foreign Samples Branch of the Department of Overseas Trade in Old Bailey.

BRITISH credit of £2,000,000 has now been put at the disposal of Austria.

Trade Union Matters.

MR. FRENCH AND WAGE REDUCTIONS.—Mr. J. D. French, the president of the Typographical Association, on Saturday evening attended, as chief guest, a smoking concert promoted by the Leeds branch of the Association, and addressed the gathering on topics at present prominently before the printing trade. The Typographical Association, he said, was going through perilous times—facing on the one hand a great amount of unemployment, and on the other demands from the employers for reduced wages. When negotiations were in progress prior to the last reduction the employers urged that reduction of wages was required in order to resuscitate trade. But the unemployment figures were now as high as ever, and he could not see any sign of improvement in the trade. Mr. French went on to say that the Postmaster-General was entirely responsible for the unemployment in the printing trade, and he made an urgent appeal that the Government should immediately reduce postal charges and thus allow the printer to recover some of the lost ground.

PUBLISHING TRADE STRIKE.—It is very satisfactory to learn that it has been agreed to make an end this week to the strike of book trade employees which disorganised the work of many publishing houses and was already affecting certain bookbinding and printing firms. The settlement is the outcome of further negotiations undertaken between the National Union of Printing and Paper Workers and the Book Trade Employers' Federation, with the good offices of Mr. A. E. Holmes, secretary of the Printing and Kindred Trades Federation, as intermediary.

London Master Printers and Wages.

The Present Position Discussed at a Special General Meeting of the L.M.P.A.

Monday's special general meeting of the London Master Printers' Association held at noon at the Stationers' Hall, drew a large attendance of members. The new president, Lieut.-Colonel J. R. Truscott, was in the chair.

The Chairman opened the proceedings by pointing out that the object of the meeting was to ascertain what measure of support members were prepared to give to the proposals of the National Wage Basis Committee. He drew attention to the fact that the various negotiations with the trade unions were being conducted by the Federation of Master Printers, not by the London Alliance, and he reminded the meeting also that the figures which would be put forward were proposed simply as a basis for discussion and not as representing finality. He then called upon Mr. R. A. Austen-Leigh, the late president of the Association, and vice-president of the Federation—as one who had been in the closest possible touch with the negotiations—to present a brief résumé of what had happened up to date.

Mr. R. A. Austen-Leigh.

Mr. R. A. Austen-Leigh first congratulated the new president upon having attained the honourable, but rather arduous, position in which he now found himself, and added that it was a pleasant thing to have someone of his honoured name in the chair. He remarked that as Colonel Truscott had been attending council meetings for 25 years, they would all feel that this experience would prove useful under the present conditions.

Every one of them, he went on, would agree that the time had come not only for an immediate, but for a substantial, reduction in wages—mainly because of the considerable fall in the cost of living. He pointed out that while the cost of living was rising they had repeatedly met the demands of the unions, and, he thought, met them sympathetically; but while agreeing to increases of wages, they had pointed out that these increases would diminish the demand for the printers' product. This prophecy had proved to be true, as was evident from the deplorable state of their factories and balance sheets, and from the large amount of short time and unemployment prevalent in the industry. To take the London Society of Compositors as an example, the normal wage in August, 1914, had been 39s., whereas at the end of 1920 it had risen to 100s. At the time of the last increase of wages the cost of living figure stood at 168. Taking the increase of wage represented by the difference between 39s. and 100s. and spreading it over 168 points, they found an average of 44d. a point. When they had made the first demand for a conference with the unions, the cost of living figure had stood at 88; now he believed it was 86. Taking it at 88, they found the fall had been 80 points; therefore, if wages were to fall at a rate similar to that at which they rose, the employers were justified in asking for a deduction of 29s. 4d. from 100s. But as 5s. had actually been deducted last autumn this left 24s. 4d. as the reduction due on this basis.

Mr. Austen-Leigh went on to point to the decrease of 18 per cent. and over in the wages of the engineers, shipbuilders and other workers, as compared with the 5 per cent. reduction obtained up to date from the compositors. Again, the *Board of Trade Gazette* showed that the average fall in wages for men, women and children had been 10s. 4d., whilst in the printing trade the highest decrease obtained had been only 7s. 6d., and some branches had had a reduction of only 5s., others even less. Thus the case for a substantial reduction of wages was proved up to the hilt.

In sending on to the Federation resolutions asking that the question of wage reduction should be dealt with, the L.M.P.A. had drawn special attention to the fact that 2s. 6d. less had been deducted from the wages of the L.S.C. than of the other unions; they had also urged that a proportionately greater reduction was due from the women workers. The subject was duly tackled by the National Wage Basis Committee,—which included their representatives, Mr. W. Howard Hazell, Mr. O. C.

Griffith, Mr. J. J. Keliher, Mr. J. D. McAra, and was now reinforced by the addition of Col. Truscott—which had drafted a scheme to meet the present position.

Mr. Austen-Leigh then proceeded to explain the sliding scale scheme, which was eventually proposed by the National Wage Basis Committee (as described in our issue of March 16th). He said that according to this scheme, which was put forward merely as a basis for discussion, they were demanding from the more highly skilled unions a reduction all over the country of 16s. 3d., and from the L.S.C. (adding the 2s. 6d. previously due but not accorded) of 18s. 9d., the latter figure applying also to the Correctors of the Press and the Electrotypers and Stereotypers. In regard to the less skilled trades, they proposed to make a slight discrimination against them, demanding 17s. 5d. instead of 16s. 3d. The reduction asked for from the women was 12s. in the printing trade, and 13s. 2d. from the "Natsopa" women.

Unions Not Facing the Position.

He wished that when this scheme had been put before the unions it had been met in a more conciliatory spirit. It did not appear that the unions were facing the economic situation to-day, as they seemed to be employing dilatory tactics. Last year the negotiations had taken five months before they were completed; they did not wish to repeat that experience. Therefore the National Wage Basis Committee had put forward the following resolution:—"That each of the unions be given an intimation that a definite reply as to the request for a reduction of wages must be received not later than March 27th; and that the present position be reported to the Alliances and the Newspaper Associations, with a request that they state at once whether they are prepared to take whatever steps the National Wage Basis Committee may consider necessary, including the posting of a notice for reductions of wages at definite dates, in order to insure a reduction on the basis of the proposals submitted to the unions; and that a meeting of the Federation Council be called for March 29th; and that steps also be taken for a meeting of the Joint Industrial Council on April 4th, in order that the employers' organisations may thereafter be free to take any action they consider necessary to secure the reductions."

Mr. Austen-Leigh reminded members that by the constitution of the Joint Industrial Council matters in dispute must be put before the Council before aggressive action could be taken. Drastic action, even the posting of notices, might be necessary. If they supported the resolution that he would put to the meeting, steps would later be taken to find out how many of them were prepared to take whatever action the National Wage Basis Committee might think necessary.

Mr. Austen-Leigh then moved the following resolution (which had been adopted by L.M.P.A. Council on March 23rd, 1922, for submission to the special general meeting of the Association): "That this meeting approves of the action of the National Wage Basis Committee, provided that the suggested reduction is made by instalments. This meeting further desires, failing a settlement by the J.I.C., to give all practical support, including the posting of notices, that may be recommended by the Federation, but asks for a further general meeting to be summoned at a later stage."

He added that no doubt they would know, by the time that further general meeting was summoned, the precise wages figure in regard to which they were asked to post notices, and would also know the exact amount of support forthcoming from members.

Mr. Hartley Straker seconded Mr. Austen-Leigh's resolution.

The Chairman, in throwing the meeting open for discussion, read a letter written to him on the 21st inst. from the Federation, which contained information confirming what Mr. Austen-Leigh had said as to the dilatory tactics of the unions and also the need for material reductions in wages, and the consequent necessity for a united front on the part of the employers.

Mr. Tee asked for definite information as to

the intended "instalments" in the reduction of wages.

The Chairman pointed out that in the resolution before the meeting the need for instalments was emphasised. The amounts of the instalments would be settled by the National Wage Basis Committee.

Another speaker suggested that a reduction of 3s. more from London women than from those in the Provinces was insufficient.

Mr. Austen-Leigh pointed out that a resolution sent by the L.M.P.A. Council to the Federation had specified 34s. as an adequate wage to-day.

Mr. Tee urged the specifying of the precise instalments intended.

The chairman intimated that the unions had shown no concern about the matter of instalments. The present suggestion was that there should be three monthly instalments.

Mr. Forder (Harrison, Jehring) raised the question of the position of the newspaper proprietors.

Mr. A. E. Goodwin's Speech.

Mr. A. E. Goodwin (secretary of the Federation), being asked to reply to Mr. Forder, took the opportunity to speak on the general question, in favour of the resolution. He stated quite frankly that no one among the Federation Council or the officials desired to see a stoppage in the printing industry, and every effort would be made to avoid a stoppage. He went on, however, to urge the necessity for loyalty on the part of their members. There was a bigger question at stake, he said, than wage-reduction. In all sections of industry, trade union leaders were refusing to function. They were not in a position, in many industries, to recommend courses of action which they themselves knew to be right. This was illustrated in our own industry in connection with the wages of the London newspaper trade. The London Newspaper Proprietors' Association, which in October last gave three months' notice of wage-reduction proposals, had not yet completed their negotiations. Certain unions, he understood, had agreed to reductions, but in the case of one union, although the executive of the union recommended certain reductions, the members had rejected the proposals. Another trade union executive, after this example, had declined to submit the terms to their members. It was an impossible position—some unions accepting and others refusing. It illustrated the critical position in which trade union leaders, and employers' associations also, found themselves to-day.

Mr. Goodwin went on to urge members to give their loyalty and confidence to those conducting the negotiations. They were looking at every point of view, and trying to secure the best settlement possible, but this could only be done if they were assured of the loyal support of every member of the organisation. From all parts of the country they were hearing that wages must come down, and it was clear that in various parts of the country they certainly would come down. Mr. Goodwin concluded by expressing the hope that the resolution would be adopted, and assuring members that the Federation was trying to meet the difficulties of the situation in the interests both of London members and of the whole trade.

The resolution was then put to the meeting, and was carried with only a single dissident. The chairman announced that another general meeting would be held later.

The Swedish Paper Lock-Out.

There is no further news regarding the lock-out in the paper mills of Sweden. It is still in force, though hopes are expressed that it may not last long. In the meantime, production has practically ceased, and there is every prospect of an immediate effect being felt in paper supplies.

It is suggested that if the Government does not intervene there is every prospect of a scarcity in paper, more especially in news-print, as stocks are negligible.

With reference to the reported willingness of the workers to accept a reduction in wages by 42.6 per cent., it appears that the proposal was only approved by the union representatives, while the workers themselves turned it down. This was the immediate cause of the lock-out.

Messrs. THOM AND COOK, papermakers' agents have removed from Queen Victoria-street, to 56, Carter-lane, London, E.C.4.

Cost of State Printing.

The very nature of their task rendered it impossible for the Geddes Committee to examine very closely into the expenditure of some of the Departments dealt with towards the end of their comprehensive inquiry. This alone can be the explanation of the very mild suggestions dealing with stationery and printing—says a correspondent of *The Times*.

In 1913-14 the audited expenditure was £1,059,724, in 1921-22 the estimates were £4,119,944, and the provisional estimates for 1922-23 are £3,163,850. The Geddes Committee consider a total reduction of £427,502 possible. It is shown that in 1914 the total employed by the Stationery Office was 223 on the permanent staff and 294 on the temporary, a total of 517, whereas in August, 1921, the total was 3,813, and even in April, 1922, the number was 3,422.

The increase in the cost of the Parliamentary Debates is shown to be from £16,783 in 1913-14 to £16,000 in 1922-23. These Debates are now being printed at Harrow, and a comparison with the number of men and machines employed now and when these were done by a firm of contractors would have enlightened the Committee and the public.

The Committee state:—"The Harrow works were originally purchased in 1918 for the purpose of printing the food coupons for the national scheme of food rationing. We are told that the works tender for Government orders in ordinary competition with other contractors, and that their trading accounts are run on an ordinary commercial basis. The works have been the subject of report by Select Committees of the House, and are being maintained for a trial period of three years dating from June, 1920. In view of this, we make no recommendation, but suggest that the whole question should be thoroughly reviewed before the expiration of the period, the staff being maintained on a temporary basis. We cannot think that, as a general rule, such enterprise by Government Departments can be as economical as public tender, but such considerations as temporary rings in the market and other abnormal circumstances may otherwise justify a departure from principle. At the end of the three years' trial the matter can be reviewed."

The Committee was apparently not told that certain contracts, the Telephone Directory, for instance, were given to the State works without any tenders being asked for elsewhere. Was the Committee told whether contracts for the Admiralty and Foreign Office were taken on a competitive basis? If a Government works be allowed to charge a portion of the work done at its own price, it can easily do the other portion at competitive prices, whether the works be a printing works, a clothing factory, or a railway wagons shop.

It is not a fact that the Harrow works were occupied as a war measure, and that the Printing and Publications Committee of the House simply acquiesced in the experiment being continued, without making anything like the exhaustive inquiry required when so serious a departure in policy and expenditure of public money were involved. The Committee make clear their opinion that, as a general rule, such enterprise by Government Departments cannot be as economical as by public tender. They would certainly have applied this general principle to the State printing works had they been able to probe more deeply.

Recently, when tenders were invited for 36 groups of work for various Government Departments to the value of £70,000, the State printing works secured only one for about £400. This fact is an effective answer to any suggestion that it is necessary to keep the State printing works in existence to prevent rings or combinations being formed to secure exorbitant prices. Competition for Government printing work was keen long before the State printing works were established, and is likely always to remain so, owing to the very nature of the printing industry.

The Geddes Committee could not be expected to locate every leakage, but here is an opportunity for the Government itself to go a step farther than the Committee. The Government should institute an immediate inquiry into the working of the Harrow printing works. There is no necessity to wait till June, 1923, to decide if the experiment is a success or not. Can the country afford to keep a State printing works running when the work can be done as efficiently and certainly cheaper in other printing offices in the country?

SPECIAL PREPAID ADVERTISEMENTS

THURSDAY, MARCH 30, 1922.

The Wages Negotiations.

IT must be obvious, we think, to all parties interested in the wages negotiations in the printing trade, that some kind of uniformity of wages as between different parts of the country and different trade unions is a necessity to the harmonious development of the organisation of both employers and workpeople. If we consider either the various associations comprising the employers' federation or the various federated unions, very dangerous possibilities seem to lie ahead for the trade once we get separate sections refusing to be guided in any way by the conditions of the industry as a whole, and attempting by mere force to stand out from any national arrangements which may be devised with a view to the good of the industry as a whole. Such an attitude in the ranks of either masters or men makes for the disruption of printing trade organisation and the loss of advantages gained by the long years of development. Certainly any national agreements made must be sufficiently elastic to allow variations as between different localities and different classes of workers. But the provision of reasonable variations from the normal is possible only when the normal exists. For healthy and peaceful development of printing trade organisation, it is essential first that a certain amount of uniformity of conditions be agreed, and then exceptions made in accordance with reason. In view of this, the present position of the wages negotiations has a rather ominous look. It will be the duty of both panels of the Joint Industrial Council, when it meets on the 4th of next month, to seek to make sectional interests on each side subservient to the general good of the trade, and to endeavour, besides obviating danger of a stoppage of work, to find such a solution of the present problem as shall be reasonably fair both to minorities and majorities.

The Postal Rates and Services.

APROPOS of the reference in this column last week to the hopes of early reductions in certain postal rates, we understand that manufacturing stationers dissent very strongly from the view that a reduction of postage affecting printed matter and postcards would meet the needs of industry. They emphasise,

altogether apart from any personal interests of their own, the close dependence of the whole business community upon a cheap and efficient postal service, claiming that the lessons of history, when the penny post was first introduced, amply prove that a cheap and efficient postal service is a real help in the creation of new business; and new business is obviously the first essential to the bringing about of a revival of employment. Such a revival would relieve the Treasury of the necessity of finding further funds under the Unemployment Acts, and the Treasury would thus be a direct gainer—though it must never be forgotten, as Mr. Kellaway well said the other day, that the Post Office is the servant of the public, not the milch-cow of the Treasury. The present high rates of postage and the imperfect service rendered are a continuous source of trouble. The absence of Sunday collection, for instance, means in many important factories an almost total absence of work for the Monday. While manufacturing stationers are, for their part, doing all they can in the cheapening of their products, so as to assist business in general, they feel their efforts are seriously hampered by the burden of dear postage. Here, of course, the manufacturer has in mind not so much such factors as the holiday-maker's picture postcards as the communications carried by letter post.

Window Envelopes.

THE difficulty which was recently raised as a result of the Madrid Postal Conference with regard to certain forms of window envelopes appears to have been overcome. At all events, we learn that following the Postmaster-General's announcement, there has been dispatched from this country to various parts of the world, even to countries where the restrictions were nominally in existence envelopes of the attached-window pattern which were declared at one time to be contrary to the regulations. These were sent out to test the embargo which was laid upon them, but we are informed that none are being returned. There appears every reason to believe, therefore, that we have heard the last of the unfortunate incident that occurred at Madrid.

Hand-made Paper Prices.

PRACTICALLY all the hand-made mills have advised slight reductions in their papers. Prices now range from 2s. to 2s. 4d. per lb., as against 2s. 3d. to 2s. 9d. a few weeks ago. The demand is surprisingly good and well maintained. A representative of one of our leading wholesale houses stated this week that his best business all through the slump had been for hand-made ledger stock. On the subject of hand-made paper, it has always appeared a peculiarity to us that while ordinary pen-writing presents no difficulty, the use of a fountain pen is limited. Whether it is the nature of the ink, the structure of the nib or the character of the hand-made paper surface, we do not say; but the fact remains that there is an ever-present tendency to misfire. Perhaps some hand-made papermaker could express an opinion on this point.

MASTERPRINTERS AND EXCESSIVE TAXATION.
 —Mr. Harry Cooke, head of the Leeds and London printing firm of Messrs. Alf. Cooke, Ltd., now associated with Messrs. Bemrose, of Derby, and Messrs. Natzio, of Manchester, is the chairman of the Leeds and District Branch of the Federation of British Industries, and in that position is taking a prominent part in the demand of business men for a reduction in taxation. Mr. Cooke last week was the chairman of a deputation from the Leeds branch of the Federation to Yorkshire Members of Parliament at the House of Commons, and as a consequence the Chancellor of the Exchequer is to be asked to receive a deputation from the Federation so that the case may be put to him for a reduction of income-tax and the abolition of the Corporation Profits tax.

THE Home Labour Market
 depends upon patronage of

Personal.

At the annual dinner of the London Master Printers Association, held at the Connaught Rooms last night (Wednesday), Viscount Burnham (president of the Newspaper Proprietors' Association) was to propose the toast, "Literature and the Printing Craft," response being made by Mr. James MacLehose (president of the Federation of Master Printers), other speakers including Sir William Waterlow and Lord Marshall.

ALDERMAN SIR C. WAKEFIELD is presenting a set of bookshelves and a series of reference and other books to the library of the London Press Club.

MR. VALENTINE KNAPP, and Mr. F. L. Armstrong, president and secretary respectively of the Newspaper Society, have, we understand, consented to act as stewards at the annual dinner of the Newspaper Press Fund, and are sending a joint appeal to the members of the Newspaper Society to assist this very deserving object.

LIEUT.-COLONEL E. F. LAWSON, D.S.O., M.C., presided at a concert in aid of the funds of the Lloyd Memorial Convalescent Home, Deal, held at the Loughborough Hotel Assembly Rooms, Brixton, on Saturday night. The "plate" realised £130 11s., a record.

MR. GEORGE ISAACS, general secretary of the National Society of Operative Printers and Assistants, last week opened his campaign as Labour candidate for Gravesend, where the Labour movement is rallying to his support as a prospective addition to the printing trade M.P.'s.

MR. HARRY BECKER has been invited to stand as Anti-Coalition and Anti-Waste candidate for the Richmond Division of Surrey.

MR. W. R. CUMMINS, printer, Muswell Hill, collected £176 for this year's Salvation Army Self-Denial Fund. The grand total raised by him from this yearly effort is now £2,529.

MR. J. T. DUNSFORD, who for 57 years has been the editor and manager of the *Bridgewater Mercury*, and part proprietor of that journal, has attained his 80th birthday, and, to mark the occasion, has been presented with an illuminated album bearing the signatures of the whole of the employees.

MR. SIDNEY JENKINS has announced his retirement from the editorship of the *Bexley Observer* and also the chairmanship of the South-East London branch of the National Union of Journalists.

At the factory of William Lewis (Printers), Ltd., Cardiff, on Friday, a presentation was made to Mr. William Jenkyn Brown to mark the completion of 50 years unbroken service with the present firm and its predecessors.

The presentation was made by Mr. Frank Murrell, the managing director, and appreciations of Mr. Brown's work were expressed by Messrs. John Elias (47 years service), G. Lavington (43 years service), J. W. Findon Browne (37 years service), and A. Wiggell (39 years service).

The presentation took the form of a note-case containing fifty £1 notes, and in addition a beautifully bound and illuminated album containing photographs of Mr. John Bird, the original founder of the business "next the castle gates" in 1791; of Mr. William Lewis, who took over the business in 1866; of the present directors; also of 15 members of the present staff who have been associated with Mr. Brown for 25 years and over, and whose total number of years service amount to 545 years.

MR. CHRISTOPHER CHARLES HUGHES, printer and stationer, has been elected a member of the Llandrindod Urban District Council without a contest.

MR. W. TUCKER, of the *Western Times*, Exeter, has just completed 66 years' continuous service. His two sons are in journalism, while a daughter is employed on the commercial side of a newspaper.

MR. THOMAS JAY, the president of the National Union of Journalists, made a speech brimfull of witty epigrams at the Bristol Rotary Club's luncheon on Monday.

Electrotypers and Stereotypers MANAGERS & OVERSEERS' ASSOCIATION

There was only a fair attendance of members at the monthly meeting of the Association on Tuesday of last week, at St. Bride Institute, Bride-lane, E.C.4, when the chair was occupied by the president, Mr. A. Chadwell. In the absence of a lecturer and little routine business to be transacted, opportunity was taken, after the reading of the minutes, to indulge in a somewhat desultory conversation on various trade topics.

The president asked for expressions of opinion from the members on the question of the Association financially supporting the new technical school. Various kindred associations to their own were giving it support, and he thought that if they, as an association, desired to have a voice in its management, they should support it. Their trade society was giving it financial backing, and gifts had already been made to it by Brigadier-General Mildren and Mr. John Fry, and he thought the members, through their own association, would like to feel they had some direct interest in its management.

One or two members raised the question of the danger of the new school being run on commercial and competitive lines, especially as the plant and machinery to be installed was to be so extensive as to enable it to compete with private establishments.

The prevailing opinion among the members, however, was that if there was any possibility of danger in that direction the scheme would not have received the unanimous support of the trade unions.

The matter of voting any sum from the Association was eventually left to lie on the table for a month. Mr. Bullett, the secretary, in the meantime promising to secure more information on the subject.

The remainder of the evening was taken up by a discussion on various points concerning the members' control of their staffs and difficulties that sometimes arose. In regard to this matter it was decided to ask Mr. W. Warren (general secretary National Society) to be present at the next meeting to clear up any points that might have caused misunderstandings.

Before the meeting closed the secretary announced that Mr. Duncan Keats had promised to address the Association in May on the "Treatment of Printing Plates on the Machine."

The Conversion of the P.M.G.

The Postmaster-General has said that "it is a crime against trade and commerce to continue the high postal charges." No doubt this expression of opinion has been caused by the falling off of the nation's correspondence to the extent of 389,000,000—the items making up this colossal total being: Printed matter, 190,000,000; letters, 110,000,000; postcards, 77,000,000; newspapers, 12,000,000.

In an interview which Mr. W. H. Burchell, of the Caxton Press, Ltd., had last week with Mr. Kellaway it was stated that although the halfpenny postal rate on printed matter had never been a profitable rate to the Post Office, yet Mr. Kellaway had become converted to the fact that the re-establishment of the halfpenny rate was an absolute necessity to industry. Mr. Burchell was complimented on the thoroughness of the wide-spread campaign against high postal charges which he had been carrying on in the Press and elsewhere since May, 1921. Mr. Kellaway said he was using his utmost endeavours in getting the Government to apply the anticipated Post Office huge surplus of between nine and ten millions in the reduction of postal charges. From the pleasant and reassuring nature of the interview Mr. Burchell feels satisfied that the re-establishment of the halfpenny postal rate on printed matter, the most important of all postal rates, will shortly come into force.

AMONG the week's announcements of dissolutions of partnership is that between John Marks and Frank Baker, law stationers, 27a, Abington-street, Northampton.

Litho Auxiliary Concert.

An Interesting Presentation.

From every point of view the final bohemian concert of the season of the Lithographers' Auxiliary to the Printers' Pension Corporation, held on Friday evening at the Cannon-street Hotel, was an outstanding success. The large gathering was presided over by the president, Mr. J. E. Reeve (Geo. Mann and Co., Ltd.). During the evening Mr. Sydney Cumbers (Johnstone and Cumbers, Ltd.), was made the recipient of a handsome illuminated address presented in recognition of his past services to the auxiliary. Among others present were:—Mr. T. E. Naylor, M.P., and Messrs. F. C. Fuller, Clement Graham, T. Hammond, F. V. Heywood, A. E. Jarvis, A. E. Lowe, J. Mortimer (secretary, Printers' Pension Corporation), C. Pollard, W. Popper, Woodgate Stevens and J. Mynott (secretary of the Auxiliary).

Mr. Reeve, during an interval in the programme, referred to the work of the Auxiliary, and said he had long since learned the first duty of the chairman was to collect money; in fact it was the only duty. He was afraid, however, he had not been so successful in this respect as their past president, Mr. Cumbers. During the twelve years of their existence they had collected £2,768. That meant they had created six pensions up to date of £20 a year, and they had £368 in hand towards another £400. During his experiences while collecting money he had been received most kindly. It was with special pleasure that he announced the fact that Messrs. J. Robertson and Co., Ltd., had printed and supplied the programmes. He then gave a detailed statement of individuals' and firms' donations to his list, which amounted to £222 1s. 6d. That sum enabled them to carry forward £200, after buying another pension, which meant that another veteran of the industry would be provided for, at any rate it would keep the wolf from his door for the rest of his days.

Mr. Reeve then called upon Mr. Naylor to present to Mr. Sydney Cumbers an illuminated address, signed by all the members of the Committee.

Mr. T. E. Naylor, M.P., in making the presentation on behalf of the Committee, said the printing trade was known the wide world over not only for its benevolence, but for the number of great men who have come forward in response to the many appeals to help in benevolent causes. Among these he counted his friend Mr. Sydney Cumbers. It was a fashion in these modern times to postpone recognition of good deeds until a man had passed to the great beyond, but he was pleased to know that the Litho Auxiliary had not waited till then to express their appreciation. Mr. Cumbers was a man of enterprise in works of benevolence, and if it was his intention to abate his interest in the work he had done so well in the recent past, he hoped it would only be to enter the letterpress section in order to help them in the same way as he had done in the lithographic.

Mr. Sydney Cumbers, in returning thanks to Mr. Naylor and the Litho Auxiliary Committee, said he had been challenged a good many times if a time would come when he would be lost for words. If there was ever a time when he felt his back against the wall it was that evening. He confessed to having mingled feelings at the spontaneous display of good fellowship shown towards him, but he thought the work he had been able to accomplish was in large measure due to the energetic co-operation of Mr. Laurence H. Blades and the untiring efforts of the committee. He thought Mr. Naylor had conferred a great honour upon the lithographic section of the trade in coming amongst them that evening.

Mr. Reeve next announced that the plate—which realised £15—after being added to the previous amount collected and augmented by further donations from himself and several friends, brought the total to £250.

Mr. Woodgate Stevens briefly proposed a hearty vote of thanks to the chairman, which was accorded musical honours.

The concert, arranged by Mr. T. Hammond, was of the usual good quality provided by this Auxiliary. Special pleasure was evinced at the performances of Messrs. Eddie B. Brownhill and H. G. Myers (both of Messrs. Geo. Mann and Co., Ltd.). Gioconda Papacini (Italian soprano) and Miss Kitty Lackington (contralto) were very warmly received, as also were the efforts of Mr. A. E. Nickolds (banjoist) and Mr. Albert H. Howe.

DIVIDENDS AND REPORTS.

WINTERBOTTOM BOOK CLOTH Co. is again paying 10 per cent., free of tax, on its ordinary capital of £998,000. An interim dividend of 4s. per £10 share, free of tax, was paid last October, and a final dividend of 16s. per share, free of tax, is now announced. A sum of £20,000 is set aside for depreciation, £11,172 is added to the reserve fund, and £53,468 is carried forward. A year ago the same amount was allocated to depreciation, but no addition was made to reserve, which then stood at £568,828. The carry forward however, was £139,366, or rather more than double the amount that now remains undistributed.

LAMSON PARAGON SUPPLY Co.—The directors recommend the payment of a dividend of 10 per cent. on the ordinary shares for the year ended January 31st last. For the two years 1919-20 and 1920-21, the dividend was 12½ per cent.; for the three previous years 10 per cent. In October the customary interim dividend was passed on the ground of the uncertainty of the outlook for trade generally.

PRINTING MACHINERY.—Interim dividend at guaranteed rate of 7½ per cent. per annum on ordinary shares for past half-year.

NEW COMPANIES.

BRISTOL STATIONERY Co., LTD.—Capital £250, in £1 shares; printers, wholesale and retail stationers, office equipment providers, etc. Private company. Subscribers: W. Kingman and O. J. George. Registered office: St. John's Chambers, 24, Christmas-street, Bristol.

PICTORIAL PUBLICITY Co., LTD.—Capital £2,000, in £1 shares; to take over the business of advertising contractors and agents, carried on at 26, Long Acre, W.C.2, as the Pictorial Publicity Co. Private company. First directors: A. H. Lakeman, R. W. J. Tucker, and W. H. Miller. The two first named are permanent. Qualification: £100. Remuneration as fixed by the company. Registered office: 26, Long Acre, W.C.2.

WALTER IBBOTSON AND Co. (MANCHESTER), LTD.—Capital £6,500, in £1 shares; stationers, papermakers, printers' ink manufacturers, box makers, envelope manufacturers, etc. Private company. First directors: N. J. Ibbotson, W. D. B. Ibbotson, A. Jones, and W. Moss. Registered office: 29, Princess-street, Manchester.

F. S. OLIVER AND SONS, LTD.—Capital £51,000, in £1 shares (34,000 7½ per cent. non-

cumulative preference and 17,000 ordinary; to acquire and deal in shares, stocks, debentures, to deal with any lands, buildings or other real or personal property, carry on business as printers, publishers, newspaper and magazine proprietors, stationers, advertising agents and contractors, paper manufacturers, etc. Private company. Subscribers are: F. S. Oliver and M. Oliver.

THORNBORROW'S, LTD.—Capital £100 in £1 shares; law and general stationers, law writers, printers, etc. Private company. First directors: T. K. Thornborrow and H. J. Thornborrow. Registered office: 5, Great James-street, Bedford-row, W.C.

Re Skinner, Brierley & Co.

The first meeting of creditors was held last week at the London Bankruptcy Court under the failure of Geo. Francis Skinner and Henry Walker Brierley, lately trading as paper merchants and stationers at 22, Great James-street, Bedford-row, W.C., under the style of Skinner, Brierley and Co. The joint liabilities expected to rank for dividend are estimated at £789 and no joint assets are returned.

Mr. W. Boyle, official receiver, reported that the debtor Brierley had stated that prior to March, 1920, he was in employment in the paper trade as traveller. From 1913 to August, 1919, he was serving in the army, and on March 21st, 1920, he entered into partnership with Mr. G. F. Skinner as paper merchants and wholesale stationers, with offices at 176, Fleet-street. A deed of partnership was drawn up under which they shared the profits equally. In September, 1920, they removed their office from Fleet-street to 22, Great James street, Bedford-row. Up to early in 1921 they were doing fairly well and held stock valued at roughly, £1,000, part on credit. In March, 1921, there was a big drop in prices and they made a heavy loss, and on top of that there was the trade slump. In May, 1921, the debtor Brierley, in consequence of an injury received in France, was laid up owing to his knee having given way, and for months he was prevented from calling on customers which did great harm to their business. Eventually he had to go to hospital and was not discharged from there until March 1st of this year. For the past four months no business had been done, and the landlords had distrained and re-let the Great James-street premises. Their present position was due to slump in trade, illness of the debtor Brierley, and shortage of capital.

The estate was left in the hands of the official receiver to be wound up in bankruptcy.

National Labour Press, Ltd.

Sale of Printing Plant.

The machinery and plant of the National Labour Press, Ltd., Johnson's-court, Fleet-street, E.C., came under the hammer, last week, when Mr. Edwin W. Evans, 150, Fleet-street, E.C., by order of the receivers, sold the various lots, most of which realised exceedingly good prices, taking into consideration the depression in the trade at the present time. Among the principal items were the following: Quad demy Miehle, £900; double demy Centurette, £410; royal folio "Falcon," by Waite and Saville, £190; demy Wharfedale, £175; 16½ in. by 12 in. "Phœnix" platen, £87 10s.; Miller Falls saw trimmer, £170; 3 model 4 linotypes, £790, £700, £680 respectively; 2 model 1 linotypes, £280 and £260; 32 in. by 44 in. self clamp guillotines, by Furnival and Elliott, £95 and £110; crown folio Bremner platen, £57; 11 in. by 7 in. "Pearl" platen, £26; double demy "Albion" press, £32 10s.; 27 in. treadle perforator, £17; 72 in. by 36 in. imposing surface, £21; 56 in. by 27 in. ditto, £17; "Hallamshire" rack, 20 sections, £13 15s.; galleys, 5s. 3d. to 8s. 6d. each; chases up to 17s 6d each. Type averaged 3s. 6d. per lb. Some of it rising to 5s. per lb., and paper stock up to 20s. per ream. A 24 in. by 27 in. by 24 in. bent steel fire resisting safe, by Chubb's, brought £29, and an "Empire" time recorder for 100 hands was bought for £19. The lease of the premises went at £500.

Papermakers in Conference.

Annual Meeting and Dinner.

Mr. W. Leonard Tod presided at the annual general meeting of the Papermakers' Association held on Friday afternoon at the offices, 26-27, Farringdon-street, London.

The President's Review.

Following the adoption of the minutes of previous meetings, the President moved the adoption of the report which had been circulated. The past year, he was certain, had been the worst for the industry in the memory of any person living. His own recollections went back further, he supposed, than with most people, and he never knew anything like such a year. There had not been the slightest rift in the clouds during the whole 12 months, and there was not the least sign of one. They were told that the darkest hour came before the dawn and that there was a silver lining to every cloud. He hoped the silver lining would appear soon, because it was long overdue. He thought there was just a little sign of the lighting in the clouds, but there was no silver lining to be seen yet. However, they felt a little happier and more cheerful than during the past months.

With regard to the Codified Trade Customs, if they were adhered to, and he wished to emphasise that point, they would do a great deal of good. There had been some tendency among the stationers and possibly also among the mills not to stick to the Customs. The Customs were the result of a great deal of work and he trusted they would all try to stick to them as much as possible. It would be a pity if all the benefit of the work put into the revision was to be thrown away.

Referring to the railway rates, Mr. Tod said a lot of work had been undertaken in this matter, and Mr. Thomas, who had evinced great interest in the subject, had been successful in getting a concession for esparto. At first the railway companies would not listen to their application; but when it came before the tribunal, Mr. Thomas argued his case so well that they were able to get esparto placed in a slightly lower classification.

Extended Operations.

Another development proposed for the future was that a room should be taken in Manchester and that Mr. Foster should attend there for a day or two at regular intervals, perhaps every fortnight or three weeks or a month, so that members in the Northern district might be able to keep in touch with headquarters and get the secretary's advice on any matters on which they might require it. If that arrangement was a success in Manchester, it might be extended to Scotland.

Then it was intended to develop the statistical work of the Association, and in various other ways they wanted to make the Association of the utmost possible use. Mr. Foster and Miss Ingram and the other members of the staff put in a tremendous amount of work. They were most enthusiastic; they had been very successful; and, given the opportunity, they would be more successful still. (Hear, hear.)

Seconded by Capt. Birrell, the report was adopted.

Re-Election of President.

Mr. Foster announced that the only nomination for the presidency was that of Mr. Tod, who had held the office for two years and was still eligible for another twelve months.

Mr. Herbert Green moved the re-election of Mr. Tod, and eulogised the work that gentleman had performed for the Association during the past two years.

Mr. D. Clegg seconded the resolution, which was carried unanimously.

In moving the re-election of Mr. Herbert Green as treasurer, Mr. Tod mentioned that Mr. Green had performed the duties for several years with every satisfaction.

Mr. W. R. Challinor seconded, and the resolution was cordially carried.

On the motion of Mr. Green, seconded by Captain Nuttall, Mr. Williams was re-elected auditor.

Mr. Tod mentioned that it was necessary to elect a trustee in the room of the late Colonel Birrell, and remarked that the two surviving trustees were Mr. Lewis Evans and Lord Doverdale. It was thought advisable that they should have a younger man to fill the vacancy, and he would like to propose Mr. Ralph Reed.

Mr. Goldstraw seconded, and Mr. Ralph Reed intimating his willingness to accept the office, he was unanimously elected.

The President, on behalf of the Association, expressed the regret of the members at the death, since the beginning of the year, of Mr. W. D. Dixon and Mr. Joseph Ridley. Both were old members of the Association and took a great interest in the work. They would be very much missed.

It was agreed to enter a record of the expression on the minutes.

The Dinner.

A highly successful function was the annual dinner of the Papermakers Association, which was held on Friday night at the Connaught Rooms, London. A year ago no such function was held owing to the railway strike, and members and their friends were evidently pleased that the old custom was revived. Altogether 318 diners sat down, representing not only the paper industry of this and other countries, but every section of the allied industries of the United Kingdom. A striking feature of the gathering was the friendly and cheerful spirit which predominated, due in no small measure to the care which had been taken in arranging the tables. A happy note was touched in the musical programme under the direction of Mr. G. Oswick. Scottish humour—a tribute to the President—was a prominent characteristic and delighted everybody. Mr. Jock Walker and Mr. Hector Gordon had an appreciative audience; while the singing of Miss Nellie Walker (contralto) and Mr. Fredk. W. Taylor (baritone) was equally attractive. Mr. R. Stanton presided at the piano with his usual efficiency. During dinner and also the reception Mrs. Fred Wildon's orchestra entertained the company in a very agreeable manner. It was the aim of the Dinner Committee to promote the social aspect of the function, and they succeeded admirably. It was in consonance with this object that the toast-list was restricted within definite limits.

Continuation Schools.

SIR,—The interruption to the business of the master printer and the utility of the costly Continuation Schools, is happily recognised by the Municipal Reform Party, which has just come into power, at the London County Council. The Act of Parliament which compels the parents of girls and youths to see that they attend Continuation Schools until they have attained the age of 15, may be suspended if the Board of Education accedes to the policy of the M.R. Party. In the meantime until a decision is arrived at I understand that prosecution of parents will cease.

This piece of news will be welcomed by master printers, who have experienced interference with their business arrangements, and the loss of time paid for by the employer caused by the employee having to acquire unnecessary knowledge, of no possible use to him in his work.

The policy of the Municipal Reform Party will have the effect of closing down these superfluous and costly institutions, thus saving the taxpayer hundreds of thousands yearly.

These schools have hit the master printer in two ways; as a taxpayer, he pays for the upkeep of these schools; he also pays for the lost time of those of his staff who have been compelled to attend the Continuation Schools.

Yours, etc.,

W. H. BURCHELL,
Hon Sec.

Association of Master Printers of the
London Central Districts.
London, March 27th, 1922.

A SPECIAL joint meeting of the North Wales Master Printers' Alliance and Lancashire and Cheshire Alliance will be held at the Grosvenor Hotel, Chester, on Monday, April 3rd, 1922, when lunch will be provided at 1.30, to be followed immediately by the meeting, which will be addressed by the president of the Federation of Great Britain and Ireland (Mr. MacLehose), Mr. R. A. Austen Leigh (Federation vice-president), Mr. A. E. Goodwin (Federation secretary), Mr. A. E. Harrison (N.W. Alliance president), and others.

Government Contracts.

Contracts were placed with the following firms during February:—

Stationery Office.

PRINTING, RULING, BINDING, ETC.

Northern Ireland—Group 4 (1922), Parliamentary Printing—Senate Minutes, etc., Do. Group 5 (1922), Do. Commons Votes, etc., Do. Group 8 (1922), *Belfast Gazette*.—W. and G. Baird, Ltd., Belfast.

Northern Ireland Group 6 (1922), Miscellaneous Bookwork No. 1.—R. Carswell and Sons, Ltd., Belfast.

Northern Ireland—Group 7 (1922), Do. No. 2.—John Adams, Belfast.

1,500 Telephone Message Books "88."—Tee and Whiten and J. Mead, London, S.E.

5,000 Diaries, "C.I.D. 24," 4,000 Books, P. 1038.—McCorquodale and Co., Ltd., Wolverton.

Group 1 (1922)—Wales—Bookwork Printing.—Wm. Lewis (Printers) Ltd. Cardiff.

Group 2 (1922)—Wales—Jobwork Printing Only.—Roberts and Co., Cardiff.

Group 3 (1922)—Wales—All Operations.—*Western Mail*, Ltd., Cardiff.

Group 4 (1922)—Wales—All Operations on Manilla and Cardboard.—J. Locke and Son, Cardiff.

Group 21 (1922)—Parliamentary and Stationery Office Publications—Recurring Works, Group 23 (1922)—Admiralty Recurring Works: Eyre and Spottiswoode, Ltd., London, E.C.

Group 22 (1922)—Admiralty Special Works, 42,250 Income Tax Receipt Books, 10,000,000 Forms A/cs. 455 and 455 D.G., 10,000 Books, Mines and Quarries, Form 42: Waterlow and Sons, Ltd., London, E.C.

Group 114 (1922)—Admiralty—Specified Items No. 3, Secs. A. and B, 25,000 Books, Form S/55, Nat. Savings, 1,500 Stores Demand Books, 1,000,000 Forms P. 647, 250,000 Books, Med. 40: W. P. Griffith and Sons, Ltd., London, E.C.

Group 114 (1922)—Admiralty—Specified Items No. 3, Sec. C.: T. Beaty Hart, Kettering.

Bdg. 675 Assessment Form Books: Drake, Driver and Leaver, Ltd., London, E.C.

55,000,000 Telegram Forms: Bemrose and Sons, Ltd., Derby; Manifoldia, Ltd., West Bromwich.

Weir, Ltd., Alloa; London Paper Mills, Co., Ltd., Kent; North of Ireland Paper Co., Ltd., Co. Antrim, Ireland; Barrow Paper Mill, Ltd., Barrow-in-Furness; North Wales Paper Co., Ltd., Flint, N. Wales; Darwin Paper Mill Co., Ltd., Lower Darwen.

Crown Agents.

PRINTING.—Messrs. Waterlow and Sons, Ltd., London, E.C.

BOOKS.—The Broadway Press, Kent (Dartford).

PRINTING PAPER.—Spalding and Co., London, E.C.

PORTFOLIOS.—J. Adams, London, E.C.

E. and N.E. London Master Printers.

Much regret was expressed at the announcement—made at the annual meeting of the Association of Master Printers of East and North-East London on the 15th inst.—of the resignation of the Association's esteemed president, Mr. E. R. Alexander, through failing health. It was unanimously agreed that the title of president should remain with Mr. Alexander, the office of chairman being created in order to overcome any difficulties arising through his enforced absence from meetings. Mr. C. H. Ward was elected to fill the new office.

The secretary reported on the year's work, and although it was felt that the best interests of the Association were retarded through the apparent lack of interest shown by a large number of the members, it was agreed that the average attendance was as good as could be expected in view of the conditions prevailing and the scattered area over which the Association operates.

The treasurer's report showed a substantial balance in hand.

Following the election of officers, discussion ranged round the circular issued on paper trade customs. It was agreed that the question of wrappers should be taken up by the Federation, and that the limits for special makings should be considerably modified: 5 per cent., 2½ per cent., and 1½ per cent. being suggested in place of the existing 12 per cent., 7½ per cent., and 5 per cent.

The meeting closed with an interesting little ceremony. The treasurer, Mr. Phelps, in a happy speech, proposing a substantial present to the secretary in view of his recent marriage. This was, in an equally happy manner, supported by the chairman, Mr. Ward, and carried with enthusiasm.

The Association's next meeting is fixed for Wednesday, April 26th.

Printing Trade Football.

The following matches were played on Saturday, and resulted as shown:—

Printers' Football League.

Falcon, 2; Oyez, 1. Amalgamated Press, 4; Blades, 0.

MR. THOMAS GIBSON BOWLES, proprietor of *The Lady*, and one of the founders of *Vanity Fair*, left unsettled property of the gross value of £59,825, with net personality £54,372. The testator left his newspaper property, *The Lady*, and everything held or used in connection therewith, including book debts and the business premises, 38, 38A, 39, and 40, Bedford-street, Covent-garden, and 26 and 27, Maiden-lane (subject to business liabilities) to his son George Frederic Stewart Bowles, charged with the payment of 15 per cent. of the profits from these bequests to each of his (testator's) children.

LONG SERVICE.—There are over 200 employees of Messrs. Hulton, Withy-grove, Manchester, who have been in the service of the firm for over twenty years.

Mr. Fishenden at the Camberwell SCHOOL.

Mr. R. B. Fishenden recently gave an interesting talk on "Quality in Printing" to the students in the printing classes at the Camberwell School of Arts and Crafts. He said in the course of his remarks that we were in the midst of a big fight in the printing industry in which the cause was the improvement of standards of British typography and printing generally. He advised all apprentices and craftsmen to make a hobby of their life work, so that it should become their great absorbing interest. Sport and exercise were essential to every man's well being, but printing contained so many interests and covered such a wide field that it could be made a very congenial occupation for one's spare time. The students at the technical schools were the young crusaders of the craft and the custodians of its future. At the printing classes all over the country they were imbued with the new spirit of typography, and from there went into the composing rooms at the works to put the ideas they were taught into practice. In the nature of things, they must be prepared to meet rebuffs and set-backs because many who were in authority could only understand the standards which obtained twenty or thirty years ago. But the number of technically trained students was always on the increase, so that the difficulties of the young men were constantly decreasing. On the other hand, it was a source of great gratification to the student when he found that his work secured the approval of his employer and the customer.

The technical classes had been the pioneers of progress in typographical display, which now had the support of a number of organisations whose object was the improvement in the standard of work; even H.M. Stationery Office had a committee sitting to improve the standards of Government work.

In thinking of new styles of typography, they must not forget the classic models. Nicholas Jenson was a monument to the craft, and his beautiful types were to-day the recognised models for proportion, harmony, legibility and distinction. His printing, though it did not conform to modern standards of press work, was full of lessons to those who could understand and learn.

Mr. Fishenden touched on the various effects which it was possible to obtain by different treatment and different processes in printing, and dealt at some length on the conditions which influence the legibility of types.

Mr. W. H. Amery, the well-known instructor of the classes, in a few remarks, thanked Mr. Fishenden for his address, saying that all his life he had been associated with the schools, either as a student or a teacher, and agreed that the subject of printing was an all-absorbing one, and that typography could be made a joyous task, even in commercial work.

Manchester School of Technology.

Last Saturday (March 25th) about 90 members of the Rochdale Printing and Kindred Trades Federation paid a visit to the Manchester Technical School.

The party were met at three o'clock by Major Gamble, principal of the printing section of the school, and were conducted over the various sections of the school's printing and process department. All the plant was working. After visiting the printing section, much interest was shown in the "process" rooms, where blocks were being made. The litho section of the visitors gained much valuable knowledge from the demonstrations in the offset litho and the direct process rooms.

At the conclusion of the visit tea was provided in the school, and thanks were given to Major Gamble and his staff for their kindness.

Arrangements had been made for three parties to visit the works of Messrs. Hulton and Co., Withy Grove, where the production of the *Sunday Chronicle* and *Empire News* was in full swing.

Much interest was shown in the working of the giant octuple presses and the automatic casting done by the autoplating machine.

The party spent a very enjoyable day, and voiced their thanks to Messrs. Hart and Noble, of the Master Printers' Association, who had kindly undertaken all the arrangements.

The Piezo-Micrometer.

By JAMES STRACHAN, F.Inst.P., F.R.M.S.

The few notes published about the demonstration of the piezo-micrometer before the Aberdeen Division of the Technical Section of the Papermakers' Association, have aroused considerable interest in the trade, judging from the number of inquiries received by the writer. As it may be some time before a detailed description of the instrument is published, the following notes may be of present interest.

The piezo-micrometer was designed and constructed for two purposes (so far as paper is concerned): (1) To measure very accurately the thickness of one or several sheets of paper under a measured pressure; and (2) To investigate the physical properties of paper, comprised generally under the terms bulk, porosity, compressibility and solidity. The instrument may be used for other purposes with which we are not concerned in these pages.

The principle of the instrument involves the application of a measured pressure to a measured area of the paper, and thereafter the application of a micrometer without sensible mechanical pressure other than that required to complete an electrical circuit, wherein lies the sensitiveness of the piezo micrometer.

Three types of the instrument have been designed, but so far only the laboratory model has been constructed. Three of the latter type have been made, and are in daily use. In the laboratory type of instrument a dead weight pressure is applied by means of a lever of special construction, working on agate bearings, and the electrical contact of the micrometer is established between a platinum needle and a disc of the same metal. A very small dry battery is sufficient to work the instrument.

The construction of the piezo-micrometer has been carried out entirely in the workshops of the Nicol Smith Co., Aberdeen, and the perfect workmanship displayed disposes of the idea that we must go abroad to obtain testing instruments for the paper trade.

It is a well established fact that various micrometers of the ordinary type will give different readings on the same sheet of paper, according to the degree of compressibility of the latter and the pressure applied during measurement. It is obvious, therefore, that the thickness of a compressible material cannot be expressed accurately without an accompanying statement concerning the pressure under which the measurement is carried out. For ordinary purposes in the measurement of the thickness of paper this pressure should be about two pounds per square inch (140.6 gms. per sq. cm.). In the piezo-micrometer the pressure is applied in units of 2 lbs. per square inch, and the micrometer is graduated in tenths, thousandths, and tenths of a thousandth of an inch.

With regard to the practical information derived from the study of the compressibility of paper, the writer has already indicated the line along which research is now being conducted (*vide World's Paper Trade Review*, December 23rd, 1921), but meanwhile we may state that two very important facts have been established. These are:—

1. Time is a factor in the compression of paper. On the addition of a given pressure a definite time elapses before the compression is completed. For ordinary papers this takes about five minutes for 2 lb. units.

2. The compression graph is a regular curve until the limit of compression is reached, when it becomes asymptotic.

The compression curve corresponds to a well-known mathematical formula— $PV^k = k$, in which P=pressure; V=volume or thickness under compression; and k=constants.

This curve becomes a straight line when plotted in logarithms or on logarithmic paper, so that when the limits of the curve are known, a straight line drawn through two points will give the thickness for all intermediate pressures without further experiment or calculation. The accuracy of both the instrument and the application of this formula may be judged from the fact that the values of "k" in ten observations at different pressures on the same piece of paper did not vary more than one per cent.

Several important mathematical deductions may be arrived at from this formula; but it remains to be seen to what extent they can be applied in practice. Taking the weight of the paper into consideration, it appears fairly certain that for any particular class of paper

a constant curve may be figured, upon which the degree and extent of coincidence of the curve for any particular sample will indicate a numerical value for certain physical properties of paper, hitherto rather ill-defined. It is certain that our ideas of "bulk" as outlined in the "C.B.S. Units," will require revision, and that we are approaching a more definite conception of that elusive property called "handle."

We have outlined the nature of the researches which are being done with the piezo-micrometer not merely to indicate the possibilities of the instrument, but also to reserve priority in the publication of results, because we feel that in the limited spare time of a "mill chemist," it may be some time before the work is completed.

That does not mean, however, that we are reserving such a valuable instrument for our own use. The laboratory model will be placed on the market immediately, with a view to establishing it as a standard instrument for the checking and calibration of micrometers already in use.

THE NATIONAL Association of Wholesale Stationers AND PAPER MERCHANTS.

National Council Meeting.

The monthly meeting of the National Council was held at the Council Chamber, 11, King's Bench-walk, Temple, E.C.4, on Thursday, March 9th, the new president, Mr. F. M. Carson (Messrs. Richard Herring and Co., Ltd.), being in the chair.

Amongst other items, the new regulations of the railway companies with regard to the addressing of goods were under discussion, about which certain representations had been made to the railway companies.

A discussion took place with regard to the adoption by the shipping companies of ton weight rates, with a view to putting further facts before them, since it was understood that they would be again considering the subject at an early date.

As all the districts had now appointed their delegates to serve on the National Council for the current year, the general secretary was able to give the meeting a full list of the National Councillors.

The various sections of the trade had been communicated with as regards the formation of a Paper Trade Golfing Society, and it was hoped to hold a meeting at an early date to bring this society into being.

A report was laid before the meeting as regards the insurance policies which had been affected under a scheme giving preferential terms to members of the Association.

A lengthy discussion took place with regard to the esparto mills and the proposed combine and its possible effect on the distributors.

It was understood that a deputation was shortly to call upon the Chancellor of the Exchequer, which would include representatives of this Association, to urge forward demands for cheaper postal facilities.

A meeting of the National Wrapping Paper Section had also been held in the morning, and it was agreed that the next meetings of the National Council, National Wrapping Paper Section, and National Writings and Printings Section should be held on April 6th

Leatherboards.

The imports of leatherboards into the United Kingdom during February were as under:—

Port of Importation.	Country whence Consigned.	Quantity. Cwts.	Value. £
Glasgow	Germany	300	233

The offices of the Papermakers' Directory of All Nations (published by Dean and Son, Ltd.) have been removed to 29, King-street, Covent Garden, London, W.C.2.

New Inventions.

Rotary Litho Machine.

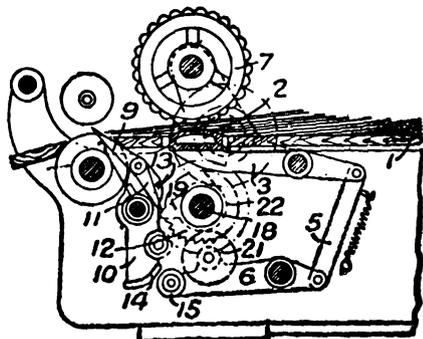

A rotary lithographic printing machine has been patented by Linotype and Machinery Ltd., and C. L. Stern, which can be used for printing (a) single side direct, (b) single side offset, (c) perfector offset, or (d) two-colour offset, is constructed with two printing cylinders 1, 2, and an impression cylinder 3 of half the diameter of the cylinders 1, 2, the cylinder 1 being fitted with an offset surface 5, and with a plate surface or offset surface 4, and with inking and damping mechanisms 9, 8 for the surface 4 when a printing plate is employed on 4. The cylinder 2 may have two

printing plates 6, 7 fitted, and is provided with damping mechanisms 10, 12, and inking mechanisms 11, 13, for printing different colours, the damping mechanisms being arranged adjacent to each other as shown, or, if desired, the damping mechanism 12 may be between the inking mechanisms 11, 13, or only one damping mechanism may be employed. For printing in the manner (a) referred to above, a printing plate 4 is fitted to the cylinder 1 and sheets are fed to cylinder 3 at every alternative revolution, the mechanisms not required being rendered inoperative in known manner. For manner (b), an offset impression from plate 7 is transferred to the offset surface 5 which prints a sheet carried by cylinder 3. For manner (c), a printing plate is fitted to the surface 4 and prints on an offset surface on cylinder 3, which then prints on the underside of a sheet while the surface 5 prints an offset impression from the plate 7 on the outside of the sheet. For manner (d), the grippers on the cylinder are arranged to carry the sheet for two revolutions, at each of which an offset impression from the plates 6, 7 is printed by the offset surfaces 4, 5.

Feeding Sheets from a Pile.

The specification of an invention patented by Mr. G. Spiess describes how sheets are fed from a pile such as a fanned out pile on a pile table 1 by a rotating friction roller 7 arranged above the table 1, the pile being lifted periodically to bend the top sheet and bring it into contact with the roller 7 by mechanism arranged under the table, and controlled by a feeler actuated by the separated sheet. As

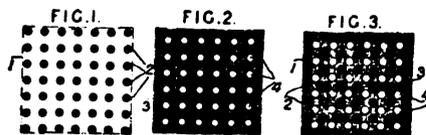

shown, this raising-means consists of a block 2 carried by levers 3 connected by a link 5 to a lever 6 fitted with a roller 21 co-acting with a cam 22, the block 2 being raised when the roller 21 is on the concentric portion of this cam. The separated sheet acts on a feeler 9, carried by a lever 10, and brings a pawl 11

into engagement with a ratchet 12 on the main shaft 18, and thus the lever 10 is moved counter-clockwise, and a cam 14 on lever 10 acts on a roller 15 on the lever 6, and depresses this, thereby depressing also the block 2 by means of the link 5 and levers 3. The pawl 11 is fitted with a check stop 13, and the lever 10 is reset by a cam 19.

Photo-mechanical Printing.

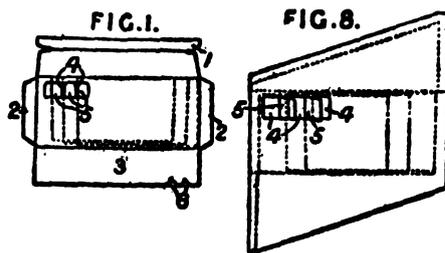

In an invention by Mr. J. A. Hatt a half-tone screen comprises clear openings 4, Fig. 3, wholly opaque dots 2, interspaced with the clear openings, and the remainder semi-transparent. The screen is made by superposing two screen plates illustrated in Figs. 1 and 2. The plate shown in Fig. 1 is made by exposing a bichromated colloid plate through a

regular cross line screen suitably spaced therefrom to produce the circular dots, completely washing away the unexposed colloid and dyeing the exposed dots 2. The plate shown in Fig. 2 is produced by printing the plate shown in Fig. 1 on to a similar colloid plate, washing away the unexposed colloid, and dyeing the remainder of the film 3 but not so heavily as the opaque dots 2. When the plates shown in Figs. 1 and 2 are superposed, there are no film layers in the transparent openings 4.

Envelopes.

In a paper sheet or blank of the kind adapted when folded to enclose one or more post cards, etc., bearing postage stamps exposed for obliteration through openings in the blanks, the openings 4 are cut away on three sides leaving integral flaps 5 behind which the post cards are positioned. The portion 3 of the blank is notched as shown at 6 so that on folding down the side flaps 2 and gummed flap 1, the latter adheres to the post cards and effectively retains them in position.

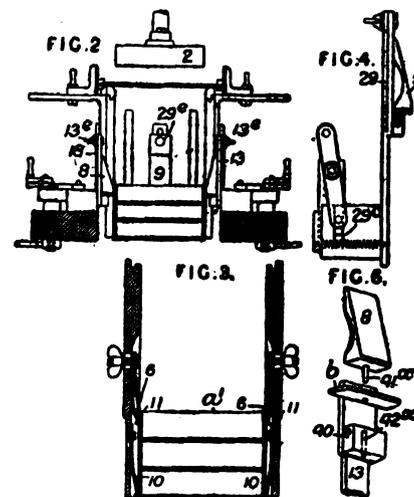

The blank may be in the form of an ordinary letter-card, or it may have tapered closing-flaps to economise paper. Instead of the openings 4 being cut in the direction of the length of the post card, they may be cut in the direction of its width. In some cases the openings are smaller than the stamp, so that when affixing the stamp it adheres both to the post card and to the blank. In place of the notches 6, holes may be provided. The blank may have advertisements upon it. Mr. H. Chambon is the patentee.

Making Paper Boxes.

An invention patented by the Kingsbury and Davis Machine Co. relates to a machine for making paper boxes, and having reciprocating formers, for example, those described in Specifications 10729/03 and 164,888, the radially-moved crimpers 8, 9, Figs. 2, 4, and 6, are constructed with outwardly inclined surfaces, as shown so that if the former 2 descends while the crimpers are in its path they will be pushed out of the way without injury of the parts. The crimpers may be adjusted vertically in their carriers 13, 29 by

means of bolts passing through slots in the carriers, and securing the crimpers thereto by winged nuts 13', 29'. Pins 41₂ on the crimpers engage holes 42' in blocks 40 on the carriers, and are frictionally held by spring-pressed members so as to be removable. Crimper blades *b* of various sizes may be employed

according to the size of the box to be made. The formed box *a'*, Fig. 3, is held in place for the crimping operation after the former is removed by spring stops 6, Fig. 3, and spring grips 10, 11. Specification 167,123 is referred to.

MR. JUSTICE SHEARMAN, in addressing the annual meeting of the Booksellers' Provident Institution at Stationers' Hall recently, said that he had sat for many years in Criminal Courts, and he could frankly say he had never seen a bookseller in the dock.

Unemployment in the Allied Trades.

Irregular Conditions Last Month.

In the printing, publishing and bookbinding section the total estimated number of insured workpeople is 218,500 (141,560 males and 76,940 females). Unemployed books remaining lodged at February 21st was 17,919 (11,544 males and 6,375 females), a percentage of 8.2, equally distributed between males and females. Compared with January 31 there was an increase of 0.3 in the case of males, but a decline in females of 0.2. The total number of short time workers at February 21st was 2,532 (967 males and 1,565 females). There was a decline in the case of males of .34 and an increase of 1.19 in the case of females. The total percentage of 1.2 represents an increase of 0.1 compared with January 31st.

The official report to the *Labour Gazette* as to the condition of employment in the paper trade in February is to the effect that "employment was irregular owing to the general lack of orders. Of 9,000 workpeople covered by the returns 36 per cent. were losing on an average 13 hours per week through short time."

On the general question of unemployment the chart which appears in the *Gazette* indicates that the temporary rise in unemployment which has taken place since September terminated in January and that there has latterly been resumed the fall in unemployment which began in June last, when the peak of the depression was reached. Between June and February the percentage of unemployed has fallen from 23 to 16.

Particulars of unemployment in insured industries, total unemployment, show that the estimated number of insured workpeople in papermaking and staining was 59,870 (41,860 males and 18,010 females). The number of unemployment books remaining lodged at February 21st was 6,704 (4,821 males and 1,883 females). The 11.2 percentage of unemployment represented an increase in the case of males of 0.5 and a decrease in females of 1.1. Short time in paper and staining showed some diminution in February. The total of 3,798 on February 21st represented a decline of 6.23 - 1.2 in the case of males and 0.9 in the case of females.

Manufactured stationery, in which the estimated number of insured workpeople is put at 69,190 (21,320 males and 47,870 females) had a total of 6,338 unemployment books lodged at February 21st (2,051 males and 4,287 females), or a total percentage of 9.2. The total percentage decrease is 0.1. Short time shows a decline also. The total of 1,571 is lower by 231 compared with January 31st, the total percentage of 2.3 representing a decline of 0.3 per cent.

Reporting on conditions in the paper, printing and bookbinding trades generally, the *Labour Gazette* says:—Employment continued bad generally during February, and a considerable amount of short time was still being worked; there was a slight improvement in the printing trade, but a further decline with bookbinders. With letterpress printers employment in London remained slack or bad in most sections, but there was a further slight improvement among compositors. Overtime was still being worked by compositors and readers in certain offices, but in others a num-

ber of men were on short time. In the provinces a slight improvement was reported from a few centres, including Birmingham, Bristol, Cardiff and Belfast. In the lithographic printing trade employment continued generally bad and much short time was reported. Of over 6,500 workpeople in the letterpress and lithographic printing trades

covered by returns received by the Department 32 per cent. were working short time and losing on an average 9 hours each per week.

Employment in the bookbinding trade showed a further slight decline, and of 2,900 workpeople concerning whom returns were received 45 per cent. were working on an average 10 hours per week short of full time.

(From Our Sydney Correspondent)

A MARKED falling-off in the profits of W. E. Smith, Ltd., is disclosed in the report and accounts covering the year ended October 31st last. The gross profit for the term was £37,156 13s. 2d. against £50,218 8s. 7d. for the preceding year, and the net earnings £4,750 17s. 6d. as compared with £12,594 7s. for the previous 12 months. Though the directors do not state the cause for the shrinkage in profits, it was no doubt due to the depreciation in the value of stock. They state that the stock has been written down to present landed cost, and it is interesting to note that stocks in transit on October 31st last were only valued at £50,000 6 11s. 3d., against £56,970 6s. 3d. on the corresponding date in 1920. A sum of £4,594 7s. was brought into the accounts, making the total credit in the appropriation account, £9,345 4s. Of this £4,000 was utilised for establishing a reserve fund, and £3,000 was distributed as an interim dividend on September 24th. It is now proposed to pay a 2 per cent. dividend (making 5 per cent. for the year), absorbing £2,000, leaving £345 4s. to be carried forward.

In giving judgment on an application by the Queensland Master Process Engravers' Association to vary the Process Engravers' award, the judge said the Queensland industry was peculiarly exposed to competition from the South, especially from Sydney, and confidential particulars were given to him of several pieces of work which went South because the local quotations were too high. If the award were now being made for the first time he should be strongly inclined to give rates not higher than those in Sydney, but as the amended Victorian rates for the more highly skilled employees were higher he would give those. Operators, half-tone etchers, and line etchers would be reduced by 2s. 6d. per week, making their rates the same as those now in force in Victoria, and 1s. 6d. higher than in New South Wales. Other adult males, except printers, who would remain as at present, would also be reduced by 2s. 6d., and females by 1s. 6d. There was a provision in the New South Wales Act for junior journeymen which he would adopt, allowing them to continue to work in the same establishment for one year as operators and half-tone etchers at £4 17s., and line etchers at £4 13s. The variations would take effect as from December 5th, 1921.

AS THE result of negotiations between the Country Press Association and the N.S.W. district of the Australian Journalists' Association, a new award has been agreed to and confirmed. The award abolishes B grade dailies and ranks all dailies as A grade, with increases in salaries ranging from 6s. to 11s. per week. The separate award for bi-weekly and tri-weekly newspapers has been abolished, and their staffs are now under pay conditions which are slightly lower than those of the dailies' award, but which give increases of 2s. 6d. to 10s. per week on the rates now paid.

NEW premises are being erected for F. T. Wimble and Co., printers, in Clarence street, Sydney. In the course of the building operations three plasterers were injured owing to a scaffolding giving way. They fell 8 ft. and were all injured, one seriously and two slightly.

A CURIOUS printer's error appeared on the notice paper in the House of Representatives. The clerk had written, "That this House approves of the execution by the Prime Minister of the agreement. . . ." But the printer said, "That this House approves of the execution of the Prime Minister." The Speaker drew the attention of the House to the matter, and the Prime Minister's laugh was the loudest of all.

IN Brisbane on December 21st an application was made by F. H. Webster and Co. for an order for a compulsory winding up of the Globe Printing Works, Ltd., or alternatively for the winding up of the company under the supervision of the court. According to the petition, the company was formed with a capital of £10,000, and went into voluntary liquidation with liabilities of over £17,000, of which £1,184 was owing to the petitioner and creditor. Mr. W. J. McGown, one of the shareholders in the company, was appointed voluntary liquidator. He wound up the company and realised the assets by selling to the *Rockhampton Morning Bulletin* for £999. The Judge eventually suggested an adjournment so that the parties might confer, and an adjournment was accordingly agreed to.

ONE of the best known book businesses of Melbourne, founded in 1859 by Mr. S. Mullen, and till recently conducted under the name Melville and Mullen Pty., Ltd., has been amalgamated with the similar business of George Robertson and Co. Pty., Ltd., and will in future be conducted under the name of Robertson and Mullens, Ltd.

SYDNEY City Council has been debating the subject of municipal printing. It had previously decided to increase considerably the council's printing plant in order to deal with all printing required. At a recent meeting of the council, however, there was brought forward a motion to the effect that only such additions to the plant should be made as would enable it to deal with routine inter-departmental printing. An amendment by the Labour aldermen that the extended plant be purchased was defeated by 15 votes to nine, and by 11 votes to 10 it was agreed that small additions be made to the plant. One of the aldermen stated it was more economical to order large printing by contract.

SOME time ago four printing trades unions, the letterpress printers, process engravers, bookbinders, and lithographers, combined to form the Amalgamated Printing Trades Union. It is now reported that the move has been to mutual advantage. Financially, matters are sounder, and members realise they are better off. Still, like others, the new union has a fair number out of work.

THE Sydney firm of N. Le Roy-Tracy, Ltd., supplied during the last twelve months loose-leaf and other systems to the value of over £25,000. The firm states that 75 per cent. of the metal parts in use are made in Australia, and it is hoped that as the demand increases the whole of the work in this connection will be performed in the Sydney factory. The firm is completing the manufacture of a thong binder (entirely the product of Australian artisans), for which it is claimed that it will compete with the best type of apparatus extant. Previously these thong binders were imported in parts, and merely assembled in the Commonwealth.

IN the new regulations prescribed by the Postmaster-General it is provided that a circular must not have the nature of actual or personal correspondence. It must not be so worded as to convey the impression that it is an individual communication intended for the address only, but it may contain a prefix such as "Dear Sir," or "Dear Madam," and may commence with such words as "I beg to inform you," or "we have pleasure in informing you," and may conclude with words such as "Yours faithfully," etc. The word "circular" must appear at the top of the first page. In the general conditions respecting books, it is set out that a publication, though in book form, if published for advertising purposes, shall not be eligible for transmission at book rates of postage. Printed papers rate of postage only shall apply. In order to be in book form a publication must consist of not less than 80 printed or printed and illustrated pages fastened together by stitching or stapling and bound in covers of paper, cardboard, cloth or leather. Books printed in Australia, and conforming to certain elaborate conditions, go at half the rate applying to other books.

THE recent convention in New York of the International Trade Composition Association has drawn attention to the fact that trade composition has become a large and important department of the printing industry. Service is not only given to printers in the same town, but to clients many miles distant.

London Master Printers Association.

Annual Dinner at the Connaught Rooms Proves a Great Success.

The annual dinner of the London Master Printers' Association, which was held last Thursday, March 29th, at the Connaught Rooms, London, proved a great social and craft success. Lieut.-Col. J. R. Truscott, the recently elected president of the Association, presided over a gathering of over 300 members, friends and ladies.

Elaborate preparations had been made for the comfort and entertainment of those attending. In the matter of the programme, the president's firm made a notable achievement. Encased in parchment paper, and measuring 7 in. by 10 in., the booklet set forth not only the menu, toast list and concert items, but several pages were devoted to a Miltonian bibliography, together with a portrait of the great poet. The last three pages contained lists of officers of the Association, past chairmen and presidents, and officials of the London District Associations. Each page was decorated with an effective black and red border, carrying out the artistic idea which the ornate cover established.

With regard to the evening's entertainment, this was of a very full and delightful order. The list of toasts was not too lengthy, while the concert was excellent in every detail. Mr. Chas. J. Winter was the musical director, with Miss Bessie Hawes at the piano. The efforts of the following artistes were highly appreciated: Miss Dorothy Greene (soprano), Miss Gladys Peel (contralto), Miss Naomi Rosalie (violin), Mr. Edward Halland (bass) and Mr. Archie Naish (humorist).

Lieut.-Col. Truscott presided in an altogether admirable manner, and supporting him at the top table were Mrs. J. R. Truscott, Viscount Burnham (president of the Newspaper Proprietors' Association), Viscount Hambleden, Lord Marshall, P.C., the Hon. Gwendoline Marshall, Sir G. Wyatt Truscott, Bart., Sir Wm. and Lady Waterlow, Sir Cecil and Lady Harrison, Mr. James MacLehose, M.A., LL.D. (president of the Federation of Master Printers), Mr. F. M. Carson (president of the National Association of Wholesale Stationers and Paper Merchants), Mr. Geoffrey Williams (president of the Publishers' Association), Mr. Valentine Knapp (president of the Newspaper Society), Mr. and Mrs. E. C. Austen-Leigh, Mr. R. A. Austen-Leigh, Mr. and Mrs. W. A. Clowes, Mr. and Mrs. Alfred F. Blades, Mr. and Mrs. J. H. Williams, Mr. and Mrs. Edgar L. Waterlow, Mrs. Harold Gabb and Mr. and Mrs. J. J. Keliher.

Literature and the Printing Craft.

Following the loyal toasts, Lord Burnham proposed that of "Literature and the Printing Craft," and discoursed with his usual eloquence on the trend of public taste in literature during recent years. He remarked that by far

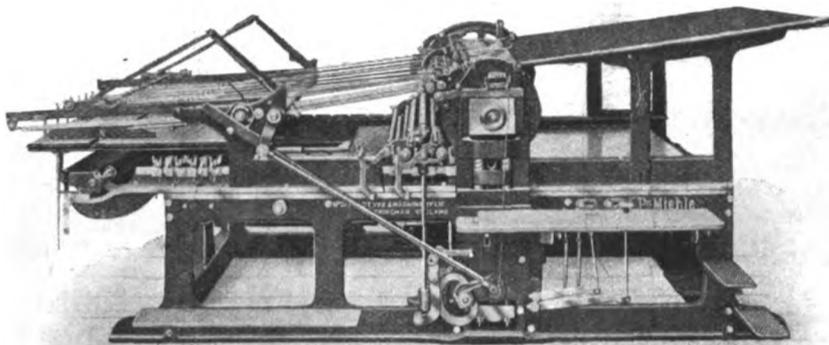

the best seller among the books of the past year had been the volume of Mrs. Asquith's memoirs, which, of course, fitted exactly the standard of public requirements and public taste, though they as printers might have other books of undoubtedly high value. He went on to refer to the report that printers in America were bringing out a new edition of the Bible, with snappy headlines and modern pictures, and he understood they intended writing up the dull parts. (Laughter.) He did not know which of the firms represented there that night would have similar work given to them over here, but he was sure they would not be behind their colleagues in the States in enterprising and artistic achievements. (More laughter.) There was no doubt, of course, that there was no better printing in the world than the best English printing. If they wanted a specimen of good English printing, they could take the programme for that evening with its plentiful reminiscences of the great champion of British freedom. Whether there was better work done on the average last year he was hardly able to say. One knew very well that it was common talk before the War that the Germans, taking the average production, obtained a rather better standard than we did. However, perhaps that only came from that incurable fault of our national character—self-contempt and self-depreciation. At any rate, he believed himself that with all the difficulties and the undoubted want of pains that affected men and women of all classes, the printing trade of this country was accomplishing work of which we had every reason to be proud. (Hear, hear.) To what extent and how men of letters were co-operating with the printing trade he could not tell them. Perhaps they were going more and more the way of Fleet-street. If it was true that all good journalism was not good literature, he was far from saying that all good literature was good journalism. His Lordship went on to refer to the serial publication of literary works in the columns of the daily and weekly press, and to the employment of men of letters for descriptive work in the newspapers. He added that at any rate, the bonds between literature and the press had been in many ways growing closer, and he saw the time coming when all the literature of the country, whether special or ordinary, would pass into currency through the agency of the newspaper press in the first place. He supposed the publishers would be pleased, because they would get all the free advertisement of prolonged publication before they had to issue their books to the public. He doubted whether printers would admit that newspaper printing could be what they called good printing; but the news-

papers had to take their standards from the general trade, and, so far as they could in the rush and hurry of daily publication, come as near it as they might. He was pleased to know that the relations between that part of the trade to which he (Lord Burnham) belonged and those to whom he was speaking were so friendly, as evidenced by the invitation to him to come there and propose what he imagined they meant to be the toast of the evening. (Applause.)

Taste in Literature.

Mr. James MacLehose, in response, said that printing had widened the portals of literature in a way that it was perhaps difficult for them to realise. Printing had transformed the work and the opportunities of the scholar and of every individual in the country. They were perhaps apt to think that because there were great libraries in the old days, and literature and philosophy flourished so luxuriantly, every citizen was a scholar or a poet. But it was not so. The inspiration and relaxation of literature were confined to a narrow circle, and although there were great libraries, access to them was difficult, and to-day the humblest scholar, however abstruse his subjects, could feel that there was an open door to a great library awaiting him. That change was due to the printing industry. (Hear, hear.) While it was true it had enormously multiplied the opportunities of reading, it was a very interesting and difficult question whether it had heightened the standard of literature. They must always remember, when comparing standards, that the better literature had a longer life; the contemporary was apt to look at the very large amount produced in the present day by the printing press, and to think that the general average was not high. They were apt to forget that the older time had very inferior literature also, but in the waste of time only the great outstanding things remained. It was said that when there were a large number of people working at heart that the one helped to encourage and inspire the other, and that the work of Michael Angelo or Raphael would not have been as great as it was if they had not had fellow craftsmen who, perhaps unconsciously, encouraged and inspired them. If that was true, even though they knew that the poet was born and not made, one might have expected that there would have been a larger number of great works in literature in recent years. The world waited long for a Plato, or Dante, or Shakespeare, and in 1922, when they looked back upon the great names of the last century, they were apt to think that their competitors in the last generation had been few. The average attainment and the average in-

YOU can get into line with the best by installing a **MIEHLE** two-revolution press.

IT IS BUILT WITH A MICROMETER,
 but does not need a micrometer to run it.

When you have a Miehle you will be able to print black and three-colour work equal in quality to the best produced by any other printers in the country—and good printing commands good prices.

The best advertisement for the Miehle is the Miehle. It has been the means of assisting many hundreds of printers to establish their businesses in the front rank, and what it has done for them it can do for you. The Miehle has, over and over again, proved that the best is the most profitable.

Shall we send full particulars?

terest in education and literature had probably never been higher or more widely diffused than at the present time. All the same, the heights had rarely been scaled within the last 40 years. Many of those to whose work they looked for the attainment of that achievement lay resting in France and Belgium. They would never know what the loss to the literature of this country had been by the Great War.

Industrial Difficulties.

Proceeding, Mr. MacLehose referred to the industrial situation as affecting the printing trade. The difficulties they had to meet with were, he said, innumerable, and yet he thought they would be wrong if they looked on the situation in any other spirit than one of hope. He knew the difficulties. Those of them who were in their own particular industry were very closely in touch with difficulties just now and yet they ought to remember that in all their negotiations they had seen develop a spirit of fairness and reasonableness which gave grounds of hope for the future. They must face their difficulties and endeavour to find a way out of them, because after all, neither side in a great industrial community could expect to obtain, or at least permanently to secure, advantages that were unreasonable. There was at this moment a danger that conditions which were rightly considered as reasonable during the exceptional conditions of the War were apt to be continued in times of peace. Those problems, whether it be in the printing industry or in the engineering or any other industry in the country, must be faced; and he felt that if they were approached with leadership and with courage, they would come to a proper conclusion in the end. The speaker added that Col. Truscott was fortunate in having succeeded to a chair in which he had had many distinguished predecessors; and might he say, although he was only present as a guest and not as a member of their particular Alliance, that they looked with entire confidence to Col. Truscott for that leadership and that courage of which he had spoken. (Cheers.)

The Postal Rates.

At this stage the president read a telegram from Mr. W. H. Burchell, the secretary of the Central Districts Branch, which he remarked illustrated the work which master printers were doing behind the scenes. The telegram was as follows: "Regret being unable to be present. Dispatching to-night 1,000 letters with publicity literature to members of the House of Commons, the House of Lords and the Cabinet, asking them to support Mr. Kellaway's proposals in the House on the reduction of high postal rates." (Cheers.)

Helping the Printers.

Alderman Sir William Waterlow submitted the toast of "The Visitors." He congratulated Col. Truscott on the position to which he had been unanimously elected by the members of the trade. Master printers had always complained that they had not sufficient representatives in the House of Commons to voice their interests, but he hoped the friends and members of their trade now in the House of Lords would be able to make up for the deficiency of the past. (Hear, hear.) He thought they might rely on their support in regard to cheaper postage rates, Government printing establishments—(laughter)—and such matters. Sir William went on to say that printers were, of course, poor down-trodden people, but the Government were going to provide them with additional work. He believed they were to have an opportunity of licking postage stamps that contained advertisements on the back. While he was not in the habit of licking printing ink, he believed it was possible to do so in a way that was perfectly harmless. At all events, the printing would be under the gum, so that they would have to do a good deal of licking before they got to it. He regarded it as thoughtful of the Government to provide that additional work for the printers, and he had no doubt the firms which were interested would give a suitable acknowledgment shortly. (Laughter.) He should like to say that, being interested in the printing of insurance stamps, he did not see any reason at all why they should not be included in the advertising scheme. (Laughter.) Sir William went on to say that he had had great hopes, from a printing point of view, of the movement for securing a brighter London; and believing that London would look nicer if there were a larger number of posters about, he had accepted the vice-presidency of the new movement. (Laughter.) However, he had not received any orders so far. (Renewed laughter.) If there were any

present who were interested in the brighter London movement and who could do anything to make London brighter in the direction he had indicated, they would be doing a very good turn. He knew there were several other printers in the room who were interested in the same class of business. (Loud laughter.) Coupling the name of Lord Marshall with the toast, Sir William paid a tribute to His Lordship's public work, adding that he believed Lord Marshall had the distinction of being the first Lord Mayor of London to be created a Peer.

Lord Marshall, responding, referred to the close association of the printing trade with the Court of the Aldermen of the City, as illustrated in the family of Waterlow, the family of Truscott, and the present Lord Mayor, who, he said, was not only a printer and publisher, but an author.

Tribute to the Chairman.

Sir Cecil Harrison, in proposing the health of the chairman, thanked Col. Truscott for stepping into the gap created by the resignation of his predecessor. The members of the Alliance thanked him for coming forward, and they had the greatest confidence in the way he would discharge his duties.

The toast was drunk with musical honours and much enthusiasm.

The president, in returning thanks on behalf of himself and Mrs. Truscott, said the success which had attended that function was due not only to the speakers, but to his colleagues on the Dinner Committee, especially Mr. Langley, their vice-president. (Applause.) It was also due to Mr. Albert Bennett for the time and trouble he took in arranging the instructive lesson on Milton. Last, but not least, it was due to the tireless energy of their fine secretary, Mr. Whyte. (Cheers.)

The very pleasant and memorable gathering broke up at 10.30.

Directory of Papermakers.

The 1922 edition of the Directory of Papermakers of the United Kingdom for 1922 reaches its 46th annual publication. Published by Marchant Singer and Co. at 5s. nett (by post 5s. 9d.), it takes the usual form (7 in. by 10½ in.) and the classification which has been found so useful for reference purposes is adhered to. Important alterations, however, have taken place during the past year in respect of some of the paper concerns in this country. Accordingly the Directory has been authentically revised and brought up to date, and careful attention has been given to the list of papermakers, etc., of the United Kingdom under the various headings. Features which add to the value of the work are the numerical index of mills and their presentation in alphabetical order and according to counties. Together with the papermakers' representatives in London and the chief provincial towns and the London wholesale stationers, the Directory from this point of view is complete. But in addition, the sections devoted to the classification of makes; and the list of trade designations (actual watermarks and tradenames) are of great value for reference purposes, especially to printers, stationers, publishers and all who handle paper. In regard to the trade designations numerous additions have been made, a fact which ought to be specially noted. The inclusion of the revised Paper Trade Customs enhances the value of this Directory of 272 pages.

HOLMAN AND WILLIAMS. — An interesting announcement comes to hand from Mr. Percy Holman, of 23, Budge-row, London, E.C. Since his father (Mr. S. H. Holman) died in June last, Mr. Percy Holman has carried on the paper business in his own name. As from April 3rd, however, he will be joined in partnership by Mr. Alfred J. Williams, and as a consequence the title of the firm will be altered to that of Holman and Williams. Mr. Williams has been connected with the business for 11 years, and is widely known in trade circles, having had a varied experience in paper commerce. Mr. Percy Holman joined his father in May, 1919, previous to which date he served with the Army in France. In his early days he spent a considerable time at paper mills in Sweden and Germany. Messrs. Holman and Williams will continue to deal in all classes of paper at 23, Budge-row, specialising in imported wrappers of all descriptions, while the expert attention and service will be maintained.

Municipal Printing at Cardiff.

In an effort to effect economies, the Cardiff Corporation has now turned its attention to the matter of printing. At a meeting of the finance committee last week the City Treasurer submitted a report on the printing and stationery costs for ordinary Corporation purposes. He said that the present contracts, outside supplies to schools, were entered into in November, 1913, for three years. Owing to the war period they deemed it advisable not to re-advertise but to continue the existing contracts. The prices had increased from time to time until to-day the total increase on schedule prices were as follows: Account books, 366 per cent.; printed forms, 466 per cent.; stationery, 162 per cent.; placards, 300 per cent.; binding (general) 300 per cent.; Corporation minutes, 293 per cent.; educational minutes, 308 per cent.; and binding minutes, 500 per cent. He thought the time had now arrived when new schedules should be prepared and tenders again invited. This part of the report was agreed to unanimously.

The City Treasurer also suggested that the whole of the school supplies should be secured in the open market through the Corporation's own stationery department. The school supplies were different from the ordinary Corporation supplies in that very large quantities of copy books, exercise books, drawing books, pencils and pens could be ordered at one time, provided there was enough room in the City Hall to accommodate the stock when purchased. He thought if contracts were placed with wholesale firms there would be an appreciable reduction in cost on the present system. In the course of the discussion on this recommendation it was stated that it would not cut out local firms, as they could still tender for the larger quantities of school requisites. This part of the report was also adopted.

In regard to Corporation printing the City Treasurer advocated the purchase of a Gammeter printing machine, by means of which, he said, a considerable saving might be effected, as a large proportion of the printed forms, etc., now included in the Corporation and educational schedules could be done on this machine quickly and at a little cost. The cost of the machine would be only £350 and it could be worked by two girls, one as a typesetter and the other as a machine-minder, and the wages of the girls should commence at 30s. a week. The Lord Mayor said there was a principle involved in this recommendation, namely, whether they were going to do a lot of their own printing instead of putting it out on contract. Councillor G. Fred Evans said he was against the proposal on the ground that the established firms of printers in the city had to pay heavy rates and the saving to be effected by the Corporation in doing their own printing would be very small. The Corporation's printing should go to the firms in the city, and he was against any extension of the municipal trading departments. Councillor R. J. H. Snook asked whether this meant the Corporation would be editing a paper in the near future, but the Lord Mayor assured him that there was no necessity for another paper in Cardiff just now. Eventually a sub-committee was appointed to inspect the Gammeter machine and report, without approving or disapproving of the principle referred to by the Lord Mayor. The City Treasurer stated that there was such a machine already in operation in Cardiff and that he could obtain girls in the city who were already trained.

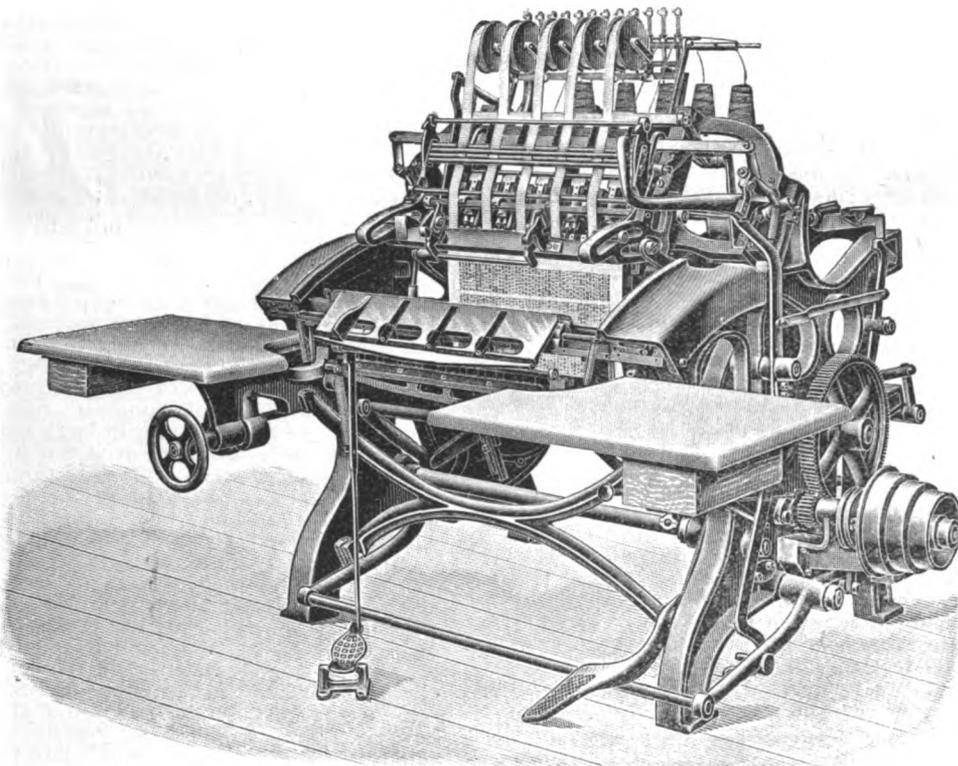

Papermaking in Morocco.

Studies are being made to ascertain the possibility of making paper in Morocco. The leaves and stalks of the asphodel are rich in cellulose, as also the dwarf palm. Trees suitable for pulp could easily be found for mills in the forests of Mamora and Azrou. In Eastern Morocco alfa could be utilised. To commence, it is proposed to build average sized mills, preferably at the ports where cheap coal is available and there are facilities for export. — *Le Papier*.

MESSRS. OLIVE AND PARTINGTON, LTD., have appointed Mr. James E. Morrison to succeed Mr. J. Connolly as manager of their Glasgow offices at 34, Albion Road.

Aug. Brehmer's British Successor

Trade Notes.

PACKERS' STRIKE.—It is expected that the workers affected by the recent strike of publishers' packers will return to work during the present week.

MAKING J.I.C. AWARDS BINDING.—Between 20 and 30 Joint Industrial Councils, and Interim Reconstruction Committees for various important industries, have approached the Ministry of Labour with a view to obtaining legislation to make any wage award or agreement binding upon the whole of the industry concerned. The printing trade J.I.C. discussed this matter at a recent meeting, but no decision, we understand, was arrived at.

AMONG the week's announcements of dissolutions of partnership are those between Herbert Dudley Jackson, James Joseph Melly, and George Francis Murdoch, commercial printers, 65, Westow-street, Upper Norwood; James Casson Jones Stott, Joseph William Moss, and William Fletcher, law stationers, 4, Albert-square, Manchester; Johann Thiel and James Frederic Tangye, printers, 106, Princess-street, Manchester; Ernest Hemingway and Herbert Hoyle, printers, Townstreet, Earlsheaton, Dewsbury; Henry Arthur Yeo, Brian Alexander Bilton, and Frank Ross Yeo, paper merchants, 22, Gray's Inn-road, W.C.

NO DUTY ON GOLD LEAF.—The Federation of Master Printers has been informed that the Board of Trade has received the report of the Committee recently set up, under the Safeguarding of Industries Act (Part II), to investigate the complaint made in regard to the importation of gold leaf from Germany. The Board of Trade state that the report advises that the Committee did not find the conditions laid down in Section 2 (1) and 2 (3) (a) of the Act to be fulfilled. Consequently, in view of the provisions of the Act, the Board is unable to take any further action in respect to the complaint. There will, therefore, be no Order made imposing a duty on imported gold leaf.

MR. GILBERT JONES, aged 34, the secretary of the Darwen branch of the National Union of Printing, Bookbinding and Paper Workers, was at Darwen on Friday, last week, sentenced to six months' imprisonment with hard labour, for embezzling sums amounting to £600 belonging to the Union.

A COVENTRY printer, Andrew Hamblyn, 36, Ribble-road, was fined £10 on Wednesday of last week, for printing ready-money football betting coupons. Defendant admitted printing the forms for a man who had signed a form that the lists were required for credit betting only and pleaded that had he not obtained the signed form he would not have printed them.

At the annual general meeting of the Publishers' Association, held at Stationers' Hall on Thursday afternoon last, the following officers were elected for the ensuing year: President, Mr. Geoffrey S. Williams; vice-president, Mr. Humphrey Milford; treasurer, Mr. C. F. Clay.

EARLY on Wednesday, last week, fire destroyed practically all the machinery and stock at the Selsdon-road, Croydon, works of Messrs. Harper, Woodhead, and Co., manufacturing stationers. The damage is estimated at £25,000.

ROCHDALE PRINTER BOWLERS.—The Rochdale Printing and Kindred Trades' Federation are organising a series of bowling matches for the coming season. A trophy is to be provided, and the teams will be recruited from the different workshops, smaller offices joining together. The local Master Printers' Association are taking an active interest in the social side of the craft.

MR. EMERY WALKER LECTURES.—"Letterpress Printing as an Art" was the subject of an interesting paper, read by Mr. Emery Walker, at the Birmingham Art School. The lecturer, who was a great friend of William Morris, poet, artist, and reformer, showed many lantern slides of exquisite examples of Morris's art in book illustration. In the course of his remarks the lecturer deplored that whilst there was little difference between the nature of paper now used in the publishing of books the design of the type used showed great deterioration from that used during the infancy of printing. Then beauty of design and construction was the result of man's pleasure in his work. Books printed by men who derived pleasure from so doing were real works of art.

A COMPLETE plant for the manufacture of counterfeit £1 Treasury notes has been discovered by the Manchester police in a raid on a house in Bedford-street, Hulme, and two men are consequently in the hands of the Warrington police.

At a Shoreditch inquest on Tuesday on a printer's machine minder named William Clark, who committed suicide by inhaling coal gas, it was stated that a doctor found a tobacco pouch containing several Treasury notes fastened under one of the man's armpits.

THE estimates for the salaries and expenses of the Civil Departments in 1922-23 include the sum of £2,679,937 for stationery and printing, which is a decrease of £1,507,507 on last year's figures.

RESTRICTION OF HOARDINGS.—Lord Newton has introduced into the House of Lords a Bill to extend the powers of local authorities under the Advertisement Regulation Act, 1907, to restrict the exhibition of advertisements in rural places and public pleasure resorts.

AN appeal on behalf of Miss Peacock—daughter of the late T. E. Peacock, who held the post of assistant secretary to the L.S.C. for a period of thirty years—is being made by the staff at St. Bride-street. It is earnestly hoped that considerable help will be forthcoming from the members, and that the result of the effort will show some acknowledgment of the services rendered by the late Mr. T. E. Peacock to the work of the Society.

CASSELL'S STAFF DINNER.—After an interval of eight years the staff dinner of the house of Cassell was resumed last week, when a gathering of several hundred, including directors, editors and members of the staff, met at the Trocadero Restaurant, under the chairmanship of Sir Arthur Spurgeon, J.P. (managing director). Dr. Chalmers Mitchell, in proposing the toast of "The House of Cassell," briefly sketched the development of the house since its foundation by John Cassell, and Sir William E. Berry, Bart., replied. Mr. J. Gomer Berry proposed the toast of "The Chairman," and during the evening a presentation was made to Mr. W. H. Mellor, who had been with the house 50 years.

PRINTING CRAFT LECTURES.—We learn that the Stationers' Company and Printing Industry Technical Board have in hand the arranging of a series of craft lectures to commence next October, on similar lines to those held by the Royal Society of Arts, but dealing only with craft subjects, including bibliography. The lectures will be free to all engaged in the crafts represented by the Worshipful Company of Stationers. The holding of these lectures in Stationers' Hall with all its associations with the inception and development of the Printing Art in England will appeal to those who have deplored the discontinuance next year of the St. Bride trade lectures, due to the School's transference to Stamford-street next session.

THE late Mr. John William Reid, of W. H. Lockett and Co., now Dawson, Payne and Lockett, printers' engineers, left £1,465.

MR. ALGERNON GRAVES, F.S.A., of London, print publisher and picture dealer, well known in the art world as the compiler of invaluable dictionaries of exhibitors and summaries of art sales, who died February 5th, aged 77, left £2,355.

CAXTON RELIC SOLD.—The copy of a first edition of Caxton's "Chronicles of England"—"emprynted by me William Caxton in thabbey of Westmynstre, June 10, 1480"—which was bought by a Cork man among an assortment of second-hand books, was sold by Messrs. Hodgson and Co., in London on Thursday, for £130.

At Sotheby's on Tuesday a copy of John Gower's "Confession of the Lover," printed by Caxton at Westminster, was sold for £300 to Mr. Quaritch.

THE world-famous library of the late Baroness Burdett-Coutts will be sold at Sotheby's on 15th, 16th and 17th May. The outstanding feature of the library is the renowned "Daniel" copy of the first folio Shakespeare, which came into the possession of Baroness Burdett-Coutts in 1864 at a cost of 682 guineas. Thirty years later a first folio, known as the Brayton Ives example, was purchased in New York for £840.

MESSRS. COLE AND Co. are installing a monotype plant at their works in Vauxhall-bridge-road, and a member of the Chapel is undergoing a course of instruction at the Monotype School with a view to taking up the work. The firm are paying him full wages while so learning.

MR. WILLIAM TOWNEND, who has died at Leeds, had been employed in the composing-room of the *Yorkshire Post* for 44 years. He retired, through ill-health, about two years ago.

ELECTION POSTERS.—At the Court of Criminal Appeal on Tuesday were heard the cases of *Rex v. Daily Mirror Newspapers, Ltd.*, and *Rex v. Charles William Glover*. These were appeals on law against convictions for corrupt practices in connection with the posting of posters in the East Hertfordshire by-election. The *Daily Mirror Newspapers, Ltd.*, had been fined £100, and Mr. Glover, one of their employees, £20. The result was that as to the company the conviction was quashed, but as to Glover the appeal was dismissed.

OWING to dislocation caused by the packers' strike, the *World's Work* for April will not be published until April 10th.

IN asking the public to apply direct to the publishers for copies of the *Nineteenth Century* review, the editor complains that the March issue of that journal has been boycotted, owing to the wage dispute in the London publishing trade, the trade union having given orders that the journal shall not be sold from railway bookstalls or by the leading distributors.

THE *Stockport Advertiser* on Friday published a centenary number, which included a facsimile copy of the first issue on March 29th 1822.

DUBLIN NEWSPAPER RAIDED.—In the early hours of Thursday last a large armed party, said to represent the I.R.A., entered the *Freeman's Journal* office in Dublin and held up the entire staff, who were collected and ordered to a room on the ground floor of the building. The raiders proceeded to smash the machinery with sledge hammers, and then, having sprinkled the different floors and stairways with petrol, set fire to the place. The staff was then allowed to depart, the building being in flames. The fire brigade was later called to the scene, and thanks to their efforts the fire was quickly suppressed, and the building is practically intact. But 14 or 15 linotype machines, three rotary printing machines, and other items of the plant were smashed up. The *Freeman's Journal* announces that it will continue publication, and "will continue to say what it chooses."

"NEWSPAPER reports," said Mr. Justice McCardie, during the hearing of a case in the King's Bench Division last Thursday, "are extraordinarily accurate nowadays."

Dispersal of Plant.

The container-making and engineering plant of the British Hard Paper Ware Co. (in voluntary liquidation) was sold by auction last Thursday. The company's factory was at Stockholm-road, Bermondsey, and the sale took place in a hall near the premises, and Mr. S. J. Baker acted as auctioneer, the firm of Robert H. Ruddock having charge of the disposal of the plant. Among the lots sold were the following: Three 23-in. adjustable twin roller tube rolling machines, for hand power, £4; five similar machines, £5 10s.; a 26-in. glueing machine, £2; a "Waller" open back seaming machine, £10; a 60-in. barrel winding machine, fitted for power, £12 10s.; a 42-in. brought the same price; a 54-in. core winding machine, £12; a 38-in. lever mill-board cutter, £8 5s.; a "Langston" automatic spiral winding equipment, £70; a box-maker's reel-feed automatic wire-stitching machine, by Brehmer, £25; a steam-heated waxing tank, £30; a metal stamping press, £42 10s.; a 5-cwt. lever platform weighing machine, £12; a "Waller" open back seaming machine, £13; another metal stamping machine, £50; a fully automatic double-ended seaming machine, £87 10s.; a twin mandril rotary tube cutting machine, £6; and a "Perfection" automatic wire-stitching machine, by Morrison, £20.

The Future of Colour Work.

Mr. William Gamble's Views.

Mr. William Gamble, F.R.P.S., F.O.S., editor of *Penrose's Annual*, in a lecture delivered on the 24th ult., under the auspices of the Derby Master Printers' Association, at the Derby Technical College, laid stress on the importance of good colour rendering in the negatives. Whether for blocks, offset, photogravure or collotype, he said, the aim in colour production must be to "get it in the negative." So long as colour rendering had to depend on the fine etcher and retoucher there must be great divergence in the quality of the results obtained.

Improving the Apparatus.

Whatever improvement might be made in colour work in the future must depend on improved colour photography. We had by no means reached finality in regard to the colour filters. In particular the making of a good green filter was a difficulty which could be solved with such dyes as were at present known. If we could sensitise our plates more effectively it might be possible to dispense with filters altogether. We had at present non-filter plates for orthochromatic photography, but these are not useful for three-colour work. They showed, however, there were possibilities of making plates which required no filter. Years ago we had a non-filter collodion emulsion which was quite successful. Collodion emulsion lent itself better to colour sensitising than gelatine plates, but this material had gone out of use in England, though still being worked extensively and successfully in Germany.

Another direction in which we might perhaps look for improvement was in the illumination of the original. Arc lamps yielded a too violet light which falsified the colour rendering. Daylight was the best illuminant for colour work, but it was too uncertain in its quality and intensity in this country. Attempts had been made from time to time to illuminate the original with coloured light. Another scheme was to project coloured light on to the image from a lantern, and it was possible to localise the coloured illumination by projecting a positive of the picture at the same time so that it fitted in register and shaded certain parts of the picture. There was also a scheme of illuminating the original by the light of the spectrum itself.

Error in Colour Theory.

It might be that the reason why so much fine etching and retouching are required and why there were so many difficulties in colour printing was that there was some missing link in the theory. There were a number of thoughtful people who believed that the three-colour idea had had its day, and there were some who went so far as to say that it was fundamentally unsound. These opinions seemed to converge on one point, viz., that to obtain the best results four printings were required.

It was pointed out that the inability of the process to reproduce pure greens and blues, and the fact that it did not yield brilliant crimsons, violets, pure black and homogeneous greys, showed that there was something wrong with the method, though its faults were usually ascribed to the inks. It had been contended that by introducing a green printing with suitable modification of the other colours a far better result would be obtained.

This suggestion was first made by Mr. C. G. Zander, the well-known expert on printing inks. This gentleman devised in 1905 what he called "Complementary Colour Process," using four filters instead of three. This, of course, necessitated four printings, the additional colour being green, and the red, yellow and blue being modified.

Mr. Zander did not succeed in convincing the trade and his method had almost been forgotten. Last year, however, there was a pronouncement by Dr. Edridge Green at a meeting of the Oil and Colour Chemists Association which recalled Mr. Zander's early work. Dr. Green, whilst working with the spectroscope, found that lemon yellow was not produced by a mixture of red and green light, as was generally believed, but by a mixture of green and yellow light. The general misconception was found to be due to two causes; first, that all the green and red pigments commonly used for experiments in colour reflected or transmitted a considerable quantity of yellow—thus when light from them was mixed the real red and green produced the effect of white as usually found, but

the yellow common to the two became the only apparent hue; secondly, that a considerable amount of red light might be added to lemon light without perceptibly altering its hue. Thus a mixture of green, yellow and red looked very much the same as one of green and yellow only. The reason for this was that clear lemon yellow was the most luminous of all hues to the eye, which had great difficulty in detecting even considerable impurity in an admixture with white light. The addition of red to lemon yellow composed of green and yellow merely gave the impression of yellow and white, since green and red gave the eye this sensation. Mr. A. E. Bawtree had arrived at the same conclusion independently by working with his Colourmeter.

The three-colour inks were generally stated to produce black by superimposing them, but it was only a rough approximation. Many workers had groped after superior results by adding a fourth printing in black, taken through a lemon yellow, or an orange, screen. This was a fundamentally sound idea and marked an improvement, but there was still something wanting in the process and probably that was the reason why no marked progress in the method had been made during the last ten years or more.

Need for Four Colours Established.

Now that the error of supposing that red and green made yellow had been proved, and yellow had been given its proper place as a fundamental point in the colour circle, the necessity for a four-colour process had become established.

In America solid blacks in colour work were only printed with the black and blue, the blockmaker omitting the yellow and red in the blocks. Another variation from the regular method was to print the colours in the order, black, blue, red and yellow, the contention being that a slight error in registering in the red and yellow did not show so much as in the first two colours. Further, it was easier to determine the correct strength of the yellow when it was the last printing.

These things showed that there was quite a lot to be done yet in improving colour rendering whether for block printing or for lithography, collotype or photogravure.

Bankruptcy.

RE HORACE STANLEY PAGE-HENDERSON, stationers' agent, 22, Pandora-road, West Hampstead, N.W.—The debtor attended at the London Bankruptcy Court, on Tuesday, for his public examination before Mr. Registrar Mellor on a statement of affairs showing liabilities £1,582 14s. 11d. and assets £40. He stated that at the beginning of 1899 he began trading in partnership with another person under the style of the Alert Printing Co. He possessed no capital, and they traded at 14, Henrietta-street, Strand. His partner, however, absconded, leaving partnership liabilities amounting to £800 which he (the debtor) afterwards paid. The debtor subsequently acted as agent for a firm of printers and stationers. In March, 1916, he was granted a commission in the R.D.C., in which he served until September, 1919. He had since again acted as agent for a firm of printers and stationers on commission which had averaged some £600 per annum. The debtor attributed his failure and insolvency to living beyond his means and to interest on borrowed money. The examination was concluded.

PROCESS ENGRAVERS.—The annual meetings of the Federation of Master Process Engravers were held at Birmingham on March 29th and 30th, when there were important discussions relative to the maintenance and improvement in these difficult times of the mutually strengthening co-operation of the capital and labour of the craft. Attention was given also to the continued furtherance of good relations with master printers, who, it was thought, often did not quite appreciate the engravers' difficulties and burdens. Various delegates spoke as to the efforts being made to maintain the high quality of British engraving. At the annual dinner, Mr. A. Dargavel presided, and the toast of "The Federation" was proposed by Mr. Frank Colebrook. Mr. Dargavel, in replying, remarked: "We need not go to a seaside place for our annual meeting while we have Colebrook to invigorate us." Mr. A. Dent, the recently-appointed secretary of the Association, told of some of his observations during an American tour. Mr. Siviter Smith, of the Birmingham Association, assured the Federation of Birmingham's pleasure at the meetings being held in their city.

PENSIONS

Corporation Annual Meeting.

Sir William Waterlow Presides.

Sir William Waterlow presided, in the absence of Sir G. Rowland Blades, M.P., over the annual meeting of subscribers to the Printers' Pension, Almshouse and Orphan Asylum Corporation, held at St. Bride Institute on Saturday afternoon.

Sir William, in moving the adoption of the report, said that this was the most successful year in the history of the Corporation, with the exception only of 1920, when the Prince of Wales presided over the annual festival. His congratulations, he said, were all the more sincere and hearty because this success was achieved notwithstanding a year of extremely bad trade generally.

The report states that there are now 780 aged printers and widows of printers receiving pensions at an annual cost of about £18,750. Over 1,200 orphan children of printers killed in the war are receiving grants amounting to £12,000 a year, and there are now over 2,000 recipients of benefits at a total cost of £32,000 per annum.

The Right Hon. C. W. Bowerman seconded, drawing attention to the inauguration of the special fund for War orphans, and remarking that to his certain knowledge no other trade in the United Kingdom had undertaken such work. Referring to the valuable assistance given by Sir Wm. Waterlow and his firm, Mr. Bowerman reminded the meeting that Sir William had presided at last year's annual festival, which resulted in a subscription list of £28,000.

Mr. T. Timberlake, chairman of the London Society of Compositors, congratulated the Corporation upon the excellent report presented.

The report was adopted unanimously and with acclamation, and the meeting ended with cordial votes of thanks to the Governors of the St. Bride Foundation Institute for the use of the hall, to the Council of the Printers' Pension Corporation and to Sir William Waterlow.

This Year's Pensions List.

The following are the elected candidates: (£35), Thomas A. Mathews; (£30), Rose L. Beatty, William H. Alderman, John G. A. Codling, Harry Strahan, Albert Wettlauffer, James Dellagana, Joseph Perrett, Thomas Cullingham, Ernest Tomlinson, William Malin, John E. Jones; (£26), John W. Apps, Harry Blauks, William Groom; (£25), Richard Colling, Maria E. Cass, Leah A. Adams, Frederick Burkmar, William Watson, Frederick Turner, John J. Smith; (£20), Thomas Little, Henry Nicholls, Charles S. Beves, Charles Sheppard, William Norris, William J. F. Suggate, Frederick J. Finn, Arthur Hulbert, George F. Jackson, Harry Shepherd, Ernest Ward, Charles D. Shorter, Annie M. E. Osborne, Ann Keir, Mary Ashton, Louisa A. Scott, Mary E. Albrecht, Annie W. Wareham, Sabina Smith, Helena Moreton, William Hayward, Henry Gibbons, George Lovick, Frederick Mitchell, Willard R. Sawyer, George Baker, William Seargent, John T. Wallwork, Thomas C. Pignon, Frederick J. Walker, Sarah A. Sewell, Charles Carrington, Robert Hilton, Matilda Treble, Elizabeth Bull, Rose M. Preston, Mary Andrews, Edward J. Culver, Emily M. Cannadine, Thomas Johnson, Harry J. Dall, Jane Chambers, Alice A. Dyer, William Dean, Alfred Miles, John W. Olinski, James W. Underwood, Alfred Romney, William Smith, Thomas F. Collins, Emma S. Philpott, William L. Crickett, John Williams, Sarah H. Healy, Isabella Baker, Richard A. Williamson, William Munns, Thomas A. Smith, Henry Gilligan, Mary Moyce, Leonard Haddon, Agnes M. Rignall, Alfred D. Marshall, Elizabeth Cunningham, and Harriett Rhodes.

Unsuccessful candidates, each receiving £5, are: Alexander Munro, Frank Long, Louisa Delaney, Walter W. Wilkinson, Arthur Lazenby, Henry C. Norman, Sophia Mann, Henry W. Frampton, Thomas D. Hewer, George J. Bishop, Robert L. Lawson, Caroline A. Tout and Maria M. Banks.

ITALIAN pressmen and master printers are uniting to tackle the situation created by the Fascisti. Several newspaper offices have been stormed and their machinery destroyed during the past year and many journalists were assaulted and injured.

Fifty Years with Edinburgh Printing FIRM.

Remarkable Record of Five Employees.

In these unsettled times, when disputes in the realm of industry recur with monotonous and tragic regularity, it is refreshing to turn for a moment to another, and more pleasing, aspect of the relationship between employer and employed, as exemplified by an interesting function which took place in Edinburgh on the 24th ult. Instances in the printing trade of long, unbroken, and devoted service are fortunately by no means uncommon, but it was surely a remarkable, if not unique, record that was celebrated on the date mentioned by Messrs. Morrison and Gibb, Ltd., the well known Edinburgh firm of printers. No fewer than five employees of this firm have completed fifty years' work, and the occasion was taken by the directors to recognise this splendid achievement in fitting manner.

At a social gathering of over five hundred workers and their friends the five honoured veterans—Mr. John C. Wilson (who has risen from the position of office boy to that of works manager), Mr. James Miller (a member of the country house staff, Mr. John McIntosh (reader), Mr. James Milne (case room), and Mr. Daniel Hall (case room)—were each presented with a wallet, bearing suitable inscription and containing Treasury notes, as a tangible recognition of the directors' appreciation of their long and valuable connection with the firm. The gifts were handed over by Sir John Cowan (chairman of the directors), who cordially congratulated the recipients, and remarked upon the amicable relations which had always existed between the heads of the firm and the large body of workers. Referring to the future of the printing trade, Sir John Cowan emphasised the point that co-operation and good will between employer and employed were more than ever necessary for the successful conduct of the industry and for the welfare of all concerned in it.

Sir John Clark, of T. and T. Clark, Ltd., Mr. C. D. O. Morrison and Mr. D. S. Curr, managing directors of Morrison and Gibb, Ltd., also spoke, the notable fact that no fewer than 130 employees had been in the service of the firm for 25 years or more being mentioned by Mr. Morrison.

Speeches interestingly reminiscent were delivered by the guests of the evening in acknowledging the generosity of the firm and the esteem and good wishes of their colleagues, Mr. J. C. Wilson recalling that when he joined the firm in 1872 it was known as Messrs. Murray and Gibb; from 1879 till 1896 as Messrs. Morrison and Gibb, and from the latter year to the present as Messrs. Morrison and Gibb, Ltd.

Of Mr. Wilson and the other gentlemen honoured it might be said, in the words of Tennyson, "He wrought all kind of service with a noble ease, that graced the lowliest act in doing it."

Africa, United States, South America, Canada, etc.

THURSDAY, APRIL 6, 1922.

The Wages Negotiations.

THE expected special meeting of the Joint
Industrial Council for the Printing and Allied
Trades was held on Tuesday afternoon at the
Ministry of Labour, Mr. James MacLehose,
M.A., LL.D., being in the chair. The whole
subject of wages in the printing trade was
fully discussed, and eventually it was decided
to adjourn consideration of the matter until
the next meeting of the J.I.C. In the mean-
time conferences with the various unions are
to be resumed.

Postage Reductions in View.

IT appears that the issue is still in the bal-
ance as to whether the Postmaster-General is
to carry out the promised reductions of postal
charges or the Chancellor of the Exchequer
be allowed to run away with the profits
reaped from high postal rates. We note that
one London daily newspaper remarks that
"the Postmaster-General has taken so strong
a line in this matter in public, and has led us
to expect so much, that he could scarcely re-
frain from resignation if he were refused the
money he wants by the Cabinet." The
matter is certainly a serious one, and it is
evident that the time has not yet come to
cease drawing public attention to the strong
case, already iterated and reiterated, of those
who demand an early revision of the rates.
All possible support should be given to Mr.
Kellaway. Mr. W. H. Burchell, we are glad
to note, continues his propaganda on the
subject. Writing to us last week, he remarks:
"Recommendations will soon come before
the House of Commons for reductions in the
postal rates, which are paralysing trade and
commerce and creating great unemployment."
He continues: "On the basis of existing rates
the Post Office revenue, as indicated in the
estimates now prepared for the next financial
year, shows a big surplus over estimated ex-
penditure. Indeed, this surplus is not far off
£10,000,000. By employing it as the public
expect, and as the Postmaster-General has
promised, in the reduction of charges it would
be possible immediately to: Reduce the In-
land Letter Rate from 2d. to 1½d.; reduce the
Post Card Rate from 1½d. to 1d.; reduce the
Printed Paper Rate from 1d. to ¾d.; reduce
the Imperial Letter Rate from 2d. to 1½d.;
and restore Sunday collections—besides reduc-

ing the telephone charges by an average of 10
per cent. all round." Such reductions would
certainly do a great deal to set the "life-
blood of commerce" circulating more vigor-
ously again, and the printing trade would be
one of the first to feel the benefit of the re-
moval of the present unfair and pernicious
tax on industry.

Unemployment Insurance.

AN interesting and important pamphlet is
being issued by the National Federation of
Employers' Approved Societies on the ques-
tion of unemployment insurance. It seems
clear that the State handling of the subject
has not been a success. Opinion is fairly
general that it is too expensive and cumber-
some, apart from lacking in that personal
touch which can achieve so much. Accord-
ingly there is strong support for the sugges-
tion that unemployment insurance should be
undertaken by groups of industries themselves
or by individual firms. The whole subject is
well ventilated in the booklet referred to. A
broad view of the subject is taken by Mr.
Henry Lesser, president of the National
Federation of Employers' Approved Societies,
who submits for consideration and discussion
a scheme for the administration of unemploy-
ment insurance in individual firms, with the ul-
timate object of its expansion and application
to each organised industry as a separate, self-
supporting entity. The argument is that
such a scheme would result in considerable
saving to the public funds, in the more
economical administration of each industry
itself, in a better regard for the common
interests of employers and employed, and in
the reduction of unemployment generally.
Contributions to the discussion in the publi-
cation are made by Lord Askwith and others
who have studied the question. Experience
of the past twelve months goes to show that
the haunting evil of unemployment has not
been approached in the right way, and it is
clearly in the interests of the country that
some practical method should be adopted for
dealing with it in a more effective way than
has yet been found. The publication of the
pamphlet before us should help in reaching
this desirable end.

The Market for Strawboards.

STRAWBOARDS are almost scarce; a new
turn of events. It is most difficult to secure
exact requirements from stock, and there is
no talk of price concession to-day. Deliveries
from Holland are uncertain, unless extra
charges are paid for transport by alternative
route. There is so little margin of profit on
strawboards that an extra 10s. per ton on
carriage would pave the way for loss unless
the consumer bears the cost. Anyway, it is
much more healthy for the trade to have the
consumer thinking how much he can pay,
rather than have the agent left to think how
little he can get. It is about time straw-
boards began to have a normal market.

The Australian Preference.

THE Australian preference to British news-
print apparently rests on firm ground. The
publishers in Australia, if their views are
at all represented by the Country Press
Association, have not only expressed ap-
proval of the preference given to news-print
made to this country, but go so far as to
voice the hope that nothing will be done to
render the preference nugatory by extending
it to Canada without inquiry as to the
methods adopted by "the American and
Canadian combine" in supplying news-print
to Australia during and since the war. This
resolution implies a fine compliment to those
who have hitherto represented English houses
in the Commonwealth, and the attitude of
the newspaper proprietors, who are never too
ready to look favourably upon their suppliers,
is a reward for faithful service in the past.

Personal.

A RESOLUTION to confer the freedom of Ramsgate on Lord Northcliffe is to be made at a meeting of the Town Council to-day (Thursday), in recognition of his services to the borough and of his work during and since the war.

SIR JOHN FINLAY, chairman of directors of the *Scotsman* newspaper, presided at a luncheon held at the Savoy Hotel last Thursday, in connection with the opening of the handsome new London offices which this well-known Edinburgh journal has just built at 63, Fleet-street.

WHEN the Society of Women Journalists held their largely-attended At-Home at the Lyceum Club last Thursday afternoon, the president, Miss E. A. Stout, received the guests, among whom were Viscountess Burnham, Lady Norah Bentinck, Lady Brittain, Mrs. Massey-Lyon, and Miss Cora Hind, the well-known representative of the *Manitoba Free Press*.

MR. J. A. SPENDER was entertained to dinner at the National Liberal Club on Thursday night in recognition of his great services to Liberalism, and of his 26 years' editorship of the *Westminster Gazette*.

MR. A. G. GARDINER, late editor of the *Daily News*, was one of the speakers, and remarked that largely as a result of causes over which no one had any control, journalism had become a vast commercial machine, from which great independent publishers had very largely disappeared. The high priest of the machine was Lord Northcliffe, and if they asked themselves whether Northcliffism was a sufficient substitute for Spenderism they would understand something of the nature of the change. This was a matter of the highest interest to society.

MR. J. D. WISE was re-elected president of the South-West London Master Printers' Association at the annual meeting on Tuesday evening, Mr. E. G. Cole vice-president, and Mr. F. A. Cole hon. secretary. A strong resolution on the wages question was passed for submission to headquarters.

MR. E. H. MCLEOD delivered a much-appreciated lecture on "Printing Inks" to the Printers' Managers and Overseers (Parent) Association on Tuesday evening. Report next week.

MR. G. A. EDEN, late general secretary for 14 years of the Printing, Bookbinding and Kindred Trades Overseers' Association, is to be made the recipient of a presentation at the annual dinner of the Association on Saturday at the Holborn Restaurant.

AT the monthly meeting on Tuesday at St. Bride Institute a short paper on the history of the Association, prepared by Mr. Eden, was read by Mr. A. G. Aves, the financial secretary, in the absence of the late secretary, who was unavoidably absent through indisposition.

AT the same meeting congratulations were tendered from the chair to Mr. James Walker on his being elected as a councillor at the recent Wood Green District Council election. Mr. Walker was a former president of the Association.

AT the election at Cranham for the Romford Rural District Council on Monday, Mr. Arthur O'Connor polled 69 votes as against 24 polled by Lieut.-Col. R. Prioleau, and therefore the general secretary of the Printers' Medical Aid and Sanatoria Association was declared elected.

MR. REGINALD KNIGHT, well known in Leeds printing circles by his association with Messrs. Knight and Foster, printers, Leeds, was on Saturday elected a Rural District Councillor for the Templenewsam Ward of Hunslet, Leeds.

MR. J. W. HAMMOND, proprietor of the *Pembroke County Guardian*, was last week elected to the Haverfordwest Town Council with a majority of 227 over his opponent.

MR. JAMES PROUDFOOT, who is retiring from the position of chief reporter of the *Glasgow Herald* after 40 years' service, was made the recipient of a presentation at the annual staff dinner of the publications of Messrs. George Outram and held on Saturday evening at Glasgow.

THE presentation, which took the form of a series of etchings, a clock, and a diamond ring for Mrs. Proudfoot, was made by Sir Robert Bruce, who recalled some of the early experiences of the guest of the evening as a special correspondent in notable events.

MISS MABEL RUSSELL, a young member of the staff of Messrs. Archibald and Co., 11, Pilgrim street, has been selected as a member of the British team of women athletes to compete in the International Sports to be held at Monte Carlo at Easter. The first of these Women's Olympic Meetings was held last year, and Miss Russell had the honour of being a member of the winning team on that unique occasion.

Scottish Master Printers Confer.

Annual Meeting and Lunch at Glasgow.

The annual meeting and luncheon of the Scottish Alliance of Employers in the Printing and Kindred Trades, held on Tuesday of last week in Glasgow, drew a large attendance of members from all parts of Scotland.

Dr. MacLehose Honoured.

An event of special interest occurred at the luncheon in the Central Station Hotel, when the Alliance presented Mr. James MacLehose, M.A., LL.D., president of the Federation of Master Printers, with his portrait in oils (painted by Sir James Guthrie), in recognition of the services he has rendered to the Scottish Alliance and to the printing industry throughout the Kingdom.

Mr. James Paterson, president, occupied the chair and made the presentation. Referring to Dr. MacLehose's term of office as president of the Scottish Alliance, the chairman said he was one of the most indefatigable workers on behalf of their industry that the industry had ever produced. It was well to remember that Dr. MacLehose was a Glasgow man and a Glasgow printer. London might claim him for a little, and the Scottish Alliance might boast that he was once their president, but he remained a citizen of Glasgow. The printing and allied trades in Glasgow had produced many eminent men. In a comparatively short term of years five members of the trade occupied the position of Lord Provost, a record of which he thought no other trade could boast. After referring to various movements in the printing industry in which Dr. MacLehose had taken a leading part, the chairman on behalf of the members asked him to accept his portrait, which, he said, had been so ably executed by Sir James Guthrie.

Dr. MacLehose, in acknowledging the gift, said he desired to express his gratitude not only for the portrait but also for the kind expression of appreciation which had been voiced by the chairman. He was proud to have been president of the Scottish Alliance, but he did not know that he had ever been prouder of that post than he had been in recent months, when his experiences in London had shown what strength the Scottish Alliance possessed. He had always felt that the stronger the organisations were on both sides—employers and employed—the better the relations between the two bodies were likely to be. In no part of the country were the relations between employers and employed in the printing industry better than they were in Scotland, and that he attributed largely to the strength of the Scottish Alliance. His experience was that in the past years, during which Mr. Paterson had occupied the chair, the Alliance had gained in influence, mainly on account of his unfailing good humour, his strength of vision, and the manner in which he had faced the difficulties that confronted him. Dr. MacLehose also expressed his appreciation of the honour that had been done him in making him president of the Federation of Master Printers of Great Britain, but at the same time he assured them he was looking forward with eagerness to the time—ten weeks hence—when this work would end. They had had many difficulties to face, and these could only be overcome by extraordinary self sacrifice and generosity on the part of the members

of the Alliance, who were willing to waive their own particular interests for the common good. It was in that spirit that they had made the Scottish Alliance, and it was that spirit that would give it strength in the future. To himself and his family the portrait with which he had just been presented would always be a source of gratification and a reminder of their goodwill, which he valued more highly than he could express. (Applause.)

Dr. Blaikie, Edinburgh, who proposed a vote of thanks to Sir James Guthrie, referred to the services which Dr. MacLehose had rendered to the industry and the esteem in which he is held.

Annual Meeting Elects Officers.

At the annual general meeting in the afternoon Mr. Robert Wilson, of Messrs. H. and J. Pillans and Wilson, Edinburgh, was appointed president; Mr. Jas. Monte Wilson, of Messrs. Wilson, Guthrie and Co., Glasgow, vice-president; and Mr. George D. Stewart, of Messrs. George Stewart and Co., Ltd., Edinburgh, was re-elected hon. treasurer.

Mr. James Paterson, the retiring president, was presented on behalf of the members with a piece of silver plate suitably inscribed, a "smoker's companion," and a rope of pearls with diamond pendant in a silver casket for Mrs. Paterson. Mr. Wilson, in making the presentation, referred to the esteem which Mr. Paterson, as president, had won both from employers and workers throughout Scotland. His endeavour at all times to get a square deal with the workers had been an invaluable asset to the Scottish Alliance. He dealt with the strenuous time through which the industry had passed during the three years of Mr. Paterson's occupancy of the chair. Mr. Paterson, in replying, thanked the members for their gifts, but particularly for the loyal support which he had at all times received from both the Board and members of the Alliance. He assured the Alliance that he would, at all times, be only too pleased to place his services at their disposal, and congratulated the Alliance on their choice of a successor in the person of Mr. Robert Wilson.

Master Printers at Chester.

Rally from Lancashire, Cheshire and Wales.

An important meeting was held at Chester on Monday, when there was a big rally of master printers of the Lancashire and Cheshire Alliance and the North Wales Alliance to meet the president of the Federation of Master Printers.

The executives of both Alliances were entertained to lunch at the Grosvenor Hotel, the chair being taken by Mr. A. E. Harrison the popular president of the North Wales Alliance.

At the meeting which followed, a warm welcome was given to the Federation president, Mr. J. MacLehose, M.A., LL.D., Mr. Harrison referring to the self-sacrificing way in which the president was devoting his time and energy to the work of the Federation.

Dr. MacLehose outlined the many-sided work successfully handled by the Federation, and made a clear and reasoned statement as to the position of the wages negotiations. He made it plain that while he occupied the chair no unreasonable proposal would be brought forward, but said that in the interests of employees as well as employers it was essential that a reduction of wages should take place in the printing trade.

Mr. J. C. Coppock referred in eloquent terms to the statesmanlike way in which the president of the Federation had discharged his duties during the past ten months, and confidently called upon members for renewed evidence of their loyalty and confidence.

Mr. H. A. Bethell, president of the Lancashire and Cheshire Alliance, also urged the necessity for giving full support to those in charge of the negotiations.

Mr. A. E. Goodwin, secretary of the Federation, replied in detail to a number of questions. He explained how the cost of living figure was arrived at, and pointed out that the proposals put forward did provide for a substantial improvement in the basic wages of all the workers in the industry.

All those attending the meeting were entertained to tea by the president and members of the Chester Master Printers' Association, and a hearty vote of thanks to Dr. MacLehose and Mr. Harrison concluded the proceedings.
